The Jib Door Marlen Haushofer 1998 In this novel the protagonist struggles with almost solipsistic isolation, alternating with a delight in solitude and routine. In narrative form punctuated by diary entries, the author describes in plain, almost prosaic detail these struggles and the ultimately futile attempt Annette makes to escape their cycle. To read Haushofer well requires and enables courage, for her realities are banal and cold, her consolations bleak, hardworn -- and paradoxical, but one is left with a vital sense of affirmation.

Forgotten Connections Klaus Mollenhauer 2013-10-30 Klaus Mollenhauer's *Forgotten Connections: On Culture and Upbringing* is internationally regarded as one of the most important German contributions to educational and curriculum theory in the 20th century. Appearing here in English for the first time, the book draws on Mollenhauer's concern for social justice and his profound awareness of the pedagogical tension between the inheritance of the past and the promise of the future. The book focuses on the idea of *Bildung*, in which philosophy and education come together to see upbringing and maturation as being much more about holistic experience than skill development. This translation includes a detailed introduction from Norm Friesen, the book's translator and editor. This introduction contextualizes the original publication and discusses its application to education today. Although Mollenhauer's work focused on content and culture, particularly from a German perspective, this book draws on philosophy and sociology to offer internationally relevant responses to the challenge of communicating cultural values and understandings to new generations. *Forgotten Connections* will be of value to students, researchers

and practitioners working in the fields of education and culture, curriculum studies, and in educational and social foundations.

Body Silent Robert F Murphy 2001-06-05 "The most powerful book of its kind I've ever read... Extraordinary powers of observation, generalization, and depth."—Oliver Sacks, author of *The Man Who Mistook His Wife For a Hat* Winner of the Columbia University Lionel Trilling Award. Robert Murphy was in the prime of his career as an anthropologist when he felt the first symptom of a malady that would ultimately take him on an odyssey stranger than any field trip to the Amazon: a tumor of the spinal cord that progressed slowly and irreversibly into quadriplegia. In this gripping account, Murphy explores society's fears, myths, and misunderstandings about disability, and the damage they inflict. He reports how paralysis—like all disabilities—assaults people's identity, social standing, and ties with others, while at the same time making the love of life burn even more fiercely.

Freud made a huge and lasting contribution to the field of psychology with many of his methods still being used in modern psychoanalysis. He inspired much discussion on the wealth of theories he produced and the reactions to his works began a century of great psychological investigation.

Beyond Consent Jeffrey P. Kahn 2018 "Since the publication of the first edition of *Beyond Consent*, issues of justice remain critical in discussions, debates, and policy making in biomedical research in involving human subjects. The second edition adds new content in two different ways, first by asking authors to examine the issues identified in the first edition by asking what has changed and what new issues arise in the contemporary environment, and second by adding chapters to take on issues that are salient today and looking forward. The result is a new treatment of the issues of justice in research through fresh perspectives and by examining the latest issues. The editors have assembled a group of leading scholars and researchers as contributors, and author the final chapter themselves. This collection is a vital resource for students and scholars of bioethics, medicine, and public health policy; as well as for members of institutional review boards (IRBs), research administrators, and policy makers."--

Nowhere Ending Sky Marlen Haushofer 2013 Meta opens her eyes wide, and the blue seeps into them. She keeps them open until she is fat and swollen with colour and the sky is drained pale. It is a slightly scary game: it could easily be that the sky doesn't like having its colour taken away. So she closes her eyes and sends the blue back to where it came from.

Minima Moralia Theodor Adorno 2018-06-26 Written between 1944 and 1947, Minima Moralia is a collection of rich, lucid aphorisms and essays about life in modern capitalist society. Introduction to Literary Hermeneutics Peter Szondi 1995-02-24 Peter Szondi is widely regarded as being among the most distinguished post-war literary critics. This first English edition of one of his most lucid and interesting series of lectures opens up his work in hermeneutics for English-speaking readers. The question of what is involved in understanding a text occupied Biblical and legal scholars long before it became a concern of literary critics. Peter Szondi here traces the development of hermeneutics through examination of the work of eighteenth-century German scholars. Ordinarily treated only as prefigurations of Schleiermacher, the work of Enlightenment theorists Johann Martin Chladenius, George Friedrich Meier, and Friedrich Ast yields valuable insight into the 'material theory' of interpretation, on which a practical interpretive methodology might be built.

globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

somatic patients, covering issues around depression and trauma, and exploring similarities and differences between somatic and borderline patients. Key treatment issues are also described such as psychosomatic investigation and the issue of transference and countertransference. The result of a working party on psychosomatics of the European Psychoanalytical Federation, this unique book not only asks whether somatic illness arises from an impoverishment of the psyche or is primarily a form of communication through or by the body, but also tries to go beyond this classical opposition. It will appeal to any psychoanalyst or psychotherapist interested in this contentious and fascinating area.

