

# THE PATH OF RECOVERY

*Recovery is a process that happens over time. The help you need to get your life back is treatment, not "will power." Let's take a quick look at the biology of recovery.*

## treatment

### YOU ENTER TREATMENT

When you enter treatment, you have almost no naturally occurring endorphins and a significantly decreased number of opioid receptors. You may experience anxiety, agitation, insomnia, diarrhea, cramping, nausea, and vomiting.

## relief

### YOU EXPERIENCE RELIEF

Physician-directed, medication-assisted treatment uses medicine that bonds to your remaining opioid receptors to remove withdrawal symptoms. This will help cut down on threatening behaviors, illegal drug use, and wasted money and time. Now you can begin biological, psychological, and social recovery.

## remission

### PROGRESS IN RECOVERY

You have started laying the foundation for a genuine, long-lasting recovery. Your brain has begun to heal, and you have engaged in counseling services to learn important recovery skills and relapse-prevention techniques.

## recovery

### GETTING YOUR LIFE BACK

After 6-12 months of brain repair, you have developed skills to strengthen your recovery, such as finding a job, going to school, and restoring relationships. You can now focus on living your life while maintaining your recovery.

## healing

### SCIENTIFIC STUDIES SHOW

Your brain responds to treatment over a 6- to 12-month period by rebuilding opioid receptors and restarting its production of natural endorphins. The result of this healing process is that you begin to feel "normal" again.
