

Why Is Sex Fun Jared M Diamond

Why is Sex Fun? - Jared M. Diamond 1997

Human sexuality seems normal to us, but it is bizarre by the standards of other animals. Diamond argues that our strange sex lives were as crucial to our rise to human status as our large brains. Among the aspects of human sexuality discussed are female menopause, our having sex in private, our often having sex for fun rather than procreation and the expansion of women's breasts even before use in lactation, and the battle of the sexes over parental care. These features might seem too natural to require explanation, but on reflection they prove surprisingly difficult to account for.

¿Por qué es divertido el sexo? - Jared M. Diamond 1999

No hay una autoridad más preparada y competente que Jared Diamond, reconocido experto en el campo de la fisiología, para responder a estas y otras inquietantes preguntas. Con su amena y fascinante experiencia científica, Diamond analiza la desconcertante evolución que ha configurado la sexualidad de los seres humanos, tan diferente al resto de especies animales.

¿Por qué es divertido el sexo? - Jared Diamond 2020-04-01

¿Por qué los humanos son una de las pocas especies que realiza sus prácticas sexuales en privado? ¿Y por qué practican el sexo cualquier día del mes y del año? ¿Por qué las hembras del ser humano son los únicos mamíferos que experimentan la menopausia? ¿Por qué el pene del hombre es tan innecesariamente grande? Estas y otras importantes preguntas encuentran su respuesta en la mirada que Jared Diamond lanza a la vida sexual del ser humano, única entre todas las especies animales. Profesor de fisiología, ornitología y geografía, y galardonado con el Premio Pulitzer, Diamond posee una formación y una capacidad divulgativa excepcionales para entrar en estas cuestiones. La sexualidad humana ha sido objeto de estudio desde hace apenas unas décadas, y no se presta a experimentos de laboratorio. Sin embargo,

Diamond consigue aplicar sus conocimientos científicos y su sentido del humor a las fascinantes fuerzas evolutivas que configuraron nuestra peculiaridad sexual, y muestra cuánto contribuyeron a esa condición única que supone ser humano. Reseña: «Leer a Jared Diamond nos alerta sobre cómo es posible desaparecer o seguir divirtiéndonos.» Juan Malpartida, Letras Libres

Collapse - Jared Diamond 2011-01-04

In Jared Diamond's follow-up to the Pulitzer-Prize winning *Guns, Germs and Steel*, the author explores how climate change, the population explosion and political discord create the conditions for the collapse of civilization. Diamond is also the author of *Upheaval: Turning Points for Nations in Crisis*. Environmental damage, climate change, globalization, rapid population growth, and unwise political choices were all factors in the demise of societies around the world, but some found solutions and persisted. As in *Guns, Germs, and Steel*, Diamond traces the fundamental pattern of catastrophe, and weaves an all-encompassing global thesis through a series of fascinating historical-cultural narratives. *Collapse* moves from the Polynesian cultures on Easter Island to the flourishing American civilizations of the Anasazi and the Maya and finally to the doomed Viking colony on Greenland. Similar problems face us today and have already brought disaster to Rwanda and Haiti, even as China and Australia are trying to cope in innovative ways. Despite our own society's apparently inexhaustible wealth and unrivaled political power, ominous warning signs have begun to emerge even in ecologically robust areas like Montana. Brilliant, illuminating, and immensely absorbing, *Collapse* is destined to take its place as one of the essential books of our time, raising the urgent question: How can our world best avoid committing ecological suicide?

Why Is Sex Fun? - Jared Diamond 2014-03-20

A fascinating insight into how human sexuality came to be the way it is now - Jared Diamond explains why we are different from the animal kingdom. Why are humans one of the few species to have sex in private? Why do humans have sex any day of the month or year, including when the female is pregnant, beyond her reproductive years, or between her fertile cycles? Why are human females one of the few mammals to go through menopause? Human sexuality seems normal to us but it is bizarre by the standards of other animals. Jared Diamond argues that our strange sex lives were as crucial to our rise to human status as were our large brains. He also describes the battle of the sexes in the human and animal world over parental care, and why sex differences in the genetic value of parental care provide a biological basis for the all-too-familiar different attitudes of men and women towards extramarital sex.

