Love, Power, and Justice - William S. Hatcher 2002

With fascinating insight, *Love, Power, and Justice* explores issues of authentic morality using precepts and arguments from philosophy, science and religion, as well as the profound concepts contained in the Baha'i revelation. This work, now in its second edition, is an innovative contribution to one of the more intractable debates of our time--a time when so many different factions and individuals each claim to speak with moral authority.

Equals and Partners - Patricia Verge 2018-03-23

Canada is poised to reconcile its centuries-long fraught history with Indigenous peoples and to establish justice. What fundamental spiritual principles should guide this challenging process and bring together peoples who have been separated for so long? In this part-memoir, part-scholarly work, Patricia Verge records her decades-long friendship with the Stoney Nakoda Nation in southern Alberta. She explores how her spiritual journey has been intimately entwined with service among Indigenous people and confronts her own ignorance of the true history of Canada, taking for her guidance this quote from the writings of the Bahá'í Faith: "a massive dose of truth must be administered to heal." An engaging and timely work, *Equals and Partners* is ultimately a story of love and commitment to the principle of the oneness of humanity.

American Journal of Psychotherapy - 1947

Eleven - Paul Hanley 2014-09-16

Eleven billion people will crowd this marvelous planet by century's end. If the global economy were to grow five-fold during this period as predicted, humanity's ecological footprint would exceed Earth's biocapacity by 400%. We need to chart a new course to the future. The sweeping changes that make a 'full world' work--involving dual processes of destruction and reconstruction--will transform global culture, agriculture, and ultimately the human race. *ELEVEN* is a call to consciousness. Only an 'ethical revolution' will allow us to carry forward an ever-advancing civilization. Paul Hanley proposes a transformational model that will help individuals, institutions, and communities make an eleven-billion world work for everyone--and the planet.

The Universe Within Us - Jane E. Harper 2009

A provocative look at the purpose of life through a mixture of religion, science and personal experience

The Oxford Handbook of Medical Ethnomusicology - Benjamin Koen 2008-11-03

Medical Ethnomusicology is a new field of integrative and holistic research and applied practice that approaches music, health, and healing anew, engaging the biological, psychological, emotional, social, and spiritual domains of human life that frame and inform our experiences of health and healing, illness and disease, life and death. The power of music to create health and healing at the individual, community, and societal levels is not only linked to these domains of human life, but is intimately interwoven with the ever present and multifaceted frame of culture, which is often where meaning lies, and is a key factor that creates or inhibits efficacy. The *Oxford Handbook of Medical Ethnomusicology* appeals to all those interested in music, medicine, and culture, and represents a new stage of collaborative discourse among researchers and practitioners who embrace and incorporate knowledge from a diversity of fields. Importantly, such knowledge, by definition, spans the globe of traditional cultural practices of music, spirituality, and medicine, including biomedical, integrative, complementary, and alternative models; is rooted in new physics, philosophy, psychology, sociology, cognitive science, linguistics, medical anthropology, and of course, music, dance, and all the healing arts. The book is more than the first collected volume to establish the discipline of medical ethnomusicology and express its broad potential; it is also an expression of a wider paradigm shift of innovative thinking and collaboration that fully embraces both the health sciences and the healing arts. The authors encourage the development of this new paradigm through an openness

to and engagement of knowledge from diverse research areas and domains of human life conventionally viewed as disparate, yet laden with potential benefits for an improved or vibrant quality of life, prevention of illness and disease, even cure and healing.

Transcultural Caring Dynamics in Nursing and Health Care - Marilyn A Ray 2018-05-16

How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions.

The Anatomy of Ethical Leadership - Lyse Langlois 2011

Maximizing productivity without regard for human consequences, the quest for profit above all else, the stifling of individual personality and creative expression, a competitive atmosphere--these are the reigning features of the modern workplace. Although many writers have called attention to the debilitating effects of this dehumanization of the working environment, solutions have been less in evidence. In *The Anatomy of Ethical Leadership*, Lyse Langlois frames the problem in terms of ethics, pointing to the fact that managers are often uncertain how to integrate ethical considerations into their process of decision making. She explores the instrumental, often highly legalistic patterns of thought that pervade modern organizations and proposes instead a new emphasis on dialogue and on modes of reasoning that make room for the complexity of ordinary reality. To that end, she outlines a trajectory for ethical, responsible, and authentic decision making--the TERA model--that managers can use to evaluate workplace situations, taking into account three interrelated ethical perspectives: care, justice, and critique. Leaders who have mastered the art of ethical thinking, she argues, can in turn foster relationships among co-workers that are not only more human but ultimately more productive.

Home-grown Terrorism - Thomas. M. Pick 2009

This book is part of the NATO Science for Peace and Security Series - E: Human and Societal Dynamics and is based upon the presentations of a NATO Research Workshop by the same title. There are many recent examples of terrorist acts committed by radicalised Europeans with an immigrant heritage: in 2004 the Dutch filmmaker Theo Van Gogh was assassinated, by a Dutch citizen from Morocco origins, because he produced a movie portraying Islam in an unconventional manner. The same year in the United Kingdom, the police foiled a potential terrorist attack and arrested eight men, all of whom were British citizens of Pakistani descent. Why some individuals with a migrant background become radicalised? Issues about marginalisation, societal exclusion, lack of integration, feelings of isolation, powerlessness and humiliation are all part of the problem. No amount of military or other coercive action will, in itself, do the trick of countering terrorism effectively without remedial action based upon a thorough knowledge of the underlying processes involved. This book is meant to be a small but significant step in that direction. With this purpose, it gathers the views of a wide range of multidisciplinary experts about how to prevent home grown terrorism and what strategies should be developed to hinder its development.

