Implementing a Human Development Strategy Keith Griffin 1994-11-12 'Readers will find in these pages a very lucid, creative, and highly readable version of many of the ideas that have taken shape through the medium of the Human Development Reports during the last four years. Busy policy makers all over the world will find this an indispensable primer.' - Mahbub ul Haq, from the preface. This book introduces the basic concepts of human development and presents policy guidelines for implementing a human development strategy in developing countries. Human development is seen both as an end in itself and as a means to increase the capabilities of people. The role of the state, the market and of people's participation in such a strategy are described. Specific chapters discuss the structure of incentives, allocation of public sector resources, structural reforms, the relationship of human development to environmental issues and finance and administration.

The Military Prison Stanley L. Brodsky 1970 The fourteen contributors to this volume all have had experience in military prisons as psychologists, psychiatrists, penologists, educational advisors, or project officers for correction and for research. The importance of their subject can be realized by noting that when the nation is at war the military correctional and confinement system is larger than the entire federal prison system. Psychiatrists and psychologists, as well as students of criminology and penology, will find here much that is relevant to their professional work. But the question of the military prisoner will excite a broader interest. Every thoughtful person at some time confronts the problem of his responsibility for removing great numbers of men from normal civilian pursuits. Events during the last two years have created an urgent need to learn the facts of military imprisonment and the consequences of the widespread military service. This need is now met by publication of this book.

Death Without Weeping Nancy Scheper-Hughes 2023-11-10 When lives are dominated by hunger, what becomes of love? When assaulted by daily acts of violence and untimely death, what happens to trust? Set in the lands of Northeast Brazil, this is an account of the everyday experience of scarcity, sickness and death that centres on the lives of the women and children of a hillside "favela". Bringing her readers to the impoverished slopes above the modern plantation town of Bom Jesus de Mata, where she has worked on and off for 25 years, Nancy Scheper-Hughes follows three generations of shantytown women as they struggle to survive through hard work, cunning and triage. It is a story of class relations told at the most basic level of bodies, emotions, desires and needs. Most disturbing - and controversial - is her finding that mother love, as conventionally understood, is something of a bourgeois myth, a luxury for those who can reasonably expect, as these women cannot, that their infants will live.

Basic Marksmanship 1980

Governing the Ungovernable Ishrat Husain 2018 Pakistan, since its independence in 1947, had to face tumultuous years for the first four decades. Despite the many challenges, both internal and external, the country was able to register a 6 per cent average annual growth rate during the first forty years of its existence. The country was ahead of India and Bangladesh in all economic and social indicators. Since 1990, the country has fallen behind its neighbouring countries and has had a decline in the growth rate. This book attempts to examine the reasons behind this slowdown, the volatile and inequitable growth of the last twenty-five years, and through a process of theoretical and empirical evidence argues that the most powerful explanatory hypothesis lies in the decay of institutions of governance. It also suggests a selective and incremental approach of restructuring some key public institutions that pertain to accountability, transparency, security, economic growth, and equity.

Economic Reform in Vietnam Keith Griffin 2016-01-20 Vietnam, along with China, stands out as a rare success story among transition economics. This authoritative study of the reform process since 1989 pays particular attention to the way the macroeconomics framework can contribute to an environment that encourages human development and helps to reduce poverty. Thus there are chapters on macroeconomics reforms, international trade policies, the role of the state, rural development, education and health, environmental issues and poverty and gender inequality. Although areas of weakness are indicated, emphasis is placed on the success Vietnam has experienced compared to other transition economies. The lessons of both the successes and failures of the reform process for policymakers elsewhere are outlined.

The Craft of Intelligence Allen Dulles 2006-04-01 If the experts could point to any single book as a starting point for understanding the subject of intelligence from the late twentieth century to today, that single book would be Allen W. Dulles's *The Craft of Intelligence*. This classic of spycraft is based on Allen Dulles's incomparable experience as a diplomat, international lawyer, and America's premier intelligence officer. Dulles was a high-ranking officer of the CIA's predecessor--the Office of Strategic Services--and was present at the inception of the CIA, where he served eight of his ten years there as director. Here he sums up what he learned about intelligence from nearly a half-century of experience in foreign affairs. In World War II his OSS agents penetrated the German Foreign Office, worked with the anti-Nazi underground resistance, and established contacts that brought about the Nazi military surrender in North Italy. Under his direction the CIA developed both a dedicated corps of specialists and a whole range of new intelligence devices, from the U-2 high-altitude photographic plane to minute electronic listening and transmitting equipment. Dulles

