

Living Sexuality Issues For Nursing And Health

Nursing Knowledge & Practice - Maggie Mallik 1998

Introducing the first truly integrated approach to foundation nursing knowledge, from the biological, psycho-social sciences into core nursing knowledge. This text adopts a unique decision-making approach that encourages critical thinking and the development of decision making skills. Addresses the fundamental aspects of care which are primarily nursing responsibilities and also features helpful summaries of key research findings.

EBOOK: Sexuality, Sexual Health and Ageing - Merryn Gott 2004-12-16

·What factors underpin dominant understandings of later life sexuality? · How do older people experience and prioritise sexuality and sexual health? ·What sexual health issues are relevant to older people and how are these addressed by health care professionals? This is the first book to integrate theoretical insights into sexuality, sexual health and ageing, with research findings from studies conducted with older people and the professionals that work with them. The book is split into three sections. In the first section stereotypes that typify contemporary understandings of sexuality and ageing are explored, particularly the 'myth of asexual old age' and the more recent stereotype of the 'sexy oldie'. Section two identifies what we actually know about ageing and sexuality by reviewing current literature, as well as presenting findings from one of the first qualitative studies to explore sexuality from the perspective of older people themselves. The final section of the book explores what 'sexual health' means within the context of ageing and focuses on issues relevant to health professionals working with older people. Sexuality, Sexual Health and Ageing provides key reading for students, researchers, practitioners and policymakers working within gerontology, sociology, psychology, social work, health sciences, nursing and medicine. This book is likely to become essential reading for all academics and professionals working with older people or in the area of sexual health.

Cancer Nursing - Jessica Corner 2009-03-16

The needs of cancer patients and their families are complex. Yet still more complex are the powerful social and cultural forces that shape the delivery of cancer care, and the way in which it is experienced. Cancer Nursing: Care in Context addresses this by adopting a unique approach that situates cancer care in the context of society's attitudes to the disease, and the broader every-day needs of both patients and their carers. By combining evidence-based information, a critical view of care and treatment, and 'first-hand accounts' of having cancer and caring for people with cancer, the book provides a new perspective how best to deliver the care that patients truly require. This second edition includes new chapters on prevention, diagnosis, symptoms, self-help and self-management, and living with cancer long-term. It also: * Addresses significant changes in cancer care, including expansion of nursing roles, the establishment of cancer networks and cancer collaborative projects * Considers NICE guidance on Supportive and Palliative care * Incorporates material on prevention and early detection * Includes evidence tables based on relevant literature Cancer Nursing: Care in Context is an invaluable resource for all those involved in the provision of cancer care and support to patients and their families.

Nursing Care and the Activities of Living - Ian Peate 2009-08-10

This book gives a practical focus to the underpinning theory of nursing in order to help students through the academic part of their undergraduate course as well as their placement. The book is based on the activities of living model so each activity has its own chapter, allowing readers to dip in and out. It is essential reading for students, enabling them to understand and manage the many clinical issues they face on a daily basis when nursing adults on wards, in clinics and in the community setting.

Living with Chronic Illness and Disability - Esther Chang 2021-10-12
Fully updated and refreshed to reflect current knowledge, data and perspectives

The Challenge of Sexuality in Health Care - Hazel Heath 2008-04-15

This book provides a comprehensive overview of the range of issues and concerns related to sexuality and health care. It describes the normal processes and issues which arise at different stages in a person's life connected with sexuality, and goes on to describe the particular issues and concerns that arise when there is illness, disfigurement, physical or

mental disability. The Challenge of Sexuality in Health Care will provide qualified nurses, students, and health care professionals with the confidence to encourage patients to raise any concerns they might have.

Ebersole and Hess' Gerontological Nursing & Healthy Aging - E-Book - Theris A. Touhy 2021-04-07

Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' Gerontological Nursing & Healthy Aging, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.

