Curriculum Models for the 21st Century - Maree Gosper 2013-08-28

Changing student profiles and the increasing availability of mainstream and specialized learning technologies are stretching the traditional face-to-face models of teaching and learning in higher education. Institutions, too, are facing far-reaching systemic changes which are placing strains on existing resources and physical infrastructure and calling into question traditional ways of teaching through lectures and tutorials. And, with an ever-increasing scrutiny on teaching and teachers'

accountability for positive educational outcomes, the call for closer attention to learning, teaching and, most especially, to the design and delivery of the curriculum is given increasing relevance and importance. Research provides strong evidence of the potential for technologies to facilitate not only cognition and learning but also to become integral components in the redesign of current curriculum models. Some Universities and individual academics have moved along this pathway, developing new and innovative curriculum, blending pedagogies and technologies to suit their circumstances. Yet, there are others, unsure of the possibilities, the opportunities and constraints in these changing times. Curriculum Models for the 21st Century gives insights into how teaching and learning can be done differently. The focus is on a whole of curriculum approach, looking at theoretical models and examples of practice which capitalize on the potential of technologies to deliver variations and alternatives to the more

traditional lecture-based model of University teaching.

Snakes - Stephen J. Mullin 2011-08-15

Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all

animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each

Best Sex Writing of the Year: On Consent,

BDSM, Porn, Race, Sex Work and More - Jon
Pressick 2015-03-17

This exciting 2015 volume of Best Sex Writing features a number of significant bloggers and some of the most important stories of the past two years. Alexandria Goddard is the blogger who made the important connections in the historic Steubenville Rape Case; Epiphora is the most renowned and saucy sex toy reviewer who has legions of dedicated followers; Lux Alptraum has recently sold the wildly successful Fleshbot and taken an editorial position at Nerve. These contributors (and many others) know the words that sell online, and their presence in this collection will carry tremendous weight with readers. At the same time, this anthology features topics that have not received as much attention in previous editions. Claire Litton provides a terrific personal recollection of sex in nerd culture. Internationally acclaimed musician Ember Swift recounts her sexual appetites while she was pregnant. David Henry Sterry

remembers his experience as a sex worker providing service to an 82-year-old woman. People — including those beyond the sex

community — are learning to consider sex from many different angles, and this collection covers a great number of them.
