**Perfumes** Luca Turin 2010-08-06 'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought *Perfumes: The Guide* by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, *Guardian* *Perfumes: The Guide* is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

*The Female Brain* Louann Brizendine 2009-05-04 Accessible, fun and compelling, and based on more than three decades of research, *The Female Brain* will help women to better understand themselves - and the men in their lives. In this groundbreaking book, Dr Louann Brizendine describes the uniquely flexible structure of the female brain and its constant, dynamic state of change - the key difference that separates it from that of the male - and reveals how women think, what they value, how they communicate, and whom they'll love. She also reveals the neurological explanations behind why... - A woman remembers fights that a man insists never happened... - Thoughts about sex enter a woman's brain perhaps once every couple of days, but may enter a man's brain up to once every minute... - A woman's brain goes on high alert during pregnancy - and stays that way long after giving birth... - A woman over 50 is more likely to initiate divorce than a man... - Women tend to know what people are feeling, while men can't spot an emotion unless someone cries or threatens

*Love Signals* David Givens 2006-01-10 A world renowned anthropologist explores the nonverbal signs, signals, and cues human beings exchange to attract and keep their mates. As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner.

*Fragrant* Mandy Aftel 2014-10-16 Winner of the 2016 Perfumed Plume Award The "Alice Waters of American natural perfume" (indieperfume.com) and author of the Art of Flavor celebrates our most potent sense, through five rock stars of the fragrant world Mandy Aftel is widely acclaimed as a trailblazer in natural perfumery. *Handbook of African Medicinal Plants, Second Edition* Maurice M. Iwu 2014-02-04 With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the *Handbook of African Medicinal Plants* provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

**Introducing Intercultural Communication** Shuang Liu 2010-11-09 Books on intercultural communication are rarely written with an intercultural readership in mind. In contrast, this multinational team of authors has put together an introduction to communicating across cultures that uses examples and case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Written to be accessible for international students too, this text situates communication theory in a truly global perspective. Each chapter brings to life the links between theory and practice and between the global and the local, introducing key theories and their practical applications. Along the way, you will be supported with first-rate learning resources, including:

- theory corners with concise, boxed-out digests of key theoretical concepts
- case illustrations putting the main points of each chapter into context
- learning objectives, discussion questions, key terms and further reading framing each chapter and stimulating further discussion
- a companion website containing resources for instructors, including multiple choice questions, presentation slides, exercises and activities, and teaching notes.

This book will not merely guide you to success in your studies, but will teach you to become a more critical consumer of information and understand the influence of your own culture on how you view yourself and others.

*The Forgotten Pollinators* Stephen L. Buchmann 2012-06-22 Consider this: Without interaction between animals and flowering plants, the seeds and fruits that make up nearly eighty percent of the human diet would not exist. In *The Forgotten Pollinators*, Stephen L. Buchmann, one of the world's leading authorities on bees and pollination, and Gary Paul Nabhan, award-winning writer and renowned crop ecologist, explore the vital but little-appreciated relationship between plants and the animals they depend on for reproduction -- bees, beetles, butterflies, hummingbirds, moths, bats, and countless other animals, some widely recognized and other almost unknown. Scenes from around the globe -- examining island flora and fauna on the Galapagos, counting bees in the Panamanian rain forest, witnessing an ancient honey-hunting ritual in Malaysia -- bring to life the hidden relationships between plants and animals, and demonstrate the ways in which human society affects and is affected by those relationships. Buchmann and Nabhan combine vignettes from the field with expository discussions of ecology, botany, and crop science to present a lively and fascinating account of the ecological and cultural context of plant-pollinator relationships. More than any other natural process, plant-pollinator relationships offer vivid examples of the connections

between endangered species and threatened habitats. The authors explain how human-induced changes in pollinator populations -- caused by overuse of chemical pesticides, unbridled development, and conversion of natural areas into monocultural cropland--can have a ripple effect on disparate species, ultimately leading to a "cascade of linked extinctions."

