Realities and Relationships - Kenneth J. Gergen
2009-06-01

Kenneth Gergen's aim in this textbook is to outline the main elements of a social constructionist perspective, to illustrate its potential and to foment debate on the future of constructionist pursuits in psychology and the human sciences.

Unfolding Social Constructionism - Fiona J. Hibberd 2006-11-24

For more than half of the 20^{*} century, psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social. In the late 1960s, a reaction to that neglect brought about a "crisis" in social psychology. This "crisis" did not affect all social psychologists; some remained seemingly

oblivious to its presence; others dismissed its significance and continued much as before. But, in certain quarters, the psychological was reconceptualised as the social, and the social was taken to be *sui generis*. Moreover, the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that, as social beings, our actions vary from occasion to occasion, and are, for many reasons, unrepeatable. There is, so it was thought, an inherent instability in the phenomena of interest. The nomothetic ideal was said to rest on individualistic cause-effect positivism of the kind which (arguably) characterised the natural sciences, but social psychology (so it was said) is an historical inquiry, and its conclusions are necessarily historically relative (Gergen, 1973). Events

outside psychology converged to give impetus to the "crisis" within.

Therapy as Social Construction - Sheila McNamee 1992-07-30

'An interesting collection of the state of the art of social constructionism and therapy, and a major contribution to reflection on therapeutic theory and practice' - Changes 'The chapters are interesting as windows into wider debates beyond therapy to those within the human sciences over the organization of meaning and change in culture... the value of this book is that it makes it possible for the reader to step back and think that therapy may mean different things to different communities, that therapy is not the touchstone but only one of many social constructions' - British Psychological Society Counselling Psychology Review This volume explores the exciting possibilities for the therapeutic process of adopting a social constructionist perspective. A key concern is with socially constructed lives. Our senses of

self, identity and life purpose are socially and culturally embedded, but no single cultural 'script' proves all-powerful. In social constructionist therapy, client and therapist work to co-create new, more satisfactory 'stories' in ways which recognise their social, relational character. The book firstly examines the theoretical basis for this process. It also looks at the implications for client-therapist relationships and discusses various approaches in practice, including 'irreverent therapy', the 'not-knowing therapist' and the role of reflexivity. A number of case studies are presented. The final section offers an exhilarating mix of overview, self-critique and agenda for the future.

An Invitation to Social Construction - Kenneth J Gergen 2009-03-05

This new edition of Kenneth Gergen's landmark Invitation to Social Construction offers readers a clear and more thorough introduction to the theory and practice of social constructionism.

Downloaded from
legacy.opendemocracy.net on
2019-02-05 by guest

Particular to this new edition is a writing style more directed to the undergraduate, a larger more student-friendly format as well as textboxes/visual material employed throughout to lift concepts to a more relevant state of meaning.

Social Constructionism - Andy Lock

2010-03-25

Social Constructionism: Sources and Stirrings in Theory and Practice offers an introduction to the different theorists and schools of thought that have contributed to the development of contemporary social constructionist ideas, charting a course through the ideas that underpin the discipline. From the New Science of Vico in the 18th century, through to Marxist writers, ethnomethodologists and Wittgenstein, ideas as to how socio-cultural processes provide the resources that make us human are traced to the present day. Despite constructionists often being criticised as 'relativists', 'activists' and 'anti-establishment' and for making no concrete

contributions, their ideas are now being adopted by practically-oriented disciplines such as management consultancy, advertising, therapy, education and nursing. Andy Lock and Tom Strong aim to provoke a wider grasp of an alternative history and tradition that has developed alongside the one emphasised in traditional histories of the social sciences.

