Integrating Ecofeminism, Globalization, and World Religions Rosemary Radford Ruether, 2005 This book addresses the practical relevance of the interconnection of feminism, ecology, and religious theological thought, and asks questions about the lack of attention to gender issues in both ecological theology and deglobalization theory. The book looks at issues of globalization, interfaith ecological theology, ecofeminism, and deglobalization movements comparatively across different world religions and across geographical regions. Shifting the Geography of Reason Marina Paola Banchetti-Robino, Clevis Ronald Headley, 2009-03-26 Here stands the first of a series of important collective statements on the proverbial problem of reason that once fled those spaces in which the person of color reached for a meeting. What other resources are left for those of us who rely on ideas in a world that offers few options short of violence or, worse, apathy but to transcend the struggle for recognition into the sphere of building new intellectual homes? One must read this courageous celebration of thinking and of asserting the value of intelligence. Lewis R. Gordon, President of the Caribbean Philosophical Association and Laura H. Carnell Professor of Philosophy at Temple University and Ongoing Visiting Professor at the University of the West Indies at Mona, Jamaica

Global Inequality David Held, Ayse Kaya, 2007-01-23 What is global inequality? How can it be measured? What are the major trends? Addressing these questions, this book examines the major issues that need to be confronted in conceptualising, measuring and analysing patterns of global inequality. It explores the implications of these patterns for politics and public policy.

Christianity and Social Systems Rosemary Radford Ruether, 2009 From the earliest interactions of Christians with the Roman Empire to today's debates about the separation of church and state, the Christian churches have been in complex relationships with various economic and political system for centuries. Renowned theologian Rosemary Radford Ruether...
analyzes the ways Christian churches historically interacted with powerful systems such as patriarchy, racism, slavery and environmentalism, while looking critically at how the church shapes these systems today. This book is neither an attack on the relationship between Christianity and these systems nor an apology but rather a nuanced examination of the interactions between them. By understanding how these interactions have shaped history, we can more fully understand how to make ethical decisions about the role of Christianity in some of today’s most pressing social issues.--BOOK JACKET.

*Globalization, Spirituality, and Justice Revised Edition* Daniel G. Groody, 2015-10-15 A theological reading of globalization and a global reading of theology. This book offers a rigorously critical, and yet inspiring, vision of justice as an integral part of Christian spirituality in our complex, globalized world. At the same time, Daniel Groody’s analysis draws on the conviction that faith and spirituality have an integral role in the struggle to achieve a more just social order.

*Flat World, Big Gaps* United Nations, 2007-03 This publication sets out an empirical analysis of the impact of economic liberalisation and globalisation on inequality, poverty and development, including recent trends in economic growth, income distribution and global inequalities, and the comparative experiences of countries that have pursued different economic policies.

*Beyond Liberation Theology* Ivan Petrella, 2013-01-03 Liberation theologies are the most important theological movement of our time. In the 20th century, their influence shook the Third and First Worlds, grass root organizations and the affluent Western academy, as well as the lives of priests and laypeople persecuted and murdered for living out their understanding of the Christian message. In the 21st C their insights and goals remain - unfortunately - as valid as ever.

*American Culture in the 1990s* Colin Harrison, 2010-03-31 American Culture in the 1990s focuses on the dramatic cultural transformations of the last decade of the millennium. Lodged between the fall of Communism and the outbreak of the War on Terror, the 1990s was witness to America's expanding influence across the world but also a period of anxiety and social conflict. National traumas such as the Los Angeles riots, the Oklahoma City bombing and the impeachment of President Clinton lend an apocalyptic air to the decade, but the book looks beyond this to a wider context to identify new voices emerging in the nation. This is one of the first attempts to bring together developments taking place across a range of different fields: from Microsoft to the Internet, from blank fiction to gangsta rap, from abject art to new independent cinema, and from postfeminism to posthumanism. Students of American culture and general readers will find this a lively and illuminating introduction to a complex and immensely varied decade. Key Features*3 case studies per chapter featuring key texts, genres, writers and artists*Chronology of 1990s American Culture*Bibliographies for each chapter*18 black and white illustrations

Knowledge for Development? Kenneth King, Simon McGrath, 2013-07-04 In 1996, the World Bank President, James Wolfensohn, declared that his organization would henceforth be ‘the knowledge bank’. This marked the beginning of a new discourse of knowledge-based aid, which has spread rapidly across the development field. This book is the first detailed attempt to analyse this new discourse. Through an examination of four agencies -- the World Bank, the British Department for International Development, the Japan International Cooperation Agency and the Swedish International Development Cooperation Agency -- the book explores what this new approach to aid means in both theory and practice. It concludes that too much emphasis has been on developing capacity within agencies rather than addressing the expressed needs of Southern ‘partners’. It also questions whether knowledge-based aid leads to greater agency certainty about what constitutes good development.

