The Misfits - Colin Wilson 1989

Galerij van schijvers die in zich hun leven en/of werk buiten de algemeen begane paden van de seksualiteit begaven. Uitgangspunt van deze studie is de hypothese van de Hongaarse psychologe Charlotte Bach (die na haar dood een man in vrouwenkleren bleek te zijn) dat 'seksueel geperverteerden' verder geëvolueerd zijn dan mensen die seksueel 'normaal' zijn. Aandacht voor o.a. Sade, Byron, Goethe, Gogol, Swinburne, Proust, Jack the Ripper en Mishima.

Sex and the Intelligent Teenager - Colin Wilson 1966**The Development Of The Sexual Impulses** - R.E. Money-Kyrle 2013-09-13

This is Volume VII of ten in a collection on Physiological Psychology. Originally published in 1932, in this study the author attempts to bring order and consistency into his ideas about psycho-analysis and the relations of this science to philosophy, physiology, biology, anthropology, sociology and ethics, and presents one system for looking at the area of the development of sexual impulses.

Three Contributions to the Theory of Sex - Sigmund Freud 2015-11-16

The fact of sexual need in man and animal is expressed in biology by the assumption of a "sexual impulse." This impulse is made analogous to the impulse of taking nourishment, and to hunger. The sexual expression corresponding to hunger not being found colloquially, science uses the expression "libido." Popular conception makes definite assumptions concerning the nature and qualities of this sexual impulse. It is supposed to be absent during childhood and to commence about the time of and in connection with the maturing process of puberty; it is supposed that it manifests itself in irresistible attractions exerted by one sex upon the other, and that its aim is sexual union or at least such actions as would lead to union. But we have every reason to see in these assumptions a very untrustworthy picture of reality. On closer examination they are found to abound in errors, inaccuracies and hasty conclusions. If we introduce two terms and call the person from whom the sexual attraction emanates the sexual object, and the action towards which the impulse strives the sexual aim, then the scientifically examined experience shows us many deviations in reference to both sexual object and sexual aim, the relations of which to the accepted standard require thorough investigation.

Around the Outsider - Colin Stanley 2011

In May 1956, aged just 24, Colin Wilson achieved success and overnight fame with his philosophical study of alienation and transcendence in modern literature and thought, *The Outsider*. Fifty-four years on, and never out of print in English, the book is still widely read and discussed, having been translated into over thirty languages. In a remarkably prolific career, Wilson, a true polymath, has since written over 170 titles: novels, plays and non-fiction on a variety of subjects. This volume brings together twenty essays by scholars of Colin Wilson's work worldwide and is published in his honour to mark the author's 80th birthday. Each contributor has provided an essay on their favourite Wilson book (or the one they consider to be the most

significant). The result is a varied and stimulating assessment of Wilson's writings on philosophy, psychology, literature, criminology and the occult with critical appraisals of four of his most thought-provoking novels. Altogether a fitting tribute to a writer

The Sexual Revolution in Modern English Literature - Ch.I. Glicksberg 2013-03-09

The study of its literature is a useful guide to the degree of sexual security existing in a culture. ' When a future historian comes to treat of the social taboos of the nineteenth and twentieth centuries in a fourteen-volume life-work, his theories of the existence of an enormous secret language of bawdry and an immense oral literature of obscene stories and rhymes known, in various degrees of initiation, to every man and woman in the country, yet never consigned to writing or openly admitted as existing, will be treated as a chimerical notion by the enlightened age in which he writes. ' If I were asked to name some characteristics typical of the mid-20th century, I would put first the uncritical worship of money, the spread of nationalism, the tyranny of the orgasm, the homosexual protest and the apotheosis of snobbery. Money, sex, and social climbing motivate society. " The English are, on the whole, an inhibited people. They have a basic prudery and gaucheness in sex matters which sets them apart from almost every other nation in Europe . . . In England, the realisation that many of the restraints and taboos of Victorian times are unnatural and even psychologically harmful, combined with the decline of organized religion, has led to a considerable laxity in sex matters, particularly since World War II! 1.

Psychoanalytic Movement Freud's Theories of the Unconscious by H. W. Chase Sigmund Freud (1856-1939) was an Austrian neurologist and the father of psychoanalysis, a clinical method for treating psychopathology through dialogue between a patient and a psychoanalyst. In creating psychoanalysis, Freud developed therapeutic techniques such as the use of free association and discovered transference, establishing its central role in the analytic process. Freud's redefinition of sexuality to include its infantile forms led him to formulate the Oedipus complex as the central tenet of psychoanalytical theory. His analysis of dreams as wish-fulfillments provided him with models for the clinical analysis of symptom formation and the mechanisms of repression as well as for elaboration of his theory of the unconscious. Freud postulated the existence of libido, an energy with which mental processes and structures are invested and which generates erotic attachments, and a death drive, the source of compulsive repetition, hate, aggression and neurotic guilt.

The Sex Diary of a Metaphysician - Colin Wilson 1993-11

The Origin and Development of the Moral Ideas - Edward Westermarck 2020-09-28

THAT the moral concepts are ultimately based on emotions either of indignation or approval, is a fact which a certain school of thinkers have in vain attempted to deny. The terms which embody these concepts must originally have been used—indeed they still constantly are so used—as direct expressions of such emotions with reference to the phenomena which evoked them. Men pronounced certain acts to be good or bad on account of the emotions those acts aroused in their minds, just as they called sunshine warm and ice cold on account of certain sensations which they experienced, and as they named a thing pleasant or painful because they felt pleasure or pain. But to attribute a quality to a thing is never the same as merely to state the existence of a particular sensation or feeling in the mind which perceives it. Such an attribution must mean that the thing, under certain circumstances, makes a certain impression on the mind. By calling an object warm or pleasant, a person asserts that it is apt to produce in him a sensation of heat or a feeling of

pleasure. Similarly, to name an act good or bad, ultimately implies that it is apt to give rise to an emotion of approval or disapproval in him who pronounces the judgment. Whilst not affirming the actual existence of any specific emotion in the mind of the person judging or of anybody else, the predicate of a moral judgment attributes to the subject a tendency to arouse an emotion. The moral concepts, then, are essentially generalisations of tendencies in certain phenomena to call forth moral emotions. However, as is frequently the case with general terms, these concepts are mentioned without any distinct idea of their contents. The relation in which many of them stand to the moral emotions is complicated; the use of them is often vague; and ethical theorists, instead of subjecting them to a careful analysis, have done their best to increase the confusion by adapting the meaning of the terms to fit their theories. Very commonly, in the definition of the goodness or badness of acts, reference is made, not to their tendencies to evoke emotions of approval or indignation, but to the causes of these tendencies, that is, to those qualities in the acts which call forth moral emotions. Thus, because good acts generally produce pleasure and bad acts pain, goodness and badness have been identified with the tendencies of acts to produce pleasure or pain. The following statement of Sir James Stephen is a clearly expressed instance of this confusion, so common among utilitarians:—"Speaking generally, the acts which are called right do promote, or are supposed to promote general happiness, and the acts which are called wrong do diminish, or are supposed to diminish it. I say, therefore, that this is what the words 'right' and 'wrong' mean, just as the words 'up' and 'down' mean that which points from or towards the earth's centre of gravity, though they are used by millions who have not the least notion of the fact that such is their meaning, and though they were used for centuries and millenniums before any one was or even could be aware of it."