Social Constructionism - Vivien Burr

2015-04-21

Now in its third edition, this successful book introduces students to the area of social science theory and research known as social constructionism. Using a variety of examples from everyday experience and from existing research in areas such as personality, sexuality and health, it clearly explains the basic theoretical assumptions of social constructionism. Key debates, such as the nature and status of knowledge, truth, reality and the self are given in-depth analysis in an accessible style. Drawing on a range of empirical studies,

Downloaded from
legacy.opendemocracy.net on
2019-02-05 by guest

the book clearly defines the various different approaches to social constructionist research and explores the theoretical and practical issues involved. While the text is broadly sympathetic to social constructionism, it also adopts a critical perspective to the material, addressing its weaknesses and, in the final chapter, subjecting the theory itself to a more extensive critique. New to this edition: Extended coverage of the relationship between 'mainstream' psychology and social constructionism and how the two fields can engage with each other. An exploration of the rise and popularity of neuroscience and the challenge it poses to social constructionism. New material on the field of psychosocial studies. Updated coverage of existing key issues such as age and sexuality, and inclusion of more recently emerging issues (e.g. status and role of affect). Updated discussion of key social constructionist contributors, with revised references. Updated chapter on research methods, including more on

narrative and critical narrative analysis, and personal construct methods. The third edition of Social Constructionism extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students across the social and behavioural sciences.

Interviews With Brief Therapy Experts - Michael F. Hoyt 2013-05-13

This book is a compilation of twelve interviews with brief therapy experts and some of the field's most influential innovators (O'Hanlon, de Shazer, White, and Meichenbaum to name a few). The interviews, conducted to explore technical, theoretical, and ethical aspects of the theory and practice of brief therapy, offer the give-and-take spontaneity that can only be found in an interview style. The selection of the content is based on both the expertise of the interviewees as well as those issues of most concern to the field: managed care and economics, ethics, and being solution-focused.

Relational Responsibility - Sheila McNamee
1999

Relational Responsibility replaces traditional ideas on individual responsibility by giving centre stage to the relational process thereby replacing alienation with meaningful dialogue.

An Invitation to Social Construction - Kenneth J. Gergen 2023-01-14

This book uses real-world examples to bring together complex theories that are foundational to, and sometimes critical of, social constructionism in a way that is highly approachable for social sciences students.

Toward Transformation in Social Knowledge - Kenneth J Gergen 1994

Considers the shift in social psychology and across the social sciences during the last decade toward a social constructionist perspective. This work rejects the dominance of objective science and embraces the socially embedded nature of our knowledge.

Engaging Theories in Family Communication -

Dawn O. Braithwaite 2005-08-23

Engaging Theories in Family Communication: Multiple Perspectives covers uncharted territory in its field, as it is the first book on the market to deal exclusively with family communication theory. In this volume, editors Dawn O. Braithwaite and Leslie A. Baxter bring together a group of contributors that represent a veritable Who's Who in the family communication field. These scholars examine both classic and cutting-edge theories to guide family communication research in the coming years.

Social Construction in Context - Kenneth J Gergen 2001-04-03

This latest book by one the world's leading protagonists in the field will be welcomed not just by psychologists but by students, academics and professionals interested in social constructionism across a wide range of subjects. *Social Construction in Context* explores the potentials of social constructionist theory when

Downloaded from
legacy.opendemocracy.net on
2019-02-05 by guest

placed in diverse intellectual and practical contexts. It demonstrates the achievements of social constructionism, and what it can now offer various fields of inquiry, both academic, professional and applied, given the proliferation of the theory across the social sciences and humanities. First order issues of concern within the academic world, objectivity, truth, power and ideology, are now being augmented by widespread developments in practice - therapeutic, pedagogical, organizational and political. This book looks closely at these developments and examines both the positive potentials and limitations of social constructionist theory when applied to a variety of domains. It has been written in an accessible and scholarly manner making it suitable for a wide-ranging readership.

Changing Conversations in Organizations -

Patricia Shaw 2002

Focusing on the essential uncertainty of participating in evolving events as they happen,

this book considers the creative possibilities of such participation from a complexity perspective.

Social constructionism and theology [electronic resource] - Chris A. M. Hermans 2002

Practical theology starts its theological reflections from practices, aims at analyzing empirically practices, and is directed towards the transformation of these practices. From this practice-orientation there is a strong connection between practical theology and the social sciences. Social constructionism is a growing theory within the social sciences. This volume offers a theological and social scientific reflection on this emerging concept of social constructionism.

