THE PLANET OF MORTAL WORSHIP Donald I. Templeman 2004-08-19 A Lost Wife A Found Messiah A World on the Brink of Damnation The Devil's minion has offered Crilen a deal: Return to a dead planet's past, save it from self-destruction, and be reunited with the loving wife who died in his arms over a decade ago. Not an impossible task for the fiery cosmic warrior who has built his life around rescuing planets from pagan religions, false gods and atheist monarchs. However, upon his arrival in the past, Crilen finds an incredibly complex world. A world tangled in a web of socio-political strife which threatens to sever the souls of its inhabitants from their faith in God and herd them into the burning pit of eternal suffering. Crilen's affections also become fixated upon Panla Jen, a devoutly religious leader, who seeks to reform her planet's faith by destroying the secular institution which has imprisoned the Word of God with ungodly man-made laws, rituals and ideals. An immoral government which enables the vices of the majority, an amoral news and entertainment media lusting for optimum profits and a violent underground atheist insurrection conspire to shepherd the masses into a spiritual death-spiral fueled by their own lusts for freedom as an end rather than a means. What must Crilen sacrifice to rescue this world and elude the Devil's bidding?

Gender, Place, and Identity of South Asian Women Pourya Asl, Moussa 2022-04-08 In the past century, South Asia underwent fundamental cultural, social, and political changes as many countries progressed from colonial dominations through nationalist movements to independence. These transformations have been intricately bound up with the spatiality of social life in the region, drawing further attention to the significance of social spaces within transformative politics and identity formations. *Gender, Place, and Identity of South Asian Women* studies contemporary literature of South Asian women with a focus on gender, place, and identity. It contributes to the debate on gender identity and equality, spatial and social justice, women empowerment, marginalization, and anti-discrimination measures. Covering topics such as partition memory narrative, spatial mobility, and diasporic women's lives, this book is an essential resource for students and educators of higher education, researchers, activists, government officials, business leaders, academicians, feminist organizations, sociologists, and researchers.

Common Core State Standards and the Speech-Language Pathologist Lissa A. Power-deFur 2015-10-01 *Common Core State Standards and the Speech-Language Pathologist: Standards-Based Intervention for Special Populations* is a tool for the analysis of the Common Core State Standards (CCSS) and the development of interventions to meet student-specific needs. The CCSS is an education initiative in the United States that details what K-12 students should understand in English language arts and mathematics by the end of each grade. The initiative seeks to establish consistent education standards across the United States and ensure that graduating students are prepared to enter college or the workforce. As of 2015, forty-three states had adopted the CCSS. With the implementation of the CCSS, it is critical that speech-language pathologists collaborate with educators to enable the success of students with communication disorders as well as English language learners. This text offers a practical approach for application of the CCSS with a parallel analysis of children's strengths and needs to create a template for intervention. It addresses strategies to facilitate the success of students in accessing and achieving the expectations of the general curriculum, with a focus on students with communication disorders, hearing loss, vision loss, deaf-blindness, specific learning disabilities, autism, multiple disabilities, and English language learners. Key features include: Background and implications of the CCSS Chapters written by experts in the field Tools for analysis of the language expectations of the CCSS and a framework for aligning intervention (both direct and classroom-based) with the CCSS for students at elementary and secondary levels Collaboration strategies to facilitate success in the classroom Multiple case studies *Common Core State Standards and the Speech-Language Pathologist* is a must-have resource for any speech-language pathologist working with children, as well as their education and administration partners.

