## **Best of Five MCQs for the Endocrinology and Diabetes SCE** - Atul Kalhan 2022-02-28

Best of Five MCQs for the Endocrinology and Diabetes SCE is a dedicated revision guide designed to assist candidates in preparing for the Endocrinology and Diabetes Specialty Certificate Examination (SCE). It contains 350 best of five questions covering the main themes of the specialty curriculum. The questions mirror the format that the candidates can expect to find in the exam and cover all of the key topics, including pituitary gland and hypothalamus, thyroid gland, parathyroid gland and bone disease, adrenal glands, reproductive endocrinology, and diabetes and lipid metabolism. Explanatory answers include references to the most up to date NICE and international guidelines as well as other literature to enable further reading and study. This second edition has been fully updated, with 20 extra questions added to the diabetes chapter to reflect the new exam weightings. Providing a thorough assessment of the reader's endocrinological knowledge, this is the only revision book candidates will need to pass the Endocrinology and Diabetes Speciality Certification Examination first time.

## **The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology** - Lisa L. M. Welling 2019-03-19

The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology offers a comprehensive and compelling review of research in behavioral endocrinology from an evolutionary perspective on human psychology. Chapters, written by renowned experts on human behavior, explore a number of subtopics within one of three themes (1) development and survival, (2) reproductive behavior, and (3) social and affective behavior. Such topics include hormonal influences on life history strategy, mate choice, aggression, human hierarchical structure, and mood disorders. This Handbook is situated at the intersection of evolutionary psychology and behavioral endocrinology. Its interdisciplinary approach makes it an important resource for a broad spectrum of researchers, graduate students, and advanced undergraduates who are interested in studying the motivations and mechanisms that affect behavior.

## **Nuclear Receptors as Drug Targets** - Eckhard Ottow 2008-09-08

Edited by two experts working at the pioneering pharmaceutical company and major global player in hormone-derived drugs, this handbook and reference systematically treats the drug development aspects of all human nuclear receptors, including recently characterized receptors such as PPAR, FXR and LXR. Authors from leading pharmaceutical companies around the world present examples and real-life data from their own work.

## **Index Medicus** - 2004

Vols. for 1963- include as pt. 2 of the Jan. issue: Medical subject headings.

## **The Effects of Steroid Hormones on Urothelial Cell Proliferation** - Jian Teng 2007

## **Wiley Encyclopedia of Molecular Medicine** - 2002

### *Women's Vascular Health* - Iain A Greer 2006-12-29

This book brings together specialist authors from a variety of medical disciplines to give comprehensive coverage of the whole spectrum of women's vascular health. Covering coronary artery disease and its precursors, venous disease, thrombophilic defects, hormonal therapy and haemorrhagic problems, the content is divided into three sections. Section one reviews generic issues including the pathophysiology of arteriosclerosis, metabolic factors in vascular disease, the epidemiology and management of CHD in women. The management of cardiac syndrome X and the problem of diabetes are also discussed here. The second section looks at women's vascular health as it applies to fertility issues and during pregnancy such as polycystic ovarian disease, menstrual dysfunction, the menopause, venous thromboembolism and haemorrhagic problems. In the concluding third section, hormonal therapy in women and in particular the

oral contraceptive pill and hormone replacement therapies are covered. The reader will be given a clear overview of the potential mechanisms whereby such therapy can act as a risk factor for arterial and venous disease, and will receive clear guidance regarding prescribing.

## *Development of Analytical Methodologies Aimed at the Investigation of Isoflavones and Their Biological Effects* - Chang Kyu Byun 2005

## **Practical Clinical Endocrinology** - Peter Igaz 2021-02-24

This practical book aims to cover the whole scope of clinical endocrinology, including both common and selected rare but important diseases, with an emphasis on practical clinical management. A number of different questions and problems in clinical routine are discussed in this book in an unconventional format. Each topic begins with the presentation of a typical clinical case, and then the topic is approached in a question and answer format linked to the clinical case presented, highlighting the most important questions in diagnosis, differential diagnosis and therapy. Numerous figures and tables are included to help understanding. The book is chiefly intended for doctors in training (preparing for boarding exam in endocrinology or internal medicine), but also for established clinicians who want to broaden or refresh their skills. University students of medicine can also find this book interesting.