Constructive Therapies V2 - Michael F. Hoyt
1998-10-01

Like its predecessor, *Constructive Therapies, Volume 1*, this engaging book presents a range of creative, time-effective approaches for helping clients build on their competencies and

develop their own solutions. In-depth interviews with Michael White, Steve de Shazer, Bill O'Hanlon, Donald Meichenbaum, and Kenneth Gergen are incorporated with other clinically oriented chapters from well-known therapists. Topics covered include different styles of constructive therapy, the externalization and deconstruction of problems, narrative work with ADHD-diagnosed children, a solution-focused approach for dealing with cases of domestic violence, EMDR and the MRI interactional approach, actualizing the empty self in psychotherapy, emotional and spiritual healing, and more. Illustrative case examples are featured throughout.

Handbook of Constructionist Research - James A. Holstein 2008-01-01

Constructionism has become one of the most popular research approaches in the social sciences. But until now, little attention has been given to the conceptual and methodological underpinnings of the constructionist stance, and

the remarkable diversity within the field. This cutting-edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research, how it is put into practice in multiple disciplines, and where it may be headed in the future. The volume critically examines the analytic frameworks, strategies of inquiry, and methodological choices that together form the mosaic of contemporary constructionism, making it an authoritative reference for anyone interested in conducting research in a constructionist vein.

Constructing (in)competence - Dana Kovarsky 2013-06-17

Competence and incompetence are constructs that emerge in the social milieu of everyday life. Individuals are continually making and revising judgments about each other's abilities as they interact. The flexible, situated view of competence conveyed by the research of the authors in this volume is a departure from the

way that competence is usually thought about in the fields of communication disabilities and education. In the social constructivist view, competence is not a fixed mass, residing within an individual, or a fixed judgment, defined externally. Rather, it is variable, sensitive to what is going on in the here and now, and coconstructed by those present. Constructions of competence are tied to evaluations implicit in the communication of the participants as well as to explicit evaluations of how things are going. The authors address the social construction of competence in a variety of situations: engaging in therapy for communication and other disorders, working and living with people with disabilities, speaking a second language, living with deafness, and giving and receiving instruction. Their studies focus on adults and children, including those with disabilities (aphasia, traumatic brain injury, augmentative systems users), as they go about managing their lives and identities. They examine the all-

important context in which participants make competence judgments, assess the impact of implicit judgments and formal diagnoses, and look at the types of evaluations made during interaction. This book makes an argument all helping professionals need to hear: institutional, clinical, and social practices promoting judgments must be changed to practices that are more positive and empowering.

Faith - Gerrit Immink 2005

Addressing faith as it is lived, rather than as a system of doctrine, F. Gerrit Immink emphasizes that having faith means more than assenting to certain opinions about God; it involves a dynamic relationship, or dialogue, with God. As he investigates the practice of faith, Immink holds together the poles of divine activity and human experience, external Word and indwelling Spirit. At its heart, this book is about God. How can faithful people speak about God and understand God's presence? Well versed in both philosophical analysis and the theological

tradition, the author argues for an understanding of God as a speaking, acting person, genuinely experienced in faith. In so doing, he issues a compelling plea to reevaluate the theoretical foundations of practical theology. Applying his work particularly to the theories of preaching and pastoral care, Immink brings to bear insights garnered from years as an academic theologian, as the dean of a theological seminary, and as a minister. Scholars, ministers, and seminary students alike will benefit from his careful reflections on the Christian life of faith.

Social Construction - Kenneth J Gergen
2003-04-03

This reader introduces a number of important

viewpoints central to social constructionism and charts the development of social constructionist thought.

[What Is a Person?](#) - Christian Smith 2011-11-30
The task of understanding human beings, what we ourselves are, our constitution and condition, is a perennial problem in philosophy and related disciplines. Smith argues here that our understanding of human persons is threatened by technological development and capricious academic theories alike, seeking to deny or relativize the personhood of humanity. Smith's book puts a stake in the ground, in defense of a view of the human that is genuinely humanistic in the traditional sense and capable of sustaining with intellectual coherence things like modern human rights and universal benevolence.
