"Over a decade after its publication, one book on dating has people firmly in its grip." —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

Texting Women - Cristiano Marquez 2019-11-22

If you are reading my book's description it's because maybe you are having trouble finding a girlfriend, isn't it? It's likely that among the photos you posted online there isn't one in which you look like Leonardo di Caprio and that you think physical appearance is the only way to impress woman. Or maybe your girlfriend never texts you until you do, and when she answers, hours later, it's with a simple or . Or perhaps you're one of those guys who's convinced he can get the attention of a beautiful girl by simply texting her " Hi! " or " Hey! "? I guess I must give you a hint then, pal: Women are different from men! And naturally, they think differently, they love differently! And this is because before loving with their body women always love with their mind... In my book, "Texting Women", I give you the right tips, quick and simple, to learn everything there is to know about texting a woman, and especially to understand how to get the timing right. In your opinion, what's every man's main goal when texting a woman he likes? Easy! That she always texts him back - the sooner the better - and eagerly! But clearly, to be able get there one must study the method and train hard - as if it were a physical activity - and put all of the following steps into practice: Mindset: work on yourself. Remember how as a child you were told to always be yourself? Well, forget that! Unless you want to die alone... The thing is, there is no "self". Which self? There can be many different selves, you can be whatever you want, you can improve: To manipulate girls, first you must be able to manipulate yourself. Skills: The main skill consists in figuring out who is the girl you're writing to, what she likes, what language frequencies she travels on. By doing that, you will be able to become the mirror in which she sees herself, and in you and in your texts she will recognize a part of herself and of her mind. Techniques: The right techniques allow you to seduce girls by doing nothing, you

have to get to the point where, whatever you write them, they start answering with long messages, as if they were talking about themselves with a psychologist. This way girls feel like they're seducing themselves with their own mind and will increasingly feel the need to answer your texts. Secrets: once you have completed all the previous steps, you should not be in a hurry to meet or see them, enjoy the moment and let them stew in their own juice. Raise the conversation's level by talking about spicy stuff, that's when they'll go crazy, and that's how when you'll see them in person they will already be completely obsessed with you and they will be yours. In the end it's going to be you the one not texting them back.