Older People and Mental Health Nursing - Rebecca Neno 2008-04-15

Older People and Mental Health Nursing provides an evidence-based guide to caring for the growing number of older people with mental health issues. It focuses on the knowledge and key skills which practitioners require to work effectively with older people who have, or are at risk of developing, mental health needs. Divided into five sections, Older People and Mental Health Nursing first explores the background, historical perspectives and influences on mental health care in later life. It then looks at the ethical and legal issues involved, therapeutic relationships, and the values underpinning support and care. Part three focuses on aspects which have traditionally been neglected in mental health care, including culture, religion and sexuality. Part four details specific mental health issues for older people, including delirium, depression, and dementia. The final section explores future trends in older people's mental health and offers ideas on how nursing is developing, and could develop, to address these. Offers a practical evidence-based guide to the care of older people with mental health conditions Includes thought provoking practice examples throughout Contains guidelines for nursing practice & therapeutic interventions Includes case studies and reflective scenarios Written by experts in the field

Palliative Nursing - Shaun Kinghorn 2007-11-14

This title is directed primarily towards health care professionals outside of the United States. Content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally, particularly the UK NICE guidance on Supportive and palliative care for people with cancer and the Care of the Dying Pathway. It reflects the rapid development of palliative nursing as an emerging specialty. It helps in the process of defining palliative nursing and how it interfaces with other disciplines within the specialty. The text is divided into three sections and comprehensively, yet sensitively, covers all aspects of palliative nursing. Key themes covered include pain control, symptom control, loss and grief, and handling loss. A strong emphasis is placed on the integration of theory and practice and evidence based care. Reconciliation of the theory and practice is achieved by the use of case studies. It addresses malignant and non-malignant palliative care. Research and extensive literature support each chapter. Content has been thoroughly revised and updated in line with changes in practice and policy both locally and internationally, particularly the UK NICE guidance on Supportive and palliative care for people with cancer and the Care of the Dying Pathway. Three new chapters on: Sexuality. Care of the Dying Pathway. Changing roles of the nurse in palliative care. New appendix on North American drug names equivalents for the international market

Sexual Difficulties After Traumatic Brain Injury and Ways to Deal with it - Ronit Aloni 2003

Provides professional with an understanding of the issue of sexuality after traumatic brain injury and how to plan an intervention program at various stages of the rehabilitation process.

Sexuality & Ageing - Walter Pierre Bouman 2017-10-02

Across the globe, both in developed and developing countries, the population is rapidly ageing. In the fields of sexual and relationship therapy and sexual health, ageing has not been an issue of priority. Too often, ageing is thought of as a process that relates to problems, deficits, and taboos, and less to pleasure, change, growth and diversity. It is treated as a separate life stage and not a process throughout the lifecycle. Sexuality and sexual health are important parts of the lives of older people, as they have a significant impact on quality of life, psychological well-being and physical health, as well as social and family life. This book brings together contributions from those currently writing on and researching ageing as it relates, in a therapeutic context, to gender identity, to sex and sexuality, and to intimate relationships. This book was originally published as a special issue of *Sexual and Relationship Therapy*.

Midwifery and Sexuality - Sam Geuens 2023-03-09

This first open-access book on midwifery and sexuality integrates sexual health into the care for the pregnant and postpartum couple. It addresses sexuality and intimacy from an education and prevention perspective instead of just focusing on treating problems, aiming to foster the development of sexual well-being and happy couplehood. Sexuality and intimacy are essential elements in the bonding of the couple and the parents-to-be. That process can be seriously hampered by sexual problems due to mutual misunderstanding, fear and sexual troubles (especially when the natural processes of conceiving, pregnancy and delivery are disturbed). In this phase of life, disruption of intimacy, sexuality and sexual relationship is a significant risk factor for developing couple and family problems. The need for such a book stems from the very limited attention given to this health area in the daily practice of most midwives and related healthcare professionals. In building a close relationship with the couple through frequent, intense, longstanding contact, the midwife acquires a perfect position to address sexuality and intimacy. With 36 authors from 14 countries, the book comprises five modules: 1. Sexuality; 2. Sexual aspects of the various phases of reproduction when things develop without complications; 3. Sexual aspects when those same phases deviate from physiology; 4. Special topics on sexuality relevant to daily midwifery practice; 5. Teaching, learning, skills and competencies with regard to sexuality. This new practical textbook guides healthcare professionals such as midwives, obstetricians, gynaecologists, nurses, general practitioners, pelvic floor therapists, etc., by offering both basic knowledge and skills on sexual health and wellbeing, combined with modern sexological knowledge, like the entirely new topic of sexual aspects of preconception care.