The Palgrave Handbook of Reproductive Justice and Literature Beth Widmaier Capo 2022-09-10 This handbook offers a collection of scholarly essays that analyze questions of reproductive justice throughout its cultural representation in global literature and film. It offers analysis of specific texts carefully situated in their evolving historical, economic, and cultural contexts. Each chapter analyzes texts from within the framework of reproductive justice in an interdisciplinary way, including English, Japanese, Italian, Spanish, and German language, literature and culture, comparative literature, film, South Asian fiction, Canadian theatre, writing, gender studies, Deaf studies, disability studies, global health and medical humanities, and sociology. What It All Means Philippe Schlenker 2022-11-22 How meaning works—from monkey calls to human language, from spoken language to sign language, from gestures to music—and how meaning is connected to truth. We communicate through language, connecting what we mean to the words we say. But humans convey meaning in other ways as well, with facial expressions, hand gestures, and other methods. Animals, too, can get their meanings across without words. In *What It All Means*, linguist Philippe Schlenker explains how meaning works, from monkey calls to human language, from spoken language to sign language, from gestures to music. He shows that these extraordinarily diverse types of meaning can be studied and compared within a unified approach—one in which the notion of truth plays a central role. "It's just semantics" is often said dismissively. But Schlenker shows that semantics—the study of meaning—is an unsung success of modern linguistics, a way to investigate some of the deepest questions about human nature using tools from the empirical and formal sciences. Drawing on fifty years of research in formal semantics, Schlenker traces how meaning comes to life. After investigating meaning in primate communication, he explores how human meanings are built, using in some cases sign languages as a guide to the workings of our inner "logic machine." Schlenker explores how these meanings can be enriched by iconicity in sign language and by gestures in spoken language, and then turns to more abstract forms of iconicity to understand the meaning of music. He concludes by examining paradoxes, which—being neither true nor false—test the very limits of meaning.

Culturally Affirmative Psychotherapy With Deaf Persons Neil S. Glickman 2013-10-23 The impetus for this volume is the growing awareness within the mental health and larger community of a culturally affirmative model for understanding and assisting deaf people. In contrast to the "medical-pathological" model which treats deafness as a disability, the "cultural" model guides us to view deaf persons in relation to the

deaf community--a group of people with a common language, culture, and collective identity. A primary tenant of culturally affirmative psychotherapy is to understand and respect such differences, not to eradicate them. The contributors to this volume present a practical and realistic model of providing culturally affirmative counseling and psychotherapy for deaf people. The three dimensions of this model have been delineated by the multicultural counseling literature. These dimensions assert that culturally affirmative psychotherapy with deaf persons requires therapist self-awareness, knowledge of the deaf community/culture, and understanding of culturally-syntonic therapeutic interventions. The first to exhaustively delineate the implications of the cultural model of deafness for counseling deaf people, this book is essential reading for anyone who works in an educational or counseling capacity with the deaf. This audience includes not only psychotherapists, but also vocational, guidance and residence counselors, teachers, independent living skills specialists, interpreters, and administrators of programs for the deaf.

Studies in the Acquisition of Anaphora B. Lust 2012-12-06 Today, one fundamental set of issues confronts both the linguistic theory of 'Universal Grammar' and the psychological study of human cognition. These issues concern the question of to what degree and how the human mind is "programmed," presumably biologically, to acquire the complex knowledge of human language. As discussed in Volume I, anaphora has been critical to this study because, while a critical property of language knowledge, it is largely underdetermined by available evidence. While most previous research projects have generally addressed these issues through either linguistic analyses or psychological analyses of language data, and have concerned themselves with either the role of innateness or the role of experience in language knowledge, this volume, with its predecessor, attempts to combine these approaches; in fact to develop a research paradigm for their joint study. While Volume I emphasized study of the content and nature of the initial state, i. e. , of the language faculty, this second volume emphasizes study of the way in which experience does or does not interact with this language faculty to determine language acquisition. We argue in the introduction that the issues addressed in Volume II are appreciable, if not necessary, complements to those addressed in Volume I. This is not only because a more comprehensive model of language acquisition requires so, but because valid definition of the content of 'the initial state' may require so.

