**Decoding Domesday** David Roffe 2015 The Domesday Book is one of our major sources for a crucial period of English history; yet it remains difficult to interpret. This provocative new book proposes a complete re-assessment, with profound implications for our understanding of the society and economy of medieval England. In particular, it overturns the general assumption that the Domesday inquest was a comprehensive survey of lords and their lands, and so tells us about the economic underpinning of power in the late eleventh century; rather, it suggests that in 1086 matters of taxation and service were at issue and data were collected to illuminate these concerns. What emerges from this is that Domesday Book tells us less about a real economy and those who sustained it than a tributary one, with much of the wealth of England being omitted. The source, then, is not the transparent datum that social and economic historians would like it to be. In return, however, the book offers a richer understanding of late eleventh-century England in its own terms; and elucidates many long-standing conundrums of the Domesday Book itself. DAVID ROFFE is an honorary research fellow at Sheffield University. He has written widely on Domesday Book and edited five volumes of the Alecto County Edition of the text.

**Sussex Cavalcade** Arthur R. Ankers 1997

**Veiled Women** Sarah Foot 2023-01-09 There is no published account of the history of religious women in England before the Norman Conquest. Yet, female saints and abbesses, such as Hild of Whitby or Edith of Wilton, are among the most celebrated women recorded in Anglo-Saxon sources and their stories are of popular interest. This book offers the first general and critical assessment of female religious communities in early medieval England. It transforms our understanding of the different modes of religious vocation and institutional provision and thereby gives early medieval women's history a new foundation.

**Domesday Book and the Law** Robin Fleming 2003-12-18 The Domesday Book contains a great many things, including the most comprehensive, varied, and monumental legal material to survive from England before the rise of the common law. This book argues that it can - and should - be read as a legal text. When the statistical information present in the great survey is stripped away, there is much material still left, almost all of which stems directly from inquest, testimony given by jurors impanelled in 1086, or from the sworn statements of lords and their men. This information, read in context, can provide a picture of what the law looked like, the ways in which it was changing, and the means whereby the inquest was a central event in the formation of English law. The volume provides translations (with Latin legal terminology included parenthetically) for all of Domesday Book's legal references, each numbered and organised by county, fee, and folio.

**The Cambridge World History of Genocide: Volume 1, Genocide in the Ancient, Medieval and Premodern Worlds** Ben Kiernan 2023-01-31 Volume I offers an introductory survey of the phenomenon of genocide. The first five chapters examine its major recurring themes, while the further nineteen are specific case studies. The combination of thematic and empirical approaches illuminates the origins and long history of genocide, its causes, consistent characteristics, and the connections linking various cases from earliest times to the early modern era. The themes examined include the roles of racism, the state, religion, gender prejudice, famine, and climate crises, as well as the role of human decision-making in the causation of genocide. The case studies cover events on four continents, ranging from prehistoric Europe and the Andes to ancient Israel, Mesopotamia, the early Greek world, Rome, Carthage, and the Mediterranean. It continues with the Norman Conquest of England's North, the Crusades, the Mongol Conquests, medieval India and Viet Nam, and a panoramic study of pre-modern China, as well as the Spanish conquests of the Canary Islands, the Caribbean, and Mexico.

**The Wandering Herd** Andrew Margetts 2021-03-23 The British countryside is on the brink of change. With the withdrawal of EU subsidies, threats of US style factory farming and the promotion of 'rewilding' initiatives, never before has so much uncertainty and opportunity surrounded our landscape. How we shape our prospective environment can be informed by bygone practice, as well as through engagement with livestock and landscapes long since vanished. This study will examine aspects of pastoralism that occurred in part of medieval England. It will suggest how we learn from forgotten management regimes to inform, shape and develop our future countryside. The work concerns a region of southern England the pastoral identity of which has long been synonymous with the economy of sheep pasture and the medieval right of swine pannage. These aspects of medieval pastoralism, made famous by iconic images of the South Downs and the evidence presented by Domesday, mask a pastoral heritage in which a significant part was played by cattle. This aspect of medieval pastoralism is traceable in the region's historic landscape, documentary evidence and excavated archaeological remains. Past scholars of the South-East have been so concerned with the importance of medieval sheep, and to a slightly lesser extent pigs, that no systematic examination of the cattle economy has ever been undertaken. This book represents a deep, multidisciplinary study of the cattle economy over the longue durée of the Middle Ages, especially its importance within the evolution of medieval society, settlement and landscape. It explores the nature and presence of vaccaries, a high status form of specialized cattle ranch. They produced beef stock, milk and cheese and the draught oxen necessary for medieval agriculture. While they are most often associated with wild northern uplands they also existed in lowland landscapes and areas of Forest and Chase. Nationally, medieval cattle have been one of the most important and neglected aspects of the agriculture of the medieval period. As part of both a mixed and specialized farming economy they have helped shape the countryside we know today.

**Domesday Names** K. S. B. Keats-Rohan 1997 First-ever full index to people and place-names in Domesday in their original forms. Presented here is the first complete, all Latin index to the Domesday Book, comprising two Indices Personarum and one Index Locorum. The main Index Personarum contains all references to people: named individuals, title-holders, and 'institutions' (collections of persons functioning as individual landholders in the Domesday text); individuals are listed alphabetically under the initial letter of their forename, while 'institutions' are entered under the place where they are located. The second, shorter Index Personarum lists all people alphabetically under their surname. In both indexes the exact Latin forms given in Domesday Book and all variant spellings have been retained. The Index Locorum lists all place-names in Domesday, except where linked to an 'institution': the names of administrative units have been incorporated alphabetically into this index with the appropriate term added after the name. Cross-references to other counties have also been included. Again, the Latin form in the Domesday text is given exactly. References are to the 1783 Farley and more recent Phillimore editions. Dr K.S.B. KEATS-ROHAN is Director of the Linacre Unit for Prosopographical Research; DAVID THORNTON is Assistant Professor in the Department of History, Bilkent University, Ankara.
