

# Rethinking Sex Social Theory And Sexuality Research

**Sexual Inequalities and Social Justice** Niels Teunis 2007 This pioneering collection of ten ethnographically rich essays signals the emergence of a new paradigm of social analysis committed to understanding and analyzing social oppression in the context of sexuality and gender. The contributors, an interdisciplinary group of social scientists representing anthropology, sociology, public health, and psychology, illuminate the role of sexuality in producing and reproducing inequality, difference, and structural violence among a range of populations in various geographic, historical, and cultural arenas. In particular, the essays consider racial minorities including Hispanics, Koreans, and African Americans; discuss disabled people; examine issues including substance abuse, sexual coercion, and HIV/AIDS; and delve into other topics including religion and politics. Rather than emphasizing sexuality as an individual trait, the essays view it as a social phenomenon, focusing in particular on cultural meaning and real-world processes of inequality such as racism and homophobia. The authors address the complex and challenging question of how the research under discussion here can make a real contribution to the struggle for social justice.

**The Scope of Anthropology** Laurent Dousset 2012 Some of the most prominent social and cultural anthropologists have come together in this volume to discuss Maurice Godelier's work. They explore and revisit some of the highly complex practices and structures social scientists encounter in their fieldwork. From the nature-culture debate to the fabrication of hereditary political systems, from transforming gender relations to the problems of the Christianization of indigenous peoples, these chapters demonstrate both the diversity of anthropological topics and the opportunity for constructive dialogue around shared methodological and theoretical models.

**Making Sexual History** Jeffrey Weeks 2013-05-28 Jeffrey Weeks has established an international reputation as one of the most original and influential writers on the social history of sexuality.

**Are the Lips a Grave?** Lynne Huffer 2013-10-15 Lynne Huffer's ambitious inquiry redresses the rift between feminist and queer theory, traversing the space of a new, post-moral sexual ethics that includes pleasure, desire, connection, and betrayal. She begins by balancing queer theorists' politics of sexual freedoms with a moralizing feminist politics that views sexuality as harm. Drawing on the best insights from both traditions, she builds an ethics centered on eros, following Michel Foucault's ethics as a practice of freedom and Luce Irigaray's lyrical articulation of an ethics of sexual difference. Through this theoretical lens, Huffer examines everyday experiences of ethical connection and failure connected to sex, including queer sexual practices, sodomy laws, interracial love, pornography, and work-life balance. Her approach complicates sexual identities while challenging the epistemological foundations of subjectivity. She rethinks ethics "beyond good and evil" without underestimating, as some queer theorists have done, the persistence of what Foucault calls the "catastrophe" of morality. Elaborating a thinking-feeling ethics of the other, Huffer encourages contemporary intellectuals to reshape sexual morality from within, defining an ethical space that is both poetically suggestive and politically relevant, both conceptually daring and grounded in common sexual experience.

Mapping Desire:Geog Sexuality David Bell 2003-09-02 This is the first book to explore sexualities from a geographical perspective. The nature of place and notions of space are of increasing centrality to cultural and social theory. Mapping Desire presents the rich and diverse world of contemporary sexuality, exploring how the heterosexual body has been appropriated and resisted on the individual, community and city scales. The geographies presented here range across Europe, America, Australasia, Africa, the Pacific and the imaginary, cutting across city and country and analysing the positions of gay men, lesbians, bisexuals and heterosexuals. The contributors ring different interests and approaches to bear on theoretical and empirical material from a wide range of sources. The book is divided into four sections: cartographies/identities; sexualised spaces: global/local; sexualised spaces: local/global; sites of resistance. Each section is separately introduced. Beyond the bibliography, an annotated guide to further reading is also provided to help the reader map their own way through the literature.

**Sex Research and Sex Therapy** Ross Morrow 2013-06-17 Gynaecologist William Howell Masters and psychologist Virginia Eshelman Johnson pioneered research into the nature of human sexual response and the diagnosis and treatment of sexual disorders and dysfunctions from 1957 until the 1990s. This book examines their influential scientific sex research and its groundbreaking implications for sex therapy and the study of human sexuality. Until now, these developments have been largely ignored in sociology. The book illuminates how Masters and Johnson have constructed their apparently scientific ideas about sexual function and dysfunction with reference to dominant Western discourses about sexuality. In addition, the book will explore some of the wider theoretical, conceptual and historical issues relating to the study of human sexuality. These will include a critical evaluation of conventional accounts of the history of the sociology of sex, particularly in the United States, major theoretical frameworks used in the study and understanding of human sexuality, and some of the key concepts underpinning sex research and sex therapy.