The Slovak Economy and EU Membership - Bruno S. Sergi 2004

Reviews the country's economic achievements in the period 1990-2004 with a view to negotiating membership in the enlarged EU.

Rulers of Reality and the Ruled Races - Joseph R. Washington 1990

Global Citizenship Education - 2008-01-01

The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities. As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities.

ANATOMIE DU LEADERSHIP ÉTHIQUE. POUR DIRIGER NOS ORGANISATIONS D'UNE MANIÈRE CONSCIENTE ET AUTHENTIQUE - Lyse Langlois 2019-02-12T00:00:00-05:00

La performance à tout prix, la productivité accrue sans égard aux conséquences que cela peut provoquer sur soi, les autres et son environnement et celle de la compétition forcent parfois les individus à restreindre leurs rapports avec autrui. Cette poursuite n'est pas sans entraîner un certain raccourci de notre capacité à penser et à mieux décider. Certains décideurs n'acceptent plus ces pressions et cherchent à construire de nouveaux rapports plus justes avec les autres. Ils s'intéressent avec acuité à l'éthique. Le XXI^e siècle sera-t-il marqué du sceau de la conscientisation des conduites et des effets que celles-ci peuvent avoir sur notre capacité à mieux vivre ensemble ? Comprendre le processus décisionnel en situation de dilemme éthique est un premier pas vers cette démarche de conscientisation, surtout lorsqu'on est en situation d'autorité et que nous détenons la capacité de préserver ce qu'il est juste de faire, le tout dans un environnement de plus en plus complexe. Cet ouvrage s'adresse particulièrement aux gestionnaires et aux étudiants en gestion des ressources humaines préoccupés par l'instauration d'une pratique éthique au travail. « Ce livre mérite d'être lu par toutes les personnes qui s'interrogent sur la portée de ses propres décisions et jugements et, aussi, sur ceux des autres. » - FERNAND MORIN, professeur émérite en droit du travail « Ces travaux novateurs offrent non pas uniquement aux leaders en éducation mais aussi à ceux d'autres organisations l'occasion de réexaminer sous un angle nouveau leur propre processus de prise de décision éthique. » - JERRY STARRATT, Boston College L'ouvrage de la professeure Lyse Langlois arrive à point nommé pour les gestionnaires du monde de l'éducation. Avec les grandes transformations culturelles, sociales et économiques que nous vivons, il est souvent difficile de trouver la bonne boussole quand vient le temps de porter un jugement et de prendre une décision. La démarche proposée par Lyse Langlois répond à un besoin pressant et permet de développer des conduites plus éthiques dans nos organisations scolaires. - CLAIRE LAPOINTE, directrice du Centre de recherche et d'intervention sur la réussite scolaire La formation TERA offerte à une douzaine de décideurs de mon organisation influence déjà le développement de celle-ci. Au cœur des décisions de l'organisation,

leurs préoccupations éthiques bénéficient à tous et, en premier lieu, à l'élève... notre raison d'être ! - JACKY TREMBLAY, directeur des ressources humaines, commission scolaire des Découvreurs

Overcoming Violence Against Women and Girls - Michael L. Penn 2003

A vivid overview of the scope of the problem of gender-based violence worldwide, and a sense of the important work now underway to eradicate it.

Close Connections - John S. Hatcher 2005

Close Connections will appeal to anyone interested in spirituality and its link to everyday life. For more than twenty-five years John Hatcher has studied the nature and purpose of physical reality by exploring the theological and philosophical implications of the authoritative Baha'i texts. His latest book explains how the gap between physical and spiritual reality is routinely crossed, and describes the profound implications that result from the interplay of both worlds.

Bahá'í Ethics in Light of Scripture: Doctrinal fundamentals - Udo Schaefer 2007

There is a fundamental discrepancy between man as he is and man as he could be, if only he recognized his true being and purpose. Ethics is the discipline by which man can understand how he can pass from the first condition to the second. Udo Schaefer's Bah ' Ethics in Light of Scripture is an attempt to analyse the underlying structures and detect the interior architecture of the Bah ' moral system and is a step towards developing a Bah ' moral theology. Doctrinal Fundamentals, the first of two volumes, provides a historical overview of the Bah ' Faith, a systematic survey of its doctrines and an overview of the origin and derivation of moral values. It considers the metaphysical nature of human beings and human responsibilities, looks at reason and conscience, and explores liberty and its limits. Schaefer's second volume deals with concrete values - the virtues, divine commandments and principles of social ethics from a Bah ' perspective.

Toward a Socially Responsible Psychology for a Global Era - Elena Mustakova-Possardt 2013-08-13

This book explores the concept of "socially-responsible psychology in a global age" and how it might be used to organize, integrate and bring enhanced focus a field that has the potential to contribute to solutions to the world's most pressing problems. In this volume, the editors explore the central and defining features of socially-responsible psychology, challenges that this work would face, and the mechanisms and processes by which psychological work could be synergistically integrated with the work of other disciplines. For this purpose, the volume also examines a variety of factors currently that limit psychology in carrying out this goal.
