Physical Attractiveness and the Theory of Sexual Selection - Doug Jones 1996-01-01

Erotic Capital - Catherine Hakim 2011-09-06

Catherine Hakim's theory of "erotic capital" is controversial, not least because women tend to believe that relying on looks and charm to catch a man or get a promotion are subterfuges best left behind in the 1950s. With little apparent fear of running deeply against popular thought, Hakim, a social scientist, proposes that all women should become as attractive as possible and then exploit their sexual power. She explains that the "male sex deficit," the idea that men always want more sex than they get, raises the value of women's erotic capital. Hakim claims that radical feminists, religion and patriarchal society currently foil this feminine advantage. Although the beauty bias is not a new concept, Hakim's reinterpretation raises the stakes. Alas, though she supports women in general, Hakim proves consistently unkind to males, Americans, lesbians, feminists, the overweight and the religious. Nonetheless, for a new perspective on the advantages of attractiveness and on the gender conversation, getAbstract suggests Hakim's thought-provoking thesis.

[The Psychology of Sexual Emotion](#) - Vernon W. Grant 1979

In his opening chapter, the author writes: This entire book is based on the conviction that there is a psychology of sex that begins, not with the way the sex organs are constructed (as so many sex books do), but with the fact that men and women are attractive to each other, that this kind of attractiveness attaches to a great deal more than the physical differences, and that attraction is selective: that is, one person is chosen from several or many when opportunity for choice is offered.

Honey Money - Catherine Hakim 2011-08-25

Why do some people seem to lead charmed lives? They are attractive, but also lively, friendly and charismatic. People want to be around them. Doors open for them. The answer, this book shows, is in the power of erotic capital - the overlooked human asset that is at the heart of how we work, interact, make money, succeed and conduct our relationships. Catherine Hakim's groundbreaking book reveals how erotic capital is just as influential in life as how rich, clever, educated or well-connected we are. Drawing on hard evidence, she illustrates how this potent force develops from an early age, with attractive children assumed to be intelligent, competent and good. She examines how women and men

learn to exploit it throughout their lives, how it differs across cultures and how it affects all spheres of activity, from dating and mating to politics, business, film, music, the arts and sport. She also explores why erotic capital is growing in importance in today's highly sexualised culture and yet, ironically, as a 'feminine' virtue, remains sidelined. Honey Money is a call for us to recognize the economic and social value of erotic capital, and truly acknowledge beauty and pleasure. This will not only change the role of women in society, getting them a better deal in both public and private life - it could also revolutionize our power structures, big business, the sex industry, government, marriage, education and almost everything we do.

Sexual Attraction - Mark Cook 2016-06-03

Sexual Attraction is a very interesting and creative study on how humans get attracted to their opposite sex, presenting scientific basis of sexual attraction among humans. This book begins by elaborating on sexual arousal in humans, which is followed by a discussion on what is sexually

desirable for a person. This discussion examines physical appearance of humans that contributes to sexual attraction. The two subsequent chapters are devoted to examining sexual behaviors, particularly the interesting topic of "love at first sight and the concept of love. This book then explains how attraction can lead to marriage, explaining how two persons sexually attracted to each other successfully prolong the attraction and have a lasting relationship. This book ends by explaining the responses of other people who believe their unattractive appearance is the cause of their dull social and sexual lives. This book will surely be of interest to anyone interested in exploring sexual attraction. Because this book is science-based, it is helpful as well to those in the field of psychology and counseling.

Sexual Attraction - James Giles 2015-06-30

How and why does sexual attraction happen? This book is an exploration of the universal yet highly individualized experience of being sexually attracted to another person. Incorporating interviews, research findings, and excerpts from romantic and erotic literature, lyrics, and film, *Sexual Attraction: The Psychology of Allure* explores a subject that is central to the human experience and highly relevant not only in personal, intimate interactions but also other relationships as well. Although the causes and effects of sexual attraction have been studied, sexual attraction itself—how we experience others in terms of their sexual attractiveness—remains a neglected, rarely researched topic. Scholar James Giles presents jargon-free information that is accessible and fascinating to the general reader as well as highly useful and informative to students and researchers in social psychology, sexology, sex and marital therapy, and relationship counseling. The book explores subjects such as how sexual attraction is fundamentally different from other forms of interpersonal attraction and how at the heart of sexual attraction lies the experience of allure—something that makes one feel helplessly drawn towards an intimate physical joining with the sexually attractive person. The allure of strangers, cross-sex friends, sexual friends ("friends with benefits"), and romantic partners are all addressed, revealing the often subtle heterosexual attraction that typically exists

between males and females in all their relationships, including between those who are ostensibly "just friends."

Mirror, Mirror - Elaine Hatfield 1986-01-01

Mirror, Mirror... examines the hidden truth about good looks. Through extensive research of scholarly studies and popular culture, the authors provide a lively and comprehensive view of what behavioral scientists have learned about the effects of personal appearance. A wealth of illustrations and photographs give visual support to the evidence presented. The book explores the view that people believe good-looking individuals possess almost all the virtues known to humankind; consequently, they treat the good-looking and ugly very differently. *Mirror, Mirror* reviews the stereotypes held about people with specific characteristics and it explains the impact of height, weight, and attributes such as hair color, eye color and facial hair on the course of social encounters. The authors show that through time these reaction patterns have their effect and that good-looking and unattractive persons come to be different types of people. To show the relative nature of concepts of beauty, the authors also present examples of what other cultures consider attractive.

Attraction Explained - Viren Swami 2015-12-22

How much does appearance matter in the formation of romantic relationships? Do nice guys always finish last? Does playing hard-to-get ever work? What really makes for a good chat-up line? When it comes to relationships, there's no shortage of advice from self-help 'experts', pick-up artists, and glossy magazines. But modern-day myths of attraction

often have no basis in fact or - worse - are rooted in little more than misogyny. In *Attraction Explained*, psychologist Viren Swami debunks these myths and draws on cutting-edge research to provide a groundbreaking and evidence-based account of relationship formation. At the core of this book is a very simple idea: there are no 'laws of attraction', no foolproof methods or strategies for getting someone to date you. But this isn't to say that there's nothing to be gained from studying attraction. Based on science rather than self-help clichés, *Attraction Explained* looks at how factors such as geography, appearance, personality, and similarity affect who we fall for and why.
