Love and Intimate Relationships - Norman M. Brown 2013-06-17

Using a style that draws students into the ongoing inquiry into how intimate relationships work, *Love and Intimate Relationships* investigates the life cycle of relationships influences that affect them, theories behind them, and ways to improve them. Dozens of stories from students themselves, case examples and over 150 tables, figure, and the cartoons of Don Edwing of Mad Magazine help bring the material alive. The book is also unique in exploring aspects of human relationships not covered in other textbooks on the subject. *Love and Intimate Relationships* helps bring the complex issues surrounding intimate relationships into focus for students from diverse backgrounds. The multidisciplinary perspective of the textbook makes it ideal for introductory courses in psychology, marriage counseling, human relations, and sexuality, and interpersonal relationships

Studying Interpersonal Interaction - Barbara M. Montgomery 1993-11-01

This volume presents a comprehensive, critical examination of current research methods used to study human social behavior as it occurs in

interpersonal settings such as families, acquaintanceships, friendships, and romantic partnerships. Multidisciplinary in approach, the book's chapters are written by leading figures in communication, social psychology, sociology, and family studies who explore the methodological choices a researcher must make in order to study interpersonal interaction. To permit clear comparison, all chapters in this volume reference the same, common research problem to develop examples, illustrate controversial issues, and describe the potential of the particular method under discussion. Written in an accessible style, chapters openly discuss the strengths and weaknesses of each method, consider underlying philosophy and assumptions, and note limitations as well as advantages. The result is an originally crafted work that offers readers a unique way to learn about, compare, and ultimately judge the many methods presently available to the researcher or student of interpersonal interaction. Part I considers the assumptions researchers must make about the nature of a social interaction in order to study it. Chapters address issues related to formulating research problems, choosing a research paradigm, determining a viewpoint (participant, peer, or observer) from which to gather data, deciding on appropriate levels and units of analysis, incorporating time, and assessing the mutual adaptation that characterizes interpersonal communication. Part II focuses on procedures for gathering data. These include using accounts and narratives, logs and diaries, retrospective self reports, discourse records, direct observation, and experimentation. Part III highlights new and newly re-discovered methods for analyzing interaction data. Assuming that the reader is familiar with traditional regression and mean-differences approaches, chapters build on this knowledge base to discuss content analysis, tests of sequential association in categorical data, ways of dealing with interdependence in dyadic data, and longitudinal analytic techniques such as time-series analysis, phasic analysis, and meta-analysis. The book concludes with a chapter that both summarizes previous chapters and convincingly argues for methodological pluralism. Encompassing the broad range of central concerns in designing research studies--

from conceptualization, through assessment, to data analysis--this book is an ideal reference source for all those engaged in actual research projects. It is also highly valuable for advanced undergraduate and graduate methods courses. *Uncoupling, an insider's guide to separation in New Zealand* - Barbara Relph 2021-10-04

Are you frustrated by stymied relationships, missed connections, and the loneliness of the search for someone to spend the rest of your life with? Are you ready, instead, to find "The One"? In *Calling in "The One,"* Katherine Woodward Thomas shares her own personal experience to show women that in order to find the relationship that will last a lifetime, you have to be truly open and ready to create a loving, committed, romantic union. *Calling in "The One"* shows you how. Based on the Law of Attraction, which is the concept that we can only attract what we're ready to receive, the provocative yet simple seven-week program in *Calling in "The One"* prepares you to bring forth the love you seek. For each of the 49 days of Thomas's thoughtful and life-affirming plan, there is a daily lesson, a corresponding practice, and instruction for putting that lesson into action in your life. Meditation, visualization, and

journaling exercises will gently lead you to recognize the obstacles on your path to love and provide ways to steer around them. At the end of those 49 days, you will be in the ideal emotional state to go out into the world and find "The One." An inspirational approach that offers a radical new philosophy on relationships, *Calling in "The One"* is your guide to finding the love you seek.

