The Girl Without a Sound - Buhle Ngaba 2019-03

'As an act of restoring power and agency to young black girls in South Africa ... [the author] wrote a story about a voiceless girl of colour in search of a sound of her own.'--Preface. '[T]he story follows the journey of a young girl whose fantastical stories live in her eyes. She has no voice -- just a "golden cocoon" humming inside of her throat. Visited by a "red-winged woman" sent from the moon, the two begin the process of finding her voice only to learn that it's always lived inside of her. It's a classic tale of learning to love, trust and accept oneself.'--

Voicing Girlhood in Popular Music -

Jacqueline Warwick 2016-06-10

This interdisciplinary volume explores the girl's voice and the construction of girlhood in contemporary popular music, visiting girls as musicians, activists, and performers through topics that range from female vocal development during adolescence to girls' online media culture. While girls' voices are more prominent than ever in popular music culture, the specific sonic character of the young female voice is routinely denied authority. Decades old clichés of girls as frivolous, silly, and deserving of contempt prevail in mainstream popular image and sound. Nevertheless, girls find ways to raise their voices and make themselves heard. This volume explores the contemporary girl's voice to illuminate the way ideals of girlhood are historically specific, and the way adults frame and construct girlhood to both valorize and vilify girls and women. Interrogating popular music, childhood, and gender, it analyzes the history of the all-girl band from the Runaways to the present; the changing anatomy of a girl's voice throughout adolescence; girl's participatory culture via youtube and rock camps, and representations of the girl's voice in other media like audiobooks, film, and television. Essays consider girl performers like Jackie Evancho and Lorde, and all-girl bands like Sleater Kinney, The Slits and Warpaint, as well as performative 'girliness' in the voices of female vocalists like Joni Mitchell, Beyoncé, Miley Cyrus, Taylor Swift, Kathleen Hanna, and Rebecca Black. Participating in girl studies within and beyond the field of music, this book unites scholarly perspectives from disciplines such as musicology, ethnomusicology, comparative literature, women's and gender studies, media studies, and education to investigate the importance of girls' voices in popular music, and

to help unravel the complexities bound up in music and girlhood in the contemporary contexts of North America and the United Kingdom.

The Sound of My Voice - Ron Butlin 2017-02-09
Morris Magellan is an executive who runs a biscuit company in Scotland. He has a house in the suburbs, nice wife and kids and seems, on the surface, to be an embodiment of Thatcherite values. However, there is one major problem. He is a chronic alcoholic and, from the start, we sense that he is doomed and his life is about to disintegrate. He isn't a coke-and-booze bingeing style victim with one eye on the clock, hoping to meet Ms Right and acquire the two kids and the suburban home that will straighten everything out. He already has all this and it hasn't straightened out anything. Magellan's journey

will never end. The Sound of My Voice is as extraordinary a vision of alcoholism as Malcolm Lowry's Under the Volcano.

Rapture Practice - Aaron Hartzler 2013-04-09
Sometimes salvation is found in the strangest places: a true story. Aaron Hartzler grew up in a home where he was taught that at any moment the Rapture could happen. That Jesus might come down in the twinkling of an eye and scoop Aaron and his family up to heaven. As a kid, Aaron was thrilled by the idea that every moment of every day might be his last one on planet Earth. But as Aaron turns sixteen, he finds himself more attached to his earthly life and curious about all the things his family forsakes for the Lord. He begins to realize he doesn't want the Rapture to happen just yet—not before he sees his first movie, stars in the school play, or has his first kiss. Eventually Aaron makes the plunge from conflicted do-gooder to full-fledged teen rebel. Whether he's sneaking out, making out, or playing hymns with a hangover, Aaron learns a few lessons that can't be found in the Bible. He discovers that the best friends aren't always the ones your mom and dad approve of, and the tricky part about believing is that no one can do it for you. In this funny and heartfelt coming-of-age memoir, debut author Aaron Hartzler recalls his teenage

journey to find the person he is without losing the family that loves him. It's a story about losing your faith and finding your place and your own truth—which is always stranger than fiction.

Giving Voice - Meryl Alper 2017-01-20
How communication technologies meant to empower people with speech disorders—to give voice to the voiceless—are still subject to disempowering structural inequalities. Mobile technologies are often hailed as a way to “give voice to the voiceless.” Behind the praise, though, are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self-representation. In *Giving Voice*, Meryl Alper explores these assumptions by looking closely at one such case—the use of the Apple iPad and mobile app Proloquo2Go, which converts icons and text into synthetic speech, by children with disabilities (including autism and cerebral palsy) and their families. She finds that despite claims to empowerment, the hardware and software are still subject to disempowering structural inequalities. Views of technology as a great equalizer, she illustrates, rarely account for all the ways that culture, law, policy, and even technology itself can reinforce disparity, particularly for those with disabilities. Alper explores, among other things, alternative understandings of voice, the surprising sociotechnical importance of the iPad case, and convergences and divergences in the lives of parents across class. She shows that working-class and low-income parents understand the app and other communication technologies differently from upper- and middle-class parents, and that the institutional ecosystem reflects a bias toward those more privileged. Handing someone a talking tablet computer does not in itself give that person a voice. Alper finds that the ability to mobilize social, economic, and cultural capital shapes the extent to which individuals can not only speak but be heard.
