

Desistance From Sex Offending D Richard Laws

Social Control of Sex Offenders D. Richard Laws 2016-05-11 This book surveys the history, current status, and critical issues regarding the various mechanisms designed to control sex offenders. It shows that the social problem of sex offending is not apparently resolvable by any of the means currently employed. A large array of procedures are used in the attempt to control the difficult population of sex offenders, including: imprisonment, institutional and community treatment, community monitoring by probation and parole, electronic monitoring, registration as a sex offender, community notification of an offender's status, strict limits on behavioral movement in the community, and residence restrictions. However, these constraints on behavior are almost completely the result of public outrage regarding sensational sex crimes, overreaction of media coverage that produce inaccurate statements of potential community risk, and the efforts of the legal profession and politicians to quell this anger and foreboding by enacting legislation that supposedly confronts the risk. This book demonstrates that we have constructed a massive edifice of community control that is socially and politically driven and which has largely failed to contain sex crime.

Rethinking What Works with Offenders Stephen Farrall 2013-10-11 This important and original new book reports on a major investigation of the outcomes of probation supervision, is concerned with the key question of what works in probation, and comes at an important moment of change and development for the probation service in the UK. Unlike previous studies which have relied mostly on official data, this book makes use of over 200 interviews with men and women on probation, and their supervising Probation Officers. Rethinking What Works with Offenders has the following objectives: to understand probation work from the perspectives of those who deliver it and those to whom it is delivered to study probation intervention as a whole (in particular the probation order) rather than specific aspects to locate probation work in the wider social contexts of those on probation to analyse how probation works, and to reconceptualise probation outcomes in terms of degrees of success rather than as 'successful' or 'unsuccessful' to assess the policy implications of these conclusions This book presents an important and challenging range of findings on 'what works' in probation and with offenders, and will be essential reading for anybody professionally concerned with the present and future of probation. raises central issues at a critical time for the reorganised National Probation Service based on extensive research, including 200+ interviews essential reading for anybody interested in 'what works' in probation

Escape Routes: Contemporary Perspectives on Life After Punishment Stephen Farrall 2010-12-15 *Escape Routes: Contemporary Perspectives on Life After Punishment* addresses the reasons why people stop offending, and the processes by which they are rehabilitated or resettled back into the community. Engaging with, and building upon, renewed criminological interest in this area, *Escape Routes* nevertheless broadens and enlivens the current debate. First, its scope goes beyond a narrowly-defined notion of crime and includes, for example, essays on religious redemption, the lives of ex-war criminals, and the relationship between ethnicity and desistance from crime. Second, contributors to this volume draw upon a number of areas of contemporary research, including urban studies, philosophy, history, religious studies, and ethics, as well as criminology. Examining new theoretical work in the study of desistance and exploring the experiences of a number of groups whose experiences of life after punishment do not usually attract much attention, *Escape Routes* provides new insights about the processes associated with reform, resettlement and forgiveness. Intended to drive our understanding of life after punishment forward, its rich array of theoretical and substantive papers will be of considerable interest to criminologists, lawyers, and sociologists.

An Integrated Theory of Sexual Offending Tony Ward 2021-08-02 The book will introduce the Integrated Theory of Sexual Offending (ITSO) and start with a general overview. The core assumptions of the theory will be examined in subsequent chapters (eg the biological component, the neuropsychological systems and social competency problems), which will include the evidence and supporting theory for ITSO. The final chapters will sketch out the practical implications of ITSO for risk assessment and treatment.

Offending Identities Kirsty Hudson 2015-05-21 This book aims to explore sex offenders' perspectives of the way they are treated and managed. Whilst a great deal has been written about sex offenders and their treatment within the criminal justice system, few studies have approached the issues through an understanding of offenders' own views and perspectives on their offending behaviour and others' responses to it. This book aims to redress this imbalance. The book is based on in-depth interviews with 32 convicted male sex offenders attending three different sex offender treatment

programmes (the prison based Sex Offender Treatment Programme, Behaviour Assessment Programme and the community-led Sex Offender Groupwork Programme). Through gaining an understanding of offenders perceptions of initiatives designed to both treat and control their risk of future offending, Offending Identities at the same time helps us to evaluate the effectiveness of such schemes.

