The Narrow House Evelyn Scott 2021-07-29 Evelyn Scott's first novel, *The Narrow House*, depicts a family stricken by dysfunctional domesticity. Revolving around troubled members of the Farley family, Scott exposes notions of romantic love, longing, and the image of the Southern belle as damaging, unrealistic constructs, all against the backdrop of a seemingly normal middle-class existence that in previous decades had been idealized in Southern writing. Published to high praise when it appeared in 1921, *The Narrow House* vaulted Scott to literary celebrity in her day. In this new critical edition, Mary E. Papke contextualizes Scott's first and possibly best writing effort with an astute introduction that discusses Scott and her contemporaries, the work's importance to the genre of the novel, and the small but ongoing reclamation of Scott's place in literary history. Completely updated and formatted for a modern readership, this critical edition of *The Narrow House* is sure to find its way into classrooms and onto bookshelves.

The Dangerous Passion David M. Buss 2000-02-14 Why do men and women cheat on each other? How do men really feel when their partners have sex with other men? What worries women more -- men who turn to other women for love or men who simply want sexual variety in their lives? Can the jealousy husbands and wives experience over real or imagined infidelities be cured? Should it be? In this surprising and engaging exploration of men's and women's darker passions, David Buss, acclaimed author of *The Evolution of Desire*, reveals that both men and women are actually designed for jealousy. Drawing on experiments, surveys, and interviews conducted in thirty-seven countries on six continents, as well as insights from recent discoveries in biology, anthropology, and psychology, Buss discovers that the evolutionary origins of our sexual desires still shape our passions today. According to Buss, more men than women want to have sex with multiple partners. Furthermore, women who cheat on their husbands do so when they are most likely to conceive, but have sex with their spouses when they are least likely to conceive. These findings show that evolutionary tendencies to acquire better genes through different partners still lurk beneath modern sexual behavior. To counteract these desires to stray -- and to strengthen the bonds between partners -- jealousy evolved as an early detection system of infidelity in the ancient and mysterious ritual of mating. Buss takes us on a fascinating journey through many cultures, from pre-historic to the present, to show the profound evolutionary effect jealousy has had on all of us. Only with a healthy balance of jealousy and trust can we be certain of a mate's commitment, devotion, and true love.

Social Networks and the Life Course Duane F. Alwin 2018-03-06 This volume engages the interface between the development of human lives and social relational networks. It focuses on the integration of two subfields of sociology/social science--the life course and social networks. Research practitioners studying social networks typically focus on social structure or social organization, ignoring the complex lives of the people in those networks. At the same time, life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and "linked" to one another through social networks. These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields. It covers the role of social networks across the life span, from childhood and adolescence, to midlife, through old age.

The Custom-Made Child? Helen B. Holmes 2012-12-06 Women most fully experience the consequences of human reproductive technologies. Men who convene to evaluate such technologies discuss "them": the women who must accept, avoid, or even resist these technologies; the women who consume technologies they did not devise; the women who are the objects of policies made by men. So often the input of women is neither sought nor

listened to. The privileged insights and perspectives that women bring to the consideration of technologies in human reproduction are the subject of these volumes, which constitute the revised and edited record of a Workshop on "Ethical Issues in Human Reproduction Technology: Analysis by Women" (EIRTAW), held in June, 1979, at Hampshire College in Amherst, Massachusetts. Some 80 members of the workshop, 90 percent of them women (from 24 states), represented diverse occupations and personal histories, different races and classes, varied political commitments. They included doctors, nurses, and scientists, lay midwives, consumer advocates, historians, and sociologists, lawyers, policy analysts, and ethicists. Each session, however, made plain that ethics is an everyday concern for women in general, as well as an academic profession for some.

