interludes, charivaris, and masking invited the English and French nobility to assert their identities in gesture and costume as well as in speech. These events presumed that performance makes a self, in contrast to the modern belief that identity precedes social performance and, indeed, that performance falsifies the true, inner self. Susan Crane resists the longstanding convictions that medieval rituals were trivial affairs, and that personal identity remained unarticulated until a later period. Focusing on England and France during the Hundred Years War, Crane draws on wardrobe accounts, manuscript illuminations, chronicles, archaeological evidence, and literature to recover the material as well as the verbal constructions of identity. She seeks intersections between theories of practice and performance that explain how appearances and language connect when courtiers dress as wild men to interrupt a wedding feast, when knights choose crests and badges to supplement their

coats of arms, and when Joan of Arc cross-dresses for the court of inquisition after her capture.

The Singing Teacher's Guide to Transgender Voices - Liz Jackson Hearn

2018-05-18

The Singing Teacher's Guide to Transgender Voices is the first comprehensive resource developed for training transgender and nonbinary singers. This text aids in the development of voice pedagogy tailored to the needs of transgender singers, informed by cultural competence, and bolstered by personal narratives of trans and nonbinary singing students. The singing life of a transgender or nonbinary student can be overwhelmingly stressful. Because many of the current systems in place for singing education are so firmly anchored in gender binary systems, transgender and gender nonconforming singers are often forced into groups with which they feel they don't belong. Singers in transition are often afraid to reach out for help because the likelihood of finding a voice teacher who is competent in navigating the social, emotional, physical, and physiological challenges of transition is minimal at best. This text equips

teachers with a sympathetic perspective on these unique struggles and with the knowledge and resources needed to guide students to a healthy, joyful, and safe singing life. It challenges professional and academic communities to understand the needs of transgender singers and provide evidence-based voice education and real-world opportunities that are authentic and genuine. The *Singing Teacher's Guide to Transgender Voices* is the first book of its kind to provide thorough, organized information on the training of trans singers for educators in both the academic and independent teaching realms.

Sexing the World - Anthony Corbeill 2015-01-18

From the moment a child in ancient Rome began to speak Latin, the surrounding world became populated with objects possessing grammatical gender—masculine eyes (oculi), feminine trees (arbores), neuter bodies (corpora). *Sexing the World* surveys the many ways in which grammatical gender enabled Latin speakers to

organize aspects of their society into sexual categories, and how this identification of grammatical gender with biological sex affected Roman perceptions of Latin poetry, divine power, and the human hermaphrodite.

Beginning with the ancient grammarians, Anthony Corbeill examines how these scholars used the gender of nouns to identify the sex of the object being signified, regardless of whether that object was animate or inanimate. This informed the Roman poets who, for a time, changed at whim the grammatical gender for words as seemingly lifeless as "dust" (pulvis) or "tree bark" (cortex). Corbeill then applies the idea of fluid grammatical gender to the basic tenets of Roman religion and state politics. He looks at how the ancients tended to construct Rome's earliest divinities as related male and female pairs, a tendency that waned in later periods. An analogous change characterized the dual-sexed hermaphrodite, whose sacred and political significance declined as the republican

government became an autocracy. Throughout, Corbeill shows that the fluid boundaries of sex and gender became increasingly fixed into opposing and exclusive categories. Sexing the World contributes to our understanding of the power of language to shape human perception.

Transgender in the Post-Yugoslav Space - Bojan Bilić 2022-09-21

Written by an interdisciplinary collective of authors, this powerful book documents the largely unknown histories and politics of trans lives, activisms, and culture across the post-Yugoslav states. The volume sheds light on a diversity of gender embodiments and explores how they have navigated the murky waters of war, capitalism, and transphobia while forging a niche for themselves within the regional and transnational LGBTQ movements. By unleashing the knowledge concentrated in trans lives, this book not only resists trans erasures in Eastern Europe, but also underscores the potential for survival, self-transformation, and engagement in

politically challenging circumstances.

[The Routledge Dictionary of Modern American Slang and Unconventional English](#) - Tom Dalzell
2018-05-11

The Routledge Dictionary of Modern American Slang offers the ultimate record of modern, post WW2 American Slang. The 25,000 entries are accompanied by citations that authenticate the words as well as offer examples of usage from popular literature, newspapers, magazines, movies, television shows, musical lyrics, and Internet user groups. Etymology, cultural context, country of origin and the date the word was first used are also provided. In terms of content, the cultural transformations since 1945 are astounding. Television, computers, drugs, music, unpopular wars, youth movements, changing racial sensitivities and attitudes towards sex and sexuality are all substantial factors that have shaped culture and language.

This new edition includes over 500 new headwords collected with citations from the last five years, a period of immense change in the English language, as well as revised existing entries with new dating and citations. No term is excluded on the grounds that it might be considered offensive as a racial, ethnic, religious, sexual or any kind of slur. This dictionary contains many entries and citations that will, and should, offend. Rich, scholarly and informative, *The Routledge Dictionary of Modern American Slang and Unconventional English* is an indispensable resource for language researchers, lexicographers and translators.

John of Garland, 'Integumenta Ovidii' - 2022-10-31

The renowned scholar-poet John of Garland wrote the *Integumenta Ovidii* ("Allegories on Ovid") in early thirteenth-century Paris at a time of renewed interest in Classical Latin literature. In this short poem, John offers a series of dense,

highly allusive allegories on various Greek and Roman myths in Ovid's *Metamorphoses*. The text is here edited and translated for the first time in 90 years, drawing on the evidence of over two dozen manuscripts. Comprehensive explanatory notes help readers to understand John's condensed allegories in their medieval context. Textual notes discuss the various difficulties in the transmitted text of the poem, and offer several improvements on the texts of the older editions.