Gender Raewyn Connell 2009-03-23 Introducing modern gender studies, gender theories and gender politics, this text traces the history of Western intellectuals' ideas and discusses current findings on gender differences, inequalities and patterns in the state and corporations.

**Sex, Science and Morality in China** Joanna McMillan 2014-07-30 After decades of near silence on the matter, sex is being talked about in China. But what is being said? Who is allowed to speak? And whose purposes are being served? This ground-breaking book takes a critical look at how sex in China is thought and talked about. Drawing on the work of the country's foremost sex experts, and years of research in the field, it gives an overview of the sexual landscape in China today. Including new material on transsexuals, fetishism, sex aids and pornography, the book shows that the dominant ways of thinking about sex are neither innocent nor inconsequential, and that amid catalogues of prescriptions linking self-management to the collective good, people are making decisions about how to live their sexual lives. The most lively and accessible critique of sexual discourse, this book will be essential reading for scholars in Chinese studies, cultural studies and sexuality and gender studies.

**Remaking the Body** Wendy Seymour 1998 In this major new contribution to the field of the sociology of the body, Wendy Seymour interviews people who have suffered profound bodily paralysis and explores their sense of an embodied self. Essential reading for rehabilitation professionals

*Arts and Aesthetics in a Globalizing World* Raminder Kaur 2015-01-29 This is an investigation of arts and aesthetics in their widest senses and experiences, presenting a variety of perspectives which range from the metaphysical to the political. Moving beyond art as an expression of the inner mind and invention of the individual self, the volume bridges the gap between changing perceptions of contemporary art and aesthetics, and maps globalizing currents in a number of contexts and regions. The volume includes an impressive variety of case studies offered by established leaders in the field and original and emerging scholarly talent covering areas in India, Nepal, Indonesia, Iran, Russia, Rwanda, and Germany, as well as providing transnational or diasporic perspectives. From the contradictory demands made on successful artists from the south in the global art world such as

Anish Kapoor, to images of war and puppetry created by female political prisoners, the volume compels creative and political interpretations of the ever-changing and globalizing terrain of arts and aesthetics.

**Risky Lessons** Jessica Fields 2008-06-03 Curricula in U.S. public schools are often the focus of heated debate, and few subjects spark more controversy than sex education. While conservatives argue that sexual abstinence should be the only message, liberals counter that an approach that provides comprehensive instruction and helps young people avoid sexually transmitted diseases and pregnancy is necessary. Caught in the middle are the students and teachers whose everyday experiences of sex education are seldom as clear-cut as either side of the debate suggests. *Risky Lessons* brings readers inside three North Carolina middle schools to show how students and teachers support and subvert the official curriculum through their questions, choices, viewpoints, and reactions. Most important, the book highlights how sex education's formal and informal lessons reflect and reinforce gender, race, and class inequalities. Ultimately critical of both conservative and liberal approaches, Fields argues for curricula that promote social and sexual justice. Sex education's aim need not be limited to reducing the risk of adolescent pregnancies, disease, and sexual activity. Rather, its lessons should help young people to recognize and contend with sexual desires, power, and inequalities.

**Sex in Development** Vincanne Adams 2005-04-12 *Sex in Development* examines how development projects around the world intended to promote population management, disease prevention, and maternal and child health intentionally and unintentionally shape ideas about what constitutes "normal" sexual practices and identities. From sex education in Uganda to aids prevention in India to family planning in Greece, various sites of development work related to sex, sexuality, and reproduction are examined in the rich, ethnographically grounded essays in this volume. These essays demonstrate that ideas related to morality are repeatedly enacted in ostensibly value-neutral efforts to put into practice a "global" agenda reflecting the latest medical science. *Sex in Development* combines the cultural analysis of sexuality, critiques of global development, and science and technology studies. Whether considering the resistance encountered by representatives of an American pharmaceutical company attempting to teach Russian doctors a "value free" way to offer patients birth control or the tension between Tibetan Buddhist ideas of fertility and the modernization schemes of the Chinese government, these essays show that attempts to make sex a universal moral object to be managed and controlled leave a host of moral ambiguities in their wake as they are engaged, resisted, and reinvented in different ways throughout the world. Contributors: Vincanne Adams, Leslie Butt, Lawrence Cohen, Heather Dell, Vinh-Kim Nguyen, Shanti Parikh, Heather Paxson, Stacy Leigh Pigg, Michele Rivkin-Fish

