Women and Men As Friends - Michael Monsour 2001-10-01

This monograph studies women and men as friends from a developmental perspective. Women and Men as Friends examines cross-sex friendships from early childhood through old age, then summarizes the findings and offers recommendations on how friendship between males and females can be encouraged throughout the life span. In each chapter three themes are documented and applied to the corresponding stage of life: *Cross-sex friendships enrich an individual's social network in generic and unique ways. *Social and structural barriers interfere with the formation of cross-sex friendships in every stage of life. *Cross-sex friendships affect and are affected by an individual's ongoing social construction of self throughout the life cycle. The primary audience for the volume is scholars and students in personal relationship study (interpersonal communication, social psychology, sociology) with a secondary audience of scholars in family studies, developmental psychology, and clinical psychologists. The book can also be used as a supplemental text in graduate and undergraduate courses for the relevant disciplines.

The New Male Female Relationship - Herb Goldberg 2000

In this ground-breaking work, Goldberg shows how traditional relationships are doomed to fail -- not because of personal inadequacies, but because of the psychological defense mechanisms that program men to behave like machines and women like children. Goldberg offers a total reevaluation of the war between the sexes in light of the enormous changes the woman's liberation movement has brought about in the last several decades. Immensely hopeful in its outlook, the book gives us a vision of just how good a relationship can be when men and women are friends and companions as well as lovers. Book jacket.

Women's Conflicts About Eating and Sexuality - Ellen Cole 2014-06-03

Women's Conflicts About Eating and Sexuality explores the strong relationships food and sex have represented to women over the years. No other book has spelled out so clearly the parallels between sex and eating nor integrated the relationship of these to women's basic need to be loved. Today's dilemma for women--be fat or go hungry--and the endless variations and unsatisfying solutions to this problem have contributed to the incidence of anorexia, bulimia, and obesity. The pursuit of slimness, the obsession with having the perfect body, excessive aerobicizing, and diet books ad nauseam are all part of this phenomenon. Authors in Women's Conflicts About Eating and Sexuality skillfully discuss the parallel between women's obsession with sex and romance in the fifties and their obsession with food today. An important book for all women, it sheds light on the complex issues facing women and devotes special attention to the career woman and the additional pressures to be slim and stay slim. The woman who reads this potentially life-changing book can examine, question, and change her behavior, using the specific step-by-step program aid included in the book. This book is for every woman who has ever worried about being too fat or too sexual. Women's Conflicts About Eating and Sexuality will appeal to women of all ages--young women and their mothers will be fascinated by the parallels between sexual obsessions of thirty years ago and the eating obsessions of today. This healing book will particularly attract single career women for whom sex and relationships are fraught with complications. Counselors and therapists will find this book an excellent resource in their work with helping women. It is also a good auxiliary text for courses in Women's Studies focusing on psychology and history of women and the sociology of women and eating disorders.

[The Social Psychology of Female-Male Relations](#) - Richard D. Ashmore 2013-10-22

The Social Psychology of Female-Male Relations: A Critical Analysis of Central Concepts covers the thoughts, feelings, and behaviours of individuals in social interaction and explicitly considers women and men in relation to one another - as individuals, as representatives of social categories, and as significant social groups. Chapter One lays out the parameters of the social psychology of female-male relations. Chapter Two contains two major insights: that gender identity is a complex, multifaceted construct and that the structure and degree of differentiation of gender identity develop and change over the life course. Chapters Three and Four present a relatively general cognitive social-psychological framework for two

important constructs, sex stereotypes and gender-related attitudes. Chapter Five offers a critique of analyses that explain the behavior of women and men in close, personal relationships in terms of sex differences in the individual dispositions of the participants. Chapter Six presents a strong and straightforward critique of the current usage of the term sex role to describe a global set of behavioral prescriptions that apply to all women and to all men. Chapter Seven presents a comprehensive review of research on gender-related patterns of behavior in task groups that cannot be found elsewhere. The concluding chapter summarizes points made in earlier chapters and offers a set of notes toward a theory of female-male relations. Social scientists (especially, psychologists, sociologists, and anthropologists) doing research on women, on men, or on women and men in relationships or in social interaction.

Practical Female Psychology for the Practical Man - Joseph W. South 2019-09-28

Practical Female Psychology for the Practical Man is a unique examination of women and relationships in an era of material equality between the sexes. Despite vast gains in the welfare of women, especially in the modern West, both men and women are finding relationships ranging from dating to marriage increasingly difficult. The author draws upon cutting edge science in evolutionary biology, and neuropsychology, and vast personal experience with women to distill some simple and practical principles men will find useful for creating and maintaining relationships with emotionally compatible women.

[Being Married, Doing Gender](#) - Caroline Dryden 2014-02-25

In one of the first psychological studies of women in heterosexual relationships, Caroline Dryden examines the social context of their experiences and emotional struggles. Unlike the developmental literature in which women are studied only as mothers, or the clinical literature which has little theoretical basis, *Being Married, Doing Gender* places case study material in the context of the power balance between women and men. Caroline Dryden finds that there are contradictions between stereotypical gender roles and the maintenance of an equal partnership that can cause problems for both women and men. *Being Married, Doing Gender* will be valuable to students studying psychology or gender and women's studies and to marriage guidance counsellors and psychotherapists.

These books offer relationship advice without explaining how you can achieve your goals authentically and from the heart. In *Loved: Relationship Rules for Women Who Thought They Knew the Rules*, renowned psychologist and coach Julie Shafer presents a new approach based on seven key rules that get to the heart of what it means to be in an adult relationship. Sex and Gender Differences in Personal Relationships - Daniel J. Canary 1998-10-16

Challenging a commonly held assumption that men and women hail from different psychological and social "planets," this illuminating work reexamines what the empirical research really shows about how the sexes communicate in close relationships. The volume demonstrates that stereotypical beliefs about men and women fail to predict their actual interaction behavior, and highlights evidence of similarities - as well as differences - between the two groups. Setting forth an integrative theory of gender differences, the authors

propose that communication behavior in different activities is the means by which sex and gender role expectations are created and sustained. This volume is suitable for students, scholars, and researchers in

communication, social psychology, marriage and family studies, and gender studies as well as clinicians working with individuals, couples, and families.
