Young Chinese in Urban China

- Alex Cockain 2012-08-21

This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths' quests to understand themselves. The author examines social factors such as changes in the physical construction of urban neighbourhoods; changes in family life including reduced family size, increasing rates of divorce and increased physical mobility of the family unit; school life and mounting pressure to perform well in examinations and be a good student; access to foreign and domestic media as well as access to the internet. Drawing on the fields of social and cultural anthropology, Alex Cockain shows that the process of self understanding in a changing spatial, social and cultural world involves ongoing

disjointed efforts to achieve a sense of security and belonging on the one hand and a degree of increased autonomy in their relationships with, for example, parents and teachers on the other. This book will appeal to anyone interested in Chinese Society, Social and Cultural Anthropology, Asian Anthropology and Youth Studies.

Theories of Change - Karen Wendt 2021-05-07

Today, it has become strikingly obvious that companies no longer operate in an environment where only risk return and volatility describe the business environment. The business has to deal with volatility plus uncertainty, plus complexity and ambiguity (VUCA): that requires new

qualities, competencies, frameworks; and it demands a new mind set to deal with the VUCA environment in investment, funding and financing. This book builds on a new megatrend beyond resilience, called anti-fragility. We have had the black swan (financial crisis) and the red swan (COVID) - the Bank for International Settlement is preparing for regenerative capitalism, block chain based analysis of financial streams and is aiming to prevent the "Green Swan" - the climate crisis to lead to the next lockdown. In the light of the UN 17 Sustainable Development Goals, what is required, is Theories of Change. Written by experts working in the fields of sustainable finance, impact investing, development finance, carbon divesting, innovation, scaling finance, impact entrepreneurship, social stock exchanges, alternative currencies, Initial Coin Offerings (ICOs), ledger technologies, civil action, co-creation, impact management,

deep learning and transformation leadership, the book begins by analysing existing Theories of Change frameworks from various disciplines and creating a new integrated model - the meta-framework. In turn, it presents insights on creating and using Theories of Change to redirect investment capital to sustainable companies while implementing the Sustainable Development Goals and the Paris Climate Agreement. Further, it discusses the perspective of planetary boundaries as defined by the Stockholm Resilience Institute, and investigates various aspects of systems, organizations, entrepreneurship, investment and finance that are closely tied to the mission ingrained in the Theory of Change. As it demonstrates, solutions that ensure the parity of profit, people and planet through dynamic change can effectively address the needs of entrepreneurs and business. By exploring these concepts and their application, the book

Talking Cure - Paula Marantz Cohen 2023-03-14

An invigorating exploration of the pleasures and social benefits of conversation Talking Cure is a timely and enticing excursion into the art of good conversation. Paula Marantz Cohen reveals how conversation connects us in ways that social media never can and explains why simply talking to each other freely and without guile may be the cure to what ails our troubled society. Drawing on her lifelong immersion in literature and culture and her decades of experience as a teacher and critic, Cohen argues that we learn to converse in our families and then carry that knowledge into a broader world where we encounter diverse opinions and sensibilities. She discusses the role of food in encouraging conversation, the challenges of writing dialogue in fiction, the pros and cons of Zoom, the relationship of conversation to vaudeville acts, and the

educational value of a good college seminar where students learn to talk about ideas.

Cohen looks at some of the famous groups of writers and artists in history whose conversation fed their creativity, and details some of the habits that can result in bad conversation. Blending the immediacy of a beautifully crafted memoir with the conviviality of an intimate gathering with friends, Talking Cure makes a persuasive case for the civilizing value of conversation and is essential reading for anyone interested in the chatter that fuels culture.

embodied differences. This area has broadened and challenged conventional boundaries of 'disability', expanding the kinds of embodied differences considered, while continuing to grapple with important challenges such as policy relevance and the use of more inclusionary research approaches. This book demonstrates the value of a spatial conceptualization of disability and disablement to a broader social science audience, whilst examining how this conceptualization can be further developed and refined.

Talking Gender and Sexuality - Paul McIlvenny
2002-01-01

This edited volume brings together scholars from psychology, linguistics, sociology and communication science to investigate how performative notions of gender and sexuality can be fruitfully explored with the rich set of tools that have been developed by conversation analysis and discursive psychology for

analyzing everyday practical language use, agency and identity in talk. Contributors re-examine the foundations of earlier research on gender in spoken interaction, critically appraise this research to see if and how it 'translates' successfully into the study of sexuality in talk, and promote innovative alternatives that integrate the insights of recent feminist and queer theory with qualitative studies of talk and conversation. Detailed empirical analyses of naturally occurring talk are used to uncover how gender and sexual identities, agencies and desires are contingently accomplished in conversational practices. Collectively, they pose the important question of what a critical theory of talk, gender and sexuality ought to look like if it is to be sensitive to a politics of conversation analysis.