The Boundaries of Humanity James J. Sheehan 2022-05-13 To the age-old debate over what it means to be human, the relatively new fields of sociobiology and artificial intelligence bring new, if not necessarily compatible, insights. What have these two fields in common? Have they affected the way we define humanity? These and other timely questions are addressed with colorful individuality by the authors of *The Boundaries of Humanity*. Leading researchers in both sociobiology and artificial intelligence combine their reflections with those of philosophers, historians, and social scientists, while the editors explore the historical and contemporary contexts of the debate in their introductions. The implications of their individual arguments, and the often heated controversies generated by biological determinism or by mechanical models of mind, go to the heart of contemporary scientific, philosophical, and humanistic studies. Contributors: Arnold I. Davidson, John Dupré, Roger Hahn, Stuart Hampshire, Evelyn Fox Keller, Melvin Konner, Alan Newell, Harriet Ritvo, James J. Sheehan, Morton Sosna, Sherry Turkle, Bernard Williams, Terry Winograd This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact.

The Radio Family Ingeborg Bachmann 2021 Ingeborg Bachmann (1926-1973) is recognized as one of post-war German literature's most important novelists, poets, and playwrights. Influenced by Hans Weigel and the legendary literary circle Gruppe 47, Bachmann gained international renown for her poems, short stories, and novels, and won numerous awards for her work. Sadly, her life ended abruptly in October of 1973 when a lit cigarette burned down her apartment causing Bachmann to suffer severe burns that would eventually prove fatal. The author was only forty-seven, and her tragic death left what could have been a long and lustrous writing career regrettably stunted. Nearly twenty years after her death, during an estate sale in Vienna, fifteen episodes of the popular Viennese radio drama *The Radio Family* were discovered. Remarkably, they happened to be written by Ingeborg Bachmann herself, who had been a writer on the show just after she graduated university. *The Radio Family* was a popular radio soap opera broadcast in the American sector of occupied Vienna in the 1950s. The program focused on a middle-class Viennese family and their everyday life. Topics ranged from birthday parties and holiday plans to profiteering and currency fraud in the commercial sector, and Austrians' involvement in the Nazi past. All fifteen scripts have now been compiled and masterfully translated, revealing an early and significant piece of

After Theory Terry Eagleton 2004-08-26 The golden age of cultural theory (the product of a decade and a half, from 1965 to 1980) is long past. We are living now in its aftermath, in an age which, having grown rich in the insights of thinkers like Althusser, Barthes and Derrida, has also moved beyond them. What kind of new, fresh thinking does this new era demand? Eagleton concludes that cultural theory must start thinking ambitiously again - not so that it can hand the West its legitimation, but so that it can seek to make sense of the grand narratives in which it is now embroiled.

On Narcissism Sigmund Freud 2014-11-11 From the founder of psychoanalysis, Sigmund Freud, comes this fascinating introduction to his theories of narcissism. First published in 1914, *On Narcissism* introduces Sigmund Freud's work surrounding the psychological symptoms and treatment of narcissism. In this work, Freud explores his theories and argues narcissism's relevance to sexual development. What is now known as Narcissistic Personality Disorder (NPD) is a mental condition that often affects one's ability to empathise and maintain healthy, balanced relationships. This compact volume is one of Freud's earliest works and contains a wealth of influential information. Examining Carl Jung's theory of non-sexual 'libido' and Alfred Adler's 'masculine protest' concept, Freud offers narcissism as an alternative explanation. Republished by Read & Co.

The Whitewashing of the Yellow Badge Frank Stern 1992 The central themes of *The Whitewashing of the Yellow Badge* are the attitudes, behavior and actions of gentile towards Jew in postwar Germany. The analysis focuses on antisemitism and developing philosemitism in all aspects of life in the Federal Republic - a focus neglected in earlier works and critically important to the understanding of Germany after 1945. Topics include: occupiers and Germans - the Jews caught in between; American military government and German antisemitism; antisemitic and philosemitic stereotypes among blue-collar and white-collar workers; and, the political role of antisemitism and philosemitism in the formative period of the Federal Republic. This detailed and informative text is essential reading for anyone interested in Jewish and/or German history in the twentieth century.

Most importantly, by involving the parent directly in the child's therapy it benefits the relationship between infant/child and parent. neuropsychodynamic strategy for treating psychiatric disorders. Rather than pursuing an exclusively biological, psychological, or psychodynamic approach, it offers a methodology that links all three aspects in a unifying, integrative model. Central to this approach is the view of the brain as a bio-psychosocial organ in a neuro-ecological model, rather than the purely neuronal model often presupposed in current neuroscience and psychiatry. Moreover, the book views psychopathological symptoms as spatiotemporal disorders of the altered spatiotemporal structure spanning the brain and its surrounding world. The relation between one of the core symptoms and altered neuronal activity calls for the development of integrated, circular neuropsychodynamic models of psychopathological symptoms in severe psychiatric disorders and their treatment.

