**Perfumes** Luca Turin 2010-08-06 'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought Perfumes: The Guide by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, Guardian Perfumes: The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

*Statelet of Survivors* Amy Austin Holmes 2023 In *Statelet of Survivors*, Amy Austin Holmes charts the history of the Kurdish statelet-Rojava-which sits immediately adjacent to the southeastern Turkish border. Drawing from four years of research trips to northern and eastern Syria, Holmes highlights that the movement is founded on the idea of equality between people of different religious and ethnic backgrounds and does more to empower women and minorities than any other region of Syria. An in-depth examination of Rojava, this book tells the story of the statelet who both triumphed over ISIS and created a model of decentralized governance in Syria that could eventually be expanded if Assad were to ever fall.

In my view, fashion should be aspirational, but attainable and definitely something to have a sense of humor about. It's worth living every single day as the most confident, happy, and glamorous version of yourself. Here's how!" *Front Roe* is the perfect distillation of this philosophy. Louise shares stories, information, and ideas from around the world to help women feel educated, uplifted, inspired, and considerably more positive about their mind, body, closet, and home.

*Secular Byzantine Women* Sophia Germanidou 2022-03-14 *Secular Byzantine Women* examines female material culture during the Late Roman, Byzantine, and Post-Byzantine eras, to better understand the lives of ordinary and humble women during this period. Although recent scholarship has contributed greatly to our knowledge of Byzantine and medieval women, such research has largely focused on female saints, imperial figures, and prominent women of local communities. But what about secular and non-privileged women? Bringing together scholars from various fields, including archaeology, history, theology, anthropology, and ethnography, this volume seeks to answer this important question. The chapters examine the everyday lives of lay women, including their working routines, their clothing, and precious possessions. This book will appeal to scholars and students of Byzantine history, art, and archaeology, as well as those interested in gender and material culture studies.

*Why Study Talmud in the Twenty-first Century?* Paul Socken 2009 The Talmud is the repository of thousands of years of Jewish wisdom. It is a conglomerate of law, legend, and philosophy, a blend of unique logic and shrewd pragmatism, of history and science, of anecdotes and humor. Unfortunately, its sometimes complex subject matter often seems irrelevant in today's world. In this edited volume, sixteen eminent North American and Israeli scholars from several schools of Jewish thought grapple with the text and tradition of Talmud, talking personally about their own reasons for studying it. Each of these scholars and teachers believes that Talmud is indispensable to any serious study of modern Judaism and so each essay challenges the reader to engage in his or her own individual journey of discovery. The diverse feminist, rabbinic, educational, and philosophical approaches in this collection are as varied as the contributors' experiences. Their essays are accessible, personal accounts of their individual discovery of the Talmud, reflecting the vitality and profundity of modern religious thought and experience.

*The World of Ancient Rome [2 volumes]* James W. Eder 2015-08-11 This study of Ancient Rome offers a fascinating glimpse of what Roman society was like—from fashion, to food, to politics and recreation—gathered from literary works, art, and archaeological remains. While the political history and prominent figures of Ancient Rome are well known, accounts of daily life in that time and place often remain untold. This fascinating encyclopedia explores this period from a social and cultural perspective, digging into the day-to-day activities of how Romans dressed, what they ate, how they worked, and what they did for fun. Drawing from recent archaeological evidence, author James W. Eder explores the everyday lives of Roman citizens of all levels and classes. This book is organized into ten sections: art, economics, family, fashion, food, housing, politics, recreation, religion, and science. Each section contains more than two dozen entries that illuminate such topics as slavery as a social movement; the menus of peasants, slaves, and the elite; and the science and engineering solutions that became harbingers for today's technology. The work contains a selection of primary documents as well as a bibliography of print and Internet resources.

*Neurobiology of Sensation and Reward* Jay A. Gottfried 2011-03-28 Synthesizing coverage of sensation and reward into a comprehensive systems overview, *Neurobiology of Sensation and Reward* presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.

