Report of Cases Determined in the Supreme Court and Court of Appeals of the State of New Mexico - New Mexico. Supreme Court 2000

Concepts of Biology - Samantha Fowler 2018-01-07

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Necessity and Proportionality and the Right of Self-Defence in International Law - Chris O'Meara 2021-03

The right of States to use force extraterritorially

is conditioned by requirements of necessity and proportionality. This book provides a much-needed detailed analysis of those requirements, and a coherent and up-to-date account of the applicable contemporary international law in this field.

Stig of the Dump - Clive King 2010-06-03

One day, Barney, a solitary little boy, falls into a chalk pit and lands in a sort of cave, where he meets 'somebody with a lot of shaggy hair and two bright black eyes' - whom he names him Stig. And together they enjoy some extraordinary adventures. A much-loved classic story.

Humanitarian Military Intervention - Taylor B. Seybolt 2007

Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s--northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor--shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian

intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order about the need to use military force because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances.

501 Critical Reading Questions - 2004

Many standardized tests, including high school entrance exams, PSAT, SAT, and GRE, professional and civil service qualifying exams, all use reading comprehension questions to test critical reading skills. This book includes short and long passages designed to help you become familiar with the passages found on your test, as well as the typical questions that you will be asked to answer. In this workbook, test-takers get immediate, focused practice on preparing for and answering questions based on critical reading passages. The Skill Builder in Focus method provides the targeted practice necessary to attain higher scores.

Mechanisms of Insulin Action - Alan R. Saltiel
2007-10-05

More than 18 million people in the United States have diabetes mellitus, and about 90% of these have the type 2 form of the disease. This book attempts to dissect the complexity of the molecular mechanisms of insulin action with a special emphasis on those features of the system that are subject to alteration in type 2 diabetes and other insulin resistant states. It explores insulin action at the most basic levels, through complex systems.

The Great Railway Bazaar - Paul Theroux
2011-09-01

The Great Railway Bazaar is Paul Theroux's classic and much-loved homage to train travel. The Orient Express; The Khyber Pass Local; the Delhi Mail from Jaipur; the Golden Arrow of Kuala; the Trans-Siberian Express; these are just some of the trains steaming through Paul Theroux's epic rail journey from London across Europe through India and Asia. This was a trip of discovery made in the mid-seventies, a time before the West had embraced the places, peoples, food, faiths and cultures of the East. For us now, as much as for Theroux then, to visit the lands of The Great Railway Bazaar is an encounter with all that is truly foreign and exotic - and with what we have since lost. Praise for Paul Theroux: 'Theroux's work remains the standard by which other travel writing must be judged' Observer 'One needs energy to keep up with the extraordinary, productive restlessness of Paul Theroux ... [He is] the most gifted, most prodigal writer of his generation' Jonathan Raban 'Always a terrific teller of tales and conjurer of exotic locales, he writes lean prose that lopes along at a compelling pace' Sunday Times Paul Theroux's books include Dark Star Safari, Ghost Train to the Eastern Star, Riding the Iron Rooster, The Great Railway Bazaar, The Elephanta Suite, A Dead Hand, The Tao of Travel and The Lower River. The Mosquito Coast and Dr Slaughter have both been made into successful films. Paul Theroux divides his time between Cape Cod and the Hawaiian islands.

How Tobacco Smoke Causes Disease - 2010

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks

of tobacco products.

Military Self-Interest in Accountability for Core International Crimes - Morten Bergsmo
2018-04-21

Exploring Linear Relations - Gail Burrill 1998
There's a world of data out there, and this series of modules helps you integrate it into your high-school mathematics courses. Using the major data analysis concepts to provide realistic situations for the development of mathematical knowledge and opportunities for practice, the material reinforces concepts taught in current texts. Extensive use of real data provides opportunities for students to engage in meaningful mathematics, and motivates them to apply what they learn. Future modules include: -
- Mathematics in a World of Data -- Introduction to Probability -- Exploring Systems of Inequalities -- Projects: Planning and Conducting Surveys and Experiments -- Probability Models -- Exploring Least Squares Regression -- Mathematical Modeling Using Data and Logarithms -- Exploring Centers -- Advanced Modeling Using Matrices -- Exploring Symbols
Foundations of Probabilistic Programming - Gilles Barthe 2020-12-03

This book provides an overview of the theoretical underpinnings of modern probabilistic programming and presents applications in e.g., machine learning, security, and approximate computing. Comprehensive survey chapters make the material accessible to graduate students and non-experts. This title is also available as Open Access on Cambridge Core.

501 Reading Comprehension Questions - Learningexpress LLC 2014-01-07

"eTest added-value-- free online practice with instant scoring!"--Spine.

Gulliver's Travels - Jonathan Swift 2011-08-01

Evil Days - Alexander De Waal 1991

For the past thirty years-under both Emperor Haile Selassie and President Mengistu Haile Mariam-Ethiopia suffered continuous war and intermittent famine until every single province has been affected by war to some degree. Evil Days, documents the wide range of violations of basic human rights committed by all sides in the conflict, especially the Mengistu government's

direct responsibility for the deaths of at least half a million Ethiopian civilians.

Inside Out & Back Again - Thanhha Lai
2013-03-01

Moving to America turns H&à's life inside out. For all the 10 years of her life, H&à has only known Saigon: the thrills of its markets, the joy of its traditions, the warmth of her friends close by, and the beauty of her very own papaya tree. But now the Vietnam War has reached her home. H&à and her family are forced to flee as Saigon falls, and they board a ship headed toward hope. In America, H&à discovers the foreign world of Alabama: the coldness of its strangers, the dullness of its food, the strange shape of its landscape, and the strength of her very own family. This is the moving story of one girl's year of change, dreams, grief, and healing as she journeys from one country to another, one life to the next.

Probability and Statistical Inference - Robert V. Hogg 1988

This user-friendly introduction to the mathematics of probability and statistics (for readers with a background in calculus) uses numerous applications--drawn from biology, education, economics, engineering, environmental studies, exercise science, health science, manufacturing, opinion polls, psychology, sociology, and sports--to help explain and motivate the concepts. A review of selected mathematical techniques is included, and an accompanying CD-ROM contains many of the figures (many animated), and the data included in the examples and exercises (stored in both Minitab compatible format and ASCII). Empirical and Probability Distributions. Probability. Discrete Distributions. Continuous Distributions. Multivariable Distributions. Sampling Distribution Theory. Importance of Understanding Variability. Estimation. Tests of Statistical Hypotheses. Theory of Statistical Inference. Quality Improvement Through Statistical Methods. For anyone interested in the Mathematics of Probability and Statistics.

Food, Nutrition, Physical Activity and the Prevention of Cancer - 2007

Model Selection and Multimodel Inference - Kenneth P. Burnham 2007-05-28

A unique and comprehensive text on the

philosophy of model-based data analysis and strategy for the analysis of empirical data. The book introduces information theoretic approaches and focuses critical attention on a priori modeling and the selection of a good approximating model that best represents the inference supported by the data. It contains several new approaches to estimating model selection uncertainty and incorporating selection uncertainty into estimates of precision. An array of examples is given to illustrate various technical issues. The text has been written for

biologists and statisticians using models for making inferences from empirical data.

An Introduction to Logic - Eulalio Baltazar
2019-01-12

This book introduces the basic inferential patterns of formal logic as they are embedded in everyday life, information technology, and science. It is designed to make clear the basic topics of classical and modern logic. The aim is to improve the reader's ability to navigate both everyday and science-based interactions.
