We Came All the Way from Cuba So You Could Dress Like This? - Achy Obejas 1998-03-01

Achy Obejas writes stories about uprooted people. Some, like herself, are Latino immigrants and lesbians; others are men (gay and straight), people with AIDS, addicts, people living marginally, just surviving. As omniscient narrator to her characters' lives, Obejas generously delves into her own memories of exile and alienation to tell stories about women and men who struggle for wholeness and love.

The New Gay Teenager - Ritch C Savin-Williams 2009-06-30

Gay, straight, bisexual: how much does sexual orientation matter to a teenager's mental health or sense of identity? In this down-to-earth book, filled with the voices of young people speaking for themselves, Savin-Williams argues that the standard image of gay youth presented by mental health researchers—as depressed, isolated, drug-dependent, even suicidal—may have been exaggerated even twenty years ago, and is far from accurate today.

Invertito. Jahrbuch für die Geschichte der Homosexualitäten / Verfolgung homosexueller Männer und Frauen in der NS-Zeit -

Fachverband Homosexualität und Geschichte e.V. 2021-02-24

Die historische Erforschung des Schicksals der Homosexuellen in der NS-Zeit fördert weiterhin gewichtige Erkenntnisse zu Tage. Zunächst über Jahrzehnte ignoriert, dann zögerlich erforscht, wird diese Geschichte erst heute in allen ihren Hinsichten aufgearbeitet. Nur ganz selten werden die Erkenntnisse in voller Breite dargeboten, das letzte Mal im Jahre 2002. Inzwischen werden neben den Rosa-Winkel-Häftlingen in den Konzentrationslagern auch die Verfolgung der lesbischen Liebe und der Transgender thematisiert. Was Erinnerungskultur bedeutet und wie sie zu gestalten ist, hat an Gewicht gewonnen. Zudem droht vom rechtsextremen Lager her die Wiederkehr der Homophobie. Dieses Themenheft der Zeitschrift *Invertito* enthält zwölf brandaktuelle Abhandlungen mit neuen Funden und Antworten auf Streitfragen. Das wird Kontroversen auslösen. Mit Beiträgen von Birgit Bosold, Lutz van Dijk, Insa Eschebach, Norbert Finzsch, Anna Hájková, Burkhard Jellonnek, Rüdiger Lautmann, Laurie Marhoefer, Kirsten Plötz, Andreas Pretzel, Sébastien Tremblay, Alexander Zinn u.a.

The Cambridge Handbook of Social Problems: - A. Javier Treviño 2018-03-22

The introduction of the Affordable Care Act in the United States, the increasing use of prescription drugs, and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty-first-century social problems. The *Cambridge Handbook of Social Problems* offers a wide-ranging roster of the social problems currently pressing for attention and amelioration. Unlike other works in this area, it also gives great consideration to theoretical and methodological discussions. This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems. It is suitable for classes in social problems, current events, and social theory. Featuring the most current research, the Handbook provides an especially useful resource for sociologists and graduate students conducting research.

Youth, Education, and Sexualities: K-Z - James Thomas Sears 2005

Featuring more than 200 entries, this work is an authoritative source for educators, researchers and students seeking an understanding of lesbian, gay, bisexual, and transgender (LGBT) youth. This work examines policy, practice and research concerning youth who are often the victims of bullying and harassment.

Imagined Societies - Willem Schinkel 2017-02-16

Imagined Societies explores how images of 'society' and of national belonging have been forged by the media and politicians through the portrayal of immigrants and their 'failed integration'. Examining the experience of the Netherlands and other Western European countries, this book analyses how discussions of integration, culture, religion, and sexuality promote notions of national societies.

Understanding the Well-Being of LGBTQI+ Populations - National Academies of Sciences, Engineering, and Medicine 2021-01-23

The increase in prevalence and visibility of sexually gender diverse (SGD) populations illuminates the need for greater understanding of the ways in which current laws, systems, and programs affect their well-being. Individuals who identify as lesbian, gay, bisexual, asexual, transgender,

non-binary, queer, or intersex, as well as those who express same-sex or gender attractions or behaviors, will have experiences across their life course that differ from those of cisgender and heterosexual individuals. Characteristics such as age, race and ethnicity, and geographic location intersect to play a distinct role in the challenges and opportunities SGD people face. *Understanding the Well-Being of LGBTQI+ Populations* reviews the available evidence and identifies future research needs related to the well-being of SGD populations across the life course. This report focuses on eight domains of well-being; the effects of various laws and the legal system on SGD populations; the effects of various public policies and structural stigma; community and civic engagement; families and social relationships; education, including school climate and level of attainment; economic experiences (e.g., employment, compensation, and housing); physical and mental health; and health care access and gender-affirming interventions. The recommendations of *Understanding the Well-Being of LGBTQI+ Populations* aim to identify opportunities to advance understanding of how individuals experience sexuality and gender and how sexual orientation, gender identity, and intersex status affect SGD people over the life course.