**Etiquette: The Least You Need to Know** Jamila Musayeva 2019-01-22 "You never get a second chance to make a first impression." Have you ever heard this saying? Before we get a chance to say a word, our gestures and manners have already spoken for us. Though some of the rules of good manners change, others remain constant. This book is about the constants: the least you need to know to make a good first impression. As Clarence Thomas once said, "Good manners will open doors that the best education cannot." Use this book as a master key to open those doors.

**A. Magazine** 1998

*Message in a Mobile* Siri Lamoureaux 2011 This detailed, meticulous ethnographic study on mobile phone use among Nuba students at the University of Khartoum in Sudan, distinguishes itself from other studies by taking a focused look at the linguistic content of mobile phone interactions via text-messaging, portraying it as a site for the expression of personalized and affective language. While men and women appear to be equally aggressive consumers and producers of text-message poetry, women are formally discouraged in using the phone for relations that go beyond the publicly acceptable norms of "keeping in touch" and making arrangements. Nonetheless, women use it for such purposes and many manage it discreetly, showing how this technology can serve to subvert discursive norms on gender and marriage. The mobile phone in Sudan enhances individual autonomy over interactions, making possible the extension and creation of social spaces. It simultaneously enlarges private space and trespasses into public space. Poetic themes and language, previously limited to elite producers - those both more literate and who had control over mass media domains, radio and newspapers - are exposed to anonymous recipients, who draw from, copy or forward them in continuous circulation, thereby staking a claim in the public sphere. Similarly, the mobile phone serves as a site for the exercise of several layers of identity in negotiation, and reflects or creates alternative identities and the contestation of existing discourses, communities in physical space and notions of belonging.

**The Secret Perfume of Birds** Danielle J. Whittaker 2022-03-01 The untold story of a stunning discovery: not only can birds smell, but their scents may be the secret to understanding their world. The puzzling lack of evidence for the peculiar but widespread belief that birds have no sense of smell irked evolutionary biologist Danielle Whittaker. Exploring the science behind the myth led her on an unexpected quest investigating mysteries from how juncos win a fight to why cowbirds smell like cookies. In *The Secret Perfume of Birds*—part science, part intellectual history, and part memoir—Whittaker blends humor, clear writing, and a compelling narrative to describe how scent is important not just for birds but for all animals, including humans. Whittaker engagingly describes how emerging research has uncovered birds' ability to produce complex chemical signals that influence their behavior, including where they build nests, when they pick a fight, and why they fly away. Mate choice, or sexual selection—a still enigmatic aspect of many animals' lives—appears to be particularly influenced by smell. Whittaker's pioneering studies suggest that birds' sexy (and scary) signals are produced by symbiotic bacteria that manufacture scents in the oil that birds stroke on their feathers when preening. From tangerine-scented auklets to her beloved juncos, redolent of moss, birds from across the world feature in Whittaker's stories, but she also examines the smelly chemicals of all kinds of creatures, from iguanas and bees to monkeys and humans. Readers will enjoy a rare opportunity to witness the twisting roads scientific research can take, especially the challenging, hilarious, and occasionally dangerous realities of ornithology in the wild. *The Secret Perfume of Birds* will interest anyone looking to learn more about birds, about how animals and humans use our senses, and about why it can sometimes take a rebel scientist to change what we think we know for sure about the world—and ourselves.

**Tafsir Ishraq Al-Ma'an** SYED IQBAL ZAHEER 2008-06-03 About The Book With the revival of interest in Islam in our times, the Qur'an is also being read increasingly, especially by the intellectuals: Muslims and non-Muslims alike. However, and although its message and central theme have been stated in unambiguous terms, its translation fails to impart the same meaning with the same effect. Additionally, the Qur'an deals with every subject of human concern and gives guidelines for application to life and society. This increases its scope widely, and requires on the part of the reader's knowledge of various disciplines for proper appreciation of its message. It is specially important to know how the Qur'an was understood by those who received it first: Prophet Muhammad (SAW), on whom be Allah's peace, and his immediate followers. Second in order of interest and importance would be to know how the scholars of Islam have understood it in every age.

