

The Homosexual And Society An Annotated Bibliography

The Homosexual and Society - Robert B. Marks
Ridinger 1990-04-23

This bibliography pulls together a scattered literature of popular periodical articles, monographs, and sources from the legal press to create a picture of the treatment of the homosexual in both contemporary and past societies. Subject coverage has been limited to eight areas of society in which homophobic attitudes have been frequently expressed: the military, child custody, adoption and foster care, religion, censorship, employment, and police-community relations. This arrangement facilitates access to information on the desired

topics. Sources cited in this work are those which are most accessible. Annotations expand the scope of entries and are cross-referenced. Both legal and alternative press sources are included for greater scope. A pioneering work, *The Homosexual and Society* opens up a subfield of research in the social sciences that has been neglected and merits wider consideration. This bibliography is suitable for college and research libraries, state historical associations, public libraries of all sizes, law libraries and specialized research facilities in the social sciences.

Book of Gomorrah - Peter Damian 2010-10-30

Some of the roots of the characteristic negative attitude to homosexuality can be found in Peter Damian's appeal to Pope Leo IX. Though written 900 years ago by an Italian monk in a remote corner of Italy, The Book of Gomorrah is relevant to contemporary discussion of homosexuality. The Book of Gomorrah asks the Pope to take steps to halt the spread of homosexual practices among the clergy. The first part outlines the various forms of homosexual practice, the specific abuses, and the inadequacy of traditional penitential penances, and demands that offenders be removed from their ecclesiastical positions. The second part is an impassioned plea to the offenders to repent of their ways, accept due penance, and cease from homosexual activity. Payer's is the first

translation of the full tract into any language from the original Latin. In his introduction to the tract Payer places The Book of Gomorrah in its context as the first major systematic treatise in the medieval West against various homosexual acts, provides a critique of Peter Damian's arguments, and outlines his life. The annotated translation is followed by a translation of the letter of Pope Leo IX in reply to Damian's Treatise, an extensive bibliography, and indexes. The book will be of interest to students of medieval history and religion, to ethicists and students of social mores, and to persons generally concerned with the historical roots of present-day attitudes to homosexuality.

Educating About Social Issues in the 20th and 21st Centuries Vol. 2 - Samuel Totten
2013-02-01

Over the course of the past decade and a half, we, Samuel Totten and Jon E. Pedersen, have co-edited a series of books on teaching and learning about social issues. Our goal has been to build a series that would broadly represent the work that has been undertaken over the past 110 plus

years related to the field of teaching and learning about social issues. As we created and added to the series (see for example: Addressing Social Issues in the Classroom and Beyond: The Pedagogical Efforts of Pioneers in the Field; Researching and Teaching Social Issues: The Personal Stories and Pedagogical Efforts of Professors of Education; Teaching and Studying Social Issues: Major Programs and Approaches), we came to the conclusion that the development of an annotated bibliography of the key works (books, chapters, articles, reports, and research) on a wide-range of issues/topics germane to teaching and learning about social issues was a logical addition to the series. In Educating About Social Issues in the 20th and 21st Centuries Volume 1: A Critical Annotated Bibliography (which was published in early 2012), the focus was on a host of programs, models, strategies and concerns vis-à-vis teaching and learning about social issues. This new book constitutes Volume Two in the series entitled Educating

About Social Issues in the Twentieth and Twenty First Centuries and picks up where Volume One left off. Included in this book are the pioneering works of the following: Boyd Bode, Alan F. Griffin, G. Gordon Hullfish, Richard Gross, Robert Yager, and James Banks. Collectively, their work on social issues spans the period between the late 1930s through the present (with James Banks and Robert Yager continuing to publish through today). As for the subjects/topics (other than pioneers of teaching about social issues) addressed in this volume, they are: Issues-Centered Approaches to Teaching Geography, Addressing Social Issues in Sociology and Anthropology Courses, Peace Studies, The Vietnam War, and LBGT.

God Loves Gay Women - Reverend Bonnie Kelly 2014-02-28

Honest, faithful people are wondering if the Bible is really telling them to hate gay people. This book is a reasoned response to that inquiry. It deals with the Scriptures most often cited to

justify homophobia and provides a more loving interpretation. Six lesbians tell their story and how the Church has impacted their lives. Families and clergy are given clear guidelines on how to offer support and kindness to this marginalized and maligned group of women. This is an important book for our time. Homophobia, cruelty, and denial of human dignity to all gay people at home and globally have re-emerged, much of it fueled by false and malicious biblical interpretation.

The Archaeology of the Indian Subcontinent and Sri Lanka - Robert B. Marks Ridinger 2001

Filling a distinct gap in the reference literature of archaeology, this bibliography provides an introduction to the vast and varied literature produced by the practice of archaeology in the Indian subcontinent and Sri Lanka since the

early 19th Century. The annotated entries are arranged geographically by contemporary political subdivisions, with now-vanished native states and jurisdictions from the days of the British Raj cross-referenced to the modern subdivision. Within each section, entries are arranged chronologically, permitting the user to trace the inception and development of archaeological field survey and investigation regionally. Summarizing the contents of each title, the annotations place the titles within the broader context of South Asian archaeological scholarship. An appendix lists the major Pakistani, Sri Lankan, and Indian legislation regulating the conservation and preservation of archaeological sites and artifacts and the antiquities trade. The bibliography places emphasis on works in English or other Western languages that are located easily outside of South Asia.