Game Feel Steve Swink 2008-10-13 "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

Branch Rickey Lee Lowenfish 2022-08-15 He was not much of a player and not much more of a manager, but by the time Branch Rickey (1881-1965) finished with baseball, he had revolutionized the sport--not just once but three times. In this definitive biography of Rickey--the man sportswriters dubbed "The Brain," "The Mahatma," and, on occasion, "El Cheapo"--Lee Lowenfish tells the full and colorful story of a life that forever changed the face of America's game. As the mastermind behind the Saint Louis Cardinals from 1917 to 1942, Rickey created the farm system, which allowed small-market clubs to compete with the rich and powerful. Under his direction in the 1940s, the Brooklyn Dodgers became truly the first "America's team." By signing Jackie Robinson and other black players, he single-handedly thrust baseball into the forefront of the civil rights movement. Lowenfish evokes the peculiarly American complex of God, family, and baseball that informed Rickey's actions and his accomplishments. His book offers an intriguing, richly detailed portrait of a man whose life is itself a crucial chapter in the history of American business, sport, and society.

Why We Love Helen Fisher 2005-01-02 A groundbreaking exploration of our most complex and mysterious emotion Elation, mood swings, sleeplessness, and obsession—these are the tell-tale signs of someone in the throes of romantic passion. In this revealing new book, renowned anthropologist Helen Fisher explains why this experience—which cuts across time, geography, and gender—is a force as powerful as the need for food or sleep. Why We Love begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love. She proves, at last, what researchers had only suspected: when you fall in love, primordial areas of the brain "light up" with increased blood flow, creating romantic passion. Fisher uses this new research to show exactly what you experience when you fall in love, why you choose one person rather than another, and how romantic love affects your sex drive and your feelings of attachment to a partner. She argues that all animals feel romantic attraction, that love at first sight comes out of nature, and that human romance evolved for crucial reasons of survival. Lastly, she offers concrete suggestions on how to control this ancient passion, and she optimistically explores the future of romantic love in our chaotic modern world. Provocative, enlightening, and persuasive, Why We Love offers radical new answers to the age-old question of what love is and thus provides invaluable new insights into keeping love alive.

Why Love Hurts Eva Illouz 2013-05-20 Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

Fight Fair Tim Downs 2010-07-01 Everyone disagrees on some things; this is inevitable. The question is, how can we disagree with those we love but increase the odds that we will live and love to fight another day? In other words, how can we fight fair? In this companion to One of Us Must Be Crazy... and I'm Pretty Sure It's You (a treatise on making sense of the differences that divide us), Tim and Joy Downs aren't playing around. This time they concentrate less on how to make sense of our differences and more on winning at conflict without losing at love. When couples fight, tempers flare, tongues loosen, and behavior occurs that can cause major damage to the relationship. Fight Fair! teaches couples how to have healthy disagreements. It is a candid and realistic "rulebook" for married couples to ensure that their conflict is God-honoring and respectful of their partner. There is also plenty of immediate application to ensure that future conflicts don't create permanent scars.

Panic Free Tom Bunn 2019-04-30 "HURRY, BUY THE BOOK AND TRANSFORM YOUR LIFE." — Marla Friedman, PsyD, PC, board chairman, Badge of Life What if you could stop panic by tapping into a different part of your brain? After years of working to help sufferers of panic and anxiety, licensed therapist (and pilot) Tom Bunn discovered a highly effective solution that utilizes a part of the brain not affected by the stress hormones that bombard a person experiencing panic. This "unconscious procedural memory" can be programmed to control panic by preventing the release of stress hormones and activating the parasympathetic nervous system. This process, outlined in Panic Free, sounds complicated but is not, requiring just ten days and no drugs or doctors. Bunn includes specific instructions for dealing with common panic triggers, such as airplane travel, bridges, MRIs, and tunnels. Because panic is profoundly life-limiting, the program Bunn offers can be a real life-changer.

Above all, you will find out what it's like for non-human species in a human world. These are the early stories based in the Chakat Universe. From these stories, the greater body of works grew in number and complexity, but it all started here in these tales.