My Life as a Deaf Gay Man and Other Stories Peter Beach Morier 2012-08 Preface: The Inner Man By Margaret A. Pitts Peter B. Morier, who is deaf and gay, knows why he exists. I met him at Chestnut Lane, an assisted-living facility for deaf and blind people, while he was doing court-ordered community service. He was living in the past and present, and he also hoped that there would be a future for him--because at that point, his future was uncertain. He does not like to waste time. Peter has given his life to serving justice rather than adding to the numerous injustices and inequalities and the never-ending violence and viciousness that the world contains. At one point, Peter had thought that he would not make a difference. But he realizes that he was wrong to feel that way. Furthermore, other people have said that he has indeed made a difference. He never regretted the commitment he made. Peter shared his feelings with me and, at this point in his life, he is ready to keep moving forward. He has written this book with two goals. He wants to remove the stigmas that have been wrongfully placed on his life and give credibility to the Deaf and gay perspective. My name is Margaret Pitts, and I reside in Gresham, Oregon. I am Peter's ghostwriter, and he also considers me to be his "adopted sister." One part of Peter's book is one of the saddest yet most joyful stories ever printed. It is the story of how Peter found peace again, overcoming his fears with a newfound trust and transforming his life. It is truly a wonderful story to read and very inspiring. Peter has been praised for managing to tell such a difficult story. How painful it must have been for him to look back at those difficult times and transcend them. It is a wonderfully strong story, an epic journey about hope, strength, justice, and overcoming a multitude of adversities. It is a true test of human spirit and should inspire everyone to reach their highest potential in life, no matter what physical, psychological, or emotional obstacles are placed in his or her way. Peter is one of the most remarkable and multitalented human beings I know. I am proud to be his sister.

Information Structure in Sign Languages Vadim Kimmelman 2019-02-19 This book presents a first comprehensive overview of existing research on information structure in sign languages. Furthermore, it is combined with novel in-depth studies of Russian Sign Language and Sign Language of the Netherlands. The book discusses how topic, focus, and contrast are marked in the visual modality and what implications this has for theoretical and typological study of information structure. Such issues as syntactic and prosodic markers of information structure and their interactions, relations between different notions of information structure, and grammaticalization of markers of information structure are highlighted. Empirical studies of the two sign languages also showcase different methodologies that are used in such research and discuss their advantages and disadvantages. The book contains a general introduction to the field of information structure and thus can be used by linguists new to the field.

Between Worlds Cheryl G. Najarian 2013-10-14 The purpose of this book is to illustrate the struggles of Deaf women as they negotiate their family, educational, and work lives. This study demonstrates how these women resist and overcome the various obstacles that are put before them as well as how they work to negotiate their identities as Deaf women in the Deaf community, hearing world, and the places 'in between.' The scope of the book traces these women's lives in these three major sectors of their lives and provides a discussion of the implications for other linguistic minorities.

Deaf Education and Challenges for Bilingual/Multilingual Students Musyoka, Millicent Malinda 2022-01-07 Bilingualism, or the development of reading, writing, speaking, listening, and thinking competencies in more than one language, is a complex and dynamic process. The process is even more challenging when the languages used in the literacy process differ in modality. Bilingual development among deaf students involves the use of visual languages (i.e., sign languages) and auditory languages (spoken languages). Deaf students' sign language proficiency is strongly related to their literacy abilities. The distinction between bilingualism and multilingualism is critical to our understanding of the underserved, the linguistic deficit, and the underachievement of deaf and hard of hearing (D/HH) immigrant students, thus bringing the multilingual and immigrant aspect into the research on deaf education. Multilingual and immigrant students may face unique challenges in the course of their education. Hence, in the education of D/HH students, the intersection of issues such as biculturalism/multiculturalism, bilingualism/multilingualism, and immigration can create a dilemma for teachers and other stakeholders working with them. *Deaf Education and Challenges for Bilingual/Multilingual Students* is an essential reference book that provides knowledge, skills, and dispositions for teaching multicultural, multilingual, and immigrant deaf and hard of hearing students globally and identifies the challenges facing the inclusion needs of this population. This book fills a current gap in educational resources for teaching immigrant, multilingual, and multicultural deaf students in learning institutions all over the world. Covering topics such as universal design for learning, inclusion, literacy, and language acquisition, this text is crucial for classroom teachers of deaf or hard of hearing students, faculty in deaf education programs, language instructors, students, pre-service teachers, researchers, and academicians.

