Le Nouveau Monde de M. Tompkins - George

Gamow 2019-04-03T00:00:00+02:00

Modeste employé de banque, M. Tompkins décide un peu par hasard d'assister à une conférence au titre bien sérieux : « La Théorie de la relativité selon Einstein ». Ce petit homme doux à l'attention vacillante et à l'imagination enflammée se doute-t-il que cette décision sonne le glas de sa tranquillité ? Le voici illico propulsé dans la joyeuse danse des mystères cosmiques.

La relativité d'Einstein et ses conséquences bizarres aux approches de la vitesse de la lumière, la naissance et la mort de l'Univers, les trous noirs, les distorsions temporelles et l'antimatière, le monde nébuleux des quanta... l'exploration des confins de l'Univers réserve de belles surprises ! Un grand classique de la science populaire

Les plantes ont-elles une mémoire ? - Michel

Thellier 2015-03-23

Quel est, pour les plantes, l'avantage évolutif de posséder de la mémoire ? Quand, où et comment

se produit le stockage d'information ? À quoi le rappel de l'information stockée peut-il bien servir ? Qu'est-ce que la mémoire des plantes comparés à celle des humains et des animaux ? Autant de questions passionnantes et troublantes auxquelles répond Michel Thellier avec l'exigence de la clarté et de la rigueur scientifique. Un ouvrage unique et accessible à un large public.

Plant Responses to Environmental Stimuli - Michel Thellier 2017-02-24

In this unique book, Michel Thellier has combined recent discoveries with older data dealing with plant memory and its potential role on plant acclimatization to environment stimuli. By placing memory within an evolutionary frame, the author persuades us that a new way of research has opened in plant physiology. Detailing experiments in a simplified manner, that general readers with an interest in this topic will find it easy to follow.

Haben Pflanzen ein Gedächtnis? - Michel Thellier 2017-07-24

Michel Thellier schildert in diesem Buch, dass auch Pflanzen ein Gedächtnis besitzen und beantwortet die spannende Frage wann, wo und wie sie Informationen speichern können. Er vergleicht die Erinnerung der Pflanzen mit der von Menschen und Tieren. So manche unserer Vorstellungen geraten ins Wanken, wenn wir erfahren, wie Pflanzen Reize aus der Umwelt - Wind, Regen, Verletzung, Angriff von Pflanzenfressern oder von Schädlingen, elektromagnetische Strahlungen von Mobiltelefonen - wahrnehmen und wie sie sogar darauf antworten durch Änderungen ihres Stoffwechsels und ihrer Entwicklung, mitunter sogar durch Bewegungen. Auch wenn Pflanzen kein Nervensystem haben, können sie Erinnerungen speichern: die Wiederholung eines Reizes verändert die Intensität der Antwort oder der Reiz führt zum Speichern einer Information als ob die Pflanze «sich erinnern würde» vor Tagen oder manchmal auch vor Wochen schon einmal ein solches Signal empfangen zu haben.