Memory Mambo - Achy Obejas 2016-10-18

Memory Mambo describes the life of Juani Casas, a 25-year-old Cuban-born American lesbian who manages her family's laundromat in Chicago while trying to cope with family, work, love, sex, and the weirdness of North American culture. Achy Obejas's writing is sharp and mordantly funny. She understands perfectly how the romance of exile—from a homeland as well as from heterosexuality—and the mundane reality of everyday life balance one another. *Memory Mambo* is ultimately very moving in its depiction of what it means to find a new and finally safe sense of home.

Troubling the Teaching and Learning of Gender and Sexuality Diversity in South African Education - Dennis A. Francis 2016-11-18

In this book, Francis highlights the tension between inclusion and sexual orientation, using this tension as an entry to explore how LGB youth experience schooling. Drawing on research with teachers and LGB youth, this book troubles the teaching and learning of sexuality diversity and, by doing so, provides a critical exploration and analysis of how curriculum, pedagogy, and policy reproduces compulsory heterosexuality in schools. The book makes visible the challenges of teaching sexuality diversity in South African schools while highlighting its potential for rethinking conceptions of the social and cultural representations thereof. Francis links questions of policy and practice to wider issues of society, sexuality, social justice and highlights its implications for teaching and learning. The author encourages policy makers, teachers, and scholars of sexualities and education to develop further questions and informed action to challenge heteronormativity and heterosexism.

Transition and Coherence in Intellectual Property Law - Niklas Bruun 2021-01-07

This volume is for students and scholars of intellectual property law, practitioners seeking creative arguments from across the field, and policymakers searching for solutions to changing social and technological issues. The book explores the tensions between two fundamentally competing demands made of IP law.

Prevention and Control of Aggression and the Impact on its Victims - Manuela Bach 2013-04-17

Proceedings of the XIV World Meeting of the International Society for the Research on Aggression: Prevention and Control of Aggression and the Impact on its Victims, held in July 9-14, 2000, in Valencia, Spain. Aggression is an aspect of human society that has interested scientists for many decades, and their work has provided important knowledge about its causes and way to prevent and control this behavior. However, not only scientists but many professionals working in the wide spectrum of society, from family to international policy, are interested in having programs of interventions capable of reducing aggression and violence in our society. This comprehensive book is a compendium of most research approaches that are currently taking place in the field of aggression, focusing on the interventions to control and prevent this behavior and the impact on its victims. The chapters of the book include biological approaches to aggression, such as neuroanatomy, neurochemistry, neuroendocrinology, genetics and psychopathology; information about

aggression in children and adolescents in different settings such as family, school and community; characteristics of aggression in specific relationships such as marital and sexual, and specific settings such as bars, prisons and traffic; and cultural approaches to aggression, social prejudice, war and programs of peace. Furthermore, a small number of representative chapters about victims are included, ranging from the impact of aggression on behavior and physiology in animal models to victims of war. As this book highlights, the interventions to prevent and control aggression have to be diverse (highly heterogenic) in order to deal with all aspects of human beings and society, ranging from pharmacological control in individuals to programs of peace to promote respect among people and among nations. Scientists, academics and professionals dealing with any facet of aggression and its impact on our society will obtain in this book information about the complexity of this research field and the ways to approach our objective: eliminate aggression from the human behavioral repertoire.

