Girls of Paper and Fire - Natasha Ngan 2018-11-06

Uncover a riveting story of palace intrigue set in a sumptuous Asian-inspired fantasy world in the breakout YA novel that Publisher's Weekly calls "elegant and adrenaline-soaked." In this richly developed fantasy, Lei is a member of the Paper caste, the lowest and most persecuted class of people in Ikhara. She lives in a remote village with her father, where the decade-old trauma of watching her mother snatched by royal guards for an unknown fate still haunts her. Now, the guards are back and this time it's Lei they're after -- the girl with the golden eyes whose rumored beauty has piqued the king's interest. Over weeks of training in the opulent but oppressive palace, Lei and eight other girls learns the skills and charm that befit a king's consort. There, she does the unthinkable: she falls in love. Her forbidden romance becomes enmeshed with an explosive plot that threatens her world's entire way of life. Lei, still the wide-eyed country girl at heart, must decide how far she's willing to go for justice and revenge.

Becoming Bulletproof - Evy Poumpouras 2020-04-21

Former Secret Service agent and star of Bravo's Spy Games Evy Poumpouras shares lessons learned from protecting presidents, as well insights and skills from the oldest and most elite security force in the world to help you prepare for stressful situations, instantly read people, influence how you are perceived, and live a more fearless life. Becoming Bulletproof means transforming yourself into a stronger, more confident, and more powerful person. Evy Poumpouras—former Secret Service agent to three presidents and one of only five women to receive the Medal of Valor—demonstrates how we can overcome our everyday fears, have difficult conversations, know who to trust and who might not have our best interests at heart, influence situations, and prepare for the unexpected. When you have become bulletproof, you are your best, most courageous, and most powerful version of you. Poumpouras shows us that ultimately true strength is found in the mind, not the body. Courage involves facing our fears, but it is also about resilience, grit, and having a built-in BS detector and knowing how to use it. In Becoming Bulletproof, Poumpouras demonstrates how to heighten our natural instincts to employ all these qualities and move from fear to fearlessness.

Woman Evolve - Sarah Jakes Roberts 2021-04-06

A New York Times bestseller! With life lessons she's learned and new insights from the story of Eve, Sarah Jakes Roberts shows you how past disappointments, struggles, and even mistakes can be used today to help you become the woman God intended. Who would imagine being friends with Eve—the woman who's been held responsible for the fall of humanity (and cramps) for thousands of years? Certainly not Sarah Jakes Roberts. That is, not until Sarah discovered she is more like Eve than she cares to admit. Everyone faces trials, and everyone will mess up. But failure should not be the focus. Your focus should not be on who you were but rather the pursuit of who you can become. In Woman Evolve, Sarah helps you understand that your purpose in life does not change; it evolves. Making her mistake in the Garden of Eden, Eve became the first woman to deal with rebuilding her life in the aftermath of her past. Eve knew better, but she didn't do better. With scriptural lessons, Eve as the framework, and Sarah as your guide you will discover and work through: Past issues and insecurities that haunt you Seeing yourself as God sees you and trusting Him with who you really are How to come out of darkness and pursue a real relationship with God Why it's important to truly care for yourself Setting in motion the beautiful seed that God planted in you Your fears and insecurities may have changed how you viewed God, others, and yourself, but in Woman Evolve, you can break through and use past mistakes to revolutionize your life. Like Eve, you don't have to live your future defined by your past.

Distancing Representations in Transgender Film - Lucy J. Miller 2023-02-01

Distancing Representations in Transgender Film explores the representation of transgender identity in several important cinema genres: comedies, horror films, suspense thrillers, and dramas. In a critique that is both deeply personal and theoretically sophisticated, Lucy J. Miller examines how these representations are often narratively and visually constructed to prompt emotions of ridicule, fear, disgust, and sympathy from a cisgender audience. Created by and for cisgender people, these films do not accurately represent transgender people's experiences, and the emotions they inspire serve to distance cisgender audience members from the transgender people they encounter in their day-to-day lives. By helping to increase the distance between cisgender and transgender people, Miller argues, these films make it more difficult for cisgender people to understand the experiences of transgender people and for transgender people to fully participate in public life. The book concludes with suggestions for improving transgender representation in film.

