The 1973 tennis match between Billie Jean King and Bobby Riggs became the most watched televised sports event of all time. Trapped in the media glare, King and Riggs were on opposite sides of a binary argument, but off-court each was fighting more personal and complex battles. With her husband urging her to fight for equal pay, the private King was also struggling to come to terms with her own sexuality, while

Riggs gambled his legacy and reputation in a bid to relive the glories of his past.

*The War of the Sexes* - Paul Seabright

2012-04-09

How our stone-age brains made modern society, and why it matters for relationships between men and women As countless love songs, movies, and self-help books attest, men and women have long sought different things. The result? Seemingly inevitable conflict. Yet we belong to the most cooperative species on the planet. Isn't there a way we can use this capacity to achieve greater harmony and equality between the sexes? In *The War of the Sexes*, Paul Seabright argues that there is—but first we must understand how the tension between conflict and cooperation developed in our remote evolutionary past, how it shaped the modern world, and how it still holds us back, both at home and at work. Drawing on biology, sociology, anthropology, and economics, Seabright shows that conflict between the sexes

is, paradoxically, the product of cooperation. The evolutionary niche—the long dependent childhood—carved out by our ancestors requires the highest level of cooperative talent. But it also gives couples more to fight about. Men and women became experts at influencing one another to achieve their cooperative ends, but also became trapped in strategies of manipulation and deception in pursuit of sex and partnership. In early societies, economic conditions moved the balance of power in favor of men, as they cornered scarce resources for use in the sexual bargain. Today, conditions have changed beyond recognition, yet inequalities between men and women persist, as the brains, talents, and preferences we inherited from our ancestors struggle to deal with the unpredictable forces unleashed by the modern information economy. Men and women today have an unprecedented opportunity to achieve equal power and respect. But we need to understand the mixed inheritance of conflict and

cooperation left to us by our primate ancestors if we are finally to escape their legacy.

**Battle of the Sexes** - Donna Robinson

We have discussed whether any conclusion to this book is really necessary. The fact is that neither of us have a definite answer. We are inclined to believe that emphasizing certain points is necessary. We both believe quite strongly in the acceptance of every human being with all their flaws just as we want our flaws to be accepted. That does not mean we accept or tolerate unacceptable behavior. As a woman, I seek the strong emotional attachment with another human being. Whether it's with a man or a woman is immaterial to me. I believe this kind of connection is more important to women. My interest in why we enter relationships and what we seek in them is what motivated me to write this book. I formulated the areas I wanted to discuss and laid out the chapters accordingly. Sex and the act of it is not what this book is

about. This book is about relationships. Sex is a natural and basic part of human relationships and is therefore discussed, but as mentioned throughout, it is a basic instinct and drives the male in a much different way than the female. I realized during the course of this writing that news on what people are currently up to has given us much to write about. A few examples include Reggie White's ignorant and inane comments, the sexual wanderings of a US president, and picketing the funerals of Barry Goldwater and Frank Sinatra, who are labeled as the cause of gays and lesbians taking over our government and the entertainment industry. This book is not about gays or gay rights. It is about people. It is about you and me, the way we relate to each other, and the way we marry and live together.

Barriers have existed to deny people the chance to compete athletically based on their race, ethnic background, or sex. Some athletes,

through their courage and class, have broken down the barriers that have afflicted our society, and sometimes affected greater social change. Billie Jean King changed attitudes toward women and sports with one gigantic victory, fought for equal tournament purses for female tennis players, and started a foundation that promoted athletic opportunities for women.

### **The Battle of the Sexes - 2014**

"In front of 30,000 fans and a global audience of some 50 million, the iconic tennis match they said would never happen, was about to get underway... Billie Jean King was the darling of American tennis: a global, multi-major winning superstar at the peak of her powers. Across the net was Bobby Riggs: a long-time retired pro, but a fast talking hustler and chauvinistic showman, who proclaimed his desire to put women back in their place. For the media, their unlikely courtship was a match made in heaven:

for women's liberation, it was a golden opportunity to take a huge step toward equality; and for ordinary Americans, it was a welcome distraction from Vietnam and the shame of the Watergate Scandal. Combining match footage with contemporary interviews from players past and present, key contributors and journalists, relive how The Battle of the Sexes placed tennis on the world's centre-court, and changed sport forever." --Container.

*Battles of the Sexes - Joe Malone 2018-07-03*  
A fresh look at relationships between twenty-first century females and males. In the twenty-first century, it is no longer just the battle of the sexes, but individual battles of the sexes that pose challenges to how men and women relate to each other. Battles of the Sexes helps men and women understand their own sexual nature, as well that of the opposite sex, and develop sexual empathy for each other. Leading young adult health experts Joe Malone, PhD and Sarah Harris, MS, RDN, provide insight into the

mismatch both sexes endure between our rapidly changing culture and our inherited nature and the resulting battles both genders fight. Cutting-edge, yet understandable science is used to illustrate things like the effect of women's menstrual cycles and the chemical and visual laws of attraction. Malone and Harris lay out what motivates the genders inside relationships, particularly men and their relationship with women and women and their relationship with food, in a way that encourages sexual empathy. *Battles of the Sexes* illuminates how couples can recognize chemical dangers to their bonds and gives singles valuable insights for dating, empowering loving, lasting, committed romance between men and women that will benefit not only individuals, but also our entire species.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and

expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Western literary study flows out of eighteenth-century works by Alexander Pope, Daniel Defoe, Henry Fielding, Frances Burney, Denis Diderot, Johann Gottfried Herder, Johann Wolfgang von Goethe, and others. Experience the birth of the modern novel, or compare the development of language using dictionaries and grammar discourses.

The Battle of the Sexes in French Cinema,  
1930-1956 - Noël Burch 2013-11-04

In *The Battle of the Sexes in French Cinema,*  
1930-1956, Noël Burch and Geneviève Sellier  
adopt a sociocultural approach to films made in  
France before, during, and after World War II,  
paying particular attention to the Occupation  
years (1940-44). The authors contend that the

films produced from the 1930s until 1956—when  
the state began to subsidize the movie industry,  
facilitating the emergence of an "auteur  
cinema"—are important, both as historical texts  
and as sources of entertainment. Citing more  
than 300 films and providing many in-depth  
interpretations, Burch and Sellier argue that  
films made in France between 1930 and 1956  
created a national imaginary that equated  
masculinity with French identity. They track the  
changing representations of masculinity,  
explaining how the strong patriarch who saved  
fallen or troubled women from themselves in  
prewar films gave way to the impotent,  
unworthy, or incapable father figure of the  
Occupation. After the Liberation, the patriarch  
reemerged as protector and provider alongside  
assertive women who figured as threats not only  
to themselves but to society as a whole.