**Skinny Legs and All** Tom Robbins 2003-06-17 An Arab and a Jew open a restaurant together across the street from the United Nations.... It sounds like the beginning of an ethnic joke, but it's the axis around which spins this gutsy, fun-loving, and alarmingly provocative novel, in which a bean can philosophize, a dessert spoon mystifies, a young waitress takes on the New York art world, and a rowdy redneck welder discovers the lost god of Palestine--while the illusions that obscure humanity's view of the true universe fall away, one by one, like Salome's veils. *Skinny Legs and All* deals with today's most sensitive issues: race, politics, marriage, art, religion, money, and lust. It weaves lyrically through what some call the "end days" of our planet. Refusing to avert its gaze from the horrors of the apocalypse, it also refuses to let the alleged end of the world spoil its mood. And its mood is defiantly upbeat. In the gloriously inventive Tom Robbins style, here are characters, phrases, stories, and ideas that dance together on the page, wild and sexy, like Salome herself. Or was it Jezebel?

suppressed humor...engagingly informative...sparkling social history.-ForeWord...will satisfy the standards of professionalsàacademic or commercial...This is obligatory stuff for anybody in the business...a delightfully provocative read for anyone who is the target of advertisingùanyone, today, who is not actually serving life tenure in a monastery.ö-Baltimore SunVictoria's Secret and Calvin Klein are brand names practically synonymous with sexually suggestive advertising. Considering their high public profile and huge profits, anyone can see that sex sells. Despite polls indicating that the public would like to see less sex in advertising, Americans don't mean what they say. They continue to respond to the lure of provocative marketing and, most important to business, they buy. Knowing this, more and more advertisers are testing the limits of public taste in the highly competitive battle to capture the consumer's attention.All of this is well documented in Tom Reichert's profusely illustrated book, *The Erotic History of Advertising*. As Reichert amply demonstrates, the use of sex in advertising is far from being a recent fad. As long ago as the 1880s, Duke Cigarettes enclosed in their packs--not baseball cards--but similar small cards showing scantily clad women of the stage, which encouraged purchasers to keep buying to complete the whole set. In the 1920s Woodbury soap became the market leader largely through ads with images of romantic situations and claims that Woodbury soap made a woman's skin irresistible to the touch. In the 1930s White Owl cigars had great success in marketing through ads showing attractive couples locked in a passionate kiss, suggesting that only White Owls left the breath smelling pleasant. Warner Lambert capitalized on the same kind of imagery for decades to connect Listerine mouthwash with romantic success.With numerous illustrations showing many erotic ads--some campy, some esthetically elegant, some homoerotic--that push the boundaries of sexuality and taste from over a century of product marketing, Reichert not only tracks the history of sex in advertising but also explores the many factors that make the link between sex and our consumer culture so successful. Among other things, he considers the range of salacious imagery, from mildly suggestive to the use of outright nudity; the emotional impact of sexy ads; the influence of sex on brand recognition; what works and what doesn't; the differences between male and female responses; and the possible harms of using sex in advertising, especially in regard to young audiences and the perpetuation of female stereotypes.This thoughtful, enjoyable, and fascinating look into the world of advertising--from the late 1800s to the most erotic ads of today--will appeal to both media-savvy consumers and aficionados of pop culture.Tom Reichert, Ph.D., an Advertising Professor at the University of Alabama, has dedicated ten years to studying the prevalence of sex in advertising and its effect on persuasion. He has published on this topic in many scholarly journals, is a contributor to the *Encyclopedia of Advertising*, and is the lead editor and a contributor to *Sex in Advertising: Perspectives on the Erotic Appeal*.

