British Naval Captains of the Seven Years' War - A. B. McLeod 2012

Presents rich detail on captains' duties and everyday lives.

Navies in Northern Waters - Rolf Hobson 2004-08-02

Navies in Northern Waters is a collection of articles covering the roles played by the secondary navies of northern European powers and the United States within the maritime balance of power. The contributions covering the 18th and 19th centuries focus on their relations with each other as they sought to create a counterweight to the dominant naval power of Britain. The inter-war years are treated from the perspectives of international disarmament efforts within the framework of collective security, and the subsequent naval rivalry in the Baltic area in the years leading up to the Second World War. For the post-1945 period, the contributions concentrate on superpower rivalry in northern waters during the Cold War, the changing aspects of security policy since the collapse of the Soviet Union and the particular challenges facing small coastal states policing extensive waters of increasing economic importance.

The Continental Commitment - Jeremy Black 2005-11-16

Recent debates about British political and military strategies, derived in particular from dissension about Britain's relationship with Europe and from disagreement over the Iraq war, has led to a greater awareness of the problematic nature of the concept of 'national interests'. This major new work delivers a long view of this issue, its twin strands are captured by an assessment both of the Continental commitment and British interventionism in the 18th Century. The extent to which Britain's rise to superpower status in America and Asia was related to the Continental connection, and her Hanoverian interests, is a central theme of this study, as is the relationship between the domestic position of the Crown and its interests as Electors of Hanover. The issue of Continental interventionism opens up the question of how alliances generate their own pressures, at the same time that they are supposed to help overcome challenges; while also indicating how the domestic support for alliances shifts, creating its own dynamics that in turn affect the international dimension. This book will be of great interest to students and scholars of international relations, British foreign policy, British history and war and conflict studies.

Unspoken Allies - Nigel John Ashton 2001

This study brings together the expertise of an international group of scholars to survey the development of political and economic relations between Britain and the Netherlands from the Napoleonic era to the present day. It illuminates both the underlying refrain of harmony in international outlook, ideology and interests that often made for close co-

operation between the two countries, and also their episodic instances of conflict. The contributors address topics ranging from Anglo-Dutch relations in the era of imperialism; the tensions created by Dutch neutrality in the First World; the challenges of the inter-war years; the role of the Dutch in British strategy during the Second World War; colonialism and decolonisation; and, most recently, bilateral relations in the European framework. Based on detailed research in British and Dutch archives, Unspoken Allies provides new insights into relations between two of the principal "amphibious" powers of Europe across the last two centuries.

The Seaforth Bibliography - Eugene Rasor 2009-04-17

This remarkable work is a comprehensive historiographical and bibliographical survey of the most important scholarly and printed materials about the naval and maritime history of England and Great Britain from the earliest times to 1815. More than 4,000 popular, standard and official histories, important articles in journals and periodicals, anthologies, conference, symposium and seminar papers, guides, documents and doctoral theses are covered so that the emphasis is the broadest possible. But the work is far, far more than a listing. The works are all evaluated, assessed and analysed and then integrated into an historical narrative that makes the book a hugely useful reference work for student, scholar, and enthusiast alike. It is divided into twenty-one chapters which cover resource centres, significant naval writers, pre-eminent and general histories, the chronological periods from Julius Caesar through the Vikings, Tudors and Stuarts to Nelson and Bligh, major naval personalities, warships, piracy, strategy and tactics, exploration, discovery and navigation, archaeology and even naval fiction. Quite simply, no-one with an interest and enthusiasm for naval history can afford to be without this book at their side.

The Oxford Illustrated History of the Royal Navy - J. R. Hill 2002

Britain is an island nation and throughout history its navy has been of great importance for its defence. As a consequence it has always had a special significance and has over the centuries entrenched itself in the national psyche, making itself manifest not only through the hero-worship of its principal characters such as Horatio Nelson and Sir Francis Drake but also finding expression through art, music, and literature. Like any great national institution, the navy is a complex web of interconnected histories - operational, strategic, political, economic, administrative, technological, and social. Now updated for its paperback edition, The Oxford Illustrated History of the Royal Navy, in a series of fourteen chapters, provides a thorough and engaging treatment of these histories, covering every aspect of naval history from the Anglo-Saxon period to the dawn of the new millennium. The book explores: Major action and campaigns - the defeat of the Spanish Armada, the Anglo-Dutch Wars, the Battle of Trafalgar, the Battle of Jutland, the Atlantic