Sex Crimes and Offenders Mary Clifford 2022-05-02 Sex Crimes and Offenders emphasizes the need to focus on individual perpetrators while also stressing the importance of looking at the offender's social and cultural environments, as well as the social and political responses designed to hold perpetrators accountable and help support victims

Media, Crime and Racism Monish Bhatia 2018-04-06 Media, Crime and Racism draws together contributions from scholars at the leading edge of their field across three continents to present contemporary and longstanding debates exploring the roles played by media and the state in racialising crime and criminalising racialised minorities. Comprised of empirically rich accounts and theoretically informed analysis, this dynamic text offers readers a critical and in-depth examination of contemporary social and criminal justice issues as they pertain to racialised minorities and the media. Chapters demonstrate the myriad ways in which racialised 'others' experience demonisation, exclusion, racist abuse and violence licensed - and often induced - by the state and the media. Together, they also offer original and nuanced analysis of how these processes can be experienced differently dependent on geography, political context and local resistance. This collection critically reflects on a number of globally significant topics including the vilification of Muslim minorities, the portrayal of the refugee 'crisis' and the representations and resistance of Indigenous and Black communities. This volume demonstrates that processes of racialisation and criminalisation in media and the state cannot be understood without reference to how they are underscored and inflected by gender and power. Above all, the contributors to this volume demonstrate the resistance of racialised minorities in localised contexts across the globe: against racialisation and criminalisation and in pursuit of racial justice.

Sexual Crime and Circles of Support and Accountability Helen Elliott 2018-05-31 This book offers a collection of original contributions to current research available on Circles of Support and Accountability (CoSA) by engaging with current literature and unpublished research in the field. The book explores the role of narrative identity in desistance from sexual crime and how CoSA maps onto this, as well as a history of CoSA across the world. The text then moves into an empirical section, reporting on some unpublished findings, including an evaluation of a new prison-based CoSA in the UK. Lastly, the experiences of service users and the influence of media perceptions are explored, offering a space for the 'unheard voices' as well as consideration of future directions for practitioners. The book is relevant not just to psychologists, criminologists, social workers and students, but to practitioners and the general public with an interest in learning about CoSA. The editors of this volume have all been involved in the setting up of the Safer Living Foundation, a charity formed in 2014 to reduce and prevent sexual offending.

What is Wrong with Human Trafficking? Rita Haverkamp 2019-01-24 The overarching objective of this volume is to discuss and critique the legal regulation of human trafficking in national and transnational context. Specifically, discussion is needed not only with regard to the historical and philosophical points of departure for any criminalisation of trafficking, but also, regarding the societal and social framework, the empirical dimension such as existing statistics in the area, and the need for more data. The book combines descriptive and normative analyses of the crime of trafficking in human beings from a cross-legal perspective. Notwithstanding the enhanced interest for human trafficking in politics, the public and the media, a critical perspective such as the one pursued herewith has so far been largely absent. Against this background, this approach allows for theoretical findings to be addressed by pointing out and elaborating different, interdisciplinary conflicts and inconsistencies in the regulation of human trafficking. The book discusses the phenomenon of human trafficking critically from various angles, giving it 'shape' and showing how it comes to life in the legal regulation.

Parole, Desistance from Crime, and Community Integration National Research Council
2007-12-26 Every day, about 1,600 people are released from prisons in the United States. Of these 600,000 new releasees every year, about 480,000 are subject to parole or some other kind of postrelease supervision. Prison releasees represent a challenge, both to themselves and to the communities to which they return. Will the releasees see parole as an opportunity to be reintegrated into society, with jobs and homes and supportive families and friends? Or will they commit new crimes or violate the terms of their parole contracts? If so, will they be returned to prison or placed under more stringent community supervision? Will the communities to which they return see them as people to be reintegrated or people to be avoided? And, the institution of parole itself is challenged with three different functions: to facilitate reintegration for parolees who are ready for rehabilitation; to deter crime; and to apprehend those parolees who commit new crimes and return them to prison. In recent decades, policy makers, researchers, and program administrators have focused almost exclusively on "recidivism," which is essentially the failure of releasees to refrain from crime or stay out of prison. In contrast, for this study the National Institute of Justice (NIJ) of the U.S. Department of Justice asked the National Research Council to focus on "desistance," which broadly covers continued absence of criminal activity and requires reintegration into society. Specifically, the committee was asked (1) to consider the current state of parole practices, new and emerging models of community supervision, and what is necessary for successful reentry and (2) to provide a research agenda on the effects of community supervision on desistance from criminal activity, adherence to conditions of parole, and successful reentry into the community. To carry out its charge, the committee organized and held a workshop focused on traditional and new models of community supervision, the empirical underpinnings of such models, and the infrastructure necessary to support successful reentry. *Parole, Desistance from Crime, and Community Integration* also reviews the literature on desistance from crime, community supervision, and the evaluation research on selected types of intervention.