*The Psychological Basis of Perfumery* J. Stephan Jellinek 2012-12-06 During the many years of its publication and subsequent revisions, Paul Jellinek's book has been the standard work on its subject. This new edition, translated into English for the first time, was conceived in response to the increased interest in recent years in perfumes and the sense of smell. This interest has come not only from within the highly competitive perfumery industry, but also from psychologists and market researchers. The original text has impressively withstood the test of time and the approach of this new book has been to supplement it with chapters that are now of critical importance, but which were only touched upon in the original book. A market researcher looks at why people use perfumes; a psychologist examines the motivation of perfume choice; another psychologist discusses odours and a perfumer looks at the effects of odours on human experience and behaviour. In the final chapter the editor compares the original author's views with those of today's experts and suggests which aspects are still valid and in what areas divergent views now prevail. This book is written principally to provide a scientific basis to the craft of perfumery and to enable formulators and marketers to understand why the smells they create and sell have the effect they do. It allows a systematic approach to the development of these products. Others outside the industry, including psychologists in academia, will find the book an essential reference source.

Neurobiology of Sensation and Reward Jay A. Gottfried 2011-03-28 Synthesizing coverage of sensation and reward into a comprehensive systems overview, *Neurobiology of Sensation and Reward* presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.

**Divorced Girl Smiling** Jackie Pilossoph 2013-11-23 Smile! It's not just the end of your marriage, it's the beginning of your second chance! Missy Benson has a two and a half carat diamond engagement ring with color grade H, VS2 clarity and a value of \$36,000. It's absolutely gorgeous, practically flawless, and let's be honest, really big! But what the successful Chicago realtor doesn't have anymore is a husband. After 12 years of marriage, her husband, Paul, a handsome, wealthy attorney has devastated her by breaking up their marriage for Priscilla Sommerfeld, a young, personal trainer, who according to Missy's sassy assistant, J.J., looks more like a Las Vegas stripper than a fitness expert. Not sure what to do with her ring, and with no financial issues to worry about, Missy decides to put it up for sale on Craigslist. The price: 99 cents! The catch: She gets to pick the buyer. In essence, she's looking for the perfect guy, but not for herself. Her hope is to regain faith that good men do exist, and that marriages can last forever. Now referring to herself as "the divorced girl," Missy interviews dozens of young men who are vying for the huge ring. It's a contest that includes outrageous characters, hilarious and sentimental stories, and two finalists, both of whom Missy adores and who she must choose between. Then there's Parker Missoni, the sexiest contestant by far, who drives her crazy with his brutal honesty, and at the same time stops her heart with his deep brown eyes. *Divorced Girl Smiling* is the story of a woman's journey to do whatever it takes to heal herself from divorce. It's about acceptance, reflection, taking accountability for mistakes, and appreciating all of life's wonderful gifts. The Man's Guide to Women John Gottman 2016-02-02 A great "philosopher" once said, "Trying to understand women is like trying to smell the color 9." But the fact is, men can understand women to their great benefit. All they need is the right teacher. And arguably there is no better teacher than John Gottman, PhD, a world-renowned relationships researcher and author of the bestselling 7 principles of Making Marriage Work. His new book, written with wife Julie Gottman, a clinical

psychologist, and Doug Abrams and Rachel Carlton Abrams, MD, is based on 40 years of scientific study, much of it gleaned from the Gottman's popular couple's workshops and the "love lab" at the University of Washington. It's written primarily for men because new research suggests that it is the man in a relationship who wields the most influence to make it great or screw it up beyond repair. The Man's Guide to Women offers the science-based answers to the question: What do women really want in a man? The book explains the hallmarks of manhood that most women find attractive, and helps men hone those skills to be the man she desires.

Word Play Amalie Silver 2014-06-15 Smut sells. Michael Rourke learned this the hard way.