Bringing Down the Duke - Evie Dunmore 2019-09-03

"Dunmore is my new find in historical romance. Her *A League of Extraordinary Women* series is, well, extraordinary."—Julia Quinn, #1 New York Times bestselling author "With her sterling debut, Evie Dunmore dives into a fresh new space in historical romance that hits all the right notes."—Entertainment Weekly A stunning debut for author Evie Dunmore and her Oxford suffragists in which a fiercely independent vicar's daughter takes on a powerful duke in a fiery love story that threatens to upend the British social order. England, 1879. Annabelle Archer, the brilliant but destitute daughter of a country vicar, has earned herself a place among the first cohort of female students at the renowned University of Oxford. In return for her scholarship, she must support the rising women's suffrage movement. Her charge: recruit men of influence to champion their cause. Her target: Sebastian Devereux, the cold and calculating Duke of Montgomery who steers Britain's politics at the Queen's command. Her challenge: not to give in to the powerful attraction she can't deny for the man who opposes everything she stands for. Sebastian is appalled to find a suffragist squad has infiltrated his ducal home, but the real threat is his impossible feelings for green-eyed beauty Annabelle. He is looking for a wife of equal standing to secure the legacy he has worked so hard to rebuild, not an outspoken commoner who could never be his duchess. But he wouldn't be the greatest strategist of the Kingdom if he couldn't claim this alluring bluestocking without the promise of a ring...or could he? Locked in a battle with rising passion and a will matching her own, Annabelle will learn just what it takes to topple a duke.... "There is nothing quite so satisfying as seeing such a man brought to his knees by a beautiful woman with nothing to her name except an inviolable sense of her own self-worth."—NPR

Advances in Virtual Agents and Affective Computing for the Understanding and Remediation of Social Cognitive Disorders - Eric Brunet-Gouet 2016-03-02

Advances in modern sciences occur thanks to within-fields discoveries as well as confrontation of concepts and methods from separated, sometimes distant, domains of knowledge. For instance, the fields of psychology and psychopathology benefited from accumulated contributions from cognitive neurosciences, which, in turn, received insights from molecular chemistry, cellular biology, physics (neuroimaging), statistics and computer sciences (data processing), etc. From the results of these researches, one can argue that among the numerous cognitive phenomena supposedly involved in the emergence the human intelligence and organized behavior, some of them are specific to the social nature of our phylogenetic order. Scientific reductionism allowed to divide the social cognitive system into several components, i.e. emotion processing and regulation, mental state inference (theory of mind), agency, etc. New paradigms were progressively designed to investigate these processes within highly-controlled laboratory settings. Moreover, the related constructs were successful at better understanding psychopathological conditions such as autism and schizophrenia, with partial relationships with illness outcomes. Here, we would like to outline the parallel development of concepts in social neurosciences and in other domains such as computer

science, affective computing, virtual reality development, and even hardware technologies. While several researchers in neurosciences pointed out the necessity to consider naturalistic social cognition (Zaki and Ochsner, *Ann N Y Acad Sci* 1167, 16-30, 2009), the second person perspective (Schilbach et al., *Behav Brain Sci* 36(4), 393-414, 2013) and reciprocity (de Bruin et al., *Front Hum Neurosci* 6, 151, 2012), both computer and software developments allowed more and more realistic real-time models of our environment and of virtual humans capable of some interaction with users. As noted at the very beginning of this editorial, a new convergence between scientific disciplines might occur from which it is tricky to predict the outcomes in terms of new concepts, methods and uses. Although this convergence is motivated by the intuition that it fits well ongoing societal changes (increasing social demands on computer technologies, augmenting funding), it comes with several difficulties for which the current *Frontiers in* topic strives to bring some positive answers, and to provide both theoretical arguments and experimental examples. The first issue is about concepts and vocabulary as the contributions described in the following are authored by neuroscientists, computer scientists, psychopathologists, etc. A special attention was given during the reviewing process to stay as close as possible to the publication standards in psychological and health sciences, and to avoid purely technical descriptions. The second problem concerns methods: more complex computerized interaction models results in unpredictable and poorly controlled experiments. In other words, the assets of naturalistic paradigms may be alleviated by the difficulty to match results between subjects, populations, conditions. Of course, this practical question is extremely important for investigating pathologies that are associated with profoundly divergent behavioral patterns. Some of the contributions of this topic provide description of strategies that allowed to solve these difficulties, at least partially. The last issue is about heterogeneity of the objectives of the researches presented here. While selection criteria focused on the use of innovative technologies to assess or improve social cognition, the fields of application of this approach were quite unexpected. In an attempt to organize the contributions, three directions of research can be identified: 1) how innovation in methods might improve understanding and assessment of social cognition disorders or pathology? 2) within the framework of cognitive behavioral psychotherapies (CBT), how should we consider the use of virtual reality or augmented reality? 3) which are the benefits of these techniques for investigating severe mental disorders (schizophrenia or autism) and performing cognitive training? The first challenging question is insightfully raised in the contribution of Timmermans and Schilbach (2014) giving orientations for investigating alterations of social interaction in psychiatric disorders by the use of dual interactive eye tracking with virtual anthropomorphic avatars. Joyal, Jacob and collaborators (2014) bring concurrent and construct validities of a newly developed set of virtual faces expressing six fundamental emotions. The relevance of virtual reality was exemplified with two contributions focusing on anxiety related phenomena. Jackson et al. (2015) describe a new environment allowing to investigate empathy for dynamic FACS-coded facial expressions including pain. Based on a systematic investigation of the impact of social stimuli modalities (visual, auditory), Ruch and collaborators are able to characterize the specificity of the interpretation of laughter in people with gelotophobia (2014). On the issue of social anxiety, Aymerich-Franch et al. (2014) presented two studies in which public speaking anxiety has been correlated with avatars' similarity of participants' self-representations. The second issue focuses on how advances in virtual reality may benefit to cognitive and behavioral therapies in psychiatry. These interventions share a common framework that articulates thoughts, feelings or emotions and behaviors and proposes gradual modification of each of these levels thanks to thought and schema analysis, stress reduction procedures, etc. They were observed to be somehow useful for the treatment of depression, stress disorders, phobias, and are gaining some authority in personality disorders and addictions. The main asset of new technologies is the possibility to control the characteristics of symptom-eliciting stimuli/situations, and more precisely the degree to which immersion is enforced. For example, Baus and Bouchard (2014) provide a review on the extension of virtual reality exposure-based therapy toward recently described augmented reality exposure-based therapy in individuals with phobias. Concerning substance dependence disorders, Hone-Blanchet et collaborators (2014) present another review on how virtual reality can be an asset for both therapy and craving assessment stressing out the possibilities to simulate social interactions associated with drug seeking behaviors and even peers' pressure to consume. The last issue this *Frontiers* topic deals with encompasses the questions raised by social