The World Until Yesterday - Jared Diamond
2013-10-29

The bestselling author of *Collapse* and *Guns, Germs and Steel* surveys the history of human societies to answer the question: What can we learn from traditional societies that can make the world a better place for all of us? "As he did in his Pulitzer Prize-winning *Guns, Germs, and Steel*, Jared Diamond continues to make us think with his mesmerizing and absorbing new book." Bookpage Most of us take for granted the features of our modern society, from air travel and telecommunications to literacy and obesity. Yet for nearly all of its six million years of existence, human society had none of these things. While the gulf that divides us from our primitive ancestors may seem unbridgeably wide, we can glimpse much of our former lifestyle in those largely traditional societies still or recently in existence. Societies like those of the New Guinea Highlanders remind us that it was only yesterday—in evolutionary time—when everything changed and that we moderns still possess bodies and social practices often better adapted to traditional than to modern conditions. *The World Until Yesterday* provides a mesmerizing firsthand picture of the human past as it had been for millions of years—a past that has mostly vanished—and considers what the

differences between that past and our present mean for our lives today. This is Jared Diamond's most personal book to date, as he draws extensively from his decades of field work in the Pacific islands, as well as evidence from Inuit, Amazonian Indians, Kalahari San people, and others. Diamond doesn't romanticize traditional societies—after all, we are shocked by some of their practices—but he finds that their solutions to universal human problems such as child rearing, elder care, dispute resolution, risk, and physical fitness have much to teach us. Provocative, enlightening, and entertaining, *The World Until Yesterday* is an essential and fascinating read.

Warum macht Sex Spaß? - Jared Diamond
2009-10-05

Der Bestsellerautor Jared Diamond über die bizarre Sexualität des Menschen Warum betreiben wir Menschen Sex hauptsächlich zum Vergnügen statt zur Fortpflanzung und Erhaltung der Art? Und läuft das nicht der Evolution zuwider? Warum Sex mit Frauen, die schwanger oder jenseits der Menopause sind? Sex könnte doch energiesparend auf die fruchtbaren Tage beschränkt werden ... Mit Witz, Esprit und großem Sachverstand erläutert der mehrfach ausgezeichnete Evolutionsbiologe Jared Diamond, wie sich der Mensch in seinem Sexualverhalten von anderen Tieren unterscheidet - und dass genau darin der Schlüssel zu seinem evolutionären Erfolg liegt.

Why Sex Matters - Bobbi S. Low 2015-01-04

Why are men, like other primate males, usually the aggressors and risk takers? Why do women typically have fewer sexual partners? In *Why Sex Matters*, Bobbi Low ranges from ancient Rome to modern America, from the Amazon to the Arctic, and from single-celled organisms to international politics, to show that these and many other questions about human behavior largely come down to evolution and sex. More precisely, as she shows in this uniquely comprehensive and accessible survey of behavioral and evolutionary ecology, they come down to the basic principle that all organisms evolved to maximize their reproductive success and seek resources to do so, but that sometimes cooperation and collaboration are the most effective ways to succeed. This newly revised edition has been thoroughly updated to include

the latest research and reflect exciting changes in the field, including how our evolutionary past continues to affect our ecological present.

The World Until Yesterday - Jared Diamond
2013-01-10

From the author of No.1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

An Analysis of Jared M. Diamond's Collapse
- Rodolfo Maggio 2017-07-05

American scholar Jared Diamond deploys his powers of interpretation to great effect in *Collapse: How Societies Choose to Fail or Succeed*, which seeks to understand the

meaning behind the available evidence describing societies that have survived and those that have withered and died. Why, for example, did the Norsemen of Scandinavia who colonized Greenland in the early tenth century not survive, while the inhabitants of Highland New Guinea did? With the evidence to hand, Diamond notes that a society's collapse tends to be preceded by a severe reduction in population and considerable decreases in political, economic and social complexity. Delving even deeper, Diamond isolates five major factors determine the success or failure of human societies in all periods of history: environmental degradation, which occurs when an ecosystem deteriorates as its resources are exhausted; climate change (natural or man-made); hostile neighbors; weakened trading partners; and access or otherwise to the resources that enable the society to adapt its challenges. The breadth of Diamond's research provides the springboard from which to reach these definitions, but it inevitably also introduces complications; how can evidence produced by specialists in so many different disciplines be compared? Diamond's ability to understand the meaning of the evidence at hand - and his readiness to seek and supply clarifications of meaning where necessary - underpin his achievement, and comprise a textbook example of how interpretative skills can provide a framework for strong critical thinking.

Upheaval - Jared Diamond 2020-05-12

A Bill Gates Summer Reading Pick A "riveting and illuminating" (Yuval Noah Harari) new theory of how and why some nations recover from trauma and others don't, by the Pulitzer-Prize-winning author of the landmark bestsellers *Guns, Germs, and Steel* and *Collapse*. In his international bestsellers *Guns, Germs and Steel* and *Collapse*, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet

Union's attack on Finland, to a murderous coup or countercoup in Chile and Indonesia, to the transformations of Germany and Austria after World War Two. Because Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility, painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, *Upheaval* reveals factors influencing how both whole nations and individual people can respond to big challenges. The result is a book epic in scope, but also his most personal book yet.

