Every day, four thousand American men become first-time dads. There are literally hundreds of pregnancy guidebooks aimed at women, but guys rarely rate more than a footnote. *A Guy's Guide to Pregnancy* is the first book to explain in "guy terms" the changes that happen to a guy's partner and their relationship during pregnancy, using a humorous yet insightful approach. Future fathers will find out what to expect when they enter the "Pregnancy Zone." They'll discover the right and wrong answers to Trick Questions like "Do I look fat?" They'll also learn baby-shower etiquette ("It's sooo cute!"), the truth about sex during pregnancy (yes, you can touch her) and Boys' Night Out (negotiate it), plus delivery room dos (stay upright) and don'ts (complain about missing the big game). *A Guy's Guide to Pregnancy* is designed to be guy-friendly -- approachable in appearance as well as content and length. It is divided into forty brisk chapters, one for each week of the pregnancy. Frank Mungeam is the executive producer of local programs at the ABC-TV affiliate in Portland, Oregon, supervising the Emmy-nominated daily live talk show *AM Northwest* and the series *Parenting in the 90's*. **WHO Recommendations for Augmentation of Labour** - World Health Organization 2014

Optimizing outcomes for women in labor at the global level requires evidence-based guidance of health workers to improve care through appropriate patient selection and use of effective interventions. In this regard, the World Health Organization (WHO) published recommendations for induction of labor in 2011. The goal of the present guideline is to consolidate the guidance for effective interventions that are needed to reduce the global burden of prolonged labor and its consequences. The primary target audience includes health professionals responsible for developing national and local health protocols and policies, as well as obstetricians, midwives, nurses, general medical practitioners, managers of maternal and child health programs, and public health policy-makers in all settings.

**Disease Control Priorities, Third Edition (Volume 2)** - Robert Black 2016-04-11

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

America's favorite doctors Michael Roizen and Mehmet Oz cover pregnancy from conception to birth. Few

life experiences feature emotional swings as extreme as those of pregnancy—it's a monumental mix of both intense excitement and skip-a-beat anxiety. How do you respond to such a situation? If you're like most, you scour websites, read books, browse blogs, and pick the brains of every friend, family member, and store clerk who's ever had a baby. You talk about the ups and downs, the cravings and the nausea, the maternity clothes and the stretch marks. During this 280-day journey, this sometimes scattered mind-set is perfectly natural—and healthy. But often you need help cutting through the clutter. In *YOU: Having a Baby*, Dr. Mehmet Oz and Dr. Michael Roizen, America's Doctors, will help ease your tension by teaching you not only about what you can do but also why you should do it. They'll explore the biology of your body with amazing insights about a cutting-edge new field called epigenetics, which gives you the power to change the genetic destiny of your child. And they'll give you all the ins and outs of nutrition, exercise, hormones, fetal development, and many more pregnancy-related issues. Using their signature wit and wisdom, they'll test your knowledge, bust many myths, and reassure you that your maternal instincts are usually pretty darn good. After all, the doctors want the exact same thing as you do during this journey—a healthy baby (and a healthy mom). Be assured that *YOU: Having a Baby* will be one of your favorite passengers on this wonderful ride.