Campaign of 1939-45, the Falklands conflict, the Gulf War, and attacks on terrorist bases in Afghanistan in 2001. Developments in naval history and technology - navigational advances, surveying, constructional developments, disaster relief, the suppression of the slave trade, and the Strategic Defence Review of 1998. Key personalities - Drake and Nelson, Samuel Pepys, Francis Beaufort, Jackie Fisher, Lord Charles Beresford, Lord Jellicoe. Naval life - recruitment (press gangs, training, education, discipline), tactics, gunnery and armaments, amphibious operations, wages and conditions, victualling and supply. How and when did Britain's perception of the sea change from a thing of fear to a 'moat defence' (in the words of Shakespeare)? How did the navy's administrative systems develop during the Tudor period? During the seventeenth and early eighteenth centuries, its greatest period of expansion, how did the navy develop strategically and operationally? How successfully did the navy defend the British Empire during the nineteenth century? What role did the navy play in Victorian Britain's thirst for exploring of the world? What technical developments have been important to the navy? What effect did two world wars have on the role of the Royal Navy? What does the modern navy look like now and what about the future? With a full chronology, which has been brought up to date to the end of 2001, an extensive list of further reading, 16 pages of colour plates, 23 maps, 6 special Action Station diagram 'box' features, and around 200 black-and-white integrated illustrations, this is an authoritative and highly readable account of a unique fighting service and its people.

Parameters of British Naval Power, 1650-1850 - Michael Duffy 1992

A searching collection of investigations into British naval power in the closing centuries of the sailing ship era. The discussions focus on the later seventeenth century strategy of a "big ship" battlefleet; the setting up of a Western Squadron post-1689; naval recruiting; naval power and foreign policy; and the administration of the early Victorian navy and the coming of steam.

Huguenot Soldiers of William of Orange and the Glorious Revolution of 16 - Matthew Glozier 2008-04-10

Provides the analysis of the political, religious and social rationale which underlay Huguenot support for William of Orange in 1688. This book serves as a source of biographical information about hundreds of Huguenot soldiers in British, Dutch and Brandenburg service in the period 1670 to 1700.

Seapower and Naval Warfare, 1650-1830 - Dr Richard Harding 2002-01-04

From the author of "Amphibious Warfare in the Eighteenth Century" and "The Evolution of the Sailing Navy, 1509-1815", this book serves as a single-volume survey of war at sea and the expansion of naval power in the 18th century. The book is intended for undergraduate courses on 18th century European history, and for amateur and professional military historians, and for navy colleges, and navy and ex-navy professionals.

The Royal Navy and German Naval Disarmament, 1942-1947 - Chris Madsen 1998

This book examines the formulation and the implementation of the Royal Navy's policy towards German naval disarmament after the Second World War.

Foreign Jack Tars - Sara Caputo 2022-11-17

The British Royal Navy of the French Wars (1793-1815) is an enduring national symbol, but we often overlook the tens of thousands of foreign seamen who contributed to its operations. *Foreign Jack Tars* presents the first in-depth study of their employment in the Navy during this crucial period. Based on sources from across Britain, Europe, and the US, and blending quantitative, social, cultural, economic, and legal history, it challenges the very notions of 'Britishness' and 'foreignness'. The need for manpower during wartime meant that naval recruitment regularly bypassed cultural prejudice, and even legal status. Temporarily outstripped by practical considerations, these categories thus revealed their artificiality. The Navy was not simply an employer in the British maritime market, but a nodal point of global mobility. Exposing the inescapable transnational dimensions of a quintessentially national institution, the book highlights the instability of national boundaries, and the compromises and contradictions underlying the power of modern states.

An Age of Neutrals - Maartje Abbenhuis 2014-06-12
outside the continent. --Book Jacket.

Friends and Rivals in the East - de Groot 2021-10-25

This is the first book, based on both European and Ottoman sources, to examine the commercial, military, and diplomatic relations between the Dutch and the English in the Levant in the early modern period with a special emphasis on the role played by the Ottoman officials and the local

Christian dragomans or interpreters.