reveals much about how intelligence is collected and processed, and how the resulting estimates contribute to the formation of national policy. He discusses methods of surveillance, and the usefulness of defectors from hostile nations. His knowledge of Soviet espionage techniques is unrivaled, and he explains how the Soviet State Security Service recruited operatives and planted "illegals" in foreign countries. He spells out not only the techniques of modern espionage but also the philosophy and role of intelligence in a free society threatened by global conspiracies. Dulles also addresses the Bay of Pigs incident, denying that the 1961 invasion was based on a CIA estimate that a popular Cuban uprising would ensue. This account is enlivened with a wealth of personal anecdotes. It is a book for readers who seek wider understanding of the contribution of intelligence to our national security.

Alternative Strategies for Economic Development Keith Griffin 1999-06-30 The question of alternative strategies for economic development is the subject of great controversy and intense debate amongst practitioners and academics concerned with economic and social progress in the Third World. The core of this book is an analysis of the six most widely adopted strategies of development namely monetarism, the open economy, industrialisation, the green revolution or agriculture-led development, redistributive strategies of development and socialist strategies.

Criminal Interrogation Arthur S. Aubry 2014-05-14 This is the Third Edition of what has become a paragon among criminal interrogation texts. Chapters have been added on interrogator qualification, legal aspects of confessions, the status of lie detection, and selected Supreme Court decisions from 1971 to 1979. The latter which supplements existing chapters on decisions since 1884, including the paramount Miranda and Escobedo decisions-analyzes 147 pertinent judgments. Equally thorough coverage is afforded psychological and technical considerations. The authors deftly blend all three elements - law, psychology; technique -and they explain the interrelationships. The text as a whole has been rearranged for a smoother presentation; chapters have been revised and updated wherever necessary. In its review of the previous edition, Law and Order described this as a 'how-to' book and probably one of the best you can find.... This is a book that should be in your police library.

The International Labour Organization and the Quest for Social Justice, 1919-2009 Gerry Rodgers 2009 This book tells the story of the International Labour Organization, founded in 1919 in the belief that universal and lasting peace goes hand in hand with social justice. Since then the ILO has contributed to the protection of the vulnerable, the fight against unemployment, the promotion of human rights, the development of democratic institutions and the improvement of the working lives of women and men everywhere. In its history the ILO has sometimes thrived, sometimes suffered setbacks, but always survived to pursue its goals through the political and economic upheavals of the last 90 years.

The Basic School Ernest L. Boyer 1995-11-27 A micro-community approach to education with vision and values The U.S. education system has remained somewhat static as the world changes furiously around it. The Basic School: A Community for Learning offers a model for the future. The classroom — and by extension, the school — is positioned as a little community focused on learning. Teachers are empowered with real leadership, parents are partners, resources are rich, and the curriculum is coherent and centralized. This book describes how to bring this dream-school into reality through a series of small steps forward that, over time, become a journey through progress.

Regions at Risk Jeanne X. Kasperson 1995 Human-induced environmental change is to be found throughout the world, but there are areas that scientists consider to be "critical regions" - regions that are particularly vulnerable to or suffering from environmental degradation. In this volume nine such "critical environmental regions" (Amazonia, the Aral Sea basin, the middle mountains of Nepal, Kenya's Ukambani region, the US Southern High Plains, the Mexico Basin, the North Sea, the Ordos Plateau of China, and the eastern Sundaland region of South-East Asia) are examined as case-studies. In chapter one the authors provide a detailed look into the concepts of environmental criticality and endangerment and propose formal definitions. The nine regional studies that follow in the subsequent chapters serve to translate the conceptual framework into the physical and social realities of each area. The case-studies make available an up-to-date synthesis of vast amounts of inaccessible data, and as such will be valuable to scholars and policy makers interested in specific areas of the world and others interested in regional comparisons. Anyone concerned with global environmental change, criticality, human-environment interactions, and how societies in different regions have responded to environmental degradation will find much that is new and important in this pioneering, innovative study.
