"An online survey was conducted where 255 respondents provided information about their significant other. Respondents answered questions dealing with elements of relationship satisfaction, Facebook usage, surveillance, and jealousy. Results indicate a correlation between Facebook usage and relationship satisfaction. Individuals with varying levels of Facebook usage were shown to have a positive correlation with jealousy levels in their relationship, meaning as Facebook use increased, jealousy also increased. Altman and Taylor's theory of social penetration (1973) was used to describe the stages in a relationship from orientation into a relationship of stable exchange. Culture Management - Lukasz Wroblewski 2017-01-30

"Dr Lukasz Wroblewski's book *Culture Management: Strategy and Marketing Aspects* clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future." Dr Kim Lehman Tasmanian School of Business and Economics, University of Tasmania "Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product." Dr Bonita M. Kolb Professor Emeritus of Lycoming College in Pennsylvania "A thoughtful and penetrating analysis of culture management addressing marketing strategies and cultural institutions. An important 'must read' book for those involved in this exciting sector." Prof Adrian Payne University of UNSW Business School, University of New South Wales

Marketing: A Relationship Perspective (Second Edition) - Hollensen Svend 2019-03-15

Marketing: A Relationship Perspective is back for a second edition and continues to set a benchmark for achievement in introductory marketing courses across Europe. It is a comprehensive, broad-based, and challenging basic marketing text, which describes and analyzes the basic concepts and strategic role of marketing and its practical application in managerial decision-making. It integrates the 'new' relationship approach into the traditional process of developing effective marketing plans. The book's structure fits to the marketing planning process of a company. Consequently, the book looks at the marketing management process from the perspective of both relational and transactional approach, suggesting that a company should, in any case, pursue an integrative and situational marketing management approach. Svend Hollensen's and Marc Opresnik's holistic approach covers both principles and practices, is drawn in equal measure from research and application, and is an ideal text for students, researchers, and practitioners alike.

Couples - Barry Dym 1993

"Everyone, in or out of a relationship, has wondered how couples work, and what makes them successful or unsuccessful, long-lasting or short-term. In this insightful, refreshingly nonjudgmental book, Barry Dym, Ph.D., and Michael Glenn, M.D., chart the stages of a couple's journey together, and offer a provocative glimpse of the complex birth and development of intimate partnerships." "At the heart of *Couples*, the authors identify three distinct yet recurring stages common to all enduring relationships. We learn that couples begin with a period of Expansion and Promise - a time when each individual feels somehow larger, more witty and charming, in short, the best person that he or she can be. The intensity of Expansion cannot last though, and inevitably will move into Contraction - we each pull back into our more habitual ways, enact or demand more stereotypical gender roles, and feel disappointed and betrayed. Couples who weather the storm of Contraction (and long-term couples will experience many of them) will resolve their struggles and move into a time of Resolution, when intimacy is renewed and each individual can become more complete, containing both their "best" and "worst" selves." "But *Couples* is much more than a map. Illustrating their ideas with in-depth examples, Drs. Dym and Glenn reveal how a couple's identity is shaped by these stages and the powerful cultural expectations of society, friends, and family who tell us what a couple should be. *Couples* analyzes how recurrent patterns are established, and the impact of gender issues, children, and the serious crises that occur in any lifetime. Finally, the authors offer accessible suggestions for applying these concepts to one's own relationship, guiding couples and individuals in how to manage their own periods of turmoil and transition." "Original, engaging, and thoughtful, *Couples* uncovers the essence of our most intimate relationship - ultimately, it offers a striking portrait not just of whom we love (and why), but who we are."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Helping Adults to Grow Up - Michael S. Broder 2022-06-06

This book presents Stage Climbing, an innovative seven stage developmental model as a new tool to help practitioners recognize cognitions, attitudes and behaviors-- typical of different life stages and thus levels of maturity-- in order to select the most effective treatment interventions with adult clients. It is the first book to integrate cognitive behavioral (CBT) concepts into the entire human development spectrum for any area of life that clients choose to work on. It demonstrates how resistance to change can reflect thinking and behavioral patterns that are characteristic of earlier developmental stages. It also presents a model of maturity along with treatment strategies and action steps to motivate change, as well as reactivate a client's natural and organic maturation process. Practitioners at all levels from diverse disciplines and modalities will learn to assess how, why, and where clients are "stuck" developmentally. This volume offers practitioners, who treat individuals, couples and/or families a psychologically integrated road map that guides clients to take responsibility for living their best life, by removing self-created obstacles which prevent this from occurring naturally. The integration of the most robust aspects of psychodynamics, developmental psychology, and cognitive behavioral therapy will help the field continue to evolve, by providing state of the art interventions to help clients make mature and healthy changes in their lives. All mental health practitioners, regardless of their therapeutic orientations can use the strategies in this book to assess the underlying core belief patterns of clients at each life stage, and apply appropriate interventions to challenge self-defeating beliefs, and proactively work on agreed upon desired outcomes.