**Practicing Desire** Gary W. Dowsett 1996 Through frank and graphic interviews with 20 very different Australian gay men, this book reveals how they understand the AIDS crisis and how they have reacted to it in terms of their sex lives.

**The Theory of Reasoned Action** Cynthia Gallois 2015-04-27 *The Theory of reasoned action* explores the theory and empirical research in to the factors which influence whether people engage in high-risk practices , with specific reference to AIDS education.

**Youth, AIDS and Sexually Transmitted Diseases** Anne Mitchell 2020-03-25 What has been the impact of AIDS and sexually transmitted diseases on the lives of young people? *Youth, AIDS and Sexually Transmitted Diseases* provides a comprehensive overview of research and policy in this increasingly important area. The book describes the world-wide incidence and prevalence of sexually transmitted diseases among adolescents and examines how their sexual behaviour has changed as a result of the threat of AIDS. It also looks at young people's knowledge and attitudes about their own sexual health, as well as the usefulness of models in predicting those at risk. The authors also discuss the effectiveness of institutional policies in educating young people and in preventing sexually transmitted diseases. *Youth, AIDS and Sexually Transmitted Diseases* will be of considerable benefit to health care providers, sex educators and all those who work with and study adolescents.

**Violence, Prejudice and Sexuality** Stephen Tomsen 2013-05-13 The binary model of sexuality can be devastating and even fatal for people left outside the category of heterosexuality. Essentialist categories of sexuality and gender are often enforced by harassment and violence, as is clear in the case of violence directed against sexual minorities such as homosexual men. This book investigates why men launch assaults on sexual minorities, why these attacks are so vicious and frequently irrational, the identities of perpetrators and their victims, and why such violence seems to have some acceptance in fields such as law, psychiatry, the media and popular opinion. Tomsen discusses the theoretical and research literatures on models of understanding human sexuality and gender and the nature of hate violence and prejudice in contemporary societies, and also provides an analysis from his own original research to draw out the contradictory nature of both sexual identity and violence and the significance of viewing both fields as linked domains. This text makes an important contribution to current and future discussions of the nature of social prejudice and its ties to legal rulings, collective beliefs and mainstream culture.

**Men and Masculinities in Southeast Asia** Michele Ford 2012-10-12 This book brings together extensive recent innovative research on the study of men and masculinities in Southeast Asia. Drawing on rich ethnographic fieldwork from Vietnam, Cambodia, Thailand, the Philippines, Singapore, Indonesia and Timor-Leste, the book examines both dominant and marginal constructions of heterosexual masculinity and the ways in which these are performed in different localized contexts in insular and mainland Southeast Asia. Through the presentation of detailed ethnographic studies on topics ranging from the professional practices of Filipino merchant seafarers to the sex lives of Thai migrant workers to the stand-over tactics of Indonesian gangsters, the authors in this collection challenge the idea of emerging globalizing forms of masculinities. Where existing studies of gender in Asia tend to concentrate on women, East Asia and gay men, this book fills a significant gap and demonstrates, overall, how gender, ethnicity, class, sexuality and nationality shape contemporary understandings of what it means to be a 'man' in contemporary Southeast Asia.

**Culture, Society and Sexuality** Richard Parker 2007-01-24 This new and revised edition of *Culture, Society and Sexuality* brings together and makes accessible a broad and international selection of readings to provide insights into the social, cultural, political and economic dimensions of sexuality and relationships, and emerging discourses around sexual and reproductive rights. Clearly structured and presented, the book makes an extremely useful reference for students and researchers. Section one focuses on the social and cultural construction of sexuality as an emerging field of inquiry over the course of recent decades, and examines some of the most important theoretical insights and areas of investigation that have emerged as this field has developed. Section two links research on the construction of sexuality to a growing body of work on gender and sexuality in relation to a wide range of practical issues and contemporary social policy debates. It is an essential reader not only for students and researchers in these areas, but also for activists, health workers and service providers, who daily confront practical and policy issues related to sexuality, sexual health and sexual rights.

