Scouting Frontiers - Nelson R. Block 2009-01-23

Despite the fact that Scouting has touched the lives of a quarter of a billion boys and girls and their leaders around the world in the past century, its history has been largely ignored. *Scouting Frontiers: Youth and the Scout Movement's First Century* is the first book to discuss the history and principal themes of the Boy Scout and Girl Guide movements on an international scale. Inspired by presentations at the groundbreaking 2008 Johns Hopkins University symposium, "Scouting: A Centennial History," the authors examine the world's greatest youth movement through the diverse experiences of its members and their organizations. From Muslim Scouts in Wales to French Scouts in Syria to Girl Guides in colonial Kenya, Scouting has responded to the challenges of international expansion and transformed itself to address cultural, political and social diversity. *Scouting Frontiers* focuses particularly on the intersections between Scouting's origins and its transformations over the last century as it faced frontiers of nation, empire, religion, race, class, and gender.

Tourist Behaviour and the Contemporary World - Philip L. Pearce 2011-10-06

This volume seeks to review and stimulate interest in a number of emerging and fresh topics in contemporary tourist behaviour and experience. Topics explored include the effects of newer technologies on tourists' behaviour and experience, tourists' experience of scams, safety and personal responsibility, individual perspectives on sustainability, and some dimensions of tourists' personal growth, relationships and altruism. The topics are bound together by an integrative approach to conceptualising experience which is seen as an ensemble of orchestrated sensory inputs; affective reactions; cognitive mechanisms used to think about and understand the setting; actions undertaken and the relevant relationships which define the participants' world. A special emphasis is placed on tourists' stories as a pathway to access the nature of tourists' experience. Potential research directions in the field are indicated throughout.

Management of Amphibians, Reptiles, and Small Mammals in North America - Robert C. Szaro 1988

Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value. While this often benefitted other species that were not even considered in the original prescriptions, it also negatively impacted others. We no longer can afford to take this simplistic view of ecosystem management. We need to use a more holistic approach where ecological landscapes are considered as units, and land management practices incorporate all elements into an integrated policy. This includes examining the impacts of proposed land uses on amphibian, reptile, and small mammal populations.

The Great Basin - Donald Grayson 2011-04-18

"The Great Basin, centering on Nevada and including substantial parts of California, Oregon, and Utah, gets its name from the fact that none of its rivers or streams flow to the sea. This book synthesizes the past 25,000 years of the natural history of this vast region. It explores the extinct animals that lived in the Great Basin during the Ice Age and recounts the rise and fall of the massive Ice Age lakes that existed here. It explains why trees once grew 13' beneath what is now the surface of Lake Tahoe, explores the nearly two dozen Great Basin mountain ranges that once held substantial glaciers, and tells the remarkable story of how pinyon pine came to cover some 17,000,000 acres of the Great Basin in the relatively recent past. These discussions culminate with the impressive history of the prehistoric people of the Great Basin, a history that shows how human societies dealt with nearly 13,000 years of climate change on this often-challenging landscape"--Provided by publisher.

Extraordinary Sex Therapy - Gina Ogden 2017-10-02

How do we help our clients discover the depth and breadth of sexual healing? *Extraordinary Sex Therapy* offers a range of innovative health-based approaches and models to explore the complexities inherent in sexual pleasure and potential as well as in trauma, pain, and dysfunction. The practitioners whose work is represented here expand the clinical conversation about sex beyond performance goals and tread courageously into unquantifiable realms of sexual and relational desire, health, and transformation. All of these practitioners describe work that embodies therapeutic collaboration with their clients as they confront sexual concerns that include body image, emotions, meanings, and nuances of partner interactions along with the influence of neurobiology, language, gender, addiction, socioeconomics, and cultural conditioning about pleasure. Their interventions range from education, visualization, and role-play to identifying erotic archetypes, coaching about sensual touch, and using plant spirit medicines to activate imagination and spiritual connection. Their descriptions ring with singular authenticity, depending on their training and the particular clients and issues they address. Each practitioner provides clinical examples and techniques in enough detail so that readers can incorporate elements of these approaches into their own practices. This book was originally published as a special issue of the *Journal of Sexual and Relationship Therapy*.

Human Bioarchaeology of the Transition to Agriculture - Ron Pinhasi 2011-06-24

A holistic and comprehensive account of the nature of the transition from hunting to farming in prehistory. It addresses for the first time the main bioarchaeological aspects such as changes in mobility, behaviour, diet and population dynamics. This book is of major interest to the relevant audience since it offers for the first time a global perspective on the bioarchaeology of the transition to agriculture. It includes contributions from world-class researchers, with a particular emphasis on advances in methods (e.g. ancient DNA of pathogens, stable isotope analysis, etc.). The book specifically addresses the following

aspects associated with the transition to agriculture in various world regions: Changes in adult and subadult stature and subadult growth profiles Diachronic trends in the analysis of functional morphological structures (craniofacial, vault, lower limbs, etc.) and whether these are associated with change in overall sex-specific morphological variability Changes in mobility Changes in behaviour which can be reconstructed from the study of the skeletal record. These include changes in activity patterns, sexual dimorphism, evidence of inter-personal trauma, and the like. Population dynamics and microevolution by examining intra and inter population variations in dental and cranial metric traits, as well as archaeological studies of ancient DNA (e.g. mtDNA markers).