Women of Wine Ann B. Matasar 2010-12-17 "This book, with its personal approach and global scope, is the first to explore women's increasingly influential role in the wine industry, traditionally a male-dominated domain. *Women of Wine* draws on interviews with dozens of leading women winemakers, estate owners, professors, sommeliers, and wine writers in the United States, the United Kingdom, France, Italy, Australia, New Zealand, and elsewhere to create a mosaic of the women currently shaping the wine world and to offer a revealing insiders' look at the wine industry."--Jacket.

**Midrashic Women** Judith R. Baskin 2015-05-01 While most gender-based analyses of rabbinic Judaism concentrate on the status of women in the halakhah (the rabbinic legal tradition), Judith R. Baskin turns her attention to the construction of women in the aggadic midrash, a collection of expansions of the biblical text, rabbinic ruminations, and homiletical discourses that constitutes the non-legal component of rabbinic literature. Examining rabbinic convictions of female alterity, competing narratives of creation, and justifications of female disadvantages, as well as aggadic understandings of the ideal wife, the dilemma of infertility, and women among women and as individuals, she shows that rabbinic Judaism, a tradition formed by men for a male community, deeply valued the essential contributions of wives and mothers while also consciously constructing women as other and lesser than men. Recent feminist scholarship has illuminated many aspects of the significance of gender in biblical and halakhic texts but there has been little previous study of how aggadic literature portrays females and the feminine. Such representations, Baskin argues, often offer a more nuanced and complex view of women and their actual lives than the rigorous proscriptions of legal discourse.

**Smell and the Ancient Senses** Mark Bradley 2014-12-17 From flowers and perfumes to urban sanitation and personal hygiene, smell—a sense that is simultaneously sublime and animalistic—has played a pivotal role in western culture and thought. Greek and Roman writers and thinkers lost no opportunity to connect the smells that bombarded their senses to the social, political and cultural status of the individuals and environments that they encountered: godly incense and burning sacrifices, seductive scents, aromatic cuisines, stinking bodies, pungent farmyards and festering back-streets. The cultural study of smell has largely focused on pollution, transgression and propriety, but the olfactory sense came into play in a wide range of domains and activities: ancient medicine and philosophy, religion, botany and natural history, erotic literature, urban planning, dining, satire and comedy—where odours, aromas, scents and stench were rich and versatile components of the ancient sensorium. The first comprehensive introduction to the role of smell in the history, literature and society of classical antiquity, *Smell and the Ancient Senses* explores and probes the ways that the olfactory sense can contribute to our perceptions of ancient life, behaviour, identity and morality. *Product Marketing and Cosmetic & Fragrance Retailing* 1981 Includes section: Cosmetic & fragrance retailing, a "magazine-within-a-magazine."

*Perfume on the Page in Nineteenth-Century France* Cheryl Krueger 2023-06-26 Despite long-standing assertions that languages, including French and English, cannot sufficiently communicate the experience of smell, much of France's nineteenth-century literature has gained praise for its memorable evocation of odours. As French perfume was industrialized, democratized, cosmeticized, and feminized in the nineteenth century, stories of fragrant scent trails aligned perfume with toxic behaviour and viewed a woman's scent as something alluring, but also something to be controlled. Drawing on a wealth of resources, *Perfume on the Page in Nineteenth-Century France* explores how fiction and related writing on olfaction meet, permeate, and illuminate one another. The book examines medical tracts, letters, manuscripts, posters, print advertisements, magazine articles, perfume manuals, etiquette books, interviews, and encounters with fragrant materials themselves. Cheryl Krueger explores how the olfactory language of a novel or poem conveys the distinctiveness of a text, its unique relationship to language, its style, and its ways of engaging the reader: its signature scent. Shedding light on the French perfume culture that we know today, *Perfume on the Page in Nineteenth-Century France* follows the scent trails that ultimately challenge us to read perfume and literature in new ways.