Primatology, Ethics and Trauma Robert Ingersoll 2023-02-23 *Primatology, Ethics and Trauma* offers an analytical re-examination of the research conducted into the linguistic abilities of the Oklahoma chimpanzees, uncovering the historical reality of the research. It has been 50 years since the first language experiments on chimpanzees. Robert Ingersoll was one of the researchers from 1975 to 1983. He is well known for being one of the main carers and best friend of the chimpanzee, Nim Chimpsky, but there were other chimpanzees in the University of Oklahoma's Institute for Primate Studies, including Washoe, Moja, Kelly, Booe, and Onan, who were taught sign language in the quest to discover whether language is learned or innate in humans. Antonina Anna Scarnà's expertise in language acquisition and neuroscience offers a vehicle for critical evaluation of those studies. Ingersoll and Scarnà investigate how this research failed to address the emotional needs of the animals. Research into trauma has made scientific advances since those studies. It is time to

consider the research from a different perspective, examining the neglect and cruelty that was inflicted on those animals in the name of psychological science. This book re-examines those cases, addressing directly the suffering and traumatic experiences endured by the captive chimpanzees, in particular the female chimpanzee, Washoe, and her resultant inability to be a competent mother. This book discusses the unethical nature of the studies in the context of recent research on trauma and offers a specific and direct psychological message, proposing to finally close the door on the language side of these chimpanzee studies. This book is a novel and groundbreaking account. It will be of interest to lay readers and academics alike. Those working as research, experimental, and clinical psychologists will find this book of interest, as will psychotherapists, linguists, anthropologists, historians of science and primatologists, as well as those involved in primate sanctuary and conservation.

Variation in the Input Merete Anderssen 2010-09-22 The topic of variation in language has received considerable attention in the field of general linguistics in recent years. This includes research on linguistic micro-variation that is dependent on fine distinctions in syntax and information structure. However, relatively little work has been done on how this variation is acquired. This book focuses on how different types of variation are expressed in the input and how this is acquired by young children. The collection of papers includes studies of the acquisition of variation in a number of different languages, including English, German, Greek, Italian, Korean, Norwegian, Swiss German, Ukrainian, and American Sign Language. Different kinds of linguistic variation are considered, ranging from pure word order variation to optionally doubly filled COMPs and the resolution of scopal ambiguities. In addition, papers in the volume deal with the extreme case of variation found in bilingual acquisition.

Cognitive Neuroscience of Language David Kemmerer 2022-09-27 Cognitive Neuroscience of Language provides an up-to-date, wide-ranging, and pedagogically practical survey of the most important developments in this exciting field. It guides students through all of the major areas of investigation, beginning with the fundamental aspects of brain structure and function and then following with key topics such as classic and progressive aphasia syndromes; speech perception and production; the meanings of object nouns, action verbs, and abstract words; the formulation and comprehension of complex expressions, including grammatically inflected words, complete sentences, and entire stories; and several other domains of neurolinguistic research, including reading and writing, sign language, and the bilingual brain. Drawing heavily on prominent theoretical models, the core chapters illustrate how such frameworks are supported, and sometimes challenged, by experiments employing diverse brain mapping techniques. This edition has been thoroughly updated throughout, and now includes a dedicated chapter on the neural substrates of bilingualism. Chapters have been revised to reflect the most salient developments in the field, and the book has undergone a thoughtful restructure to mirror course teaching. While the study of language can be challenging, the text has been written accessibly and requires no previous knowledge of either neuroscience or linguistics and includes definitions of technical terms and explanations of important principles from both disciplines along the way. Accompanied by online resources for students and instructors, it is an essential companion for graduate or upper-level undergraduate students.

