Confronting Cyber-Bullying Shaheen Shariff 2009-01-12 This book is directed to academics, educators, and government policy-makers who are concerned about addressing emerging cyber-bullying and anti-authority student expressions through the use of cell phone and Internet technologies. There is a current policy vacuum relating to the extent of educators' legal responsibilities to intervene when such expression takes place outside of school hours and school grounds on home computers and personal cell phones. Students, teachers, and school officials are often targets of such expression. The author analyzes government and school responses by reviewing positivist paradigms. Her review of a range of legal frameworks and judicial decisions from constitutional, human rights, child protection, and tort law perspectives redirects attention to legally substantive and pluralistic approaches that can help schools balance student free expression, supervision, safety, and learning.

Talking to Robots David Ewing Duncan 2019-07-16 One of Time magazine's '32 Books You Need to Read This Summer' -- 'a riveting read'. 'Intensely readable, downright terrifying, and surprisingly uplifting.' Vanity Fair 'A fascinating work of imaginative futurology, a science journalist takes a look at our current technologies and anticipates the human-robot future that could await us - one full of warrior bots, politician bots, doctor bots and sex bots.' One of Barbara VanDenburgh's '5 Books Not to Miss', USA Today One of the best summer reads of 2019, according to top authors David Baldacci and Elizabeth Acevedo on USA Today's Today programme. 'A refreshing variation on the will-intelligent-robots-bring-Armageddon genre . . . this colorful mixture of expert futurology and quirky speculation does not disappoint' Kirkus Reviews What robot and AI systems are being built and imagined right now? What do they say about us, their creators? Will they usher in a fantastic new future, or destroy us? What do some of our greatest thinkers, from physicist Brian Greene and futurist Kevin Kelly to inventor Dean Kamen, geneticist George Church and filmmaker Tiffany Shlain, anticipate for our human-robot future? For even as robots and AI intrigue us and make us anxious about the future, our fascination with robots has always been about more than the potential of the technology - it also concerns what robots tell us about being human. From present-day Facebook and Amazon bots to near-future 'intimacy' bots and 'the robot that swiped my job' bots, bestselling American popular science writer David Ewing Duncan's Talking to Robots is a wonderfully entertaining and insightful guide to possible future scenarios about robots, both real and imagined. Featured bots include robot drivers; doc bots; politician bots; warrior bots; sex bots; synthetic bio bots; dystopic bots that are hopefully just bad dreams; and ultimately, God Bot (as described by physicist Brian Greene). These scenarios are informed by discussions with well-known thinkers, engineers, scientists, artists, philosophers and others, who share with us their ideas, hopes and fears about robots. David spoke with, among others, Kevin Kelly, David Baldacci, Brian Greene, Dean Kamen, Craig Venter, Stephanie Mehta, David Eagleman, George Poste, George Church, General R. H. Latiff, Robert Seigel, Emily Morse, David Sinclair, Ken Goldberg, Sunny Bates, Adam Gazzaley, Tim O'Reilly, Tiffany Shlain, Eric Topol and Juan Enriquez. These discussions, along with some reporting on bot-tech, bot-history and real-time societal and ethical issues with robots, are the launch pads for unfurling possible bot futures that are informed by how people and societies have handled new technologies in the past. The book describes how robots work, but its primary focus is on what our fixation with bots and AI says about us as humans: about our hopes and anxieties; our myths, stories, beliefs and ideas about beings both real and artificial; and our attempts to attain perfection. We are at a pivotal moment when our ancient infatuation with human-like beings with certain attributes or superpowers - in mythology, religion and storytelling - is coinciding with our ability to actually build some of these entities.

Geeks, Genes, and the Evolution of Asperger Syndrome Dean Falk 2018 In this unusual book an evolutionary anthropologist and her coauthor/granddaughter, who has Asperger syndrome, examine the emergence and spread of Asperger syndrome and other forms of high-functioning autism. The authors speak to readers with autism, parents, teachers, clinicians, psychologists, psychiatrists, other health-care providers, autism researchers, evolutionary biologists, geneticists, paleoanthropologists, and people who simply enjoy reading about science. Using the latest findings regarding brain evolution and the neurological, genetic, and cognitive underpinnings of autistic individuals at the high end of the spectrum, Falk theorizes that many characteristics associated with Asperger syndrome are by-products of the evolution of advanced mental processing. She explores the origins of autism, whether it is currently evolving, how it differs in males and females, and whether it is a global phenomenon. Additionally, Eve Schofield, who was diagnosed with Asperger syndrome as a child, provides firsthand accounts of what it is like to grow up as an "Aspie."

