Touch in Sports Coaching and Physical Education - Heather Piper 2014-08-07

In our increasingly risk-averse society, touch and touching behaviours between professionals and children have become a fraught issue. In sports coaching and physical education, touching young sports performers and participants has, in some contexts, come to be redefined as dubious and dangerous. Coaches find themselves operating in a framework of regulations and guidelines that create anxiety, for them and others, and for many volunteer (and sometimes professional) coaches, this fearful context has led them to question the risks and benefits of their continuing involvement in sport. Touch in Sports Coaching and Physical Education is the first book to explore this difficult topic in detail. Drawing on a series of international studies from the US, UK, Australia, Canada, Sweden and elsewhere, it presents important new research evidence and examines theories of risk and moral panic that frame the discussion. By challenging prevailing orthodoxies the book makes a significant contribution to critical discussion around practice, pedagogy, politics and policy in sport and physical education, and also informs current debates around the nature and quality of all in loco parentis relationships.

The FBI Story -

The Mystery of Easter Island - Katherine Routledge 2007-06-01

We set to work to excavate some of the statues which stood on the slope of the Raraku mountain. The natives were entirely indifferent whether they worked or not, but by paying high wages and giving any quantity of mutton, we were able at this time to get a certain amount of precarious labour for digging and camp work. The whole lot, including my maid-servant, went in for every week-end to the village, and it was always a matter of anxiety to know whether they would ever return. -from Chapter XII Western anthropology's first in-depth look at an isolated culture is also a daring adventure story of around-the-world travel. In February 1913, archaeologist Katherine Routledge set sail on a custom-built yacht-with a small crew and the support of British Association for the Advancement of Science, the British Museum, and the Royal Geographical Society-for Easter Island, where she embarked up the first effort to catalogue the island's mysterious statues, interview the natives, and document their culture, folklore, and traditions. Her scholarship is impeccable-this 1919 work is still considered foundational-but her lively writing and her practical perspective make this a delightful read that thrill armchair travelers and amateur ethnographers alike. British archaeologist KATHERINE ROUTLEDGE (1866-1935) studied at Oxford University. She also wrote *With Prehistoric People* (1910), about her experiences in Africa after the Boer War.

Threatened Children - Joel Best 1993-05

Child abuse, incest, child molestation, Halloween sadism, child pornography: although clearly not new problems, they have attracted more attention than ever before. Threatened Children asks why. Joel Best analyzes the rhetorical tools used by child advocates when making claims aimed at raising public anxiety and examines the media's role in transmitting reformers' claims and the public's response to the frightening statistics, compelling examples, and expanding definitions it confronts. Drawing on a wide range of sources, from criminal justice records to news stories, from urban legends to public opinion surveys, Best reveals how the cultural construction of social problems evolves.

'Grooming' and the Sexual Abuse of Children - Anne-Marie McAlinden 2012-12-13

The first inter-disciplinary, thematic, and empirical investigation of grooming in a multi-jurisdictional context, this book draws on extensive research in the form of over fifty interviews with professionals, working in sex offender assessment, management or treatment, as well as child protection, in the UK and the Republic of Ireland.

Pre-Incident Indicators of Terrorist Incidents - Brent L. Smith 2011-01

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