The Dark Side of Close Relationships - Brian H. Spitzberg 2013-06-17

This collection of essays represents a follow-up to the editors' 1994 publication, *The Dark Side of Interpersonal Communication*. In the preface to that collection of essays, they argued that "To fully understand how people function effectively requires us to consider how individuals cope with social interaction that is difficult, problematic, challenging, distressing, and disruptive." In this companion volume, the focus expands from social interaction to close relationships. Aside from the inherent need to investigate the bad as well as the good of interpersonal relationships, the editors and their colleagues simply find the dark side metaphor to be intellectually arousing. It stimulates investigation of important yet often neglected phenomena, and it especially encourages consideration of the hidden and forbidden, and the paradoxical and ironic elements of human relating. This volume assembles the cutting-edge work of first rate scholars from the ranks of communication, psychology, sociology, and cognate disciplines. As in the previous text, the subject matter and stylistic approaches are diverse, reflecting the broad and interdisciplinary domain that is the dark side of human affairs. The selection of topics is somewhat selective, reflecting only a sample of emerging scholarship in the interdisciplinary study of relationships. These internationally recognized scholars examine various topics related to the dark side, including fatal attractions, jealousy and envy, misunderstanding, gossip, conflict, codependence, sexual coercion, stalking, relationship termination, unrequited love, and mental health problems in relationships. Some chapters present original data and models, whereas others reconfigure the way in which the understandings of relationships can be better

understood. In addition, the bookend chapters examine the ideology, nature, and problems of dark side scholarship. Collectively, the scholarly journeys made in this volume are intended to illustrate the complexities--both moral and functional--involved in close relationship processes. The intent is neither to valorize nor demonize the darker aspects of close relationships, but rather to emphasize their importance to the day-to-day "doing" of relationships. Only by accepting such processes as integral to relationships can their role be fully understood.

Uncoupling - Diane Vaughan 1987

Based on ten years' research, this is the only book of its type on the market today. It explains in lucid and engaging detail the turning points in intimate relationships showing that there are basic similar patterns. Vaughan's extensive use of interviews of both straight and gay couples, married and live-ins, makes her book lively and interesting.

Close Relationship Loss - Terri L. Orbuch
2012-12-06

Social scientists from various disciplines have been increasingly concerned with the nature, structure, and function of close relationships. Although most of the early work on the topic of close relationships drew attention to the development of close relationships, since the mid-1970s researchers have begun to investigate the many different aspects connected to the loss of close relationships. Despite the change to a more comprehensive conceptual framework, close relationship research is often criticized for being atheoretical; the research is criticized for being purely descriptive in nature and thus lacking a more theoretical framework. Contrary to this belief, I wish to argue that researchers in the area of close relationship loss employ several critical and prominent theoretical perspectives to describe, explain, and understand the endings of relationships--thus, the fruition of this book. The major aim of this edited book is to present and illuminate, within one volume, some of these major theoretical perspectives. The volume as a whole has several unique qualities. First, within each chapter, the authors provide a general overview of the

theoretical perspective or approach within which they examine close relationship loss.

Uncoupling Convention - Ann D'Ercole
2013-06-17

What does it mean to be member of a gay/lesbian couple or family? The contributors to *Uncoupling Convention: Psychoanalytic Approaches to Same-Sex Couples and Families* address this question by drawing on two cultural movements of the twentieth century: psychoanalysis and the gay/lesbian civil rights movement. Taken together, these traditions provide a framework for understanding, and providing psychotherapeutic assistance to, gay and lesbian patients who present with troubled relationships. The contributors to this volume espouse a clinical focus that supplants the heterosexual perspectives of traditional psychoanalysis with new narratives about family life. Drawing on cultural, feminist, gay/lesbian, and queer studies, they illustrate how concepts of gender and sexuality are routinely informed by unproven heterosexist assumptions - both conscious and unconscious. By examining the changing developmental needs and family dynamics of gay and lesbian families, the contributors broaden our very understanding of what a family is. They illustrate how contrasting cultural constructions of homosexuality and family life play out in same-sex couples. They delineate the multiple realities of gender subjectivity, both in children and in their gay parents. They ponder how technology is shaping reproductive experiences, as lesbians become part of the biomedical system. And they explore recurrent themes of feeling different and ashamed, including the shameful secrecy surrounding same-sex couples' financial matters. In uncoupling conventions, the contributors are effectively coupling post-Freudian psychoanalysis with the insights of queer theory and the critical edge of contemporary cultural studies. The result is a framework for addressing the relational and family-related challenges of gay and lesbian patients that ranges far beyond traditional approaches and will benefit analytic, couples, and family therapists alike.