The History of Development Gilbert Rist, 2002-10 With all its hopes of a more just and materially prosperous world, development has fascinated societies in both North and South. Looking at this collective fancy in retrospect, Gilbert Rist shows the underlying similarities of its various theories and strategies, and their shared inability to transform the world. He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates.

Complex Systems Theory and Development Practice Samir Rihani, 2002 Ranging over a wide terrain of social, political and economic thinking and specific country experiences, the author explains the key concepts in complex systems theory and their possible applications in development practice. He examines various development issues and institutions in the light of what he sees as the limitations of rigid linear thinking in an essentially fluid, non-linear world. Little wonder, he concludes, that the results of half a century of development effort have been so disappointing.--BOOK JACKET.

Free Trade for the Americas? Marianne Wiesebron, Paolo Vizentini, 2013-07-18 The face of international trade is continuing to change rapidly. But while much attention is focused on where, post-Cancun, any new international negotiations under the auspices of the WTO may go, there are other developments of potentially equal importance. The United States, in particular, is prioritizing new regional trade agreements. This book focuses on the most ambitious of these negotiations -- the Free Trade Area of the Americas Agreement, which is due to be completed in 2005. This US initiative aims to replicate the NAFTA Agreement (which has bound the US, Canada and Mexico into a free trade area since 1994) across all 34 countries of South and North America (bar Cuba). This huge continental market is to be built around US-defined notions of free trade and protection of foreign investment, but will exclude the free movement of labour. This volume explains the origins and process of the negotiations -- both the complicated multilateral discussions and the bilateral agreements that have already been drafted. It explains in detail: * US strategy. * The structures and procedures of the Agreement. * The possible consequences for South America, including: Mercosur; Brazil, as Latin America's largest economy; and the region's many small economies,
which cannot possibly compete on a level playing field with the US behemoth. * The wider implications of the FTAA for the
global trading system, in particular for China, Japan and the EU. This book -- the first comprehensive, in-depth study of the
FTAA -- will be of use to trade specialists, international economists, and all those interested in the FTAA, about which very
little information is readily available in the public domain.

**Thirsty Planet** Constance Elizabeth Hunt, 2013-07-18

By the year 2025 nearly 2 billion people will live in regions experiencing absolute water scarcity. In the face of this emerging crisis, how should the planet's water be used and managed? Current international policy sees nature competing with human uses of water. Hunt takes issue with this perspective. She suggests that nature is the source of water and only by making the conservation of nature an absolute priority will we have the water we need for human use in future. It is essential, therefore, to manage water in ways that maintain the water cycle and the ecosystems that support it. This book looks at the complexity of the problem. It provides a wide array of ideas, information, case studies and ecological knowledge - often from remote corners of the developing world - that could provide an alternative vision for water use and management at this critical time. Essential and compelling reading for students on courses related to water resource management and development; water managers and decision makers, and non-specialists with an interest in global water issues.

**Participation** Bill Cooke, Uma Kothari, 2001-02

This book shows how participatory government can lead to the unjust and illegitimate exercise of power. It addresses the gulf between the almost universally fashionable rhetoric of participation, promising empowerment and appropriate development. Looking at what actually happens when consultants and activists promote and practice participatory development, this book offers a sharp challenge to the advocates of participatory development. Some contributors look at particular examples of failed participatory practice; others present more
conceptually-oriented analyses. Together they provide a new, rigorous, and provocative understanding of participatory development.

**Globalisation and Labour** Ronaldo Munck, 2002-07 Intellectual fashion currently focuses on us as consumers, but the world of production and services still needs us as workers. While globalisation has, in part, been driven over the past two decades by the transnational corporations' search for cheap labour in new regions of the South, scholarly research and the mass media have paid remarkably little attention to the consequent changes that are happening in the world of work. This book is the first to deal comprehensively and analytically with labour's response to globalisation. It provides a critical overview of the main challenges facing workers and trade unions worldwide. Its author argues that what may be described as the national period in labour history is decisively over. Now the labour movement is itself acting increasingly in a transnational manner. This holds out the hope of its playing a major role in the social regulation of a global economic system which is largely out of control. The author explains how globalisation is foisting flexibilisation and feminisation on working people, but in the process also making them conscious of their transnational links. The 'old' internationalism of the trade union movement is now showing signs of developing into a 'new' internationalism where workers develop a sense of common interest and new ways of organizing that transcend national boundaries. Drawing his evidence from what is happening to workers and trade unions in a wide range of countries in both the industrialized North and the developing South, Professor Ronaldo Munck suggests that we may be on the brink of a new version of what Karl Polanyi, many years ago, strikingly called 'the great transformation'. The implications for workers, trade unions and their transnational corporate employers could be profound.
