Raising a Responsible Child: Practical Steps to Successful Family Relationships - Don C. Dinkmeyer 1973
"All parents would agree that adequate preparation for life requires a sense of responsibility. Few know how to foster responsibility, however. Commonly it is felt that one must 'teach' responsibility. Punishment, rewards and bribes are the tools of the teaching process. These methods are generally unsuccessful, as a parent cannot 'teach' responsibility, he must give it to the child and let him learn how to handle it. ...As children learn to accept responsibility they begin to enjoy being responsible. The gain confidence and feel worthwhile." -- Back cover.

Beyond Behavior Management - Jenna Bilmes 2013-01-15

Why do children do the things they do? What can teachers do to manage it all? While there is not a simple method for understanding and managing all behaviors or all children, teachers can give young children the social and emotional tools needed to grow and thrive on their own. Developed and tested in the classroom, Beyond Behavior Management, is a strength-based approach to guiding and managing young children's behavior by helping them build and use essential life skills—attachment, collaboration, self-regulation, adaptability, contribution, and belonging—into the daily life of the early childhood classroom. As a result, children will learn to exhibit more pro-social behaviors, work better as a community, and become excited and active learners. This edition includes two new chapters and content reflecting early learning standards, new research, cultural diversity, and strategies to strengthen the home-school connection. Discussion and reflection questions, exercises, journal assignments, child profile templates, a planning worksheet, and sample scripts are also included. Jenna Bilmes is an early childhood consultant and an instructional designer for WestEd Child and Family Services. She is a frequent presenter to teachers, administrators, and counselors nationally and internationally.

Building Character in Young People - St. Romain, Philip 1986

Thrift and Thriving in America - Joshua Yates 2011-07-29

Thrift is a powerful and evolving moral ideal, disposition, and practice that has indelibly marked the character of American life since its earliest days. Its surprisingly multifaceted character opens a number of expansive vistas for analysis, not only in the American past, but also in its present. Thrift remains, if perhaps in unexpected and counter-intuitive ways, intensely relevant to the complex issues of contemporary moral and economic life. Thrift and Thriving in America is a collection of groundbreaking essays from leading scholars on the seminal importance of thrift to American culture and history. From a rich diversity of disciplinary perspectives, the volume shows that far from the narrow and attenuated rendering of thrift as a synonym of saving and scrimping, thrift possess an astonishing capaciousness and dynamism, and that the idiom of thrift has, in one form or another, served as the primary language for articulating the normative dimensions of economic life throughout much of American history. The essays put thrift in a more expansive light, revealing its compelling etymology—its sense of "thriving." This deeper meaning has always operated as the subtext of thrift and at times has even been invoked to critique its more restricted notions. So understood, thrift moves beyond the instrumentalities of "more or less" and begs the question: what does it mean and take to thrive? Thoroughly examining how Americans have answered this question, Thrift and Thriving in America provides fascinating insight into evolving meanings of material wellbeing, and of the good life and the good society more generally, and will serve as a perennial resource on a notion that has and will continue to shape and define American life.

Silver Spoon Kids - Eileen Gallo 2002-01-25

A parent's guide to raising financially responsible children in an age of unprecedented wealth It is natural as parents that we want to give our children the best of everything. And in an age of unprecedented wealth and easy credit, upper- and middle-income parents can indulge that urge like never before. Yet, you have become alarmed over the impact this newfound affluence may be having on your children. You fear that through your generosity you are training your children to be greedy, selfish spendthrifts. The first parenting guide to focus exclusively on this increasingly sensitive topic, Silver Spoon Kids was coauthored by a psychotherapist who counsels people with money-related emotional problems and a lawyer specializing in estate planning. Drawing upon their experiences as members of the renowned NYU Family Wealth Institute, they tell you how to talk to kids about money, how to teach them to handle it responsibly, and how to instill in your kids a sense of giving to their communities.

Encyclopedia of Parenting - Charles A. Smith 2013-04-03

Parenting receives growing amounts of attention from researchers, and what was once considered chiefly an art is now also recognized for being a science. Our knowledge of parenting has increased significantly in the last few decades; new developments continue to happen daily. The Encyclopedia of Parenting provides, in reference book format, what we now know about parents, parenting, and the parent-child relationship, synthesized in some 250 alphabetically arranged entries. Each entry is written by an expert contributor and provides an authoritative overview of a particular topic. Subjects covered include: child activity; child outcomes; child states; parent behaviours; parental situations; external and community factors; systematic concerns; the transition to parenthood; available resources; persons who have added to our knowledge of the field. Entries draw on a wide range of disciplines, including psychology, education, and sociology. Each entry closes with a bibliography, and the volume concludes with a selected list of works for further reading.

The Death of Character - James Davison Hunter 2008-01-04

The Death of Character is a broad historical, sociological, and cultural inquiry into the moral life and moral education of young Americans based upon a huge empirical study of the children themselves. The children's thoughts and concerns—expressed here in their own words—shed a whole new light on what we can expect from moral education. Targeting new theories of education and the prominence of psychology over moral instruction, Hunter analyzes the making of a new cultural narcissism.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