Understanding Desistance From Crime Farrall, Stephen 2005-12-01 Why do people stop offending? What are the processes they undergo in stopping? What can be done to help more people who have offended put their pasts behind them? The growth of interest in why people stop offending and how they are resettled following punishment has been remarkable. Once a marginal topic in criminology, it is now a central topic of research and theorising amongst those studying criminal careers. This book is both an introduction to research on desistance, and the report on a follow-up of two hundred probationers sentenced to supervision in the late 1990s. The reader is introduced to some of the wider issues and debates surrounding desistance via a consideration of the criminal careers of a group of ex-offenders. This lively engagement with both data and theoretical matters makes the book a useful tool for both academics and students. The book will appeal to undergraduates, postgraduates and academics studying criminology, criminal justice, sociology, social work, social policy and psychology, as well as trainee probation officers.

The Sex Offender Housing Dilemma Monica Williams 2018-05-08 "When a South Carolina couple killed a registered sex offender and his wife after they moved into their neighborhood in 2013, the story exposed an extreme and relatively rare instance of violence against sex offenders. While media accounts would have us believe that vigilantes across the country lie in wait for predators who move into their neighborhoods, responses to sex offenders more often involve collective campaigns that direct outrage toward political and criminal justice systems. No community wants a sex offender in its midst, but instead of vigilantism, [the author] argues, citizens often leverage moral, political, and/or legal authority to keep these offenders out of local neighborhoods. Her book, the culmination of four years of research, 70 in-depth interviews, participant observations, and studies of numerous media sources, reveals the origins and characteristics of community responses to sexually violent predators (SVP) in the U.S. Specifically, [this book] examines the placement process for released SVPs in California and the communities' responses to those placements. Taking the reader into the center of these related issues, [the author] provokes debate on the role of communities in the execution of criminal justice policies, while also addressing the responsibility of government

institutions to both groups of citizens."--

Free Them All Gwenola Ricordeau 2023-08-08 An indispensable guide to the feminist case for prison abolition How does the criminal justice system affect women's lives? Do prisons keep women safe? Should feminists rely on policing and the law to achieve women's liberation? The mainstream feminist movement has proposed "locking up the bad men," and called on prisons, the legal system, and the state to protect women from misogynist violence. This carceral approach to feminism, activist and scholar Gwenola Ricordeau argues, does not make women safer: it harms women, including victims of violence, and in particular people of color, poor people, and LGBTQ people. In this scintillating, comprehensive study, Ricordeau draws from two decades as an abolitionist activist and scholar of the penal justice system to describe how the criminal justice system hurts women. Considering the position of survivors of violence, criminalized women, and women with criminalized relatives, Ricordeau charts a new path to emancipation without incarceration. WWith a new foreword by Silvia Federici. Translated from the French by Tom Roberge and Emma Ramadan.

The focus of the volume is to provide an overview of the practical and theoretical developments to better understand desistance. A History of the Assessment of Sex Offenders D. Richard Laws 2020-02-14 There are many varieties of procedures to assess criminal and sex offenders that have emerged throughout the 19th and 20th centuries. This book is an attempt to bridge that gap, to provide some historical background of sex offender assessment from 1830 to the present.

Thoroughly rewritten to reflect a decade of advances in the field, the second edition features many new chapters and new authors. Theories of Sexual Offending Tony Ward 2006-02-22 This comprehensive text provides an up-to-date review and critique of current theorising about sexual offending. It presents the key ideas underpinning each theory in a clear and accessible manner. Theories are rigorously tested and evaluated, and their merits are examined from both a research and a clinical point of view. Importantly, the emphasis is on providing clear links between theory and practice, and the clinical implications of the different theories and perspectives are explicitly discussed. In addition, a number of new ideas about the aetiology of sexual offending are presented. Theories of Sexual Offending is one of the few books to draw all of the disparate strands of theorising together, and is the only one to clearly link theory to practice. It will be a valuable resource for any professional working with sexual offenders, such as clinical and forensic psychologists, psychiatrists, probation officers and social workers. It will also be of interest to students of forensic and clinical psychology.