Screening the Body Lisa Cartwright 1995 Moving images are used as diagnostic tools and locational devices every day in hospitals, clinics and laboratories. But how and when did such issues come to be established and accepted sources of knowledge about the body in medical culture? How are the specialized techniques and codes of these imaging techniques determined, and whose bodies are studied, diagnosed and treated with the help of optical recording devices? "Screening the Body" traces the unusual history of scientific film during the late 19th and early 20th centuries, presenting material that is at once disturbing and engrossing. Lisa Cartwright looks at films like "The Elephant Electrocution". She brings to light eccentric figures in the history of the science film such as William P. Spratling who used Biograph equipment and crews to film epileptic seizures, and Thomas Edison's lab assistants who performed x-ray experiments on their own bodies. Drawing on feminist film theory, cultural studies, the history of film, and the writings of Foucault, Lisa Cartwright illustrates how this scientific cinema was a part of a broader tendency in society toward the technological surveillance, management, and physical transformation of the individual body and the social body.

She frequently points out the similarities of scientific film to works of avant-garde cinema, revealing historical ties among the science film, popular media culture and elite modernist art and film practices. Ultimately, Cartwright unveils an area of film culture that has rarely been discussed, but which will leave readers scouring video libraries in search of the films she describes.

Founding Psychoanalysis Phenomenologically Dieter Lohmar 2011-10-12 The present anthology seeks to give an overview of the different approaches to establish a relation between phenomenology and psychoanalysis, primarily from the viewpoint of current phenomenological research. Already during the lifetimes of the two disciplines' founders, Edmund Husserl (1859 - 1938) and Sigmund Freud (1856 - 1939), phenomenological and phenomenologically inspired authors were advancing psychoanalytic theses. For both traditions, the Second World War presented a painful and devastating disruption of their development and mutual exchange. During the postwar period, phenomenologists, especially in France, revisited psychoanalytic topics. Thus, in the so-called second generation of phenomenology there developed an intensive reception of the psychoanalytic tradition, one that finds its expression even today in current hermeneutic, postmodern and poststructuralist conceptions. But also in more recent phenomenological research we find projects concentrated systematically on psychoanalysis and its theses. In this context, the status of psychoanalysis as a science of human experience is discussed anew, now approached on the 'first person' basis of a phenomenological understanding of subjective experience. In such approaches, phenomena like incorporation, phantasy, emotion and the unconscious are discussed afresh. These topics, important for modern phenomenology as well as for psychoanalysis, are examined in the context of the constitution of the human person as well as of our intersubjective world. The analyses are also interdisciplinary, making use of connections with modern medicine, psychiatry and

psychotherapy. The systematic investigations are enriched by historical analysis and research in the internal development of the disciplines involved. The volume presents recent work of internationally recognized researchers – phenomenologically oriented philosophers, psychoanalysts and psychotherapists – who work in the common field of the two disciplines. The editors hope that this selection will encourage further systematic collaboration between phenomenology and psychoanalysis

Subjective Criticism David Bleich 2019-12-01 Originally published in 1981. The meaning and objectives of literature, argues David Bleich, are created by the reader, who depends on community consensus to validate his or her judgements. Bleich proposes that the study of English be consciously reoriented from a knowledge-finding to a knowledge-making enterprise. This involves a new explanation of language acquisition in childhood, a psychologically disciplined concept of linguistic and literary response, and a recognition of the intellectual authority of pedagogical communities to originate and establish knowledge. Amplifying his theoretical model with subjective responses drawn from his own classroom experience, Bleich suggests ways in which the study of language and literature can become more fully integrated with each person's responsibility for what he or she knows.

Divorce in Europe Dimitri Mortelmans 2020-01-30 This open access book collects the major discussions in divorce research in Europe. It starts with an understanding of divorce trends. Why was divorce increasing so rapidly throughout the US and Europe and do we see signs of a turn? Do cohabitation breakups influence divorce trends or is there a renewed stability on the partner market? In terms of divorce risks, the book contains new insights on Eastern European countries.

These post socialist countries have evolved dramatically since the fall of the Wall and at present they show the highest divorce figures in Europe. Also the influence of gender, and more specifically women's education as a risk in divorce is examined cross nationally. The book also provides explanations for the negative gradient in female education effects on divorce. It devotes three separate parts to new insights in the post-divorce effects of the life course event by among others looking at consequences for adults and children but also taking the larger family network into account. As such the book is of interest to demographers, sociologists, psychologists, family therapists, NGOs, and politicians. "This wide-ranging volume details important trends in divorce in Europe that hold implications for understanding family dissolution causes and consequences throughout the world. Highly recommended for researchers and students everywhere."