Talking About Global Migration Theresa Catalano 2016-05-03 How do migrants describe themselves and their experiences? As the world faces a migration crisis, there is an enhanced need for educational responses to the linguistic and cultural diversity of student bodies, and for consideration of migrant students at all levels of the curriculum. This book explores the stories of over 70 migrants from 41 countries around the world and examines the language they use when talking about their move to a new country and their experiences there. The book interprets common themes from the stories using metaphor and metonymy analysis to lead to more nuanced understandings of migration that have implications for language teachers. The stories also dispel many stereotypes relating to migration, serving as a reminder to us all to consider our own language when talking about this complex subject.

Magical Stories From Tagarama Serkan Kahveci 2022-06-01 Dear Readers, I am sure that you will feel great pleasure and excitement while reading my literary works (screenplays and poems) written for the 7th art, cinema. The free -verse poems include "global" issues appearing in the form of sometimes objects, sometimes animals (our buddies), sometimes sports and sometimes global warming. Film Director Jean-Luc Godard said: "Photography is truth. The cinema is truth twenty-four times per second." As I adopted this statement, I want to state that my literal and narrative screenplays will not only affect your left and right lobe but also allow you, my dear readers, to push the limits of your imagination, so you will visualize yourself as the characters depicted in the book and you will experience different evens as if you were one of them without being dependant on place, time and characters. You will, indeed, feel all the features of the ruler, of the referee and of the director of this book. These 19 screenplays and IO poems will enable you sometimes to travel to Colorado, the homeland of Cheeseburger, by following a small yellow flower; sometimes to witness extinct giant birds that came back from the dead after an earthquake; sometimes to find yourself in Machu Picchu with the help of the sun and water upon coming across a parchment paper; and sometimes to witness the messages coming from the Northern and Southern lights when Malaccan and Turkish sweethearts go to Lapland, to snow country, due to financial problems. You will feel many other common excitements and adventures like these. You will burst with excitement, laugh, cry, and shiver with fear. You will have all the feels in this book. I feel great pleasure to write like Atilla iLHAN and Hasan Huseyin KORKMAZGiL, some of the great poets and writers in our neighbourhood. May all the writers who lived in the past and in our neighbourhood and also my late father Selahattin KAHVECi rest in peace...

Beautiful Fighting Girl Sait Tamaki 2013-11-30 From Cutie Honey and Sailor Moon to Nausicaä of the Valley of the Wind, the worlds of Japanese anime and manga teem with prepubescent girls toting deadly weapons. Sometimes overtly sexual, always intensely cute, the beautiful fighting girl has been both hailed as a feminist icon and condemned as a symptom of the objectification of young women in Japanese society. In *Beautiful Fighting Girl*, Saitō Tamaki offers a far more sophisticated and convincing interpretation of this alluring and capable figure. For Saitō, the beautiful fighting girl is a complex sexual fantasy that paradoxically lends reality to the fictional spaces she inhabits. As an object of desire for male otaku (obsessive fans of anime and manga), she saturates these worlds with meaning even as her fictional status demands her ceaseless proliferation and reproduction. Rejecting simplistic moralizing, Saitō understands the otaku's ability to eroticize and even fall in love with the beautiful fighting girl not as a sign of immaturity or maladaptation but as a result of a heightened sensitivity to the multiple layers of mediation and fictional context that constitute life in our hypermediated world—a logical outcome of the media they consume. Featuring extensive interviews with Japanese and American otaku, a comprehensive genealogy of the beautiful fighting girl, and an analysis of the American outsider artist Henry Darger, whose baroque imagination Saitō sees as an important antecedent of otaku culture, *Beautiful Fighting Girl* was hugely influential when first published in Japan, and it remains a key text in the study of manga, anime, and otaku culture. Now available in English for the first time, this book will spark new debates about the role played by desire in the production and consumption of popular culture.