Desistance from Sex Offending D. Richard Laws 2011-03-11 This book offers a fresh perspective on treating a population that is often demonized by policymakers, the public, and even clinicians. The authors argue that most sex offenders are "people like us," with the potential to lead meaningful, law-abiding lives—if given a chance and appropriate support. They describe an empirically and theoretically grounded rehabilitation approach, the Good Lives Model, which can be integrated with the assessment and intervention approaches that clinicians already use. Drawing on the latest knowledge about factors promoting desistance from crime, the book discusses how encouraging naturally occurring desistance processes, and directly addressing barriers to community reintegration, can make treatment more effective and long lasting.

Sexual Offending Patrick Lussier 2018-04-17 There is growing recognition that sexual offending is a multi-determined phenomenon requiring a multi-disciplinary perspective. The significant contribution of psychology and psychiatry, but also sociology, gender studies and anthropology to the study of sex offending and perpetrators of sex offenses has played a key role in the development of a distinct field of research. In recent years, however, there has been an increase in criminological research on the topic, introducing criminological theory and concepts, scientific evidence and observations, and new methodologies to the field. This book brings together international leading scholars to consider key topics on sex offending and, where possible, compare and contrast criminological viewpoints with those of other disciplines, such as psychology and psychiatry. This book considers the following questions: Are the key explanatory factors of sex offenses completely distinct and different from those of non-sex crime and delinquency? Are current models explaining adult sex offending also applicable to explain sex crimes on college campuses, female sex offending,

sexual exploitation, sexual homicide, or child luring over the internet? Are today's youth involved in sex offenses tomorrow's adult perpetrators of sex crimes? What is the risk of sexual recidivism and are risk assessment tools effective to identify individuals at-risk of committing another sex crime in the future? Are current legal measures used to prevent sex crimes effective? What are the known effects of such measures? What are the issues and challenges related to the criminal investigation of sex offenses? This book is essential reading for students and researchers from disciplines such as criminology, psychiatry, psychology, sexology, social work and sociology, as well as criminal justice professionals and practitioners such as police investigators, prosecutors, judges, probation/parole officers, and treatment providers/counsellors involved with individuals having perpetrated sex offenses.

Treatment of Sex Offenders D. Richard Laws 2016-02-29 This rigorous survey offers a comprehensive rethinking of the assessment and treatment of sexual offenders for a bold challenge to practitioners. It critiques what we understand about offenders and the mechanisms of offending behaviors, and examines how this knowledge can best be used to reduce offending and relapses. To this end, experts weigh the efficacy of common assessment methods and interventions, the value of prevention programs, and the validity of the DSM's classifications of paraphilias. This strengths/weaknesses approach gives professional readers a guide to the current state as well as the future of research, practice, and policy affecting this complex and controversial field. Included in the coverage: Strengths of actuarial risk assessment. Risk formulation: the new frontier in risk assessment and management. Dynamic risk factors and offender rehabilitation: a comparison of the Good Lives Model and the Risk-Need-Responsivity Model. The best intentions: flaws in sexually violent predator laws. Desistance from crime: toward an integrated conceptualization for intervention. From a victim/offender duality to a public health perspective. A call to clear thought and accurate action, *Treatment of Sex Offenders* will generate discussion and interest among forensic psychologists, psychiatrists, clinical psychologists, and social workers.

Recidivism of Prisoners Released in 1994 Patrick A. Langan 2002

Sport in Prison Rosie Meek 2013-11-07 Although prison can present a critical opportunity to engage with offenders through interventions and programming, reoffending rates among those released from prison remain stubbornly high. Sport can be a means through which to engage with even the most challenging and complex individuals caught up in a cycle of offending and

imprisonment, by offering an alternative means of excitement and risk taking to that gained through engaging in offending behaviour, or by providing an alternative social network and access to positive role models. This is the first book to explore the role of sport in prisons and its subsequent impact on rehabilitation and behavioural change. The book draws on research literature on the beneficial role of sport in community settings and on prison cultures and regimes, across disciplines including criminology, psychology, sociology and sport studies, as well as original qualitative and quantitative data gathered from research in prisons. It unpacks the meanings that prisoners and staff attach to sport participation and interventions in order to understand how to promote behavioural change through sport most effectively, while identifying and tackling the key emerging issues and challenges. Sport in Prison is essential reading for any advanced student, researcher, policy-maker or professional working in the criminal justice system with an interest in prisons, offending behaviour, rehabilitation, sport development, or the wider social significance of sport.