Sign Language and Linguistic Universals Wendy Sandler 2006-02-02 Sign languages are of great interest to linguists, because while they are the product of the same brain, their physical transmission differs greatly from that of spoken languages. In this pioneering and original study, Wendy Sandler and Diane Lillo-Martin compare sign languages with spoken languages, in order to seek the universal properties they share. Drawing on general linguistic theory, they describe and analyze sign language structure, showing linguistic universals in the phonology, morphology, and syntax of sign language, while also revealing non-universal aspects of its structure that must be attributed to its physical transmission system. No prior background in sign language linguistics is assumed, and numerous pictures are provided to make descriptions of signs and facial expressions accessible to readers. Engaging and informative, *Sign Language and Linguistic Universals* will be invaluable to linguists, psychologists, and all those interested in sign languages, linguistic theory and the universal properties of human languages.

On Writing Qualitative Research Margaret Anzul 2003-12-16 This text is both about writing up qualitative research and is itself a qualitative study. The written reflections of students on the writing process and the interpretations and presentations of their findings provide a base of data which the authors have, in turn, analyzed and incorporated into their text. They have added accounts of their own experiences, and those of their colleagues and other published authors. All of these are woven into a theoretical framework that discusses them in detail.

Unreal Education: Beyond Report Cards Elaine Mellon 2012-03-02 This book was written for every parent who has ever struggled with that uneasy, anxious, apprehensive gut feeling. You are convinced something is wrong or perhaps different with your child but you just cant put your finger on it. You talk to teachers, administrators, anyone who will listen. Intimate Selving in Arab Families Suad Joseph 1999-12-01 The study of relationships—a topic which has received considerable attention in Europe, the United States, and parts of Asia, until now has not been addressed in the Arab world. Here for the first time are articles written by native feminist scholars that focus on intimate Arab familial relationships and provide a scholarly discussion of gendering of the self (the process of intimate selving) in the Arab community. The book is divided into three parts: biographical and autobiographical; ethnographic; and literary accounts in which the authors identify key family relationships—mother-son, brother-sister, mother-daughter-granddaughter, co-wives, and father-daughter—and explore them in terms of shaping and defining gender in relation to others.

The Palgrave Handbook of Disability and Communication Michael S. Jeffress 2023-03-29 The Palgrave Handbook of Disability and Communication covers a broad spectrum of topics related to how we perceive and understand disability and the language, constructs, constraints and communication behavior that shape disability discourse within society. The essays and original research presented in this volume address important matters of disability identity and intersectionality, broader cultural narratives and representation, institutional constructs and constraints, and points related to disability justice, advocacy, and public policy. In doing so, this book brings together a diverse group of over 40 international scholars to address timely problems and to promote disability justice by interrogating the way people communicate not only to people with disabilities, but also how we communicate about disability, and how people express themselves through their disabled identity.

SignGram Blueprint Josep Quer 2017-11-20 "It is common for grammars to include an introductory chapter that offers a general introduction to the language under investigation as well as its users. We encourage the grammar writer to include this type of information for the sign language to be described. If a certain variant of the sign language is described, this should be made clear at the outset. The structure of this part is fairly flexible. As can be seen from the table of contents, we suggest including information about (i) the history of the sign language, (ii) characteristics of the Deaf community, (iii) the status of the sign language, and (iv) previous linguistic work on the sign language. The last section in particular will have an impact on the content of subsequent parts, as we encourage the grammar writer to include findings from previous studies in the grammatical description of the sign language. Clearly, alternative structures are possible. The overview of previous linguistic work, for instance, could be provided under the "History" header, and Deaf culture and/or Deaf education could be discussed under dedicated first-level headers - to give just two examples. Also, depending on the available information, sub-headers could be added. Note that we adopt the convention of writing Deaf with a capital D when it refers to issues related to a community that is characterized by the use of a sign language. In contrast, deaf with a small d refers to the medical condition of not being able to hear. It is up to the grammar writer to decide whether to stick to this convention in the grammar"--
