Sex Education in Secondary Schools - Jennifer Harrison 2000

* What are effective teaching and learning styles for sex education? * How can the Health Promoting School create a context for sex education? * How do we interpret the legislation for sex education? This book will be important reading for secondary teachers of all disciplines. It provides a timely consolidation of educational thinking on sex education in schools today, including a consideration of the role of the Health Promoting School. It draws together recent research evidence to consider important aspects such as equal opportunities, school policy and practice, as well as identifying a moral and social framework for sex education. The practical guidelines are particularly helpful for trainee and newly qualified teachers and provide strategies for introducing, developing and re-visiting key areas of sex education. Some aspects, such as abortion and AIDS education, are highly sensitive areas for teachers to take on, demanding a particular awareness of the surrounding issues and of what might and can be taught in their own school. Crucially they demand a level of self awareness and self confidence for teachers to embark on a variety of appropriate teaching and learning strategies. A range of individual and group activities are provided which are aimed at both beginning and more experienced teachers to stimulate independent learning.

COVID-19 and women's intersectionalities in Africa - Ashwanee Budoo-Scholtz 2023-05-23

COVID-19 has become one of the most severe issues dominating discussions on the agendas of states globally, and across the African continent, since its emergence in 2019. The COVID-19 pandemic has regrettably brought into sharp focus the continued multiple and intersecting forms of discrimination faced

by women and girls in Africa because of their intersecting identities. Yet, paradoxically, although African women are disproportionately affected by the crisis, they are largely invisible in the responses. Several African states and governments have taken different policy measures in response to the pandemic. These responses have taken different dimensions, including shutting down economies, imposition of lockdowns, coercive quarantine measures with police enforcement and criminal consequences for offenders violating these rules. Unfortunately, these responses have reinforced and amplified women's disproportionate disadvantage and gender inequalities in Africa. Against this backdrop, this book asks the intersectional question about women's experiences during the COVID-19 pandemic in Africa. Applying an intersectional human rights lens involves questioning how the intersecting identities that African women embody affect their experiences of the COVID-19 pandemic.

Social Research for our Times - Claire Cameron 2023-11-14

For 50 years, researchers at UCL's Thomas Coram Research Unit have been undertaking ground-breaking policy-relevant social research. Their main focus has been social issues affecting children, young people and families, and the services provided for them. Social Research for our Times brings together different generations of researchers from the Unit to share some of the most important results of their studies. Two sections focus on the main findings and conclusions from research into children and children services, and on family life, minoritised groups and gender. A third is then devoted to the innovative methods that have been developed and used to undertake research in these complex areas. Running through the book is a key strategic question: what should be the relationship between research and policy? Or put another way, what does 'policy relevant research' mean? This perennial question has gained new importance in the post-Covid, post-Brexit world that we have entered, making this text a timely intervention for sharing decades of experience. Taking a unique opportunity to reflect on research context as well as research findings, this book will be of interest to researchers, teachers, students and those involved in policy making both in and beyond dedicated research units, and can be read as a whole or sampled for individual standalone chapters.

Sex, Intimacy and Living with Life-Shortening Conditions - Sarah Earle 2023-12-19

This multi-disciplinary and inclusive collection brings together theoretically informed and empirically focused research on sex, intimacy and reproduction in relation to young people and adults with life-shortening conditions. Advances in healthcare mean that increasing numbers of young people with life-shortening conditions are transitioning into adulthood. This three-part book explores the relevance and significance of this field, examines everyday experiences, and highlights the challenges faced by individuals and organisations in addressing the needs of such people in daily life and in the context of practice. Drawing on perspectives from sociology, disability studies, epidemiology, health policy, psychotherapy, legal studies, queer studies and nursing, this ground-breaking volume is written by academics, policy makers, practitioners and experts by experience. Raising Sexually Intelligent Kids - Anisa Varasteh 2023-12-01

Many parents feel uncomfortable with the thought of having 'the talk' with their children, especially teenagers. But what many people don't realise is how much of sexuality education has nothing to do with sex itself. In this book, Clinical Sexologist Anisa Varasteh teaches the foundations of a comprehensive sexuality education for children and teenagers and answers the most common questions young people have about sex and sexuality. Contrary to popular belief, talking about sex and sexuality does not make young people more prone to sexual experimentation. This book provides research-based evidence for how a comprehensive sexuality education is important for children's safety, psychological and physical wellbeing. It identifies the barriers to having open conversations with children and teenagers, and outlines methods for how to overcome them. With a focus on skills, the book addresses the building blocks of sexuality education and how to develop an environment of mutual trust, it outlines key topics for discussion and the skills that children need to develop to make healthy decisions about their sexuality. Complete with practical support, including over 20 worksheets and a comprehensive list of tough questions from teenagers - and

suggestions for how to address them - this book is an essential resource for parents, carers and educators who are responsible for the health, safety and development of children and teenagers.

SOGI Minority and School Life in Asian Contexts - Makiko Kasai 2023-09-01

Representing an often overlooked population, this book explores the experiences of LGBTQ+ youth in Asian countries. Contributors focus on LGBTQ+ youth's school life experiences, including bullying and violence, a pervasive and serious problem. This book aims to inform psychologists, mental health providers, and school professionals about the needs of LGBTQ+ youth from eight different Asian countries. Individual chapters present unique aspects of LGBTQ+ youth experiences in school contexts from different cultural perspectives. In addition, the intersectionality of LGBTQ+ and other minorities (including ethnicity, religion, and social class) highlights multiple sources of oppression or discrimination that can create additional pressures and stress for youth. The concepts of inter-minority conflict and inter-minority empathy are introduced to understand minority issues from new perspectives. This is a valuable reference for psychologists, social workers, counselors, nurses, mental health professionals, and students, whether preparing for general practice, treating LGBTQ+ clients, or supporting LGBTQ+ youth in schools around the world.

Values in Sex Education - Mark Halstead 2003-09-02

Sex education is rarely out of the news. Despite this, there exist surprisingly few studies of the principles, policies and practice of sex education. This book provides such an examination, focusing on the values to which children are exposed in sex education. Sex education inevitably involves the transmission of values, regardless of whether this is intended by teachers. Throughout the book, academic and professional

literature on both values and sex education is reviewed and discussed. The authors look at the implicit liberal values, which underpin programmes of sex education, and at the challenges presented by the diversity of values in contemporary society. The book also considers: * Why values are central to sex education * Children's voices and children's values * Religious and family values * Achievable aims for school sex education * How to help young people to reflect critically on the influences to which they are exposed and on their own developing sexual values * How to build values into practical approaches to sex education at both primary and secondary levels. This timely book will help all those involved in sex education to steer a path between controversial and often opposing views and will be essential reading for students on PGCE and BEd courses. It will also be a valuable resource for teachers and professionals involved in teaching sex education such as teachers of personal and social education, form tutors, heads of year, school nurses, health workers and academics.

Topics covered include: -social media, online presence and critical literacy skills -mental health coping strategies -plastic reducing -topical, sensitive, controversial issues (TSCIs) Covering the whole primary spectrum from Early Years to Key Stage 2, case studies from each phase are included within each chapter to help practitioners to relate the material to their own classroom.