**Gender and the Social Construction of Illness** Judith Lorber 2002-08-20 Judith Lorber and Lisa Jean Moore consider the interface between the social institutions of gender and Western medicine in this brief, lively textbook. They offer a distinct feminist viewpoint to analyze issues of power and politics concerning physical illness. SIGNS labeled the first edition 'a rich and imaginative work.' In the extensively revised second edition of this successful text, the authors add chapters on disability and genital surgeries. They also update and expand their discussions of social epidemiology, AIDS, the health professions, PMS, menopause, and feminist health care. For a creative, feminist-oriented alternative to traditional texts on medical sociology, medical anthropology, and the history of medicine, this is an ideal choice.

**Sustaining Safe Sex** R.W. Connell 2013-07-23 This book focuses on the cultural processes at work within the Australian gay communities, which have made significant efforts at preventing the spread of the HIV virus. *Sustaining Safe Sex* has clear relevance to work throughout the world.

**Rethinking Sex** R. W. Connell 1993 This volume of essays sharply questions current knowledge and ideas about sexuality, social theory, and public policy research on sexuality. The contributors, internationally recognized scholars and activists from Australia, examine the dominant research models from the United States and Western Europe and propose a new perspective, one sensitive to the social construction of sexuality and its research and to variation in sexual practices across cultures. Addressing the debates over sexual conduct from contraception to AIDS prevention, *Rethinking Sex* provides a systematic examination of the social dimensions of sexuality. Social theory, public policy analysis, and historical and survey research are applied to issues ranging from AIDS and gay identity to perceptions of women's sexuality and relations between the state and private sexual behavior. Author note: R. W. Connell is presently a visiting professor at the University of California, Santa Cruz. The author or co-author of eleven other books, he was 1991-1992 Professor of Australian Studies at Harvard University. He has been Professor of Sociology at Macquarie University in Sydney, Australia, since 1976. G. W. Dowsett is Research fellow in Sociology in the School of Behavioural Sciences at Macquarie University. He currently works as Assistant Head of the AIDS Research Unit at Macquarie University, part of the National Centre for HIV Social Research, and is a former Vice-President of the AIDS Council of New South Wales.

*Judith Butler* Gill Jagger 2008-02-07 Judith Butler's work on gender, sexuality, identity, and the body has proved massively influential across a range of academic disciplines in the humanities and social sciences. Yet it is also notoriously difficult to access. This key book provides a comprehensive introduction to Butler's work, plus a critical examination of it and its precursors, both feminist (including Simone de Beauvoir, Monique Wittig, Julia Kristeva and Luce Irigaray), and non-feminist (including Erving Goffman, Michel Foucault, Jacques Lacan, and Jacques Derrida). The volume covers such topics as: gender as performance and performativity sociological notions of performance the materiality of the body and the role of biology power, identity and social regulation subjectivity, agency and feminist political practice. A comprehensive introduction to Butler's work, this book also covers melancholia and gender identity, hate speech, pornography and 'race', social change and transformation, and Butler's shifting relation to psychoanalysis. Clearly laid out to cover key themes for a student audience, this text will be an essential read for undergraduates in the fields of gender, psychoanalysis and sociology.

*The Science/Fiction of Sex* Annie Potts 2014-02-25 What can we learn from exploring the differences in male and female orgasmic experience? Is the penis an entity with a mind of its own? These issues and others, such as the popular portrayals of male sexuality as active and outwardly focused and female sexuality as passive and internally located, are discussed in *The Science/Fiction of Sex*. Contemporary feminist and poststructuralist theories of sex and gender are explored alongside an investigation of how people make sense of such concepts as heterosexuality, orgasm, sexual dysfunction, femininity and masculinity, and safer sex practice. Potts asks men and women about their actual experiences of heterosex. This interview material, combined with excerpts from sexological and medical texts and features from film and television, draws attention to the ways in which western cultural constructs influence our ideas and experiences of the body, sex, and gender. Potts also uses deconstructive theory as a textual tool, concentrating on how binary oppositions such as inside/outside and mind/body impact on our understandings of heterosex, and affect the power relations between women and men. She also examines how the radical postmodern theories of the body and sexuality proposed by Irigaray, Lyotard, and Deleuze and Guattari disrupt such dualistic modes of understanding and experiencing sexualized bodies. *The Science/Fiction of Sex* will be of interest to those studying women and psychology as well as gender studies, cultural studies, feminist

studies, sociology, philosophy, public health and education.