Conscious Uncoupling - Katherine Woodward Thomas
2015-09-24

In 2014 a media storm erupted when Gwyneth Paltrow announced her separation from Chris

Martin, describing it as a harmonious and mutual 'conscious uncoupling' and the term entered the world's vocabulary overnight. Coined and created by relationship expert Katherine Woodward Thomas, the expression 'conscious uncoupling' has become synonymous with a divorce where both partners accept that they each played a role in the breakup and, in particular, are looking to co-parent in a functional and healthy way in the future. The Conscious Uncoupling 5 Step Process is designed to support separating couples through the thorny terrain of a breakup, helping them to consciously complete a relationship in ways that leave all involved whole, healthy and well, and optimistic about future relationships. CONSCIOUS UNCOUPLING offers a new paradigm for divorcing couples and is set to become a classic in the genre.

Uncoupling - Diane Vaughan 1986

Uncoupling is a breakthrough in understanding the dynamics of intimate relationships. Through extensive research and dozens of case histories, Diane Vaughan reveals the underlying patterns beneath every disintegrating relationship.--[book jacket].

Uncoupling - Diane Vaughan 1990

The Uncoupling - Meg Wolitzer 2015-04-02

What if every woman in town suddenly went on strike? For the people of Stellar Plains, the staging of a new school production of an Athenian drama coincides with a mysterious cold wind that blows into houses and into hearts, stilling passion and cooling sheets. As the play moves into dress rehearsal and discontent simmers, opening night cannot come a moment too soon...

Marriage and Family in Transition - John N. Edwards 1991

An anthology of 37 articles dealing with the development, maintenance, and dissolution of interpersonal relationships. The collection also deals with relevant future issues. The book is designed for the use of undergraduates on sociology courses dealing with marriage and family.

Summary of Katherine Woodward Thomas's Conscious Uncoupling - Everest Media, 2022-03-09T22:59:00Z

Please note: This is a companion version & not

the original book. Sample Book Insights: #1 The loss of a relationship, particularly if it was romantic in nature, is often considered a failure. We assume that a relationship that ends for any reason other than one or both people dying is a failure. #2 The root of the word shame is to cover, and it is characterized by the need to hide from the eyes of the world. It is especially common in situations where we feel social inadequacy. #3 According to Ruth Benedict, the difference between shame and guilt is that with shame, we feel bad about our defects and mistakes, whereas with guilt, we feel bad about our own core values. #4 When we don't meet our expectations, our brains receive a dopamine hit, which makes us feel good. But when our expectations are not met, our stress levels skyrocket, and our brains shift into a threat state.

Uncoupling - Norman Sheresky 1972

Social Psychiatry - Paul Bebbington 1991-01-01

This volume is a major international compilation in the field of social psychiatry. Building upon the work of John Wing, director of the Social Psychiatry Unit of the Medical Research Council in Great Britain, these essays make up a series of variations on one of the basic themes of human existence--the interaction between people and their environment. The authors are concerned with social psychiatry; their attention is focused on those aspects of the environment that affect psychological states, whether of persons previously healthy or already suffering from some form of psychiatric illness or disability. Social relationships and psychiatric disturbances are murky ground for investigators, many of whom have become lost or returned with nothing but truisms or unvalidated assertions. In this collection, the editor has brought together leading international researchers in the field who combined a primary emphasis on theory and methodology with an equal regard for direct observation and practice and a scrupulous attention to detail. Insistence on the most accurate measurement possible is the natural consequence of an adherence to clear theoretical positions, which both informs and demands such an approach. This book springs from the work of the Medical Research Council's Social Psychiatric Unit, but because of

the breadth of the Unit's concerns over the years, it is also a comprehensive work in the field of social psychiatry. It draws contributions from the leading international figures and will be a landmark work for professionals in social and clinical psychiatry, as well as for anyone with an interest in the social aspects of mental health.

Uncoupling - Sara Davison 2016-09-01

With a fresh, sympathetic and reassuring approach, *Uncoupling* provides tried-and-tested advice that will help anyone going through a break-up. It is the book that Sara looked for - and couldn't find - when going through the process herself, so she is only too well aware how few places people feel they can turn to for compassionate and practical advice. *Uncoupling* combines Sara's extensive training in life-coaching techniques, her cutting-edge work with those who are themselves 'uncoupling', and her own personal experience. Her advice will show you how to navigate the pitfalls and will make the process easier. It is all about being in emotional control and *Uncoupling* will help you build your personal strength so that you can deal with the rollercoaster of emotions more effectively, enabling you to move forwards. It is all about putting you back in control.
