

Shame And Pride Affect Sex And The Birth Of The Self

Uncovering Ancient Stones - Henry Neil Richardson 1994

During his long teaching career at Syracuse University and Boston University, H. Neil Richardson touched the lives of many students and colleagues. The nineteen essays included in this volume were written in his memory following his death in 1988.

The Corsini Encyclopedia of Psychology, Volume 4 - Irving B. Weiner 2010-01-19

Psychologists, researchers, teachers, and students need complete and comprehensive information in the fields of psychology and behavioral science. The Corsini Encyclopedia of Psychology, Volume Four has been the reference of choice for almost three decades. This indispensable resource is updated and expanded to include much new material. It uniquely and effectively blends psychology and behavioral science. The Fourth Edition features over 1,200 entries; complete coverage of DSM disorders; and a bibliography of over 10,000 citations. Readers will benefit from up-to-date and authoritative coverage of every major area of psychology.

Ezekiel's Hierarchical World - Stephen L. Cook 2004

From the Seminar on Theological Perspectives on the Book of Ezekiel, which meets at each annual meeting of the Society, 12 essays and two responses representing a range of perspectives and methods explore the ancient and modern meanings and implications of hierarchy in the Old Testament book. Priesthood in exile, creation as property, and Ezekiel i

A.B.C.'s of Behavioral Forensics - Sridhar Ramamoorti 2013-09-23

Get practical insights on the psychology of white-collar criminals—and how to outsmart them Understand how the psychologies of fraudsters and their victims interact as well as what makes auditors/investigators/regulators let down their guard. Learn about the psychology of

fraud victims, including boards of directors and senior management, and what makes them want to believe fraudsters, and therefore making them particularly vulnerable to deception. Just as IT experts gave us computer forensics, we now have a uniquely qualified team immersed in psychology, sociology, psychiatry as well as accounting and auditing, introducing the emerging field of behavioral forensics to address the phenomenon of fraud. Ever wonder what makes a white-collar criminal tick? Why does she or he do what they do? For the first time ever, see the mind of the fraudster laid bare, including their sometimes twisted rationalizations; think like a crook to catch a crook! The A.B.C.'s of Behavioral Forensics takes you there, with expert advice from a diverse but highly specialized authoring team of professionals (three out of the four are Certified Fraud Examiners): a former accounting firm partner who has a PhD in psychology, a former FBI special agent who has been with investigative practices of two of the Big Four firms, an industrial psychiatrist who has worked closely with the C-level suite of large and small companies, and an accounting professor who has interviewed numerous convicted felons. Along with a fascinating exploration of what makes people fall for the common and not-so-common swindles, the book provides a sweeping characterization of the ecology of fraud using The A.B.C.'s of Behavioral Forensics paradigm: the bad Apple (rogue executive), the bad Bushel (groups that collude and behave like gangs), and the bad Crop (representing organization-wide or even societally-sanctioned cultures that are toxic and corrosive). The book will make you take a longer look when hiring new employees and offers a deeper more complex understanding of what happens in organizations and in their people. The A.B.C. model will also help those inside and outside organizations inoculate against fraud and make you reflect on instilling

the core values of your organization among your people and create a culture of excellence and integrity that acts as a prophylactic against fraud. Ultimately, you will discover that, used wisely, behavioral methods trump solely economic incentives. With business fraud on the rise globally, *The A.B.C.'s of Behavioral Forensics* is the must-have book for investigators, auditors, the C-suite and risk management professionals, the boards of directors, regulators, and HR professionals. Examines the psychology of fraud in a practical way, relating it to aspects of fraud prevention, deterrence, detection, and remediation Helps you understand that trust violation—the essence of fraud—is a betrayal of behavioral assumptions about "trusted" people Explains how good people go bad and how otherwise honest people cross the line Underscores the importance of creating a culture of excellence and integrity that inoculates an organization from fraud risk (i.e., honest behavior pays, while dishonesty is frowned upon) Provides key takeaways on what to look for when hiring new employees and in your current employees, as well as creating and maintaining a culture of control consciousness Includes narrative accounts of interviews with convicted white-collar criminals, as well as interpretive insights and analysis of their rationalizations Furnishes ideas about how to enhance professional skepticism, how to resist fraudsters, how to see through their schemes, how to infuse internal controls with the people/behavioral element, and make them more effective in addressing behavioral/integrity risks Provides a solid foundation for training programs across the fraud risk management life cycle all the way from the discovery of fraud to its investigation as well as remediation (so the same fraud doesn't happen again) Enables auditors/investigators to engage in self-reflection and avoid cognitive and emotional biases and traps that lead to professional judgment errors (e.g., overconfidence, confirmation, self-deception, groupthink, halo effect, availability, speed-accuracy trade-off, etc.) Ever since the accounting scandals surrounding Enron and WorldCom surfaced, leading to the passage of the Sarbanes Oxley Act of 2002, as well as the continuing fall out from the Wall Street financial crisis precipitating the

