**Alcohol, Pregnancy and the Developing Child** Hans-Ludwig Spohr 1996-08-22 This authoritative 1996 publication was the first to review comprehensively the important relationship between maternal alcohol abuse during pregnancy and the resulting in utero damage to the child, and the results of this damage during the development of affected children. It includes important contributions by leading and internationally acclaimed clinicians and researchers. The first part of the book discusses clinical issues of alcohol teratogenicity, the clinical picture of fetal alcohol syndrome, and the epidemiology of maternal alcohol abuse and the developmental outcome of the children. The second part addresses pathogenesis and neuropathology, whilst part three reviews developmental issues in the growing child. The final part evaluates approaches to rehabilitation and intervention, and reviews social and public health issues. This comprehensive account will be of interest to gynaecologists, obstetricians, midwives, neonatologists and paediatricians, and for child and adolescent psychiatrists and psychologists.

**The King of China** Tilman Rammstedt 2019-10-25 When Keith Stapperpfennig and his family give their grandfather the trip of a lifetime--an all expenses paid holiday to any destination in the world--the eccentric old man arbitrarily chooses China, and he asks Keith to accompany him. But when Keith loses all the money for the journey at a casino, he goes into hiding--mostly under his desk--and his grandfather--equally uninterested in actually traveling to China--heads down the road to engage in a similar subterfuge. And it is here that the novel opens, two men in hiding, mere miles apart. But when his grandfather dies unexpectedly, Keith is left to continue the farce alone. With the aid of a guidebook, Keith writes a series of letters home to his brothers and sisters, detailing their imaginary travels and the bizarre sights they see. These start off harmlessly, but before long he starts adding invented details: non-stop dental hygiene shows on television, dog vaccinations at the post office--and the letters get longer and longer. Engaging, strange, and ultimately moving, this hilarious novel from Tilman Rammstedt won him the prestigious Ingeborg Bachmann Prize in 2008 and confirmed him as one of Germany's most compelling writers.

*Contemporary Africa* T. Falola 2014-08-20 60 years after independence, African nations still find it difficult to face a number of challenges, from establishing meaningful democratic institutions to establish social structures centered on the advancement of gender equality. *Historians of London* Stanley Jack Rubinstein 1968

*Desiring Disability* Robert McRuer 2003 In multiple locations, activists and scholars are mapping the intersections of queer theory and disability studies, moving issues of embodiment and desire to the center of cultural and political analyses. The two fields are premised on the idea that the categories of heterosexual/homosexual and able-bodied/disabled are historically and socially constructed. *Desiring Disability: Queer Theory Meets Disability Studies* explores how the frameworks for queer theory and disability studies suggest new possibilities for one another, for other identity-based frameworks of activism and scholarship, and for cultural studies in general. Topics include the study of "crip theory" and queer/disabled performance artists; the historical emergence of normalcy and parallel notions of military fitness that require both the production and the containment of queerness and disability; and butch identity, transgressive sexual practices, and rheumatoid arthritis. Contributors. Sarah E. Chinn, Eli Clare, Naomi Finkelstein, Catherine Lord, Cris Mayo, Robert McRuer, Todd Ramlow, Jo Rendell, Ellen Samuels, Carrie Sandahl, David Serlin, Patrick White

*The Handbook of Social Work Research Methods* Bruce Thyer 2010 "In the field of social work, qualitative research is starting to gain more prominence as are mixed methods and various issues regarding race, ethnicity and gender. *Psychodynamic Psychotherapy Of Borderline Patients* Otto F. Kernberg 1989 This long-awaited book is the first to present Otto Kernberg's successful model of psychodynamic psychotherapy with borderline patients. Bibliography and Index.

*Self-Producing Systems* John Mingers 2013-11-21 John Mingers' new volume, *Self-Producing Systems: Implications and Applications of Autopoiesis*, is a much-needed reference on autopoiesis, a subject penetrating many disciplines today. I can genuinely say that I enjoyed reading the book as it took me stage by stage through a clear and easy-to-grasp understanding of the concepts and ideas of auto poiesis and then, as the book's

title suggests, on through their applications. I found the summary in Chapter 12 particularly useful, helping to crystalize the main points of each chapter. The book conveyed enthusiasm for the subject and stimulated my interest in it. At times the book is demanding, but only because of the breadth of the subject matter, the terms and concepts associated with its parts, and the challenge of keeping hold of all this in the mind at once. This is an exceptional text. ROBERT L. FLOOD Hull, UK Preface In recent years Maturana's and Varela's concept of autopoiesis, originally a biological concept, has made a remarkable impact not just on a single area, but across widely differing disciplines such as sociology, policy science, psychotherapy, cognitive science, and law. Put very briefly, the term autopoiesis connotes the idea that certain types of systems exist in a particular manner—they are self-producing systems. In their operations they continuously produce their own constituents, their own components, which then participate in these same production processes.

The Secret of Childhood Maria Montessori 1977 Dr Montessori's revolutionary method of education began early this century. **The Heart & Soul of Change** Barry L. Duncan 2010 Updating the classic first edition of *The Heart and Soul of Change*, editors Duncan, Miller, Wampold, and Hubble, have created a new and enriched volume that presents the most recent research on what works in therapeutic practice, a thorough analysis of this research, and practical guidance on how a therapist can truly deliver what works in therapy. This volume examines the common factors underlying effective psychotherapy and brings the psychotherapist and the client-therapist relationship back into focus as key determinants of psychotherapy outcome. The second edition of *The Heart and Soul of Change* also demonstrates the power of systematic client feedback to improve effectiveness and efficiency and legitimize psychotherapy services to third party payers. In this way, psychotherapy is implemented one person at a time, based on that unique individual's perceptions of the progress and fit of the therapy and therapist. Readers familiar with the first edition will encounter the same pragmatic focus but with a larger breadth of coverage. This edition adds chapters on both youth psychotherapy and substance abuse treatment. Through reading *The Heart and Soul of Change, Second Edition: Delivering What Works in Therapy* clinicians of varied levels of experience will improve their understanding of what is truly therapeutic in the diverse forms of psychotherapy practiced today.

