Puppies are eating machines. Since they eat so much, this makes them potty machines. They grow and develop rapidly at the puppy stage, and they eat lots of food, burn up tons of energy, and they need to eliminate often and usually go wherever they want. Puppies are like babies, they do not have developed bowel and bladder control and can't "hold it" as long as an adult dog. * * * Puppies come with challenges. They need to be taught how to interact with people and other animals, go potty, stop chewing and biting, and so many other behaviors. * * * Puppies aren't totally untrained when you first pick them up. Their moms keep the area clean and free from puppy contamination until her puppies are old enough to follow her out of the den to relieve themselves. A mother's training is the beginning of a puppy's early training. Your puppy instinctively knows not to use the potty where they sleep. This makes a puppy as young as six weeks a bit easier when trying to teach them the basics of potty training. Get Your Copy Now!

Crate Training Your Dog - Pat Storer 2012-03-11

Ease Your Mind And Indulge Your Dog! If you want your dog to feel safe and secure in your home, it's time to crate train! A crate is designed as much for a dog's well-being as it is for the owner's convenience and peace of mind. For example, a crate keeps a curious puppy away from chemicals under the kitchen sink, gives a sick or convalescing dog a quiet place to rest, and secures a rambunctious dog during car trips. Crate training works because dogs, like their wild ancestors, desire a snug "den" that affords security and privacy. When dogs are crate trained properly, they accept and even enjoy their sequestered time. Pat Storer shows you how to maintain a positive, loving attitude while being firm and consistent with your dog. With Storer's advice on choosing the right crate, step-by-step instructions, and tips for dealing with crate-related behavior problems, both you and your dog will find crate training to be a simple, successful experience.

After You Get Your Puppy - Ian Dunbar 2001

Now you have your puppy, the clock is ticking and you need to meet three more Developmental Deadlines before your puppy is five months old. 4th Developmental Deadline - Socializing Your Puppy to People Your Most Urgent Priority is to socialize your puppy to a wide variety of people, especially children, men, and strangers, before he is twelve weeks old. Well-socialized puppies grow up to be wonderful companions, whereas antisocial dogs are difficult, time-consuming, and potentially dangerous. As a rule of thumb, your puppy needs to meet at least one hundred people before he is three months old. Since your puppy is still too young to venture out to dog parks and sidewalks, you'll need to start inviting people to your home right away. 5th Developmental Deadline - Teaching Bite Inhibition Your Most Important Priority is that your puppy learns to inhibit the force of his bites and develop a "soft mouth"; before he is eighteen weeks old.

Whenever a dog bites a person, or fights with another dog, the single most important prognostic factor is the degree of bite inhibition and hence, the likelihood and seriousness of injury. Accidents happen. Someone may tread on the dog's paw, or a child may trip over the dog while he's gnawing a bone. A dog may snap and lunge at a person when hurt or frightened, but if the dog has well-established bite inhibition, it is unlikely the dog's teeth will puncture, or even touch the skin. 6th Developmental Deadline - Continuing Socialization in The World at Large The Most Enjoyable Priority of dog ownership is to introduce your well-socialized puppy to the world at large. Your dog will only remain sociable and confident if he continues to meet and greet at least three unfamiliar people and three unfamiliar dogs every day. Meeting the same people and dogs over and over is not sufficient. Your dog needs to practice meeting, greeting, and getting along with strangers, not simply getting along with old friends. Regular walks with your dog are as essential as they are enjoyable.

How To Crate Train Your Dog - Mitchel Bierwirth 2021-08-10

Crate training is a method for teaching your puppy not to relieve themselves in your home. Dogs Hate Crates - Ray Lincoln 2012

The first comprehensive expose on damage dogs and their families suffer from excessive crating, both in puppy mills and private homes. *Dogs Hate Crates* reveals that many owners who buy their dogs rhinestone collars and call them "babies" also lock them in small cages for 18-23 hours a day. And although "crate training" is proven to cause hundreds of physical, emotional and social problems and is a poor method for behavior and housetraining, many dog industry "experts", motivated by \$50 Billion in greed, are attempting to persuade America that "dogs love crates". Free of emotional bias, *Dogs Hate Crates* details scientific and neurologic research, expert opinions and true case studies to demonstrate hundreds of serious symptoms caused by excessive crating, ranging from fear to dislike of humans. The book also contrasts cases of criminally abusive crating, puppy mill raids and atrocities against dogs with quotes from well-loved animal behavior experts on dogs transforming lives as nature's ambassadors and physical healers. And the authors provide effective behavior shaping and housetraining instructions as alternatives to crating. Contemporary cultural trends make America vulnerable to crating propaganda at home; and allow commercial puppy mill breeders who keep dogs caged their entire lives to sell as many as 4 million pups a year to unsuspecting consumers. *Dogs Hate Crates* examines the relationship between monetary profit and the growing popularity of caging dogs, and identifies surprising players in the pet industry and beyond that likely benefit in the millions, and billions, from dogs' and owners' distress. This groundbreaking book is meant to inspire further action and investigation by behavior experts, veterinarians, scientists, journalists/media and government- and everyone who cares about animals- to remedy one of the biggest abuses of dogs today. (*Dogs Hate Crates* is the new updated version of the book originally titled *Caged Love*.)