Rethinking Prostitution - Graham Scambler 2003-09-02

The growth of AIDS has focused renewed attention on the institution of prostitution. In contrast to the moral panic reaction of some sectors of society, very different initiatives are being displayed by other groups in

relation to the need to scrutinize the social, moral and legal status of prostitution and to reflect on the arguments in support of and against legalising brothels, paying particular concern to prostitutes' own health. *Rethinking Prostitution* covers male as well as female sex workers and considers in detail their status in law; drugs; issues of health and health care; the changing nature of sex work; partners, boyfriends and pimps; and the potential for redefining prostitution. By drawing on the expertise of researchers across all aspects of the industry, this up-to-date text focuses on an institution and industry ripe for re-assessment. *Rethinking Prostitution* will be of considerable interest to students, lecturers and researchers in medical sociology and women's studies as well as to social workers in training and practice.

Living Sexuality - Christine Webb 1994

The title of this book aims to convey that the issues discussed are current topics of concern and also that the lives of the patients and nurses whose stories are featured are very much influenced by their sexuality. The book focuses on the implications of sexuality for patient care.

Palliative and Nursing Home Care - Samuel E. Plunkett 2011

This book examines the policies, challenges, and quality of life issues in palliative care and nursing home care facilities. Some topics discussed in this compilation include: identifying the palliative care needs of home-based dementia patients and their caregivers; the functions of sexuality in older adults living in nursing homes and increasing awareness of staff and family members to this issue; haematology and non-oncological respiratory patients in palliative care; the changing role of the licensed practical nurse in nursing home care; obese nursing residents and their special considerations; gynaecological cancer and palliative cancer care; and, neonatal palliative care.

Sex Tourism - Michael C. Hall 2005-07-08

Sex Tourism examines the issues which emerge from sex worker-client interactions and from tourists visiting 'sex destinations'. It is a comprehensive summary of past research by academics and original primary and secondary research by the authors and has examples from Asia, Australasia and the USA. The authors have generated new models to show different dimensions of sex tourism, which normalise at least some components of the sex industry, and represent a new way of looking at sex tourism by challenging the preconceived perceptions that some people have of sex tourism or confirm the impression of others. *Sex Tourism* looks at issues of importance to those working in tourism, women's studies, gender studies and social change.

Sexual Health Matters! - David Thomas Evans 2011

Sexual health matters! This motif underpins the entire thesis. With survey responses from university educators and focus group encounters with clinical professionals undertaking the UK-wide Sexual Health Skills course, the study explores ways in which specific discourses pertaining to sexual health and illness inform the need for, and provision of, professional education for nurses in England. Through using a Foucauldian 'lens' and a novel process called crystallisation in sexualities and gender epistemologies (S&GE), it was possible to shed new light on some old problems hindering nurse education. The methodologies facilitated a discursive engagement between the power / knowledge of sexual health sciences (scientia sexualis), the orthodox 'regimes of truth', and various silenced voices. The silenced voices pertain to wider, socially and clinically 'invisibilised', needs of clients or patients in relation to the provision of nurse education. Set against the backdrop of England's first ever Government strategies on teenage pregnancy, sexual health and HIV, statistics on narrow definitions of sexual ill-health are still considered the worst in western Europe. Nurses acknowledge these poor facts, and witness to additional neglect related to sexual well-being in the wider, holistic, domains of a person's life, health and relationships. Respondents recount a lack of formal sexual health education in pre- and post qualifying curricula, including incidents of critical, experiential, 'on the job', learning which are capped and thwarted by clinical and educational staff who are unable and / or unwilling to explore the full learning potential through reflection and analysis of practice. Respondents acknowledge how their professional education frequently ill-equips them to deal with requirements in practice as well as newer, public health, demands on their roles to increase preventative education and effective health promotion. This thesis gives them a voice in expressing such concerns. The outcome of this work has led to the conceptualisation of a model of 'learning for life' across a curricular triptych for professional education which supports client care. Panels of this triptych relate to the foundational or holistic dimensions of sexual health matters; ancillary aspects secondary to other health conditions, and finally, the specifics, those formally defined in epidemiology and

