Hundred Percent - Karen Romano Young
2016-08-09

The last year of elementary school is big for every kid. In this novel, equal parts funny and crushing, utterly honest and perfect for boys and girls alike, Christine Gouda faces change at every turn, starting with her own nickname—Tink—which just doesn't fit anymore. Readers will relate to this strong female protagonist whose voice rings with profound authenticity and absolute novelty, and her year's cringingly painful trials in normalcy—uncomfortable Halloween costumes, premature sleepover parties, crushed crushes, and changing friendships. Throughout all this, Tink learns, what you call yourself, and how you do it, has a lot to do with who you are. This book marks beloved author Karen Romano Young's masterful return to children's literature: a heartbreakingly honest account of what it means to be between girl and woman, elementary and middle school, inside and out—and just what you name that in-between self.

Beside You in Time - Elizabeth Freeman
2019-09-06

In *Beside You in Time* Elizabeth Freeman expands biopolitical and queer theory by outlining a temporal view of the long nineteenth century. Drawing on Foucauldian notions of

discipline as a regime that yoked the human body to time, Freeman shows how time became a social and sensory means by which people assembled into groups in ways that resisted disciplinary forces. She tracks temporalized bodies across many entangled regimes—religion, secularity, race, historiography, health, and sexuality—and examines how those bodies act in relation to those regimes. In analyses of the use of rhythmic dance by the Shakers; African American slave narratives; literature by Mark Twain, Pauline Hopkins, Herman Melville, and others; and how Catholic sacraments conjoined people across historical boundaries, Freeman makes the case for the body as an instrument of what she calls queer hypersociality. As a mode of being in which bodies are connected to others and their histories across and throughout time, queer hypersociality, Freeman contends, provides the means for subjugated bodies to escape disciplinary regimes of time and to create new social worlds.

She then stumbles across her only hope: BO, the last of the legendary storm foil warriors known as the QUANTUM DRAGOONS—and Lord Baron's son!
