

Making Monsters False Memories Psychotherapy And Sexual Hysteria

Hypnosis, Compliance and Belief - Graham F. Wagstaff 1981

Recollections of Trauma - J. Don Read 2013-11-11

Proceedings of a NATO ASI held in Port de Bourgenay, France, June 1996

THERAPY'S DELUSIONS - Ethan Watters 1999-04-16

Two acclaimed authors deliver an attack on talk therapy, from its Freudian underpinnings to contemporary practice, and expose the failure of this "pseudoscience" that still holds enormous sway over the American mind.

Invention of Hysteria - Georges Didi-Huberman 2004-09-17

The first English-language publication of a classic French book on the relationship between the development of photography and of the medical category of hysteria. In this classic of French cultural studies, Georges Didi-Huberman traces the intimate and reciprocal relationship between the disciplines of psychiatry and photography in the late nineteenth century. Focusing on the immense photographic output of the Salpêtrière hospital, the notorious Parisian asylum for insane and incurable women, Didi-Huberman shows the crucial role played by photography in the invention of the category of hysteria. Under the direction of the medical teacher and clinician Jean-Martin Charcot, the inmates of Salpêtrière identified as hysterics were methodically photographed, providing skeptical colleagues with visual proof of hysteria's specific form. These images, many of which appear in this book, provided the materials for the multivolume album *Iconographie photographique de la Salpêtrière*. As Didi-Huberman shows, these photographs were far from simply objective documentation. The subjects were required to portray their hysterical "type"—they performed their own hysteria. Bribed by the special status they enjoyed in the purgatory of experimentation and threatened with transfer back to the inferno of the incurables, the women patiently posed for the photographs and submitted to presentations of hysterical attacks before the crowds that gathered for Charcot's "Tuesday Lectures." Charcot did not stop at voyeuristic observation. Through techniques such as hypnosis, electroshock therapy, and genital manipulation, he instigated the hysterical symptoms in his patients, eventually giving rise to hatred and resistance on their part. Didi-Huberman follows this path from complicity to antipathy in one of Charcot's favorite "cases," that of Augustine, whose image crops up again and again in the *Iconographie*. Augustine's virtuosic performance of hysteria ultimately became one of self-sacrifice, seen in pictures of ecstasy, crucifixion, and silent cries.

Flesh and Blood: Interrogating Freud on Human Sacrifice, Real and Imagined - Benjamin Beit-Hallahmi 2019-12-16

The horrifying idea of child sacrifice, and the offering to the gods of a beloved only son by his father is a theme which appears repeatedly in Western traditions. This book focuses on religious rituals of violence, imagined and real.

Making Monsters - Richard Ofshe 1994-06-01

Lately, reports of incest have exploded, as many people -- primarily women -- have come forward with graphic stories of sexual & psychological abuse. Many of these stories have emerged from recovered memory therapy. These recovered memories can be false, fabricated in the highly charged atmosphere of therapy. The authors not only take to task poorly trained therapists, they also show how the mental health establishment has actually added to the confusion. They trace the problem back to Sigmund Freud, & illuminate how & why the debate about recovered memories will drive psychology in the future.

Secret Trauma - Diana E.h. Russell 1986-06-09

Presents the results of a study on sexually abused girls based on in-depth interviews with 930 women from a variety of backgrounds.

The Origin of Consciousness in the Breakdown of the Bicameral Mind - Julian Jaynes 2000-08-15

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process

that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry* **Do Justice and Let the Sky Fall** - Maryanne Garry 2013-05-13

For more than 30 years, renowned psychological scientist Elizabeth F. Loftus has contributed groundbreaking research to the fields of science, law, and academia. This book provides an opportunity for readers to become better acquainted with one of the most important psychologists of our time, as it celebrates her life and accomplishments. It is intended to be a working text—one that challenges, intrigues, and inspires all readers alike. *Do Justice and Let the Sky Fall* collects research in theoretical and applied areas of human memory, provides an overview of the application of memory research to legal problems, and presents an introduction to the costs of doing controversial research. The first chapter gives a sketch of Loftus' career in her own words, and the remaining chapters color in that sketch. The final chapters of the book are more personal, and put a human face on a person who is held in such high esteem. This multipurpose volume is intended to serve as a valuable resource for established scientists, emerging scientists, graduate students, lawyers, and health professionals.

Victims of Memory: Incest Accusations and Shattered Lives - Mark Pendergrast 2012-06-21

'I doubt whether any book of greater importance will be published in 1997.' Anthony Storr, *The Times*.

The Courage to Heal - Ellen Bass 2002

Based on the experiences of hundreds of survivors & partners, this book profiles victims who share the challenges & triumphs of their personal healing processes. It offers mental, emotional & physical support to all those who are rebuilding their lives.

