Global Report on Trafficking in Persons 2020 - United Nations 2021-04-30

The 2020 UNODC Global Report on Trafficking in Persons is the fifth of its kind mandated by the General Assembly through the 2010 United Nations Global Plan of Action to Combat Trafficking in Persons. It covers more than 130 countries and provides an overview of patterns and flows of trafficking in persons at global, regional and national levels, based primarily on trafficking cases detected between 2017 and 2019. As UNODC has been systematically collecting data on trafficking in persons for more than a decade, trend information is presented for a broad range of indicators.

Sexual Enslavement of Girls and Women Worldwide - Andrea Parrot 2008-08-30

They are in different countries but share the same hell. Maria is one of 14 women lured from Mexico to Seattle, Washington, with the promise of a job, then held by force in a brothel and required to sexually service men 12 hours a day. Anna is a young mother from the Ukraine who left her husband and children there to take a job as a housecleaner in Italy, where she was put in a barred, guarded house and forced into prostitution. Nadia is an 11-year-old girl in Africa, kidnapped and forced to have sex with a militiaman daily, with a machete ever ready nearby should she refuse. All three women are part of horrific sex slavery that has drawn the attention of officials in countries around the globe. It is not rare; officials say it is increasing, at least partly due to the billions of dollars it brings in for organized crime. The U.S. State Department estimates 800,000 victims, mostly women and children, are trafficked for sex trade across nations each year and millions more are trafficked within countries - including the U.S., Britain, Spain, and the Netherlands. As a Seattle Times reporter explained when Maria's case hit the news there, the reality is that sex slaves for the most part are young women and teenaged girls who come from almost every one of the world's poorer countries and end up in almost every country where there is a combination of sexual demand and money. But they are also in undeveloped Africa, in prisons internationally, locked in forced marriages, or sold to men by parents. In this book, Parrot and Cummings outline the scope and growth of the sex slave market today and explain the history with various elements - including economic, political, cultural, and religious - that make this trade difficult to fully expose, quell, combat, and shut down. We hear from girls and women around the world describing how sexual enslavement has tortured them physically, emotionally, and spiritually, whether they suffer at the hands of prison guards in Turkey, criminals in Washington, or buyers dealing with parents who sell their daughters for the sex slave trade in Greece, Belgium, or France. The authors also describe national and international efforts and legislation passed or in design to stop sex slavery. Successful countries and regions are spotlighted. Then Parrot and Cummings point out actions still needed to stop the sex slavery trade.

Sex, Slavery and the Trafficked Woman - Ramona Vijeyarasa 2016-03-03

Sex, Slavery and the Trafficked Woman is a go-to text for readers who seek a comprehensive overview of the meaning of 'human trafficking' and current debates and perspectives on the issue. It presents a more nuanced understanding of human trafficking and its victims by examining - and challenging - the conventional assumptions that sit at the heart of mainstream approaches to the topic. A pioneering study, the arguments made in this book are largely drawn from the author's fieldwork in Ukraine, Vietnam and Ghana. The author demonstrates to readers how a law enforcement and criminal justice-oriented approach to trafficking has developed at the expense of a migration and human rights perspective. She highlights the importance of viewing trafficking within a broad spectrum of migratory movement. The author contests the coerced, female victim archetype as stereotypical and challenges the reader to understand trafficking in an alternative manner, introducing the counterintuitive concept of the 'voluntary victim'. Overall, this text provides readers of migration and development, gender studies, women's rights and international law a comprehensive and multidisciplinary analysis of the concept of trafficking.

Global Report on Trafficking in Persons 2016 - United Nations Office on Drugs and Crime 2017-01-11

The UNODC Global Report on Trafficking in Persons 2016 is the third of its kind mandated by the United Nations General Assembly. In July 2010, the UNGA adopted the Global Plan of Action to Combat Trafficking in Persons. The Report covers and provides an overview of patterns and flows of trafficking in persons at the global, regional and national levels, based on trafficking cases detected mainly between 2012 and 2014. It looks at links between trafficking in persons, migration and conflict, and how refugees may be particularly vulnerable to being trafficked. The worldwide response to trafficking in persons, particularly in

terms of criminalization and prosecution of trafficking crimes, is also a focus of this edition of the Global Report. Also included are the Country Profiles.