## *Separations Using Aqueous Phase Systems* - D. Fisher 2012-12-06

The use of aqueous two-phase systems for the partitioning of macromolecules, organelles and cells was originally developed by Per-Ake Albertsson in Sweden in the mid-fifties [1-3]. These systems were initially applied to separations of plant organelles and viruses but their use has now extended into most areas of cell biology and biochemistry [4,5]. Since 1979 biennial International Conferences on Partitioning in Aqueous Two-Phase Systems have been held in Los Angeles (1979), Sheffield (1981), Vancouver (1983) and Lund (1985). The 5th conference was held in Oxford from 23-28 August 1987 and was entitled "Advances in Separations Using Aqueous Phase Systems in Cell Biology and Biotechnology". It is the formal presentations from this meeting which comprise this volume. In contrast to earlier books on phase partitioning [4,5] this volume contains, for the first time, worldwide contributions from over sixty partitioners from a variety of scientific disciplines, thereby providing a detailed overview of the widespread application and potential of bioseparations using phase partitioning. Disciplines include Biophysics, Biochemistry, Cell Biology, Microbiology, Biotechnology and Process Engineering, in both academic and commercial establishments. These biennial conferences allow advances in these diverse partitioning fields to be reviewed and compared; they also provide an opportunity for those considering using phase partitioning to obtain information, advice and contacts. Attendance has grown steadily over the years and 140 scientists came to Oxford. The conference consisted of ten symposia on areas of application of partitioning which have been organised as specific chapters in this volume.

## **Obstetrics: Evidence-Based Algorithms** - Jyotsna Pundir 2016-04-07

Provides evidence-based guidelines in schematic flowcharts, representing a step-by-step method of solving clinical problems in obstetrics.

## MRCOG Part One - Alison Fiander 2016-10-13

A fully updated and illustrated handbook providing comprehensive coverage of all curriculum areas covered by the MRCOG Part 1 examination.

## **Endocrine-Disrupting Chemicals in Food** - I Shaw 2009-03-31

The rise in the incidence of health problems such as reproductive disorders and testicular and breast cancer has been linked by some to endocrine disrupting chemicals in the environment. The role of food in transmitting these chemicals is uncertain and a topic of considerable research. This important book addresses key topics in this area. The first part of the book reviews the impacts of endocrine disrupting

chemicals on health and behaviour, with chapters on the effect of dietary endocrine disruptors in such areas as the developing foetus, cancer and bone health. Parts two and three focus on the origin and analysis of endocrine disruptors in food products and risk assessment. Topics addressed include surveillance, analysis techniques such as biosensors, exposure assessment and the relevance of genetics, epigenetics and genomic technologies to the study of endocrine disrupting chemicals. Concluding chapters discuss examples of selected endocrine disrupting chemicals associated with food, such as dioxins, polychlorinated biphenyls and brominated flame retardants, bisphenol A and phytoestrogens and phytosterols. With its distinguished editor and international team of contributors, *Endocrine-disrupting chemicals in food* is an essential reference for all those concerned with ensuring the safety of food. Reviews the impacts of endocrine disrupting chemicals on health and behaviour including cancer and reproductive disorders. Addresses the origin and analysis of endocrine disruptors with chapters on surveillance and analysis techniques. Examines the relevance of genetics, epigenetics and genomic technologies to endocrine disrupting chemicals.