cognitive training or remediation in severe and chronic mental disorders (autistic disorders, schizophrenia). Here, therapies are based on drill and practice or strategy shaping procedures, and, most of the time, share an errorless learning of repeated cognitive challenges. Computerized methods were early proposed for that they do, effortlessly and with limited costs, repetitive stimulations. While, repetition was incompatible with realism in the social cognitive domain, recent advances provide both immersion and full control over stimuli. Georgescu and al. (2014) exhaustively reviews the use of virtual characters to assess and train non-verbal communication in high-functioning autism (HFA). Grynspan and Nadel (2015) present an original eye-tracking method to reveal the link between gaze patterns and pragmatic abilities again in HFA. About schizophrenia, Oker and collaborators (2015) discuss and report some insights on how an affective and reactive virtual agents might be useful to assess and remediate several defects of social cognitive disorders. About assessment within virtual avatars on schizophrenia, Park et al., (2014) focused on effect of perceived intimacy on social decision making with schizophrenia patients. Regarding schizophrenia remediation, Peyroux and Franck (2014) presented a new method named RC2S which is a cognitive remediation program to improve social cognition in schizophrenia and related disorders. To conclude briefly, while it is largely acknowledged that social interaction can be studied as a topic of its own, all the contributions demonstrate the added value of expressive virtual agents and affective computing techniques for the experimentation. It also appears that the use of virtual reality is at the very beginning of a new scientific endeavor in cognitive sciences and medicine.

An Enchantment of Ravens - Margaret Rogerson 2017-09-26

An instant New York Times bestseller! An Indie Next Top 10 Pick A Parents' Choice Silver Honor Winner "A funny, action-packed, and sweet romance." —School Library Journal (starred review) "A phenomenal read." —RT Book Reviews A skilled painter must stand up to the ancient power of the faerie courts—even as she falls in love with a faerie prince—in this gorgeous bestseller that's "an ideal pick for fans of Holly Black, Maggie Stiefvater, and Laini Taylor" (Publishers Weekly, starred review). Isobel is an artistic prodigy with a dangerous set of clients: the sinister fair folk, immortal creatures who cannot bake bread or put a pen to paper without crumbling to dust. They crave human Craft with a terrible thirst, and Isobel's paintings are highly prized. But when she receives her first royal patron—Rook, the autumn prince—she makes a terrible mistake. She paints mortal sorrow in his eyes—a weakness that could cost him his life. Furious, Rook spirits her away to his kingdom to stand trial for her crime. But something is seriously wrong in his world, and they are attacked from every side. With Isobel and Rook depending on each other for survival, their alliance blossoms into trust, then love—and that love violates the fair folks' ruthless laws. Now both of their lives are forfeit, unless Isobel can use her skill as an artist to fight the fairy courts. Because secretly, her Craft represents a threat the fair folk have never faced in all the millennia of their unchanging lives: for the first time, her portraits have the power to make them feel.

The Girls - Emma Cline 2016-06-02

** The Sunday Times Top Ten Bestseller ** ** The New York Times Top Ten Bestseller ** The UK's best selling hardback debut novel of 2016 Selected as a Book of the Year 2016 in the Evening Standard, Observer and The Times California. The summer of 1969. In the dying days of a floundering counter-culture a young girl is unwittingly caught up in unthinkable violence, and a decision made at this moment, on the cusp of adulthood, will shape her life.... 'This book will break your heart and blow your mind.' Lena Dunham Evie Boyd is desperate to be noticed. In the summer of 1969, empty days stretch out under the California sun. The smell of honeysuckle thickens the air and the sidewalks radiate heat. Until she sees them. The snatch of cold laughter. Hair, long and uncombed. Dirty dresses skimming the tops of thighs. Cheap rings like a second set of knuckles. The girls. And at the centre, Russell. Russell and the ranch, down a long dirt track and deep in the hills. Incense and clumsily strummed chords. Rumours of sex, frenzied gatherings, teen runaways. Was there a warning, a sign of things to come? Or is Evie already too enthralled by the girls to see that her life is about to be changed forever?