**Valuing Nature** Robert Fish 2022-11-11 When a group of liberal arts students embark on a university assignment about the natural environment, no one could have quite prepared them for the bewildering array of questions and provocations to confront them in their task. What starts out as an earnest attempt to understand nature in the modern world, turns into a philosophical and practical tangle that only a good transdisciplinary education can provide. Can anyone save the day and actually start to value 'nature'? And if they can't, then what's stopping them? The idea of 'valuing nature' harmonises diverse areas of natural resource management and is an important dimension of scientific and practical work concerned with managing ecosystems and habitats for sustainability. This graphic book takes the reader on an exploration of the issues that arise from this growing interest and concern in the valuation of nature. Set around the premise of a 'motley' group of undergraduates endeavouring to complete a university assignment on 'nature in the modern world', the book explores: the many and diverse meanings people assign to nature the different ways the relationship between people and nature might be characterised the many values systems people hold for the natural world the options and approaches society can deploy to manage it the extent to which we need entirely new economic systems to protect and sustain nature. This highly interdisciplinary book invites consideration of a range of philosophical and applied debates and questions. Written in an accessible style, it is an ideal undergraduate text in the fields of ecology, human and physical geography, conservation science, environment, social science and spatial planning, as well as a general primer for graduate natural and social scientists embarking on interdisciplinary research in the natural resource management arena.

**The Holocaust** Wolfgang Benz 2000 A concise history of the Holocaust, covering all the major topics and issues important to that history - the first to be written by a German (non-Jewish) scholar of the younger generation. The History of the Holocaust keeps being written and rewritten in ever greater detail, but almost always by Jewish writers and historians. Wolfgang Benz's book makes an important contribution by bringing German perspectives to that terrible event. His goal is to provide and analyse all the incontrovertible facts and political decisions that led to the dehumanisation and systematic murder of millions of Jews and other ethnic minorities during the Nazi regime. He details the laws, the events, the individuals, and the decisions from 1933 to 1945. The book concludes with a discussion of what the German people really knew. A masterpiece of historical compression, this book is a powerful introduction to the history of the Holocaust.

Resource Activation Christoph Flückiger 2010 This concise practice-oriented manual effectively shows how psychologists, psychiatrists, social workers, supervisors, and counselors can quickly identify and put to therapeutic use an individual's own talents and resources. Written in an easy and relaxed style using everyday language, this manual illustrates how to actively take a person's resources into consideration during therapy and counseling sessions, and how to integrate them into existing intervention concepts. The first part illustrates approaches that can be used to focus attention on assessment and dialog, and that shed light on a person's individual resources from various angles. These therapeutic approaches can be used in the framework of existing manuals and guidelines to focus on how to "do things." The second part illustrates procedures offering a framework for further applying the different perspectives and provides sample worksheets for practical use.

*Index for Inclusion* Tony Booth 2006

**Ego** Frank Schirrmacher 2015-11-30 Twenty-five years after the end of the Cold War, a new Cold War is being waged in our societies. During the Cold War a theoretical model of man was developed by economists and the military, an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends: a modern homo oeconomicus. After his career in the Cold War ended, he was not scrapped but adapted to the needs of the twenty-first century. He became the ringmaster of a new era of information capitalism. He sought to read, control and influence thoughts; to predict, price and eliminate risks. Today stock-market trading is guided by him. He uses computer algorithms and Big Data to build up detailed pictures of our preferences and then suggest and sell goods to us. The model has become a self-fulfilling prophecy. We are no longer the masters of our own fate. The Game of Life runs without us. Schirrmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock-market trading techniques that brought about the financial crash of 2008, showing how these developments were interwoven with the rise of game theory, rational choice theory and neoliberal economics. The state and politics increasingly submitted themselves to the logic of computerized game theory and an economic view of the world, evading real decision-making in the process. In this brave new world individuals, alone in front of their computers, may think they are constructing a reality of their own choosing, but in fact they are being manipulated all along by others who are setting the rules of the game. This international bestseller by one of Germany's most distinguished journalists is a powerful indictment of a way of thinking that has become pervasive and threatens to undermine not only parliaments and constitutions but also the sovereignty of the individual to be the person he or she wants to be.

*Social Work Practice in Africa* Janestic M. Twikirize 2019 The importance of integrating indigenous knowledge systems into mainstream social work and ensuring context-specific, culturally relevant practice has long been emphasised in Africa and the Global South. This book, based on empirical research, presents a selection of indigenous and innovative models and approaches of problem solving that will inspire social work practice and education. At the core of these models lies a conceptual understanding of the community as the overarching principle for effective social work and social development in African contexts. The empirical part of the book has a focus on East Africa and highlights case examples from Rwanda, Tanzania, Uganda, Burundi, and Kenya. The book is intended for use by those involved in social work and social development practice, social work educators, students, as well as policy makers. It is relevant not just for audiences in Africa but also the global social work community, especially those interested in promoting culturally relevant social work.