*Clinical Obesity in Adults and Children* - Peter G. Kopelman 2008-04-15

Highly Commended in the 2006 British Medical Association Book Awards (Endocrinology) This Second Edition brings together more than 20 internationally recognized experts in the field to provide a timely review of current knowledge. The text remains an invaluable resource for all healthcare professionals involved in the care of patients who are obese. New features of this Second Edition include: Addition of two new co-editors - Professor Bill Dietz, USA and Professor Ian Caterson, Australia. Increased number of contributors from around the globe - providing a truly international perspective. Includes new information about the causes of obesity, its complications and new (and novel) methods of prevention and treatment. Reorganized into sections that address obesity and its social and cultural aspects, biology, associated diseases, life stages (pediatric and adult), management, and environmental and policy approaches.

**Veterans and Agent Orange** - Institute of Medicine 2001-12-13

*Veterans and Agent Orange: Update 2000* examines the state of the scientific evidence regarding associations between diseases and exposure to dioxin and other chemical compounds in herbicides used in Vietnam. It is the fourth in a series of comprehensive reviews of epidemiologic and toxicologic studies of the agents used as defoliants during the Vietnam War. Over forty health outcomes in veterans and their children are addressed. Among the report's conclusions is that there is sufficient evidence of a link between exposure and the development of soft-tissue sarcoma, non-Hodgkin's lymphoma, Hodgkin's disease, and chloracne in veterans. Additionally, it found that scientific studies offer "limited or suggestive" evidence of an association with other diseases in veterans - including Type 2 diabetes, respiratory cancers, prostate cancer, multiple myeloma and some forms of transient peripheral neuropathy - as well as the congenital birth defect spina bifida in veterans' children.

**Journal of Endocrinological Investigation** - 2000

**71st AACC Annual Scientific Meeting & Clinical Lab Expo** - American Association for Clinical Chemistry (AACC) 2019-07-11

The poster abstracts accepted for the 71st AACC Annual Scientific Meeting & Clinical Lab Expo. AACC is a global scientific and medical professional organization dedicated to clinical laboratory science and its application to healthcare. Our leadership in education, advocacy and collaboration helps lab professionals adapt to change and do what they do best: provide vital insight and guidance so patients get the care they need.

**Polycystic Ovary Syndrome** - Andrea Dunaif 2008-01-12

This volume includes the latest diagnostic criteria for PCOS and comprises the most up-to-date information about the genetic features and pathogenesis of PCOS. It critically reviews the methodological approaches and the evidence for various PCOS susceptibility genes. The book also discusses additional familial phenotypes of PCOS and their potential genetic basis. All four editors of this title are extremely prominent in the field of PCOS.

*Endocrinology and Diabetes* - Ramzi Ajjan 2015-03-26

This book provides case studies accompanied by questions and commentaries for the specialist registrar in diabetes and endocrinology, to assist with problem-based learning during their training. The case studies range from the everyday to the rare and complicated, presenting a strong foundation for the specialist trainee to prepare them for their qualifying exams and, more importantly, for their future clinical consultations.

**Lignin and Lignans as Renewable Raw Materials** - Francisco G. Calvo-Flores 2015-09-28

As naturally occurring and abundant sources of non-fossil carbon, lignin and lignans offer exciting possibilities as a source of commercially valuable products, moving away from petrochemical-based feedstocks in favour of renewable raw materials. Lignin can be used directly in fields such as agriculture, livestock, soil rehabilitation, bioremediation and the polymer industry, or it can be chemically modified for the fabrication of specialty and high-value chemicals such as resins, adhesives, fuels and greases. *Lignin and Lignans as Renewable Raw Materials* presents a multidisciplinary overview of the state-of-the-art and future prospects of lignin and lignans. The book discusses the origin, structure, function and applications of both types of compounds, describing the main resources and values of these products as carbon raw materials. Topics covered include:

- Structure and physicochemical properties
- Lignin detection methods
- Biosynthesis of lignin
- Isolation methods
- Characterization and modification of lignins
- Applications of modified and unmodified lignins
- Lignans: structure, chemical and biological properties
- Future perspectives

This book is a comprehensive resource for researchers, scientists and engineers in academia and industry working on new possibilities for the application of renewable raw materials. For more information on the Wiley Series in Renewable Resources, visit [www.wiley.com/go/rrs](http://www.wiley.com/go/rrs)