strategies of sexual ill-health and associated stigmas. Whether someone qualified twenty-five years ago or within the last three months, the quality and quantity of formal sexual health learning across the curricular triptych model remains negligible and incommensurate with clinical demands on professional nursing care.

Managing Intimacy and Emotions in Advanced Fertility Care - Helen Therese Allan 2009

This book is intended for nurses and midwives who work in Assisted Reproduction clinics and those who either work in, or have an interest in women's health. The number of IVF births is increasing steadily as a percentage of all births and therefore infertility may be said to be increasingly influential in women's health nursing and midwifery. The sense of connectedness which women caring for women express and as the data in this book show, women patients feel that there is something special about being cared for by female nurses and midwives. The emotions raised in clinical practice for nurses and midwives from caring for women need attention and discussion and this book is intended to contribute to a greater awareness of emotions in clinical practice even in a busy NHS. Indeed, paying attention to emotions when you are busy may help you understand and deal with the business. This book is intended for practicing nurses and midwives and therefore each chapter ends with a reflection from the author on the implications of the data for practice and an opportunity for the reader to reflect on their practice too."

Applying the Roper-Logan-Tierney Model in Practice - E-Book - Karen Holland 2019-03-11

New edition of a successful textbook which demonstrates the theory and practice of one of the most popular models of nursing. Karen Holland, Jane Jenkins and their colleagues carefully explain and explore how the Roper-Logan-Tierney Model can help today's student learn how to care for patients in a variety of health care contexts and use it as a framework for their nursing practice. Rich with 'real-life' case studies and thought provoking exercises, this book has a helpful problem solving approach

which strongly encourages further learning and reflection. New edition of a successful textbook which explains the theory and practice of one of the most popular models of nursing. Structured approach to a core range of 'activities of living' clearly illustrate how they interconnect and may be promoted, or compromised, by health and illness, and influenced by external factors. Explains the theory to show how it can be applied in practice to assess, plan, deliver and evaluate individualised nursing care. A helpful case study approach enables readers see how the model works in 'real life'. Written by experts who actively encourage a problem-solving approach to nursing care and practice. Additional exercises are designed to encourage further learning and reflective practice, as well as develop skills in literature searching and evidence-based care. Helpful appendices include a range of reference material such as the Care Plan Documentation and Audit Tool, Laboratory Reference Values, the Roper-Logan Tierney Assessment Schedule and other commonly used nursing documentation. Ideal for use in a variety of contemporary health care delivery environments including the acute and community-based settings.

Stigma and Social Exclusion in Healthcare - Caroline Carlisle 2005-08-19

Whilst those in healthcare might like to think that they work to reduce stigma and social exclusion of others, this book reveals many strategies by which healthcare professionals contribute to increasing these conditions. Written by practitioners, some of whom have themselves been stigmatised, the book exposes the hidden processes of prejudice and the dogma of ideology that permeate contemporary healthcare. Engaging with the realities of stigma through a grassroots approach, topics covered include: * hearing * sight * sexuality * HIV and AIDS * drug use * teenage pregnancy * breastfeeding * old age. **Stigma and Social Exclusion in Healthcare** provides practical solutions to problems, recommendations for training and a blueprint for the future. It will prove a valuable reference for all those wanting to deal with the issues of stigmatisation.