Human Trafficking in Thailand - Siroj Sorajakool 2013-10-15

Few subjects elicit greater moral outrage than human trafficking. Media reports of dehumanizing practices such as slavery, abduction, child prostitution, and torture, along with shocking statistics, form the basis of public knowledge. Those who work closely with victims acknowledge the complexity of the issue, and it is this complexity, rather than loose statistics and conjecture, that deserves our attention. With sensitivity and candor, this book addresses the reality of human trafficking in Thailand, dissecting studies, presenting facts, and dismissing stereotypes. It focuses on the areas of fishing, agriculture, domestic work, sex work, and the trafficking of children, weaving individual narratives and official studies into the wider history of Thailand's changing economy and labor situation. It also details how the Thai government has addressed the issue, reflects on the roots of human exploitation, and suggests a way forward. This book raises much-needed awareness of commonly held misconceptions and clarifies what we know and what we have yet to discover about the trafficking of persons to and from Thailand. Highlights • Concise and accessible study of the reality of human trafficking in Thailand • Thorough critical analysis of current policies and public discourse on trafficking • Details relevant Thai and international laws • Discusses the relationship between the modern economic system and exploitation • Analyzes the changing face of the Thai labor market and the impact of industrialization on the Thai population

Combating Trafficking in Persons - 2009

Trafficking in persons is a form of modern-day slavery, a human rights violation that constitutes a crime against the individual and the State. It must be recognized and punished by legislative means.

Parliamentarians have an essential role to play in the fight against human trafficking. The Handbook for Parliamentarians suggests some practical ways in which they can develop and promote the comprehensive frameworks needed to do so.

Sex Trafficking - Kathryn Farr 2004-11-05

One million people are trafficked into the sex industry each year. In this timely and provocative study, Kathryn Farr documents the macro and micro impact of trafficking women and children into this industry on a global scale. Farr looks not only at the victims themselves, but also at the sex trade's main players, organized crime structure, economic conditions, and role in which various militaries perpetuate its demand. Sex Trafficking can be incorporated into a variety of courses in sociology, social problems, culture and sexuality, history, and women's studies.

Measuring Human Trafficking - Ernesto U. Savona 2007-05-19

The trafficking of human beings is a major worldwide problem. This book addresses the need for a system that provides the same set of quantitative and qualitative data to help develop a comprehensive counter-strategy. It analyzes various definitions as well as the complexity of phenomena that impair the collection and comparability of data. Coverage also examines different approaches with the aim of coming to an effective monitoring system.

Trafficking and the Global Sex Industry - Karen Beeks 2006

Trafficking of persons (mostly women and children) for commercial sexual activities and forced labor is one of the fastest growing areas of international crime. The United Nations estimates that 4 million men, women, and children become victims of international trafficking each year. Trafficking & the Global Sex Industry focuses on the international trafficking of women and children for forced labor and prostitution. This remarkable anthology takes a broad geographical and economical perspective while also dealing with the specificities of the socio-political background, poverty, opportunity structure, legal conditions, the role of the state, gender structure, and the organization of the trafficking business. The essays create a link from country to country, demonstrating the worldwide nature of the problem. Expertly written and well researched, this collection gives the reader a clearer understanding of the problem and the actions being taken to combat it. Trafficking & the Global Sex Industry will have a broad market for readers on a national and international level, especially among those interested in political science, women's studies, international relations, and criminology.

Long Walk to Nowhere - Philip Frankel 2017-07-05

The end of apartheid has triggered massive illegal immigration into South Africa from all parts of Africa and beyond. Along with urbanization and internal migration, the end of apartheid has encouraged human smuggling and the trafficking of men, women, and children into the commercial sex market and various sectors of the economy from mining to agriculture and the service industries. Long Walk to Nowhere analyses the impact of these developments on Nelson Mandela's vision for a democratic South Africa. Frankel explores human rights, the political culture, public health, the criminal justice system, and institutional development as South Africa moves into its third decade after liberation. Using migration and human trafficking as barometers for democratic success, Frankel establishes that South Africa has become more unstable under two post-Mandela presidencies. The book covers the three major modes of human trafficking: commercial sex trafficking, child trafficking, and labour trafficking. It also looks at the dynamics of trafficking with a perpetrator-focus, the complex issues of dominance, and the policy responses in light of South Africa's first comprehensive counter-trafficking legislation designed for implementation in late 2015. Long Walk to Nowhere blends South African experiences with contemporary mass political movements which challenge human rights and good governance on a world-wide basis.