Struggling to make ends meet as a mystery writer, he sold his soul - and his pride - as he pedaled sex and lust writing under the pen name Christoph Strong. No one knew he was the one behind the steamy stories on the bestsellers lists. And he planned to keep it that way. Until he met her. Monica Singer, an infamous blogger, is keen to discover the truth of his secret identity. During a chance meeting at a book convention, Michael and Monica form an instant connection. And soon, an industry rivalry becomes something else entirely. But as Michael starts to let his guard down, he doesn't realize that the person he's learning to trust may be hiding secrets of her own. *Going Gray* Anne Kreamer 2009-01-07 When 49-year-old Anne Kreamer saw a horrifying photo of her harshly dyed brown hair, she realized she wasn't kidding anyone. So she set out a plan: over the next few months she would give up her weekly visits to the salon and let her hair go its natural way. The result is *Going Gray*: an exploration of that experience and a frank, funny, and unflinchingly wise investigation of aging today. Through interviews, experiments, and surprising personal accounts, Kreamer probes the issues behind two of the biggest fears mature women face: Can I be sexually attractive as a gray-haired middle-aged woman? and Will I be discriminated against in the work world? In searching for the balance between attractiveness and authenticity, Kreamer offers an entertaining and valuable look at the politics and personal costs of our definition of "aging gracefully."

*Men to Boys* Gary S. Cross 2010 Men today delay marriage and responsibility deep into their 20s or 30s, preferring instead to hold fast to the pleasures of youth. Instead of blaming the young or glorifying the past, Cross studies the attitudes and cultures of three generations of men, linking their rebellion against maturity to parallel shifts in American culture.

**The Science of Love and Betrayal** Robin Dunbar 2012-04-03 Falling in love is one of the strangest things we can do - and one of the things that makes us uniquely human. But what happens to our brains when our eyes meet across a crowded room? Why do we kiss each other, forget our friends, seek a 'good sense of humour' in *Lonely Hearts* adverts and try (and fail) to be monogamous? How are our romantic relationships different from our relationships with friends, family or even God? Can science help us, or are we better off turning back to the poets? Basing his arguments on new and experimental scientific research, Robin Dunbar explores the psychology and ethology of romantic love and how our evolutionary programming still affects our behaviour. Fascinating and illuminating, witty and accessible, *The Science of Love and Betrayal* is essential reading for anyone who's ever wondered why we fall in love and what on earth is going on when we do.

*The Layguide* Tony Clink 2004 Clink has taught men across the country how to seduce a woman without fail. Now, every guy can have access to his infallible wisdom in "The Layguide."

**Brandwashed** Martin Lindstrom 2011-09-28 A shocking insider's look at how global giants conspire to obscure the truth and manipulate our minds. Marketing visionary Martin Lindstrom has been on the front lines of the branding wars for over twenty years. Here, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned dollars. Picking up from where Vance Packard's bestselling classic, *The Hidden Persuaders*, left off more than half-a-century ago, Lindstrom reveals: New findings that reveal how advertisers and marketers intentionally target children at an alarmingly young age - starting when they are still in the womb! Shocking results of an fMRI study which uncovered what heterosexual men really think about when

they see sexually provocative advertising (hint: it isn't their girlfriends). How marketers and retailers stoke the flames of public panic and capitalize on paranoia over global contagions, extreme weather events, and food contamination scares. The first ever neuroscientific evidence proving how addicted we all are to our iPhones and our Blackberry's (and the shocking reality of cell phone addiction - it can be harder to shake than addictions to drugs and alcohol). How companies of all stripes are secretly mining our digital footprints to uncover some of the most intimate details of our private lives, then using that information to target us with ads and offers 'perfectly tailored' to our psychological profiles. How certain companies, like the maker of one popular lip balm, purposely adjust their formulas in order to make their products chemically addictive. What a 3-month long guerrilla marketing experiment, conducted specifically for this book, tells us about the most powerful hidden persuader of them all. And much, much more. This searing expose introduces a new class of tricks, techniques, and seductions - the Hidden Persuaders of the 21st century- and shows why they are more insidious and pervasive than ever.

**Neurobiology of Chemical Communication** Carla Mucignat-Caretta 2014-02-14 Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.