Offender Rehabilitation Gwen Robinson 2009-01-22 'Robinson and Crow have achieved the seemingly impossible: a book about rehabilitation that transcends the "medical model", that is original and contemporary yet grounded in a sophisticated history, and most of all that is fun to read. It will become a new classic text in a field that has been crying out for one' - Professor Shadd Maruna, Queen's University, Belfast 'In an age where there is much public and political confusion about many criminal justice matters, this book brings considerable clarity to the idea of rehabilitation, its theoretical and historical roots, and contemporary practical application. This is an accessible, lively, and critical account of a concept which is central to the shape of the criminal justice system in pursuance of something that will "work" to reduce reoffending. "Rehabilitation" seems to go in and out of fashion depending on the politics of the day, but the careful and thorough examination of the different contexts in which it operates and competing perspectives on its potential offered here highlights its enduring qualities. This is a fascinating and engaging book by two established and "real world" scholars which will serve students and policy makers alike in the fields of criminal justice and social policy' - Loraine Gelsthorpe, Reader in Criminology and Criminal Justice, Institute of Criminology, University of Cambridge This comprehensive text explains all the key themes in the development and practice of offender rehabilitation. It explores how the issue fits within its wider social and political contexts, giving an insight into its current and future relevance to criminal justice. The book covers the full range of rehabilitative approaches, exploring how criminal justice responses have been influenced by trends such as the treatment model, 'What Works?', desistance, risk and public protection, and changes in social policy. It offers the following essential features: " theoretical grounding - providing students with all the essential background they need in order to fully understand the subject " historical context - enabling the reader to see how ideas, policies and practices have developed over time " research focus - introducing the reader to questions about how rehabilitative approaches have been evaluated and debates about 'what works' for particular groups of offenders, such as sexual offenders and drug misusers " study questions and further reading - giving students the tools both to revise and to expand their knowledge Offender Rehabilitation both advances thinking about the notion of rehabilitation, and ensures that students of crime and justice can keep abreast of the most recent developments in this area.

Desistance from Sexual Offending Danielle Arlanda Harris 2017-11-25 This book describes the complex process of desistance from sexual crime as told by 74 men incarcerated for sexual offenses

and released back into the community. Unlike much of the research on this topic, Harris places strong emphasis on how men who have committed serious sexual offenses come to stop offending and end their 'criminal career'. Drawing on in-depth interviews, Harris outlines three main strategies that the men employ in order to pursue offense-free lives. The Retirement Strategy is divided into those who appear to simply 'resign' and those who go on to 'rebuild' their lives. The Regulation Strategy characterizes desistance as a product of one's ability to navigate increasingly restrictive legislation ('restricted,' 'rehearsed,' 'resistant,' and 'reclusive' desistance). The men who describe their desistance in terms of Recovery do so either through 'rehabilitation' or through 'resilience.' This original and engaging study will be of great interest not only to academics who study sexual aggression but also those who have survived sexual abuse themselves, and anyone working with survivors of sexual abuse, individuals convicted of sexual offenses, their families, and their communities.

Restorative Justice Gerry Johnstone 2013-03 Restorative justice is one of the most talked about developments in the field of crime and justice. Its advocates and practitioners argue that state punishment, society's customary response to crime, neither meets the needs of crime victims nor prevents reoffending. In its place, they suggest, should be restorative justice, in which families and communities of offenders encourage them to take responsibility for the consequences of their actions, express repentance and repair the harm they have done. First published in 2002, *Restorative Justice: Ideas, Values, Debates* is renowned worldwide as an accessible, balanced and invaluable analysis of the argument that restorative justice can provide an attractive alternative to traditional responses to crime. The second edition includes a new chapter identifying and analyzing fundamental shifts and developments in restorative justice thinking over the last decade. It suggests that the campaign for restorative justice has not only grown rapidly in the last decade, but has also changed in its focus and character. What started as a campaign to revolutionize criminal justice has evolved into a social movement that aspires to implant restorative values into the fabric of everyday life. This new edition explores the implications of this development for restorative justice's claim to provide a feasible and desirable alternative to mainstream thinking on matters of crime and justice. This book provides an essential introduction to the most fundamental and distinctive ideas of restorative justice and will appeal to students of criminology, law or related disciplines or researchers and professionals with an interest in crime and justice issues. In addition it extends the debate about the meaning of restorative justice - pros, cons and wider significance - hence it will also be of interest to those already familiar with the topic.