Dodd-Frank Act of 2010, fraud has been a leading concern for executives globally. If you thought you knew everything there was to know about financial fraud, think again. Get the real scoop with *The A.B.C.'s of Behavioral Forensics*.

Eating and its Disorders - John R. E. Fox
2012-08-21

Eating and its Disorders features contributions by international experts in the field of eating disorders which represent an overview of the most current knowledge relating to the assessment, treatment, and future research directions of the study of eating-related disorders. Presents the newest models and theories for use in the treatment of patients with eating disorders Written specifically to fulfill the needs of clinical psychologists and therapists Includes coverage of important service related issues for working with people with eating disorders Features chapters from a global group of authors which highlight differing methods and perspectives that can be incorporated into clinical practice

Masculinities in Joyce - Colleen Lamos 2001

Shame and Guilt - June Price Tangney
2003-11-01

This volume reports on the growing body of knowledge on shame and guilt, integrating findings from the authors' original research program with other data emerging from social, clinical, personality, and developmental psychology. Evidence is presented to demonstrate that these universally experienced affective phenomena have significant implications for many aspects of human functioning, with particular relevance for interpersonal relationships. --From publisher's description.

Masculinities in Joyce - 2021-11-29

Phenomenological Inquiry in Psychology - Ron Valle 2013-11-11

This fine new book, the third in a series, brings psychologists up to date on the advances of phenomenological research methods in illuminating the nature of human awareness and experiences. In the more congenial and welcoming intellectual climate of the 1990s, phenomenological methods have moved to the forefront of discourse on research methods that

support and advocate an expanding view of science. In Valle and King (1978), phenomenological methods were presented as alternatives to behavioral methods. In Valle and Halling (1989), phenomenological methods were advanced to perspectives in psychology. This new volume is even less cautious, indeed bolder, in relation to conventional methods and epistemologies. By now, people knowledgeable about psychology, and most psychologists, have digested the criticisms directed against methods that operationalize, quantify, and often minimize human behavior. In bringing us up to date on the growing power of the phenomenological methods, this volume brings welcome coherence and integrity to an increasingly hurried science attempting to reenchanted itself with meaning and depth, an endeavor artfully exemplified by phenomenological inquiries of the last several decades.

Reading Scripture with Paul Ricoeur - Joseph A. Edelheit 2021-05-04

This unique edited collection illuminates Paul Ricoeur's engagement with Scripture. The contributors include one of the primary translators, several who studied at the University of Chicago, and some of this generation's noted Ricoeur scholars. The essays discuss Hebrew and Christian Scripture, hermeneutics, and biblical scholarship.

Paul And The Religious Experience Of Reconciliation - Gilbert I. Bond 2005

Re-constructing Emotional Spaces - Radek Trnka 2011

The Many Faces of Shame - Donald L. Nathanson 1987-06-01

For almost a century the concept of guilt, as embedded in drive theory, has dominated psychoanalytic thought. Increasingly, however, investigators are focusing on shame as a key aspect of human behavior. This volume captures a range of compelling viewpoints on the role of shame in psychological development, psychopathology, and the therapeutic process. Donald Nathanson has assembled internationally prominent authorities, engaging them in extensive dialogue about their areas of expertise. Concise introductions to each chapter place the authors both historically and theoretically, and outline their emphases and contributions to our understanding of shame. Including many illustrative clinical examples, the book covers such topics as the relationship between shame and narcissism, shame's central place in affect theory, psychosis and shame, and shame in the literature of French psychoanalysis and philosophy.