Seapower States - Andrew Lambert 2018-11-27

"A fascinating geopolitical chronicle . . . A superb survey of the perennial opportunities and risks in what Herman Melville called 'the watery part of the world.'" —The Wall Street Journal In this volume, one of the most eminent historians of our age investigates the extraordinary success of five small maritime states. Andrew Lambert, author of *The Challenge: Britain Against America in the Naval War of 1812*—winner of the prestigious Anderson Medal—turns his attention to Athens, Carthage, Venice, the Dutch Republic, and Britain, examining how their identities as "seapowers" informed their actions and enabled them to achieve success disproportionate to their size. Lambert demonstrates how creating maritime identities made these states more dynamic, open, and inclusive than their lumbering continental rivals. Only when they forgot this aspect of their identity did these nations begin to decline.

Recognizing that the United States and China are modern naval powers—rather than seapowers—is essential to understanding current affairs, as well as the long-term trends in world history. This volume is a highly original "big think" analysis of five states whose success—and eventual failure—is a subject of enduring interest, by a scholar at the top of his game. "An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered, how to do so in ways that are consistent with their values, and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more. These are timely questions." —Times Higher Education Supplement "Lambert is, without a doubt, the most insightful naval historian writing today." —The Times

Navies and Armies - G. J. A. Raven 1990

The American Revolution - David K. Allison 2018-11-06

A new look at the American Revolution: more than the David-versus-Goliath portrayal, it was the very first world war The American Revolutionary War stands as a monument to freedom and democracy the world over. *The American Revolution: A World War* provides a fuller story of a war that involved international interest and conflict. From acts of resistance like the Boston Tea Party to the "shot heard 'round the world," the struggle for liberty and independence still resonates; this book offers new insight into the involvement of other nations and the colonists' desire for a country that symbolized their values and the pursuit of the American way of life. Spain, France, and the Dutch Republic joined the colonists' fight against the British not because they supported American independence but because they wanted to protect their own interests. These nations offered essential financial and military support to the revolutionaries, without which the colonists may not have been able to withstand British military supremacy on land and on the seas. The colonists also benefitted from a fortunate tactical advantage: distraction. Great Britain, working to protect its lucrative colonial interests in the Caribbean and India from the other European superpowers, turned its attention away from the American front, enabling colonists to make unexpected gains in the war. These and many other moments in the Revolution are explored through a global lens to offer more context for this crucial moment in history. Featuring essays from leading scholars and historians, and fully illustrated with historical military portraiture, documents, and maps indicating campaigns and territories, this book offers a completely new understanding of the American Revolution: as that of the first world war.

The Mariner's Mirror - Leonard George Carr Laughton 1997

In Asian Waters - Eric Tagliacozzo 2022-07-19

A sweeping account of how the sea routes of Asia have transformed a vast expanse of the globe over the past five hundred years, powerfully shaping the modern world In the centuries leading up to our own, the volume of traffic across Asian sea routes—an area stretching from East Africa and the Middle East to Japan—grew dramatically, eventually making them the busiest in the world. The result was a massive circulation of people, commodities, religion, culture, technology, and ideas. In this book, Eric Tagliacozzo chronicles how the seas and oceans of Asia have shaped the history of the largest continent for the past half millennium, leaving an indelible mark on the modern world in the process. Paying special attention to migration, trade, the environment, and cities, *In Asian Waters* examines the long history of contact between China and East Africa, the spread of Hinduism and Buddhism across the Bay of Bengal, and the intertwined histories of Islam and Christianity in the Philippines. The book illustrates how India became central to the spice trade, how the Indian Ocean became a "British lake" between the

seventeenth and nineteenth centuries, and how lighthouses and sea mapping played important roles in imperialism. The volume ends by asking what may happen if China comes to rule the waves of Asia, as Britain once did. A novel account showing how Asian history can be seen as a whole when seen from the water, In Asian Waters presents a voyage

into a past that is still alive in the present.

Sailing School - Margaret E. Schotte 2019-07-30

Ultimately, Sailing School helps us to rethink the relationship among maritime history, the Scientific Revolution, and the rise of print culture during a period of unparalleled innovation and global expansion.
