Diseases Of Pigeonpea S.C. Agrawal 2003 This Book Is The Compilation Of The World Literature On Diseases Of Pigeonpea, An Important Pulse Crop Of The Indian Subcontinent, Africa, Australia And South America.
CRC Handbook of Viruses Infecting Legumes John R. Edwardson 1991-09-11 This interesting handbook discusses 145 plant viruses in 27 groups and 31 unclassified viruses in naturally infected legumes. The viruses were observed in field infections of 281 species in 64 genera of the Leguminosae. The book presents information regarding resistance sources and resistance-breeding, vectors, seed transmission, and host ranges. Measurements of virus properties are organized in tabular form for particle dimensions, serological relationships, nucleic acid
percentages, sedimentation coefficients of particles and nucleic acids, molecular weights of nucleic acids and coat proteins, optical density, and buoyant density. Handbook of Viruses Infecting Legumes is unique in that it relates inclusion cytology to plant virus detection, identification, and classification. Light and electron micrographs illustrate morphology, location, and staining reactions of inclusions. Of the 27 groups that contain viruses infecting legumes in nature, inclusions are diagnostic at the group level in 15 of these groups. Plant breeders, diagnosticians, plant virologists, and students of plant virology will find this an indispensable guide to legume viruses.

**Advances in Seed Production and Management** Ajay Kumar Tiwari 2021-02-26 High-quality seed is essential for healthy crops and greater agricultural productivity. At the same time, advances in breeding technology require equivalent advances in seed technology. In order to ensure food security, it is crucial to develop seeds that are high yielding, and resistant to drought, heat, cold, and insects. Gathering the latest research in seed sciences, the book includes contributions on seed production in crops such as legumes, sugar, rice, wheat and other cereals. It discusses a range of topics, like the effect of climate change on seed quality, production and storage; seed rouging; seed certification for different crop species; seed biology; and seed pathologies and their effective management. Integrating basic and applied research, this compendium provides valuable insights for researchers and students in agricultural and life sciences; professionals involved in seed certification and those working in quarantine laboratories; as well as plant pathologists.

The performing arts have coexisted for millennia in India and have entered the 21st century in their full glory. Now, over the past one century, cinema has elevated itself to a distinctive art form. Music existed since the Vedic times and has been interpreted in dance. Theatre has tackled both music and dance. And cinema has thrived on the interplay of all the performing arts, not excluding painting. This book captures the rich tapestry of music, dance, theatre and cinema-covering painting as well at the turn of the new millennium and touches upon the pulsating vibrations of their contemporary creativity. They make a composite whole, in the perspective of a perennial India and with some resonance from the neighbourhood lands. The visions are vivid, the canvas is widely varied and the experience unforgettable. The overview builds from the existing scenario at the turn of the 20th century and extends into the near future where one dares dream of shapes of the arts to come. The view remains kaleidoscopic: so needed by the aesthete and the art-lover-the connoisseur and the common man-to an unique and a must for every library and art connoisseur. Leadership Mosaics Across India Faris Digital Solutions Pte. Ltd. 2016-10-10 Leadership Mosaics Across India is part of the nine research reports, put together by Human Capital Leadership Institute (HCLI), each covering an Asian country. These reports develop insights and solutions that help companies in Asia to build global leaders. Leadership Mosaics Across India is HCLI’s focus on India. Comprising two key sections, the first describes the prevalent characteristics that India business leaders tend to display and how they may need to adapt for the future. The second section turns the spotlight on India’s emerging leaders, and how they can make the next leap to become global leaders. As a practical takeaway, this report also includes a cheat sheet to help new foreign leaders in India hit the ground running.

Leadership Mosaics Across India would not be possible without the support of many contributors. HCLI expresses its sincere gratitude to the C-suite (or equivalent) leaders who gamely agreed to be interviewed. Their insights, shared through honest and in-depth conversations, were invaluable in drawing out a more intricate mosaics of India leadership, both of its present and future, and of the incumbents and the emerging leaders. As Leadership Mosaics Across India continues to weave, validate, and event challenge what we know of business leadership in Asia, HCLI hopes that it will truly help companies in Asia build global leaders.

**Nodes of Translation** Martin Christof-Füchsle 2024-01-29 The volume examines translation of key German texts into the modern Indian languages as well as translation from the vernacular.
languages of South Asia into German. Our key concerns are shifting historical contexts, concepts, and translation practices. Bringing an intellectual history dimension to translation studies, we explore the history of translation, translators, and sites of translation. The organization of the volume follows some key questions. Which texts were being translated? At what point or period in time did this happen? What were the motivations behind these translations? Topics covered range from thematic nodes or clusters, e.g., translations of Economics texts and ideas into Urdu, or the translation of Marx and Engels into Marathi, to personal endeavours, such as the first Hindi translation of Goethe’s Faust done by Bholanath Sharma in 1939. Missionary as well as Marxist activist translation work from Malayalam, Tamil and Telugu is included too. On the other hand, German translations of Tagore and Gandhi setting in shortly after 1912 are also examined. Also discussed are political strategies of publication of translations from modern Indian languages guiding the output of publishing houses in the GDR after 1949. Further included are the translator’s perspective and the contemporary translation and literary culture. What happens through the process of linguistic translation in the realm of cultural translation? What can a historical study of translation tell us about the history of Indo-German intellectual entanglements in the long twentieth century? The volume brings together multifaceted interdisciplinary research work from South Asian and German studies to answer some of these questions.

**Indian Mosaic** R. H. Lesser 1975-01-01

**The Plant Viruses** R.G. Milne 2013-11-09 The original aim of this book was to cover different aspects of the traditionally "filamentous" potex-, carla-, poty-, clostero-, and capilloviruses. The title The Filamentous Plant Viruses seemed the only suitable one, but it has led us to discuss also the quite different filamentous viruses of the rice stripe group—recently officially named the tenuivirus group which otherwise, indeed, might not...
have been conveniently covered in any volume of this series. The question must be asked: What is there new that justifies the presentation of a book of this kind? An outline of the answer may be as follows. Progress has been made in elucidating the physical structure of potexvirus particles, and this work serves as an excellent model for discussion of and future experiments on the poty-, carla-, clostero-, and capilloviruses, which have comparable structures, although they are more difficult to manipulate. Work on the structure and strategy of the genomes of potyviruses is, however, relatively advanced and at a very interesting stage. The helper component that assists the aphid transmission of potyviruses has also recently received considerable attention, although the more we know about that, the less seems clear about the aphid transmission of the carlaviruses and closteroviruses, which apparently neither possess nor require a helper component.

**THEORY OF INDIAN DIAspORA: DYNAMICS OF GLOBAL MIGRATION** Dr. Madhu Tyagi 2017-01-01 In recent years, the term ‘diaspora’ has been more frequently used to characterise peoples existing away from their homelands. Khachig To”-lo¨lyan, editor of the journal Diaspora, asserts that ‘the term that once described Jewish, Greek, and Armenian dispersion now shares meanings with a larger semantic domain that includes words like immigrant, expatriate, refugee, guest-worker, exile community, overseas community, [and] ethnic community’.

Generally speaking, then, this mosaic of Indian identities abroad is presented as the mirror of India itself. India is diverse, and so too are its migrants. It is acknowledged that Indian migrants abroad tend to reproduce their own religions, family patterns, and cultures as much as possible. One is the prefix ‘Indian’. And the other is the term ‘dia-spora’. The implication of the first is that there is a single India with its people, who are somehow united under one flag. This is far from obvious. India has been described as a ‘nation and its fragments’ or an ‘invented nation.
