Cryptofinance: A New Currency For A New Economy - Stephane Goutte
2021-10-13

The rapid advancement in encryption and network computing gave birth to new tools and products that have influenced the local and global economy alike. One recent and notable example is the emergence of virtual currencies, also known as cryptocurrencies or digital currencies. Virtual currencies, such as Bitcoin, introduced a fundamental transformation that affected the way goods, services, and assets are exchanged. Virtual currencies are experiencing an increasing popularity in the financial markets and in portfolio management as can be classified as financial asset or commodities on a scale from pure medium of exchange advantages to pure store of value advantages. As a result of its distributed ledgers based on blockchain, cryptocurrencies offer some unique advantages to the economy, investors, and consumers, but also pose considerable risks to users and challenges for regulators when fitting the new technology into the old legal framework. Bitcoin for example may be useful in risk management and ideal for risk-averse investors in anticipation of negative shocks to the market. The core objective of this proposed book is to provide a comprehensive discussion on the important issues related to cryptocurrencies ranging from pricing, financial, legal to technological aspects.

The \$10 Trillion Prize - Michael J. Silverstein 2012-09-11

Meet your new global consumer You've heard of the burgeoning consumer markets in China and India that are driving the world economy. But do you know enough about these new consumers to convert them into customers? Do you know that: • There will be nearly one billion middle-class consumers in China and India within the next ten years? • More than 135 million Chinese and Indians will graduate from college in this timeframe, compared to just 30 million in the United States? • By 2020, 68 percent of Chinese households and 57 percent of Indian households will be in the middle and upper classes? • The number of billionaires in China has grown from 1 to 115 in the past decade alone? In *The \$10 Trillion Prize*, bestselling author Michael J. Silverstein and his The Boston Consulting Group colleagues in China and India provide the first comprehensive profile of the emerging middle class, primed to transform the global marketplace. Already the world's biggest buyers of cars, mobile phones, appliances, and more, these consumers are eager for more products and services. In fact, it's estimated that by 2020, consumers in China and India will generate about \$10 trillion of total annual revenue for companies selling to them. This book explains who these consumers are—what they buy and why, how they think and shop, and how their needs and tastes are changing. It takes you into their lives so you can better understand what they want and what they're looking for. Only by fully comprehending the forces driving this new generation of consumers will your company be able to capitalize on the opportunities their buying power represents. Insightful and backed by rigorous research, this book takes you inside the hearts and minds of today's emerging Chinese and Indian consumers—both urban and rural, and across all income levels—positioning your company to win as the next wave of global affluence reaches the marketplace.