**Prison Sex** Christopher Hensley 2002 Sex in prison remains a taboo subject. This comprehensive volume explores prison sex, presenting original research on consensual and nonconsensual intercourse, as well as the effects of conjugal visitation policies and HIV/AIDS management.

**New Sexual Agendas** Lynne Segal 1997-04-28 *New Sexual Agendas* tackles the urgent practical and theoretical challenges in the area of gender and sexuality. Leading theorists, activists and clinicians, including Bob Connell, Adam Sinfield, Leonore Tiefer and Jeffrey Weeks, encourage a creative exchange of knowledge across different research and applied perspectives. This volume highlights the intensity of the feelings generated by the changes occurring in sexual and gender relations, while signalling the possibilities for new strategies encompassing diversity and choice.

**Sexual Violence and the Law in Japan** Catherine Burns 2013-04-15 This book provides a detailed examination of judicial decision-making in Japanese cases involving sexual violence. It describes the culture of 'eroticised violence' in Japan, which sees the feminine body as culpable and the legal system which encourages homogeneity and conformity in decision-making and shows how the legal constraints confronting women claiming sexual assaults are enormous. It includes analysis of specific case studies and a discussion of recent moves to address the problem.

**Young People's Views on Sex Education** Dr Lynda Measor 2012-11-12 Based on observation of sex education programmes and in-depth interviews with young people, the authors aim to understand more about adolescent's attitudes to sexuality and their sexual behaviour in order to develop policies which will meet their needs more appropriately and effectively. Issues covered in this interesting and accessible book include the ways adolescent informal culture affects sex education programmes and practice; the impact of gender inequality on sex education and safer sex behaviours; legislation and policy frameworks which effect sex education policies; the way young people see legislation and evaluate sex education programmes; and the impact health professionals can have in school sex education. The authors contend that the insights into the values and views that young people bring to bear on the sex education they receive should have an important role to play in the development of policy and practice of those involved in sex education work.

**Rethinking Language and Gender Research** Victoria Bergvall 2014-06-11 *Rethinking Language and Gender Research* is the first book focusing on language and gender to explicitly challenge the dichotomy of female and male use of language. It represents a turning point in language and gender studies, addressing the political and social consequences of popular beliefs about women's language and men's language and proposing new ways of looking at language and gender. The essays take a fresh approach to the study of subjects such as language and sex and the use of language to produce and maintain power and prestige. Topics explored in this text include sex and the brain; the language of a rape hearing; teenage language; radio talk show exchanges; discourse strategies of African American women; political implications for language and gender studies; the relationship between sex and gender and the construction of identity through language. A useful introductory chapter sets the articles in context, explaining the relationships that exist between them, and full cross-referencing between articles and an extensive index allow for easy access to information. The interdisciplinary approach of the text, the wide-range of methodologies presented, and the comprehensive review of the current literature will make this book invaluable reading for all upper-level undergraduate students, postgraduate students and researchers in the fields of linguistics, sociolinguistics, gender and cultural studies.

**The Sexual Self** Michael S. Kimmel 2007 Abstract.

**Another World is Possible** Dwight N. Hopkins 2014-12-18 'Another World is Possible' examines the many peoples who have mobilized religion and spirituality to forge identity. The voices of Black people from around the world are presented in essays ranging from the Indian subcontinent, Japan and Australia to Africa, the UK and the USA. From creation narratives to trickster heroes, from the role of spirituality in HIV positive South Africa to its place in mental health and among the poor, spirituality is shown to

be essential to the survival of individuals and communities.

