both distant and alien, some of the best writers in science fiction—some old favorites like Robert J. Sawyer and Stephen Baxter, some up-and-coming—explore some of the many places our future may take us. You'll find problems we face right now, as in Edward M. Lerner's "The Night of the RFIDs" and Richard A. Lovett's "Tiny Berries"; and others that may (or may not?) be much farther down the road, like the very alien viewpoints in Juliette Wade's "Cold Words" and Carl Frederick's "The Universe Beneath Our Feet." You'll find engaging characters like the very young extraterrestrial with a critical mission (in the White House) and an unforgiving deadline in David D. Levine's "Pupa," and the retired astronaut with Alzheimer's who must remotely salvage a Moon mission in Marianne J. Dyson's "Fly Me to the Moon." All are guaranteed to entertain and to make you think in ways you've never thought before.

2009-01-13

9/11 and its aftermath have shown that our ideas about what constitutes sovereign power lag dangerously behind the burgeoning claims to rights and recognition within and across national boundaries. New configurations of sovereignty are at the heart of political and cultural transformations globally. *Sovereign Bodies* shifts the debate on sovereign power away from territoriality and external recognition of state power, toward the shaping of sovereign power through the exercise of violence over human bodies and populations. Following the editors' introduction are fourteen essays by leading scholars from around the globe that analyze cultural meanings of sovereign power and violence, as well as practices of citizenship and belonging--in South
