**Girls' Education in the Twenty-first Century** Mercy Tembon 2008-01-01 Persuasive evidence demonstrates that gender equality in education is central to economic development. Despite more than two decades of accumulated knowledge and evidence of what works in improving gender equality, progress on the ground remains slow and uneven across countries. What is missing? Given that education is a critical path to accelerate progress toward gender equality and the empowerment of women, what is holding us back? These questions were discussed at the global symposium *Education: A Critical Path to Gender Equality and Women's Empowerment*, which was sponsored by the World Bank in October 2007. *Girls' Education in the 21st Century* is based on background papers developed for the symposium. The book's chapters reflect the current state of knowledge on education from a gender perspective and highlight the importance of, and challenges to, female education, as well as the interdependence of education and development objectives. The last chapter presents five strategic directions for advancing gender equality in education and their implications for World Bank operations. *Girls' Education in the 21st Century* will be of particular interest to researchers, educators, school administrators, and policy makers at the global, national, regional, and municipal levels.

*Documentary as Autoethnography* Hande Cayir 2020-03-26 In a system where my identity, that is to say, my surname, was taken from me when I got married, an act supported by both the state and families, I simply became a wife. When I refused both that stereotype and the marital surname, I became curious about other women's decisions. I made a politically-grounded documentary promoting individual power and shared it via old and new media. The seventeen-minute documentary *Yok Anas?n?n Soyad? (Mrs. His Name, 2012)*, a form of self-narrative that places the self within a social context, had an impact on the community and created a collaborative meaning.

My filmmaking experience spread the seeds, gave birth to this book, created a researcher-me, in this case-and as such, 'theory in practice' and 'practice in theory' go hand-in-hand. Women in Turkey are legally required to change their surnames when they marry and divorce. If they want to continue using their ex-husband's surname after the divorce, they must seek permission from both him and the state. Has this unfair policy affected women financially? Has the forced surname change been a barrier for women's careers? What about the protection of equal legal, social and economic rights? Autoethnographic researchers analyse their subjectivity and life experiences, in which they treat the self as 'other'. This examination of social-cultural structures also calls attention to the issues of power. The interdisciplinary nature of this enquiry highlights the crucial human rights debate of the link between surnames and identity, and also focuses on the feminist maxim 'the personal is political'. In short, the private inevitably became public in a process that bridged the autobiographical, personal, cultural, social and political. I believe that eventually-through this process-my story became (y)ours.

**How Tobacco Smoke Causes Disease** 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

**Metroland** Julian Barnes 2016-10-03 A special edition of Julian Barnes's first novel with an introduction from the author and previously unseen archive material. Christopher and Toni found in each other the perfect companion for that universal adolescent pastime: smirking at the world as you find it. In between training as flaneurs and the grind of school, they cast a cynical eye over their various dislikes: parents with their lives of spotless emptiness, Third Division (North) football teams, God, commuters and girls, and the inhabitants of Metroland: the strip of suburban dormitory Christopher calls home. Longing for real life to begin, Christopher makes for Paris in time for the evenements of 1968, only to miss it all in a haze of sex, French theatre and first love. And before long he finds himself drawn inevitably back to Metroland and the very life he was trying to escape... This special edition contains unseen archive material including letters from early fans such as Philip Larkin and Dodie Smith, contemporary reviews, a deleted scene from the original manuscript as well as an introduction from the author. from sex to ageing and death. If life evolved on other planets, would it be the same or completely different? In *The Vital Question*, Nick Lane radically reframes evolutionary history, putting forward a cogent solution to conundrums that have troubled scientists for decades. The answer, he argues, lies in energy: how all life on Earth lives off a voltage with the strength of a bolt of lightning. In unravelling these scientific enigmas, making sense of life's quirks, Lane's explanation provides a solution to life's vital questions: why are we as we are, and why are we here at all? This is ground-breaking science in an accessible form, in the tradition of Charles Darwin's *The Origin of Species*, Richard Dawkins' *The Selfish Gene*, and Jared Diamond's *Guns, Germs and Steel*.

**Making Eye Health a Population Health Imperative** National Academies of Sciences, Engineering, and Medicine 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public

generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

When the unlikely opportunity of a life in the theatre announces itself, Karim starts to win the sort of attention he has been craving - albeit with some rude and raucous results. 'One of the best comic novels of growing up, and one of the sharpest satires on race relations in this country that I've ever read.' Independent on Sunday 'Brilliantly funny. Neurological, Psychiatric, and Developmental Disorders Institute of Medicine 2001-01-01 Brain disorders "neurological, psychiatric, and developmental" now affect at least 250 million people in the developing world, and this number is expected to rise as life expectancy increases. Yet public and private health systems in developing countries have paid relatively little attention to brain disorders. The negative attitudes, prejudice, and stigma that often surround many of these disorders have contributed to this neglect. Lacking proper diagnosis and treatment, millions of individual lives are lost to disability and death. Such conditions exact both personal and economic costs on families, communities, and nations. The report describes the causes and risk factors associated with brain disorders. It focuses on six representative brain disorders that are prevalent in developing countries: developmental disabilities, epilepsy, schizophrenia, bipolar disorder, depression, and stroke. The report makes detailed recommendations of ways to reduce the toll exacted by these six disorders. In broader strokes, the report also proposes six major strategies toward reducing the overall burden of brain disorders in the developing world.

Handbook of International Feminisms Alexandra Rutherford 2011-08-23 The goal of Handbook of International Perspectives on Feminism is to present the histories, status, and contours of feminist research and practice in their respective regional and/or national contexts. The editors have invited researchers who are doing this work to present their perspectives on women, culture, and rights with the objective to illuminate the diverse forms that feminist psychological work takes around the world, and connect these forms with the unique positions and concerns of women in these regions. What does "feminist psychology" look like in Japan? In South Africa? In Sri Lanka? In Canada? In Brazil? How did it come to look this way? How do psychologists in these countries or regions, each with unique political, economic, and cultural histories, engage in feminist work in the societies in which they live? How do they employ the tools of "psychology" - broadly defined - to do this work, and what tensions and challenges have they faced?

*Terra Nostra* Carlos Fuentes 2003 One of the great masterpieces of modern Latin American fiction, Terra Nostra is concerned with nothing less than the history of Spain and of South America, with the Indian Gods and with Christianity, with the birth, the passion, and the death of civilizations. Fuentes skillfully blends a wide range of literary forms, stories within stories, Mexican and Spanish myth, and famous literary characters in this novel that is both a historical epic and an apocalyptic vision of modern times. Terra Nostra is that most ambitious and rare of creations--a total work of art.