The Politics of Resentment - Katherine J. Cramer 2016-03-23

"An important contribution to the literature on contemporary American politics. Both methodologically and substantively, it breaks new ground." —Journal of Sociology & Social Welfare When Scott Walker was elected Governor of Wisconsin, the state became the focus of debate about the appropriate role of government. In a time of rising inequality, Walker not only survived a bitterly contested recall, he was subsequently reelected. But why were the very people who would benefit from strong government services so vehemently against the idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the "liberal elite." Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate's social identity matches our own. Taking a deep dive into Wisconsin's political climate, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics. *The Politics of Resentment* shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

The Cambridge History of Sixteenth-Century Music - Iain Fenlon 2018-12-31

Part of the seminal Cambridge History of Music series, this volume departs from standard histories of early modern Western music in two important ways. First, it considers music as something primarily experienced by people in their daily lives, whether as musicians or listeners, and as something that happened in particular locations, and different intellectual and ideological contexts, rather than as a story of genres, individual counties, and composers and their works. Second, by constraining discussion within the limits of a 100-year timespan, the music culture of the sixteenth century is freed from its conventional (and tenuous) absorption within the abstraction of 'the Renaissance', and is understood in terms of recent developments in the broader narrative of this turbulent period of European history. Both an original take on a well-known period in early music and a key work of reference for scholars, this volume makes an important contribution to the history of music.

James Baldwin in Context - D. Quentin Miller 2019-08-01

James Baldwin in Context provides a wide-ranging collection of approaches to the work of an essential black American author who is just as relevant now as he was during his turbulent heyday in the mid-twentieth century. The perspectives range from those who knew Baldwin personally, to scholars who have dedicated decades to studying him, to a new generation of scholars for whom Baldwin is nearly a historical figure. This collection complements the ever-growing body of scholarship on Baldwin by combining traditional inroads into his work, such as music

and expatriation, with new approaches, such as intersectionality and the Black Lives Matter movement.

Life on the Hyphen - Gustavo Pérez Firmat 2012-05-01

With fascinating insights into how both ordinary and famous Cuban-Americans, including Desi Arnaz, Oscar Hijuelos, Gloria Estefan, and José Kozer, have lived 'life on the hyphen', this is an expanded, updated edition of the classic, award-winning study of Cuban-American culture. *The Cambridge Guide to the Worlds of Shakespeare* - Bruce R. Smith 2016

This transhistorical, international and interdisciplinary work will be of interest to students, theater professionals and Shakespeare scholars.

Shakespeare and Emotion - Katharine A. Craik 2020-10-22

Shakespeare and Emotion devotes sustained attention to the emotions as a novel way of exploring Shakespeare's works in their original contexts. A variety of disciplinary approaches drawn from literary, theatrical, historical, cultural and film studies brings the recent upsurge of interest in affect into conversation with some of the most urgent debates in Shakespeare studies. The volume provides both a comprehensive account of the current state of scholarship and a speculative forum for new research. Its chapters outline some important contexts for understanding Shakespeare's creativity through an emotional lens - from religion, rhetoric, and medicine, to language, acting and Bollywood - and offer a range of case studies which reveal particular emotions at work. Considering emotional and passionate experience as an animating and sometimes alienating force within the plays and poems, the volume highlights the continuing importance of Shakespeare today: for our sense of who we are and who we might become.

Gender, Class and Education (Routledge Revivals) - Stephen Walker 2013-11-05

First published in 1983, *Gender, Class and Education* is a collection of papers that formed presentations at the Westhill Sociology of Education Conference in January 1982, and is the fifth such collection to emerge from the annual conference. The conference theme, 'Race, Class and Gender', was not only chosen because of its topicality, but also to provide a framework for debate between educational researchers and teachers. The papers focus on the reproduction of gender relations through education and provide important insights into how this process works, how it is resisted in schools and colleges, and the possibilities for radical intervention. This volume includes three teaching bibliographies on gender and education which were not presented at the conference, but were compiled specially for the book.

"All We Want is Equality" - Ryan Richard Thoreson 2018

"In the wake of the Supreme Court's 2015 marriage equality ruling, lawmakers across the United States introduced dozens of bills that would permit moral or religious objectors to decline to serve LGBT people. In at least eight states, exemption bills have been enacted into law, creating a license to discriminate based on sexual orientation and gender identity. [This report], based on interviews with 30 people affected by discrimination and 82 advocates and service providers, documents how such laws license discrimination, discourage people from accessing services, and harm the dignity of LGBT people. It urges lawmakers at the state and federal level to strengthen nondiscrimination protections for LGBT people and repeal sweeping exemptions that put the rights and well-being of marginalized groups at risk."--Back cover.

The Darker Side of Travel - Richard Sharpley 2009

The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.