He Comes Next - Ian Kerner 2009-10-13

Transform Yourself from "Passion Victim" to Passionista! In the smash hit *She Comes First*, Ian Kerner singlehandedly waged battle against male sexual "ill-cliteracy," and women everywhere benefited from his "viva la vulva" philosophy of female pleasure. Now, in

Passionista, it's time to learn all about what turns men on—and makes them stay on. In this point-by-point, "blow-by-blow" guide, Kerner makes giving as much fun as receiving as he covers every angle of male sexuality, unlocks the secrets of satisfaction, and offers knowledgeable answers to the questions every woman wonders about. His advice is the closest you'll ever come to waking up in a guy's skin and knowing what truly makes him sexually tick. Written in the same witty, insightful, and utterly readable voice that has made *She Comes First* and *Be Honest—You're Not That Into Him Either* so popular, *Passionista* is the empowered woman's guide to enjoying sex to the fullest—and ensuring that he does the same.

The Third Chimpanzee for Young People - Jared Diamond 2015-05-19

At some point during the last 100,000 years, humans began exhibiting traits and behavior that distinguished us from other animals, eventually creating language, art, religion, bicycles, spacecraft, and nuclear weapons—all within a heartbeat of evolutionary time. Now, faced with the threat of nuclear weapons and the effects of climate change, it seems our innate tendencies for violence and invention have led us to a crucial fork in our road. Where did these traits come from? Are they part of our species' immutable destiny? Or is there hope for our species' future if we change? With fascinating facts and his unparalleled readability, Diamond intended his book to improve the world that today's young people will inherit. *Triangle Square's The Third Chimpanzee for Young People* is a book for future generation and the future they'll help build.

Natural Experiments of History - Jared Diamond 2012-11-01

In eight case studies by leading scholars in history, archaeology, business, economics, geography, and political science, the authors showcase the "natural experiment" or "comparative method"—well-known in any science concerned with the past—on the discipline of human history. That means, according to the editors, "comparing, preferably quantitatively and aided by statistical analyses, different systems that are similar in many respects, but that differ with respect to the factors whose influence one wishes to study."

The case studies in the book support two overall conclusions about the study of human history: First, historical comparisons have the potential for yielding insights that cannot be extracted from a single case study alone. Second, insofar as is possible, when one proposes a conclusion, one may be able to strengthen one's conclusion by gathering quantitative evidence (or at least ranking one's outcomes from big to small), and then by testing the conclusion's validity statistically.

Evolutionary Psychology -

Sex at Dawn - Christopher Ryan 2021-01-05

The 10th-anniversary edition of the book that radical re-evaluates the origins and nature of human sexuality. Since Darwin's day, we've been told that sexual monogamy comes naturally to our species. Mainstream science — as well as religious and cultural institutions — has maintained that men and women evolved in families in which a man's possessions and protection were exchanged for a woman's fertility and fidelity. In this groundbreaking book, however, Christopher Ryan and Cacilda Jethá argue that human beings evolved in egalitarian groups that shared food, child care, and, often, sexual partners. Weaving together evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality, the authors show how far from human nature monogamy really is. With intelligence and humour, Ryan and Jethá explain how our promiscuous past haunts our contemporary struggles. They explore why many people find long-term fidelity so difficult; why sexual passion tends to fade even as love deepens; why homosexuality persists in the face of standard evolutionary logic; and what the human body reveals about the prehistoric origins of modern

sexuality. Shocking, enlightening, and ultimately inspiring, *Sex at Dawn* offers a revolutionary understanding of why we live and love as we do.

1000 Events that Shaped the World - 2008

"In a sweep of history, this book brings you what National Geographic has introduced into households for more than a century: the world and all that is in it. Concise narratives, each focused on one event and numbered chronologically from 1 to 1,000, walk you through the story of civilization, from the first evidence of life 3.8 billion years ago to the discovery of the first known planet beyond the solar system that could harbor life as we know it. Accompanied by hundreds of illustrations, events famous, infamous and little known offer insight into how and why the world has grown and changed as it has."--BOOK JACKET.

The Third Chimpanzee - Jared M. Diamond

2006-01-03

The Development of an Extraordinary Species
We human beings share 98 percent of our genes with chimpanzees. Yet humans are the dominant species on the planet -- having founded civilizations and religions, developed intricate and diverse forms of communication, learned science, built cities, and created breathtaking works of art -- while chimps remain animals concerned primarily with the basic necessities of survival. What is it about that two percent difference in DNA that has created such a divergence between evolutionary cousins? In this fascinating, provocative, passionate, funny, endlessly entertaining work, renowned Pulitzer Prize-winning author and scientist Jared Diamond explores how the extraordinary human animal, in a remarkably short time, developed the capacity to rule the world . . . and the means to irrevocably destroy it.