Shame and Pride: Affect, Sex, and the Birth of the Self - Donald L. Nathanson 1994-03-17

This is a revolutionary book about the nature of emotion, about the way emotions are triggered in our private moments, in our relations with others, and by our biology. Drawing on every theme of the modern life sciences, Donald Nathanson shows how nine basic affects—interest-excitement, enjoyment-joy,

surprise-startle, fear-terror, distress-anguish, anger-rage, dissmell, disgust, and shame-humiliation—not only determine how we feel but shape our very sense of self. For too long those who explain emotional discomfort on the basis of lived experience and those who blame chemistry have been at loggerheads. As Dr. Nathanson shows, chemicals and illnesses can affect our mood just as surely as an uncomfortable memory or a stern rebuke. Linking for the first time the affect theory of the pioneering researcher Silvan S. Thomkins with the entire world of biology, medicine, psychology, psychotherapy, religion, and the social sciences, Dr. Nathanson presents a completely new understanding of all emotion. *Intimate Violence* - Donald Dutton 2013-05-13

Take an updated approach to treating partner violence! *Intimate Violence: Contemporary Treatment Innovations* examines new and innovative approaches to treating domestic violence, de-emphasizing the unilateral, psychoeducational approach in favor of treatment modalities that focus on the offenders' individual characteristics. The book presents up-to-date information on techniques for working with men and women who commit intimate partner violence, moving past a “one size fits all” mentality to develop treatment that affects long-term changes in beliefs, behaviors, and attitudes. It also includes a brief history of perpetrator treatment, feminist perspectives on treatment, and recent research findings that suggest domestic violence offenders need more than education and attitude adjustment. *Intimate Violence* explores key treatment issues not usually found in more traditional approaches, particularly shame and attachment. The book focuses on alternate methods based on assessment and tailored to meet the treatment needs of specific populations, including women, lesbian batterers, men with borderline personality disorder (BPD), and Aboriginal men living in Canada. It also examines the Beit Noam, an Israeli live-in intervention program for abusive men, and addresses the legal and ethical issues surrounding the court-mandated treatment of offenders. An international, interdisciplinary panel of practitioners, researchers, and academics also discuss: Dialectical Behavior Therapy (DBT) Physical Aggression Couples Treatment (PACT)

attachment theory therapeutically based interventions feminist/social learning treatment individual, group, and integrative therapies transpersonal psychology systems thinking field theory and much more! *Intimate Violence: Contemporary Treatment Innovations* is an essential resource for clinicians, researchers, educators, and advocates working in psychology, social work, counseling, law, health care, and related disciplines.

Shame - Gershen Kaufman 1992

[Affect Regulation and the Origin of the Self](#) - Allan N. Schore 2015-11-19

For over three decades, Allan N. Schore has authored numerous volumes, chapters, and articles on regulation theory, a biopsychosocial model of the development, psychopathogenesis, and treatment of the implicit subjective self. The theory is grounded in the integration of psychology, psychiatry, and neuroscience, and it is now being used by both clinicians to update psychotherapeutic models and by researchers to generate research. First published in 1994, this pioneering volume represented the inaugural expression of his interdisciplinary model, and has since been hailed by a number of scientific and clinical disciplines as a groundbreaking and paradigm-shifting work. This volume appeared at a time when the problem of emotion, ignored for most of the last century, was finally beginning to be addressed by science, including the emergent field of affective neuroscience. After a century of the dominance of the verbal left brain, it presented a detailed characterization of the early developing right brain and its unique social, emotional, and survival functions, not only in infancy but across all later stages of the human life span. It also offered a scientifically testable and clinically relevant model of the development of the human unconscious mind. *Affect Regulation and the Origin of the Self* acts as a keystone and foundation for all of Schore's later writings, as every subsequent book, article, and chapter that followed represented expansions of this seminal work.

[Biocultural Approaches to the Emotions](#) - Alexander Laban Hinton 1999-11-28

This edited volume, first published in 1999, attempts to integrate neo-Darwinian and

culturalist perspectives in the study of emotion.