Global Report on Trafficking in Persons 2018 - United Nations 2019-03-21

This report, which comprises three booklets, provides a comprehensive analysis of the crime of trafficking in persons and how different countries are responding to this crisis. Countries worldwide have been detecting and reporting a larger number of victims and are also convicting more traffickers than ever before. This may well be the result of an increase in the capacity to identify victims over the last few years. While the number of reporting countries did not significantly increase, the number of victims reported in different countries did increase. The trend has unfortunately been growing over the past few years.

Human Trafficking - Louise Shelley 2010-07-29

This book examines all forms of human trafficking globally, revealing the operations of the trafficking business and the nature of the traffickers themselves. Using a historical and comparative perspective, it demonstrates that there is more than one business model of human trafficking and that there are enormous variations in human trafficking in different regions of the world. Drawing on a wide body of academic research - actual prosecuted cases, diverse reports and field work and interviews conducted by the author over the last sixteen years in Asia, Latin America, Africa, Europe and the former socialist countries - Louise Shelley concludes that human trafficking will grow in the twenty-first century as a result of economic and demographic inequalities in the world, the rise of conflicts and possibly global climate change. Coordinated efforts of government, civil society, the business community, multilateral organizations and the media are needed to stem its growth.

International Variances in Anti-sex Trafficking Implementation Strategies - Veronika Kristen Koselnikov 2015

In today's globally interdependent society, millions of women and children are exploited and sold as sex slaves. They are treated as expendable parcels of the human trafficking criminal network. According to UNICEF, around 2.5 million people in the world are trafficked into forced labor. Twenty-two to fifty percent of trafficked individuals are children (UNICEF, 2012). Depending on different regions, the age range for these children is 9-18 years old. Forms of trafficking include labor and/or sex work. Trafficked children experience detrimental effects including: physical and emotional trauma, fear, abuse and shame (Rafferty, 2008). Child trafficking occurs in a complex cultural system of norms with hard to decipher factors leading to child trafficking (Chung, 2009). The trafficking of children is part of an extremely profitable and interconnected global black market of human trafficking. Globalization causes this issue which leads to state, economic and societal interdependence (Jones, Engstrom, Hilliard & Diaz, 2007). Thus, the issue of sex trafficking is complicated and this study can help figure out the link between sex trafficking and the disparity among state regulation of anti-sex trafficking implementation strategies. The purpose of this study was to understand the difference in the effectiveness of anti-sex trafficking implementation strategies between states. Why do states differ in their implementation and enforcement of Anti-Sex Trafficking legislation? Are the reasons for this disparity due to differences in economic, political and cultural factors? Do these factors lead to weakened state intervention and protection measures which in turn propel the sex trafficking of women and children instead of eradicating this grave human rights violation? This study is a

secondary data analysis combining data from multiple datasets that are publically available. The three reports used were the Trafficking Victims Protection Act report, the Human Development Index and the Freedom in the World report. This research showed that there is a statistically significant difference between the means of groups in regards to their compliance to the Trafficking Victims Protection Act. Furthermore, state's compliance with the Trafficking Victims Protection Act is related to economic, political and cultural factors. The research showed that all of the thirteen independent variables are related significantly to a state's compliance to the Trafficking Victims Protection Act. Thus, economic, political and cultural factors played a role in a state's anti-sex trafficking implementation strategies. In other words, a holistic approach is indispensable in order to eradicate the sex slave trade. Policy makers, academia, social institutions and grassroots movements must work together to understand how economic, political and cultural factors affect a state's ability to eliminate sex trafficking and rehabilitate its victims.

