[How to Get a Girl to Like You](#) - Alex Leandres 2014-10-16

According to scientists, biology and chemistry both play big roles in the attraction between people.

Pheromones, chemicals released by the body, allow animals of the same species to 'communicate' with each other. Studies further reveal that pheromones subconsciously affect the behavior of insects and animals. Insects that work in colonies such as bees and ants communicate by using these chemicals and skunks ward off other animals by releasing a very unpleasant pheromone-related scent. Animals that belong to the same species send out chemical signals to each other to give the message that they are compatible genetically and that they can be good reproductive mates. In view of all these studies, does it mean that people should just leave it to their pheromones to find their partners? Experts say no. Humans, after all, are gifted with intellect and free will - a combination that insects and other animals don't possess. Every person has a conscious decision when it comes to choosing potential mates. So although biology plays a big role in human attraction, there are still other factors that lead people to be attracted to each other. This book will show you exactly how to attract a girl, impress her, and get her to like you. You'll find out what it really takes for a man to get the girl of his dreams to like him back. A lot of men often wonder why some individuals of their gender have more success at meeting girls and at having relationships. Is there a trick that these men use? Or are the steps on how to impress a girl and make her like you actually very simple? Read this book and find out the best ways to attract the girl of your dreams. You'd be surprised that even simple things can actually go a long way in getting a girl's attention, and eventually, her heart!