Michelle Remembers - Michelle Smith 1989-07-15

"A best-seller, *Michelle Remembers* was the first book written on the subject of satanic ritual abuse and is an important part of the controversies beginning in the 1980s regarding satanic ritual abuse and "recovered" memory. The book has subsequently been discredited by several investigations which found no corroboration of the book's events, and that the events described in the book were extremely unlikely and in some cases impossible. ... Soon after the book's publication, Pazder was forced to withdraw his assertion that it was the Church of Satan that had abused Smith when Anton LaVey (who founded the church years after the alleged events of *Michelle Remembers*) threatened to sue for libel"--Wikipedia.

Lost Daughters - Reinder Van Til 1997

The practice of recovered memory therapy (RMT) and the resulting accusations of childhood sexual abuse have polarized the psychotherapy community and crowded the courts. This book depicts the human toll exacted by the practice of RMT. Combining first person stories of families devastated by RMT-inspired memories with a critical cultural analysis, this book provides a unique glimpse into a catastrophically misguided therapy.

Making Monsters - Richard Ofshe 1995

Urban Tribes - Ethan Watters 2004-10-26

In his early thirties, Ethan Watters began to realize that none of his friends were following the paths of their parents. Instead of settling down in couples and starting families, they lived and vacationed in groups, worked together at businesses they'd started, and met every week for dinner. As he started to document this phenomenon, he

encountered countless other "tribes," in cities all over the U.S. Watters explores why tribe members have embraced this structure and what kind of affection and stability they find there, and contends that the conventional wisdom painting Generation X as isolated, selfish slackers may hide an unexpected, much warmer picture.

Making Monsters - Richard Ofshe 1996-01-01

In the last decade, reports of incest have exploded into the national consciousness. Magazines, talk shows, and mass market paperbacks have taken on the subject as many Americans, primarily women, have come forward with graphic memories of childhood abuse. *Making Monsters* examines the methods of therapists who treat patients for depression by working to draw out memories or, with the use of hypnosis, to encourage fantasies of childhood abuse the patients are told they have repressed. Since this therapy may leave the patient more depressed and alienated than before, questions are appropriately raised here about the ethics and efficacy of such treatment. In the last decade, reports of incest have exploded into the national consciousness.

Magazines, talk shows, and mass market paperbacks have taken on the subject as many Americans, primarily women, have come forward with graphic memories of childhood abuse. *Making Monsters* examines the methods of therapists who treat patients for depression by working to draw out memories or, with the use of hypnosis, to encourage fantasies of childhood abuse the patients are told they have repressed. Since this therapy may leave the patient more depressed and alienated than before, questions are appropriately raised here about the ethics and efficacy of such treatment.

The Memory Wars - Frederick C. Crews 1997

This volume contains two essays by Frederick Crews attacking Freudian psychoanalysis and its aftermath in the so-called recovered memory movement. The first essay reviews a growing body of evidence indicating that Freud doctored his data and manipulated his colleagues in an effort to consolidate a cult-life following that would neither defy nor upstage him. The second essay challenges the scientific and therapeutic claims of the rapidly growing recovered-memory movement, maintaining that its

social effects have been devastating.

Telling Incest - Janice L. Doane 2001

An exploration of how specific historical contexts, narrative conventions, and cultural politics shape the ways that stories of incest are told and heard

Spectral Evidence - Moira Johnston 1997

National Magazine Award-winning author Moira Johnston tells the dramatic story of a "perfect" American family destroyed when a daughter's "flashbacks" of incestuous rape by her father turned to accusations and lawsuits - and of the explosive landmark trial in Napa Valley that gave a father, for the first time, the right to strike back legally at the therapists he believed had planted false memories of sexual abuse in his daughter's mind. Johnston sets the story of Gary, Stephanie, and Holly Ramona in the context of a broader concern over the destructive impact of uncorroborated memories of childhood sexual abuse, a controversy that has embroiled parents, adult children, and family therapists throughout the country and has stirred debate among feminists, psychologists, memory scientists, and lawyers.

The Myth of Repressed Memory - Dr. Elizabeth Loftus 2013-06-25

According to many clinical psychologists, when the mind is forced to endure a horrifying experience, it has the ability to bury the entire memory of it so deeply within the unconscious that it can only be recalled in the form of a flashback triggered by a sight, a smell, or a sound. Indeed, therapists and lawyers have created an industry based on treating and litigating the cases of people who suddenly claim to have "recovered" memories of everything from child abuse to murder. This book reveals that despite decades of research, there is absolutely no controlled scientific support for the idea that memories of trauma are routinely banished into the unconscious and then reliably recovered years later. Since it is not actually a legitimate psychological phenomenon, the idea of "recovered memory"--and the movement that has developed alongside it--is thus closer to a dangerous fad or trendy witch hunt.