Lexical Categories - Mark C. Baker 2003-03-13
For decades, generative linguistics has said little about the differences between verbs, nouns, and adjectives. This book seeks to fill this theoretical gap by presenting simple and substantive syntactic definitions of these three lexical categories. Mark C. Baker claims that the various superficial differences found in particular languages have a single underlying source which can be used to give better characterizations of these 'parts of speech'.

These definitions are supported by data from languages from every continent, including English, Italian, Japanese, Edo, Mohawk, Chichewa, Quechua, Choctaw, Nahuatl, Mapuche, and several Austronesian and Australian languages. Baker argues for a formal, syntax-oriented, and universal approach to the parts of speech, as opposed to the functionalist, semantic, and relativist approaches that have dominated the few previous works on this subject. This book will be welcomed by researchers and students of linguistics and by related cognitive scientists of language.

[Transgender Identities in the Press](#) - Angela Zottola 2021-01-28

For many people, newspapers are a key source of information on many topics, including issues related to gender and sexuality. Applying a broad range of corpus linguistic methods, *Transgender Identities in the Press* critically explores the linguistic cues and patterns used by the print media in their representation of trans

people. Through close analysis of a corpus of articles collected from English-language newspapers from the UK and Canada, Angela Zottola focuses on the semantic categories of representation associated with transgender identities. Exploring a set of key terms, this book examines the semantic prosody and the language choices that each term is invested with, using Critical Discourse Analysis to investigate how the way the press represents this topic influences readers and their understanding of the major debates. Using a mixture of quantitative and qualitative methods, *Transgender Identities in the Press* casts light on the complex picture of press language during a period of social change and increasing awareness. Highlighting both efforts to represent this community in an inclusive and non-discriminatory way and areas where there is need for improvement, this book illustrates a variety of issues from a critical and social perspective.

Children Who Remember Previous Lives - Ian Stevenson, M.D. 2016-05-20

This is the revised edition of Dr. Stevenson's 1987 book, summarizing for general readers almost forty years of experience in the study of children who claim to remember previous lives. For many Westerners the idea of reincarnation seems remote and bizarre; it is the author's intent to correct some common misconceptions. New material relating to birthmarks and birth defects, independent replication studies with a critique of criticisms, and recent developments in genetic study are included. The work gives an

overview of the history of the belief in and evidence for reincarnation. Representative cases of children, research methods used, analyses of the cases and of variations due to different cultures, and the explanatory value of the idea of reincarnation for some unsolved problems in psychology and medicine are reviewed.

God Beyond Gender - Gail Ramshaw 1995

Changing Subjects - Erin Runions 2001-01-01
Coming from a strong gender critical and post-colonial theoretical stance, Runions takes up important questions of the reading process that arise from literary, ideological critical and cultural studies approaches to the Bible. She examines readers' negotiations with the ambiguous configurations of gender, nation and future vision in the book of Micah, using the theoretical work of Homi Bhabha with Louis Althusser, Jacques Lacan, Slavoj Zizek-all key figures in cultural studies. Her book confronts the problem of the determined subject reading an indeterminate text and suggests that (liminal) identifications with the ambiguities of the book of Micah might reconfigure the readers' own ideological positions.

The Transgender Studies Reader - Susan

Stryker 2013-10-18

Transgender studies is the latest area of academic inquiry to grow out of the exciting nexus of queer theory, feminist studies, and the history of sexuality. Because transpeople challenge our most fundamental assumptions about the relationship between bodies, desire, and identity, the field is both fascinating and contentious. The *Transgender Studies Reader* puts between two covers fifty influential texts with new introductions by the editors that, taken together, document the evolution of transgender studies in the English-speaking world. By bringing together the voices and experience of transgender individuals, doctors, psychologists and academically-based theorists, this volume will be a foundational text for the transgender community, transgender studies, and related queer theory.

Making a Living, Making a Difference - Maria Ågren 2016-11-01

What do people do all day? What did women and men do to make a living in early modern Europe, and what did their work mean? As this book shows, the meanings depended both on the worker and on the context. With an innovative analytic method that is yoked to a specially-built database of source materials, this book revises many received opinions about the history of gender and work in Europe. The applied verb-oriented method finds the 'work verbs' that appear incidentally in a wide variety of early modern sources and then analyzes the context in which they appear. By tying information technologies and computer-assisted analysis to the analytic powers--both quantitative and qualitative--of professional historians, the method gets much closer to a participatory observation of the micro-patterns of early

modern life than was once believed possible. This book directly addresses a number of broad problems often debated by historians of gender and early modern Europe. First, it discusses the problem of assessing more accurately the incidence, character and division of work. Second, it analyzes the configurations of work and human difference. Third, it deals with the extent to which work practices created notions of difference--gender difference but also other forms of difference--and, conversely, to what extent work practices contributed to notions of sameness and gender convergence. Finally, it studies the impact of processes of change. Drawing on sources from Sweden, the authors show the importance of multiple employment, the openness of early modern households, the significance of marriage and marital status, the gendered nature of specific tasks, and the ways in which state formation and commercialization were entangled in people's everyday lives.