Human Trafficking - Margaret Malloch 2016-01-18

What is human trafficking? This volume critically examines the competing discourses surrounding human trafficking, the conceptual basis of global responses and the impact of these horrific acts worldwide.

Bonded Labor - Siddharth Kara 2014-05-06

Siddharth Kara's Sex Trafficking has become a critical resource for its revelations into an unconscionable business, and its detailed analysis of the trade's immense economic benefits and human cost. This volume is Kara's second, explosive study of slavery, this time focusing on the deeply entrenched and wholly unjust system of bonded labor. Drawing on eleven years of research in India, Nepal, Bangladesh, and Pakistan, Kara delves into an ancient and ever-evolving mode of slavery that ensnares roughly six out of every ten slaves in the world and generates profits that exceeded \$17.6 billion in 2011. In addition to providing a thorough economic, historical, and legal overview of bonded labor, Kara travels to the far reaches of South Asia, from cyclone-wracked southwestern Bangladesh to the Thar desert on the India-Pakistan border, to uncover the brutish realities of such industries as hand-woven-carpet making, tea and rice farming, construction, brick manufacture, and frozen-shrimp production. He describes the violent enslavement of millions of impoverished men, women, and children who toil in the production of numerous products at minimal cost to the global market. He also follows supply chains directly to Western consumers, vividly connecting regional bonded labor practices to the appetites of the world. Kara's pioneering analysis encompasses human trafficking, child labor, and global security, and he concludes with specific initiatives to eliminate the system of bonded labor from South Asia once and for all.

Sex Traffic - Paola Monzini 2005-11

"The trafficking of women and girls for the purpose of prostitution is big business. It is one of the most lucrative industries in the world, particularly given the explosion of the sex industry since the 1990s. The collapse of the Soviet Union and the devastating impact of neoliberal economic policies in many parts of the world have resulted in significant numbers of women seeking income however they can." "This book draws on a wealth of new empirical data: case studies from several countries of origin, transit and destination; research produced by NGOs, police and criminal courts; interviews and field research with the women themselves. Monzini's primary aim is to identify the mechanisms of what has truly become a global market. Most important, she assesses recent attempts to control trafficking, and strategies for resistance and change."--BOOK JACKET.

A Savage and Deadly Reality for Women and Children - Steven Lee Douglas 2014-07-12

Thousands of women and children are trafficked to, from and thru Pakistan every year. They are trafficked to Pakistan for the sex industry and as cheap labor in garment factories. Children are also trafficked to Pakistan to labor in the clothing industry and as recently reported in the world media, Pakistani toddlers and young children are sold to Middle Eastern countries to be camel jockeys and to be used for the black-market human organ transplant industry.

Trafficking for Sexual Exploitation - Donna M. Hughes 2002

This study shows that the trafficking of women from the Russian Federation occurs on a global scale. The Russian Federation is a sending, receiving and transit country for women and children trafficked into the global sex industry. The number of women and children victims of this illicit market is unknown, but it is estimated to be in the tens of thousands, possibly hundreds of thousands. Since the collapse of the Soviet

Union, Russia has experienced severe economic decline leaving many Russian citizens without jobs, social benefits or adequate health care. The deteriorating living standards, and the belief in a Western Utopia has caused many women to seek ways to migrate. The favoured destinations being receiving countries for women and girls trafficked for sexual exploitation

Journeys of Jeopardy - Elizabeth Kelly 2002

"In this report, Professor Elizabeth Kelly assesses the current state of knowledge on the trafficking of women and children in Europe. She concludes that despite the growing interest and concern, information on the scale of trafficking, the methods used, and the most effective means to counter it, remains limited. To advance our current knowledge, Professor Kelly identifies a number of priorities for further research, including on the structure of and the methods used by criminal groups, on state compliance with relevant international law, and an evaluation of the effectiveness of counter-trafficking initiatives. This report was presented at the European Conference on Preventing and Combating Trafficking in Human Beings: A Global Challenge for the 21st Century, held under the auspices of IOM and the European Commission, in September 2002 in Brussels, Belgium."--Publisher's website.

Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States - National Research Council 2013-11-12

Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims as well as their families, communities, and society, efforts to prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18. According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build upon the capabilities of people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response, strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or disengaged from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.