**EBOOK: Theorizing Sexuality** Stevi Jackson 2010-03-16 This book surveys and evaluates the sociological contribution to the study of sexuality. It not only maps major theoretical shifts and debates, but also offers a unique examination of the topic that emphasises the sociality of sexuality. In particular, it considers the institutional, biographical and interactional contexts of our sexual lives as well as the cultural significance and everyday practice of sexuality. The authors contest not only popular understandings of sexuality as natural, but also psychoanalytic explanations and forms of analysis that privilege the cultural construction of sexuality over its everyday social accomplishment. In particular, they challenge the 'specialness' of sexuality within contemporary culture, arguing that sexuality is better understood as a routine part of everyday social life. The book confronts the anxieties associated with sexuality in the late modern, western world and engages with wider debates on social transformations in late modernity. As such, it provides both an overview of the field of sexuality as well as setting a new agenda for debating the topic. *Theorizing Sexuality* is key reading for students, researchers and academics interested in theories of sexuality, gender and intimacy and anyone concerned with the social conditions that inform our sexual identities.

**The Social Context of Birth** Caroline Squire 2009 Providing an understanding of the impact of social circumstance on women giving birth, their babies and families in the 21st century, this title explains to midwives and other health professionals how social issues, such as domestic violence, race and poverty, can affect the birth progress.

Above all, this book is a call to action to uplift the field – and each other – in challenging environments. This ground-breaking book will be of interest and value to scholars of Gender and Sexuality Education research.

**Gender, Social Inequalities, and Aging** Toni M. Calasanti 2001-08-28 The experience of men and women in later life varies enormously, not only along lines of gender but also due to ethnicity, class, sexual orientation, and race. In this text on gender issues among the aging, Calasanti and Slevin explore these differences, their genesis, their meaning to men and women, and their treatment in the policy arena. The authors also take to task traditional research on aging and how it ignores these issues. The authors cover topics of work and retirement, body image, sexuality, health, family relationships, and informal care, among many others. The current research and nuanced theoretical approach presented in this brief book makes it the ideal text to correct the stereotypic and monolithic views of the elderly for courses in gender or aging.

**Sexual Cultures in East Asia** Evelyne Micollier 2004-06-01 Using case-studies from East and Southeast Asia, this book examines sexuality and AIDS-related sexual risk in the context of Asian cultures. It offers a complementary perspective, documented with sociological and anthropological data, to historical studies and looks at commercial sex work, kinship systems, matrimonial strategies, gender, power relations, and the relevance of cultural constructs such as Confucianism and Taoism for the analysis of sexual cultures in Asia.

**Rethinking Sexuality** Diane Richardson 2000-10-26 This thoughtful and accessible book provides a critical examination of the central debates attached to conceptualizing sexuality as a site of knowledge and politics. These are explored in chapters on the meaning of heterosexuality, sexual citizenship and the associated notions of sexual rights and obligations, queer theory and its relationship with feminisms, both 'new' and 'old'. Also included is discussion of responses to the HIV/AIDS epidemic and the implications for understandings of gender and sexuality.

Rethinking Feminism in Early Modern Studies Ania Loomba 2016-07-12 Winner of the Society for the Study of Early Modern Women's Collaborative Book Prize 2017 Rethinking Feminism in Early Modern Studies is a volume of essays by leading scholars in the field of early modern studies on the history, present state, and future possibilities of feminist criticism and theory. It responds to current anxieties that feminist criticism is in a state of decline by attending to debates and differences that have emerged in light of ongoing scholarly discussions of race, affect, sexuality, and transnationalism-work that compels us continually to reassess our definitions of 'women' and gender. Rethinking Feminism demonstrates how studies of early modern literature, history, and culture can contribute to a reimagination of feminist aims, methods, and objects of study at this historical juncture. While the scholars contributing to Rethinking Feminism have very different interests and methods, they are united in their conviction that early modern studies must be in dialogue with, and indeed contribute to, larger theoretical and political debates about gender, race, and sexuality, and to the relationship between these areas. To this end, the essays not only analyze literary texts and cultural practices to shed light on early modern ideology and politics, but also address metacritical questions of methodology and theory. Taken together, they show how a consciousness of the complexity of the past allows us to rethink the genealogies and historical stakes of current scholarly norms and debates.
